1.—“Respondent” shall, in these Rules, include all co-respondents in so far as the term is applicable to them.

2.—Proceedings shall be commenced by depositing with the Registrar a Petition (Form 1) verified before the Chief Justice in Chambers by affidavit deposing to the truth of the facts of which the Petitioner has personal cognizance, and deposing to belief in the truth of the other facts alleged therein. The Registrar will, on obtaining the Chief Justice's approval, enter the facts alleged in such Petition in the Action book, and issue the necessary citations (Form 2).

3.—A citation, together with a copy, certified by the Registrar of every such Petition, shall be served, at the expense of the Petitioner in such manner as the Chief Justice may, in each case, direct, *i. e.*, either personally, or by Registered Letter, or by Advertisement in a Newspaper, upon the respondent and upon every person whom the Petitioner is required by Law to make a co-respondent. Should the name of any alleged adulterer be unknown to the Petitioner at the time of depositing the Petition, and afterwards become known to him, he must amend the Petition by inserting the name, and a copy of the amended Petition must be served as aforesaid.

4.—A Respondent may appear, by an Advocate, or Attorney, or in person, before the Registrar and enter an answer in the Action book or if not resident in the Falkland Islands may file an affidavit replying to a Petition and a copy of every such answer or affidavit shall be served by such respondent on the Petitioner.

5.—Application for leave to intervene in any cause must be made to the Chief Justice by Petition supported by affidavit.

6.—The Chief Justice shall fix a day for the hearing of any cause on being satisfied that the service has been made as directed and that the respondents have had sufficient time to prepare answers, and the day so fixed shall be notified by the Registrar to each of the Resident parties concerned by personal service and to non-Resident parties in such manner as the Chief Justice may order.

7.—Affidavits, in answer to the facts alleged in any Petition, may, with the consent of the Chief Justice, on his being satisfied that the alleged facts are set forth in such a manner as to assist the Jury in arriving at a just conclusion, be accepted at the trial from witnesses absent from the Colony, but the Chief Justice may direct that any such witness be examined by Commission.

8.—Any application for a new trial of issues of fact tried by a Jury, or for a re-hearing of a cause may be made by Petition within 14 days from the day of hearing if the Petitioner be resident, or 120 days if the Petitioner be non-Resident.

9.—Any person wishing to show cause against making absolute a decree nisi for dissolution of a Marriage shall state to the Registrar the facts upon which he relies, or file an affidavit setting forth such facts, and the Registrar shall enter such facts in the Action book, and the Chief Justice may, if he thinks fit, direct any controverted questions of fact so raised to be tried by a special Jury at the time of hearing the application to make absolute any such decree nisi.

10.—All applications, to make absolute a decree nisi for dissolution of a Marriage, must be made to the Court by motion.

NOTE.—A decree nisi can only be made absolute after six months.

11.—All Rules and Regulations of the Supreme Court, which are in force, shall so far as the same are not repugnant to these Rules be applicable to Matrimonial and Divorce causes; and in any matters not provided for, the procedure of the Probate Divorce and Admiralty division of the High Court of Justice in England shall as far as possible be adopted.

Report of Commodore on Volunteer Force, April, 1900.

H. M. S. "Flora" at sea,
11th April, 1900.

Sir,

In accordance with the instructions contained in Article XIII of my Confidential Standing Orders, I have the honour to inform you that I inspected the Falkland Islands Volunteers on March 30th last, and beg to report as follows:—

2.—The force consists of 4 Officers (including the Chaplain and Surgeon) and 82 Non-Commissioned Officers and men, of which latter some 14 are old soldiers. At my inspection however only 23 men were present, the remainder being variously employed in the town and surrounding sheep farms.

3.—The drills I witnessed were fairly well carried out, but with so small a detachment very little could be done.

4.—I was informed by the Commanding Officer (Lieutenant C. W. Hill) that during last season, viz., 1898—99, 41 men passed in Musketry, and this year 36 men have already completed their course.

5.—I inspected the two 9 pounder M.L. guns belonging to the force, and was informed that they had not been used for practice since April, 1899. Although mounted on horse carriages no harness is supplied, and when in use they have been dragged by the men themselves. They are apparently only taken out of the shed once a year, and no regular crews are told off for them.

6.—I do not consider that at present the Falkland Islands Volunteers can be considered an efficient defensive force. The movement generally does not seem to have met with much encouragement from employers of labour, otherwise the numbers might be largely increased, as I understand that in Stanley alone there are some 200 men fit to join.

7.—In any case its utility would be purely local, and I would therefore recommend that instead of Infantry pure and simple, the Corps should take the form of Mounted Infantry (the men are all good riders) and should be armed with the Lee-Metford instead of the Martini-Henry as at present.

8.—Further it would seem desirable that employers of labour and Managers of Stations in the Camp (that is Country) should be induced to take an interest in the scheme. By this means local detachments officered by persons having direct control over the men could be formed on all the principal Stations, where such drills as were necessary could be performed without interrupting the daily work, and in case of emergency they could be quickly concentrated at any given point.

I have, &c.,

(Signed)

R. GROOME,
Commodore.

The Secretary,

FALKLAND ISLANDS.

Report by Commodore on Volunteer Force, April 1900.

Memorandum by the Colonial Defence Committee.

THE Colonial Office, at the request of the Admiralty, have referred to the Colonial Defence Committee a Report, dated the 11th April, 1900, from the Commodore, South-East Coast of America, on an inspection of the Falkland Islands Volunteers held on the 30th March, 1900.

2. The Report is not satisfactory. The desire to contribute seriously to the defence of the Empire which has been so strongly manifested in the United Kingdom and in nearly all the Colonies during the last six months has apparently not reached the Falkland Islands, where the Volunteer movement appears hitherto to have met with little success and to receive no encouragement from employers of labour. This may possibly be due to a want of realization by the people in the Falkland Islands of the part that can be played by local troops in the Crown Colonies in the general scheme of Imperial Defence. Though the special conditions of these Colonies will not, as a rule, permit of their sending forces away from them to co-operate with Imperial troops in offensive operations in distant parts of the world, they may render very material service to the Empire by strengthening or establishing the local defence of its outlying parts. In some of these Colonies are Imperial fortresses and coaling-stations, on which the efficiency of Her Majesty's Navy in the surrounding seas must depend. At these, Imperial garrisons are maintained; but the many calls on the British Army compel these garrisons to be kept up at a minimum strength, and it is of great importance that they should be supplemented by trained local troops. While the strategic importance of other Colonies does not justify a dispersion of Imperial troops for their defence, it is necessary both to protect themselves and to assist in the maintenance of the Empire's prestige, that they should be in a position to offer resistance to the hostile demands of an enemy's raiding cruiser; the effectiveness of such resistance must depend on the organization and training in peace of a sufficient local force.

3. The Falkland Islands, where there is at present no Imperial garrison, come into the latter category. Though the population is small, it is, being nearly entirely British, sufficient to provide an effective defence for the East Island against the very limited form of attack to which it is liable. A couple of hundred good shots trained as mounted infantry, or partly as mounted infantry and partly as infantry, should have little difficulty in capturing any party that might be landed from a hostile cruiser, and would thus effectively maintain British prestige, and preserve for the use of the British Navy and mercantile marine an important coaling-station.

4. The Committee have departed from their usual practice in this instance by not marking this memorandum "Secret," and they recommend that the Governor be instructed to give to it such publicity as he thinks fit.

(Signed)

M. NATHAN, *Secretary,*
Colonial Defence Committee.

No. 103. **Falkland Islands Volunteers.**

The accompanying letter which has been addressed to Managers of Camp Stations, is printed for general information.

By Command,
W. HART BENNETT,
Colonial Secretary.

STANLEY, 30th November, 1900.

SIR,

We have the honour to transmit for your consideration the enclosed copy of a report of a meeting held in Stanley to consider the recommendations of the Colonial Defence Committee and the report of the Commodore as to the Falkland Islands Volunteers with a view to increasing both the numbers and utility of the force.

As to the importance of maintaining the Force in an efficient condition, it is self-evident and any doubts which may have existed on the subject at one time will have been dispelled by the recent operations in the Transvaal and Orange Free State, where, side by side with the permanent Forces of Her Majesty, have fought Colonial contingents and Volunteers. Loyalty to Queen and country is as strong in these Islands as in any part of Her Majesty's dominions, and that the desire to render efficient assistance in an hour of need is bound up with our loyalty cannot be doubted.

It therefore behoves us to do all in our power to further the Volunteer movement, to demonstrate to the world that we are not behind the other Colonies in our organisation and efficiency, and you will see from the Report of the meeting that the utmost importance is attached to carrying the "Camp" with us in the matter.

The steps proposed to be taken in furtherance of the movement are as follows:—

- To afford more facilities for practice in shooting and cheap ammunition, with a liberal free issue,
- encourage Volunteers in the camp to practice at their Stations,
- hold an Annual Rifle Meeting once a year in Stanley, and offer substantial prizes for which all Camp Volunteers shall be eligible,
- encourage Volunteers in the camp to form small detachments of Mounted Infantry,

Any other suggestions calculated to increase the popularity of the Corps will be welcomed and receive most careful consideration, but in the first instance we shall be glad if you will carefully consider the papers now sent and state to what extent the Station can co-operate, giving information as to

How many men will join the force?

How many men would undertake systematic rifle practice if provided with rifles without necessarily joining the force?

How many men would join a Corps of Mounted Infantry?

So much depends in the matter upon the hearty co-operation of the heads of Stations that we trust you will enter into the spirit of the movement and do all in your power to ensure the co-operation of those under you.

We have the honour to be, &c.,

C. W. APPLEYARD,
G. P. HAYES,
H. H. SEDGWICK.

Minutes of Committee Meeting, OCTOBER 19th, 1900.

THIS meeting, held in the Court House, was attended by a full Committee, elected at a general meeting held on the 8th inst., to discuss the best means to further the Volunteer movement in the Falkland Islands. The following were present:—

HON. C. W. APPLEYARD, HON. VERE PACKE, HON. W. A. HARDING, HON. DR. S. HAMILTON, The Very Rev. DEAN BRANDON, G. P. HAYES, Esq., W. C. GIRLING, Esq., Lieut. F. DUROSE, 2nd-Lieut. M. CRAIGIE-HALKETT, Sergt.-Instr. DAVIES, Messrs. F. W. STREET, E. HOLT, and H. H. SEDGWICK.

On the proposal of Lt. F. Durose, seconded by Mr. F. W. Street, Mr. Hayes was unanimously voted to the Chair, Mr. Sedgwick acting as Secretary. The Chairman in the course of his remarks explained that the object of the meeting was to come to some decision as to the best course to be adopted to improve in numbers and efficiency the Islands' forces for the purposes of defence. At the general meeting the opinion expressed went to prove that the idea of a mounted infantry detachment in Stanley was impractic-

able, but he thought that that opinion did not apply to the different camps where the scheme was both practicable and of utility and he invited the opinions of the members present.

Sergt.-Instr. Davies said that if the formation of the mounted detachments in the camps proved successful they would be of great value, mounted men with a knowledge of the camps being able to concentrate at a given place at short notice.

Lieut. Durose suggested that the first step that should be taken was to collect information as to what inducement would be held out to men joining in the camp and to what extent the Imperial Government would help to further the scheme. He also touched upon the subject of cost of ammunition for rifle practice and suggested that this be ascertained by the Committee.

The Hon. C. W. Appleyard promised to ask His Excellency the Governor about this and thought that if the ammunition was not free it should be at a low cost.

The Hon. W. A. Harding said he thought that the men in the camp should know first what was required of them, and in his opinion that if rifles were distributed the shooting should come first and the drill be a secondary item. He explained that the Falkland Islands Company camps were the largest and most available for help of this sort and promised his hearty support to the movement in the camps under his control.

The Chairman next asked the Sergt.-Instr. for details as to ammunition expended by the Volunteers and for his opinion as to the quantity now granted being sufficient to enable a Volunteer to become a marksman. The Sergeant explained that 60 rounds were furnished each member to enable him to become efficient, but on being further questioned admitted that members of the Stanley Rifle Club generally used 21 rounds for about 26 consecutive Saturdays, which enabled them in most cases to become good shots.

The Hon. C. W. Appleyard said he was certain that His Excellency would do everything in his power to obtain a sufficient supply of ammunition to enable the members to become marksmen. It was generally agreed after some discussion that the present regulation 60 rounds supplemented by 120 rounds for practice would go further toward the object in view, members of the old Stanley Rifle Club using often over some 500 rounds at their own expense to obtain the same ends.

The Chairman proposed that to improve the shooting an Annual Rifle Meeting should be held in May when members residing in the camp could compete as well as Stanley, and that substantial prizes should be given. Seconded by the Hon. C. W. Appleyard; carried unanimously.

The question of the most serviceable rifle was next entered upon and the Hon. Dr. S. Hamilton gave his opinion on the effective stopping power of the Martini-Henry and the Lee-Metford bullet. It was generally agreed that the choice of the rifle could safely be left in the hands of experts at home. On remarks being made as to encouragement given by employers of labour, Messrs. W. A. Harding, Vere Packe, and G. P. Hayes, the Chairman, all promised the fullest support that lay in their power.

The question of uniforms for camp members was also entered upon and some ideas were given as to a uniform corresponding with other of our Colonies as suitable to the climate here. Suggestions were also made as to an improvement in the present Volunteer uniform and to the necessity for overcoats, gloves and leggings.

The Chairman said he thought that some encouragement might be given to the movement by holding Athletic Sports annually and was informed by the Sergt.-Instr. that they had previously been held by the Colonists, but from lack of interest had been allowed to drop out since 1895.

The Hon. W. A. Harding said there was still about £10 in the Savings Bank belonging to a Sports Committee which might come in later on when sports were started again.

Mr. F. W. Street said he thought that Smoking Concerts and entertainments of that sort, on the lines they were carried out at home, would be beneficial in bringing the members together and uniting them and maintaining their interest in the corps.

The question of the Gymnasium for Volunteers and Drill Hall also was entered upon but necessarily from lack of time was but slightly discussed.

Mr. W. C. Girling asked whether steps were not now being taken to increase the numbers of Volunteers in Stanley and the Hon. C. W. Appleyard suggested that more facilities should be given to those desirous of joining and a notice issued stating the hours at which such persons could be sworn in.

It was unanimously agreed that a circular be sent embodying these minutes to the several camp managers asking their assistance to further the movement generally so that the Falkland Islands shall not rank as the only Colony that has not responded to the Imperial scheme of defence.

The Hon. C. W. Appleyard, G. P. Hayes, Esq., and H. H. Sedgwick were elected to forward an appeal to the camps generally to effect this purpose, another meeting being necessary after answers were received from camps.

CONVENTION BETWEEN THE UNITED KINGDOM AND THE UNITED STATES OF AMERICA RELATIVE TO THE DISPOSAL OF REAL AND PERSONAL PROPERTY.

Signed at Washington, March 2nd, 1899.

[Ratifications exchanged at Washington, July 28th, 1900.]

HER Majesty the Queen of the United Kingdom of Great Britain and Ireland, and the United States of America, desiring to improve the condition of the subjects and citizens of each of the respective countries in relation to the tenure and disposition of real and personal property situated, or being within, the territories of the other, as well as to authorise the representation of deceased persons by the Consuls of their respective nations in the settlement of estates, have resolved to conclude a Convention for those purposes, and have named as their Plenipotentiaries:

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, the Right Honourable Sir Julian Pauncefoot, Knight Grand Cross of the Orders of the Bath and of St. Michael and St. George, Ambassador Extraordinary and Plenipotentiary of Great Britain;

And the President of the United States of America, the Honourable John Hay, Secretary of State of the United States of America;

Who, having exchanged their said full powers, found in due and proper form, have agreed to and signed the following Articles:—

ARTICLE I.

Where, on the death of any person holding real property (or property not personal),

within the territories of one of the Contracting Parties, such real property would, by the laws of the land, pass to a subject or citizen of the other, were he not disqualified by the laws of the country where such real property is situated, such subject or citizen shall be allowed a term of three years in which to sell the same, this term to be reasonably prolonged if circumstances render it necessary, and to withdraw the proceeds thereof without restraint or interference, and exempt from any succession, probate, or administrative duties or charges other than those which may be imposed in like cases upon the subject or citizens of the country from which such proceeds may be drawn.

ARTICLE II.

The subjects or citizens of each of the Contracting Parties shall have full power to dispose of their personal property within the territories of the other by testament, donation or otherwise; and their heirs, legatees, and donees, being subjects or citizens of the other Contracting Party, whether resident or non-resident, shall succeed to their said personal property, and may take possession thereof either by themselves, or by others acting for them, and dispose of the same at their pleasure, paying such duties only as the citizens or subjects of the country where the property lies shall be liable to pay in like cases.

ARTICLE III.

In case of the death of any subject of Her Britannic Majesty in the United States, or of any citizen of the United States of America in the United Kingdom of Great Britain and Ireland, without having, in the country of his decease, any known heirs or testamentary executors by him appointed, the competent local authorities shall at once inform the nearest Consular officer of the nation to which the deceased person belonged of the circumstance, in order that the necessary information may be immediately forwarded to persons interested.

The said Consular Officer shall have the right to appear personally or by delegate, in all proceedings on behalf of the absent heirs or creditors until they are otherwise represented.

ARTICLE IV.

The stipulations of the present Convention shall not be applicable to any of the Colonies or foreign possessions of Her Britannic Majesty unless notice to that effect shall have been given, on behalf of any such Colony or foreign possession, by Her Britannic Majesty's Representative at Washington to the United States' Secretary of State within one year from the date of the exchange of the ratifications of the present Convention.

It is understood that, under the provisions of this Article, Her Majesty can in the same manner give notice of adhesion on behalf of any British Protectorate or sphere of influence, or on behalf of the Island of Cyprus, in virtue of the Convention of the 4th June, 1878, between Great Britain and Turkey.

The provisions of this Convention shall extend and apply to any territory or territories pertaining to or occupied and governed by the United States beyond the seas only upon notice to that effect being given by the Representative of the United States at London, by direction of the Treaty-making power of the United States.

ARTICLE V.

In all that concerns the right of disposing of every kind of property, real or personal, subjects or citizens of each of the High Contracting Parties shall, in the dominions of the other, enjoy the rights which are or may be accorded to the subjects or citizens of the most favoured nation.

ARTICLE VI.

The present Convention shall come into effect ten days after the day upon which the ratifications are exchanged, and shall remain in force for ten years after such exchange. In case neither of the High Contracting Parties shall have given notice to the other twelve months before the expiration of the said period of ten years of the intention to terminate the present Convention, it shall remain in force until the expiration of one year from the day on which either of the High Contracting Parties shall have given such notice.

Her Britannic Majesty or the United States shall also have the right separately to terminate the present Convention at any time, on giving twelve months' notice to that effect in regard to any British Colony, foreign possession, or dependency, as specified in Article IV, which may have acceded thereto.

ARTICLE VII.

The present Convention shall be duly ratified by Her Britannic Majesty and by the President of the United States, by and with the approval of the Senate thereof, and the ratifications shall be exchanged in London or in Washington.

In faith whereof we, the respective Plenipotentiaries, have signed this Treaty, and have hereunto affixed our seals.

Royal Humane Society Medal.

His Excellency the Governor directs the publication of the following correspondence with the Right Honourable the Secretary of State for the Colonies.
3rd January, 1901.

From the Governor to the Secretary of State.

Government House, Stanley,
9th July, 1900.

Sir,

I have the honour to transmit a copy of a letter from Dr. Foley, reporting a very courageous act on the part of Mr. Alexander Morrison; and I venture to express a hope that you may deem the circumstances worthy of being brought to the notice of the Royal Humane Society.

2. The very low temperature of the water in this Colony greatly enhances the value of the services rendered by Mr. Morrison.

I have, &c.,

(Signed)

W. GREY-WILSON,

The Right Honourable J. Chamberlain, M.P.

Stanley,
2nd July, 1900.

Sir,

I beg to bring before His Excellency's notice a conspicuous act of courage on the part of Mr. Alexander Morrison which I think Your Excellency will agree with me is deserving of some official recognition.

The circumstances were as follows:—On the evening of March 20th a party of four were riding in from Darwin to Stanley after a very heavy fall of rain which was still continuing, the streams being so full as to be almost impassable. On reaching the Fitzroy river three of the party passed over on horses safely, though with considerable difficulty—the fourth was mounted on a timid horse, and in the current of the stream the horse turned turtle three times with its rider, Mr. Gorton, who then parted company with the horse, and was washed some yards down the stream, eventually being able to clutch at some reeds on the opposite bank in a very exhausted condition. The horse continued to roll over, and reached the bank some yards further down on the same side from which they had essayed to cross.

Although wet through, and much encumbered with heavy riding gear, Mr. Morrison had started into the river to Mr. Gorton's assistance, but seeing that he had reached the opposite side swam his horse back across the river. When he found that Mr. Gorton was safe, he re-crossed to the rest of the party, and they decided that two should ride to the nearest house and procure a lasso. On their return Mr. Morrison again swam the river with the lasso, fastened it to his own horse, on which he mounted Mr. Gorton, and they were successfully pulled across by the others. The lasso was thrown back to Mr. Morrison who then mounted the horse which had failed to cross the stream at first, and he in turn was drawn across, the horse turning over in the middle of the current in exactly the same way as before.

It was entirely out of the question to have left Mr. Gorton on the opposite side of the river, as the nearest house was two hours ride distant, and darkness had set in. Mr. Morrison crossed the river 5 times in all. After the first crossing his clothes were quite wet through, and added considerably to the danger of the service which he performed.

In the course of my duties which have taken me over this country in almost every condition of weather I have not before witnessed a more courageous act.

I am, Sir,

Your Excellency's obedient servant,

C. N. FOLEY,

L.R.C.P., LOND., M.R.C.S., I.S.A.

No. 33. Message from His Majesty the King.

The Governor directs the publication of the following message from His Majesty the King which has been telegraphed to His Excellency by the Right Honourable the Secretary of State for the Colonies.
26th February, 1901.

To my people beyond the Seas.

The countless messages of loyal sympathy which I have received from every part of My Dominions over the Seas testify to the universal grief in which the whole Empire now mourns the loss of My Beloved Mother. In the welfare and prosperity of Her subjects throughout Greater Britain the Queen ever evinced a heartfelt interest. She saw with thankfulness the steady progress which, under a wide extension of self Government, they had made during Her reign. She warmly appreciated their unfailing loyalty to Her throne and Person, and was proud to think of those who had so nobly fought and died for the Empire's cause in South Africa. I have already declared that it will be My constant endeavour to follow the great example which has been bequeathed to Me. In these endeavours I shall have a confident trust in the devotion and sympathy of the people and of their several representative assemblies throughout My vast Colonial Dominions. With such loyal support I will, with God's blessing, solemnly work for the promotion of the common welfare and security of the great Empire over which I have now been called to reign.

**Queen's Commemoration
(Diamond Jubilee) Fund.**

His Excellency the Governor directs it to be notified for the information of

subscribers to the above Fund, that the amount collected—£149 11s. 6d., together with interest, which up to the end of September last, amounted to £13 3s. 4d.—remains deposited in the Government Saving's Bank.

The greater part of this sum was originally contributed for the special purpose of the establishment of a Cottage Hospital; but the Secretary of State not having felt himself able to sanction the the necessary expenditure from Public Funds, it has not been possible to proceed with this scheme.

The Admiralty have it in contemplation to erect a hospital at Navy Point for admission to which civilians will be eligible. It is therefore deemed advisable to await the development of this scheme before determining whether the sum now in the Saving's Bank can be employed in the partial endowment of a bed or must be devoted to any other use. The Government will however be pleased to receive any suggestions that may be offered and Subscribers are invited to notify to the Colonial Secretary any object to which they would wish their contributions to be devoted.

An Ordinance to provide for the acquisition of land required for public purposes.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands with the advice and consent of the Legislative Council thereof as follows:—

1.—This Ordinance may be cited for all purposes as "The Public Lands Ordinance, 1901."

2.—In this Ordinance unless the context otherwise requires:—

(2) The report of any such person together with a plan of such land shall be laid before the Governor and Legislative Council.

4.—Whenever the Governor with the advice and consent of the Legislative Council shall by resolution declare that any land shall be acquired for any public purpose it shall be lawful for the Governor by warrant under his hand and the Public Seal of the Colony to direct that such lands shall be acquired for the service of the Colony.

Every such warrant may be in the form A in the Schedule hereto and shall be published in the Gazette.

5.—Whenever by any such warrant as in the last section mentioned it is directed that any land shall be acquired for the service of the Colony the Colonial Secretary shall cause to be served personally on the person or persons entitled to sell or interested in any lands specified in such warrant or if he or they are absent from the Colony without having appointed a duly authorized attorney to represent them, or cannot be found, shall cause to be left at his or their last usual place or places of abode or business with some inmate thereof to be given to such person or persons and in case no such person can be ascertained or found, shall cause to be left with the occupier of such lands or if there be no such occupier shall cause to be affixed on some conspicuous part of such lands within eight days from the date of such warrant a notice in the form B in the Schedule hereto or as near thereto as possible.

6.—It shall be lawful for all parties being seized or possess of or entitled to any lands that may be required for any public purpose or any estate or interests therein to sell and convey or release the same to the Governor; and particularly it shall be lawful for all or any of the following parties so to sell, convey or release (that is to say) all corporations, tenants in tail or for life, married women seized in their own right or entitled to dower, guardians, committees of lunatics or idiots, trustees or feoffees in trust for charitable or other purposes, executors and administrators and all parties for the time being entitled to the receipt of the rents and profits of any such lands in possession or subject to any estate in dower or to any lease for life or for lives and years and for years or any less interest; and the power so to sell and convey or release as aforesaid may lawfully be exercised by all such parties other than married women entitled to dower or lessees for life or for lives and years or for any less interest not only on behalf of themselves and their respective heirs, executors, administrators, and successors, but also for and on behalf of every person entitled in reversion, remainder or expectancy after them or in defeazance of the estates of such parties; and as to such married women, whether they be of full age or not, as if they were sole and of full age; and as to such guardians on behalf of their wards and as to such committees on behalf of the lunatics and idiots of whom they are committees respectively, and that to the same extent as such wives, wards, lunatics and idiots respectively could have exercised the same power under the authority of this Ordinance if they had

respectively been under no disability; and as to such trustees, executors and administrators, on behalf of their *cestius que trustent*, whether infants, issue unborn, lunatics, femmes covertes or other persons, and that to the same extent as such *cestius que trustent* respectively could have exercised the same power under the authority of this Ordinance if they had respectively been under no disability.

Provided that all moneys paid under this section shall be paid into Court to the credit of whomsoever may be entitled thereto.

7.—After the lapse of twenty-one days from the publication of any such warrant in the *Gazette* it shall be lawful for the Colonial Secretary with all necessary workmen and other servants to enter upon such land and also to set out, appropriate and take so much of such land as is specified in the said warrant.

8.—When the Colonial Secretary shall set out, appropriate, and take the land specified in any such warrant he shall cause such land to be marked out and a notice to be posted in some conspicuous part of such land and such notice shall be in these words, viz: "Taken for the service of the Colony" and shall be signed by the Colonial Secretary. According as such land is acquired for the purposes of the Colony or for the Military and Naval purposes of the Imperial Government, it shall, when so set out, appropriated or taken, in pursuance of an order to be made by the Governor at any time in that behalf and published in the *Gazette*, be conveyed to and be vested in the Colonial Secretary and his successors in office or in the Secretary of State for War or in the Lords Commissioners of the Admiralty respectively as the case may be in trust for His Majesty the King, his heirs and successors for the public service.

9.—Within eight days after any such appropriation the Colonial Secretary shall cause a plan of the land so set out, appropriated and taken as aforesaid together with a certificate under his hand to the effect that the same has been taken and appropriated for the service of the Colony to be registered in the office of the Registrar General.

10.—When any land has been taken and appropriated for the service of the Colony, whether under the provisions of this or any other Ordinance, the registration of a plan of such land together with the certificate in the office of the Registrar General as in the last section mentioned shall be conclusive evidence that such land has been set out, appropriated and taken for the service of the Colony under the provisions of this Ordinance.

11.—If any land be so cut through and divided by the taking and appropriation of part of such land for the service of the Colony as to leave a portion thereof practically useless to the owner for the purpose for which he had been accustomed to use the land it shall be lawful for the owner of such land by notice in writing to be served on the Colonial Secretary at any time before an Agreement is come to for the purchase of the land taken as aforesaid or before the assessment of the price to be paid for such land under the provisions of this Ordinance to require the Governor on behalf of His Majesty the King to purchase not only the land actually taken as aforesaid but also the land rendered useless as aforesaid by reason of the severance aforesaid, and thereupon it shall be lawful for the Governor to purchase the land rendered useless as aforesaid or if he refuse to do so it shall be lawful for the arbitrators or umpires to be appointed as hereinafter mentioned if they shall find as a fact that any portion of the said land has been by the severance rendered useless as aforesaid to adjudge that the Governor shall purchase the same and to determine the price to be paid for the same in the same way as if such land was actually taken for the service of the Colony.

12.—Nothing in this Ordinance shall be deemed to authorise the Governor to take a part only of any house, building or manufactory but where a part of the land on which any house, building or manufactory stands is required for the service of the Colony it shall be lawful for the owner of such house, building or manufactory to require the Governor to take the whole house, building or manufactory.

13.—If in any case in which according to the provisions of this Ordinance the Colonial Secretary is authorised to enter upon and take any land the owner or occupier of any such land or any other person refuses to give up possession thereof or hinders the Colonial Secretary, his workmen, or servants from entering upon or taking possession of the same, it shall be lawful for the Governor to issue his warrant in the Form C in the Schedule hereto or as near thereto as possible directed to the Sheriff ordering him to deliver possession of the same to the Colonial Secretary and upon receipt of such warrant the Sheriff shall deliver possession of any such land

accordingly; and the costs accruing by reason of the execution of such warrant shall be paid by the person refusing to give possession or hindering the Colonial Secretary, his workmen, or servants as aforesaid, and the amount of such costs shall be deducted from the compensation (if any) payable to such person and if no compensation be payable to such person or if the same be less than the amount of such costs, then such costs or the excess thereof beyond such compensation if not paid on demand shall be recovered in the same manner as costs in an action.

COMPENSATION.

14.—The owners and occupiers of and all other persons interested in any land which may be appropriated and taken or entered upon as aforesaid shall be entitled to and shall receive compensation for the value of the land so taken and appropriated and for all damages sustained by such owners, occupiers and other persons by reason of the exercise as regards such land of the powers granted by this Ordinance, the amount of such compensation to be ascertained and determined as hereinafter provided.

15.—It shall be lawful for the Governor for and on behalf of His Majesty to contract and agree with the owner or occupier or any other person interested in any land which may be appropriated and taken for the service of the Colony or be injuriously affected by the exercise of any of the powers as regards such land granted by this Ordinance for the compensation to be allowed either in respect of the actual value of the land or in respect of damages incurred by reason of the exercise of any of the said powers and any sum or sums so agreed on as last aforesaid or which shall be awarded under the provisions of this Ordinance shall be paid by the Colonial Treasurer.

16.—In all cases in which any land has been appropriated, taken or entered upon under the provisions of this Ordinance or has been injuriously affected by the exercise of any of the powers granted by this Ordinance, if within twenty-one days after the publication of the Warrant in the *Gazette* directing that such land shall be acquired for the service of the Colony as hereinbefore provided no claim shall have been lodged with the Colonial Secretary in respect of such lands or if the person who may have lodged any claim and the Governor shall not have agreed as to the amount of compensation to be paid for the interest of any such person or if any such person shall not have given satisfactory evidence of his alleged interest or if separate and conflicting claims are made in respect of the same land the amount of compensation due (if any) and every such disputed or conflicting interest or title shall be settled in accordance with the following provisions:—

17. (i) The owner of any lands so taken and appropriated as aforesaid who shall refuse to accept such sum of money as may be offered for the purchase thereof may claim to have the compensation referred to the decision of two arbitrators, one arbitrator to be appointed by either party, and such compensation shall thereupon be so decided; provided that the arbitrators may, in the event of their not agreeing upon the amount of compensation to be awarded, appoint an umpire at any time within the period during which they have power to make an award.

(ii) In any such proceedings the arbitrators or umpire shall decide upon all separate and conflicting claims that may be made in respect of any such lands so taken and appropriated as aforesaid and upon the amount of compensation to be paid in respect thereof, and in the event of there being any mortgage or other charge affecting such land or any part thereof, shall direct the amount of compensation which ought to be paid to the several persons interested therein, what and in what manner notices shall be given or served to enable all persons interested to protect their rights, and shall further appoint the time and place at which they or he will sit to hear and determine the matter.

18.—The arbitrators shall make their award in writing within three months after entering on the reference, or within such further period to which they may by writing under their hand have enlarged the time for making the award.

19.—The umpire shall make his award within one month after the original or extended time appointed for making the award of the arbitrators has expired, or within such further period to which he may by writing under his hand have enlarged the time for making his award.

20.—The parties to the reference, and all persons claiming through them respectively, shall, subject to any legal objection, pre-

duce before the arbitrators or umpire all books, deeds, papers, accounts, writings and documents within their possession or power respectively which may be required or called for, and do all other things which during the proceedings on the reference the arbitrators or umpire may require.

The witnesses on the reference shall if the arbitrators or umpire think fit be examined on oath or affirmation.

21.—Any person who upon examination on oath or affirmation under the provisions of this Ordinance shall wilfully and corruptly give false evidence shall be liable to the penalties of perjury.

22.—The amount of costs and all questions relating thereto shall be determined by the arbitrators or umpire, as the case may be, but the claimant shall be held entitled to his costs of all proceedings reasonably and properly taken, unless it shall appear that his conduct has been unreasonable and vexatious or his claims grossly excessive, or that he has been party to some deceit or fraud in respect of his claim.

Provided that in case the claimant shall not be awarded as compensation a sum exceeding in amount that offered by the Governor he shall not be entitled to any such costs incurred by him.

23.—In determining claims for compensation for lands acquired under this Ordinance, the arbitrators or umpire may take into consideration:

- (1) The market value of the land at the time of awarding compensation.
- (2) Any damage sustained by the person interested at the time of awarding compensation by reason of severance.
- (3) The damage (if any) sustained by the person interested at the time of awarding compensation, by reason of the acquisition injuriously affecting his other property or his earnings.
- (4) If in consequence of the acquisition he is compelled to change his residence, the reasonable expenses (if any) incidental to such change.

But shall not take into consideration the following:—

- (5) The degree of urgency or necessity which has led to the acquisition.
- (6) Any *pretium dilectionis* or disinclination of the person interested to part with the land acquired.
- (7) Any damage sustained by the person interested, which if caused by a private person, would not render such person liable to an action.
- (8) Any damage not being in the nature of deprivation of or interference with an easement or legal right which after the time of awarding compensation is likely to be caused by or in consequence of the use to which the land acquired will be put.
- (9) Any increase to the value of the land acquired likely to accrue from the use to which the land acquired will be put.
- (10) Any outlay or improvements on such land which shall appear to have been made, commenced, or effected with the intention of enhancing the compensation to be awarded therefor in the event or with the view of such land being required for the public purpose for which the same has been required.

24.—Every award made under this Ordinance shall be in writing, signed by the arbitrators or umpire, shall be published in the Gazette, and shall specify the amount awarded under the several heads of claim, as hereinbefore provided.

25.—Nothing in this Ordinance contained shall be construed or deemed to confer upon any person any right to compensation in respect of any land resumed in the name of His Majesty, his heirs, or successors as required for roads, railways or other public works in pursuance of any condition, reservation, or power of resumption contained in any other Ordinance, or in any grant or lease of Crown or waste lands.

26.—The decision of the arbitrators or umpire respecting compensation or in the case of disputed or conflicting interests or title as aforesaid shall be final and conclusive as respects all persons who have appeared and claimed or on whose behalf any person having authority to that effect has claimed any land or interest therein; but it shall be lawful for persons who have not appeared or claimed, or on whose behalf no claim has been made as aforesaid to do so at any time within one year from the final decision. And in all cases where compensation has been awarded (except where a valid title has been shown to the satisfaction of the arbitrators or umpire) payment thereof shall be postponed until the said period of one year shall have elapsed from the date of the final decision and shall then upon application by petition of any person making claim to the same be paid over to the person or persons who shall then appear by the decision of the arbitrators or umpire to have the best right thereto, and such payment shall as concerns the Colonial Government operate as a complete discharge and acquittance of such compensation and of all claims in respect of such land or any interest therein, but shall not hinder any subsequent proceedings at the instance of any person having or alleging better right thereto as against the person to whom such payment may have been made.

27.—For the protection of persons acting in execution of this Ordinance, all actions and prosecutions to be commenced against the Colonial Secretary or person authorized by him, or his workmen, servants or agents for anything done by him or them in pursuance of this Ordinance shall be commenced within six calendar months after the act committed and not otherwise.

Notice in writing of such action and of the cause or causes thereof shall be given to the defendant one calendar month at least before the commencement of the action.

In any such action the defendant may plead the general issue and give this Ordinance and the special matter in evidence in any trial to be had thereupon.

No plaintiff shall recover in any such action if tender of sufficient amends shall have been made before such action brought, or if a sufficient sum of money shall have been paid into Court by or on behalf of the defendant after such action brought, and notice of such payment has been given to the plaintiff or his solicitor.

If judgment shall pass for the defendant, or the plaintiff shall become nonsuit or discontinue any such action, the defendant shall be entitled to his full costs of suit to be taxed as between solicitor and client and have the like remedy for the same as any defendant hath by law in other cases.

Queen's Commemoration

(Diamond Jubilee) Fund.

His Excellency the Governor directs it to be notified for the information of subscribers to the above Fund, that the amount collected—£149 11s. 6d., together with interest, which up to the end of September last, amounted to £13 3s. 4d.—remains deposited in the Government Saving's Bank.

The greater part of this sum was originally contributed for the special purpose of the establishment of a Cottage Hospital; but the Secretary of State not having felt himself able to sanction the necessary expenditure from Public Funds, it has not been possible to proceed with this scheme.

The Admiralty have it in contemplation to erect a hospital at Navy Point for admission to which civilians will be eligible. It is therefore deemed advisable to await the development of this scheme before determining whether the sum now in the Saving's Bank can be employed in the partial endowment of a bed or must be devoted to any other use. The Government will however be pleased to receive any suggestions that may be offered and Subscribers are invited to notify to the Colonial Secretary any object to which they would wish their contributions to be devoted.

WILLIAM GREY-WILSON, ESQUIRE,

Companion of the Most Distinguished Order of Saint Michael and Saint George,
GOVERNOR AND COMMANDER-IN-CHIEF

(11th December 1901.)

*An Ordinance relating to the granting of
Probate of Wills and Letters of Administration
and to provide for the Administration of Un-
represented Estates.*

BE IT ENACTED by the Governor of the Colony of the Falkland Islands with the advice and consent of the Legislative Council thereof as follows:—

Interpretation.

1.--In this Ordinance:

“Unrepresented Estate” shall mean—

- (1). The Estate of every person who shall die intestate and whose widow, husband or next of kin shall be unknown, or shall have refused to take out Letters of Administration, or shall be absent from the Falkland Islands without having an agent therein.
- (2). The Estate of every person who shall die having made a will, when owing to any cause it shall be necessary to appoint administrators *cum testamento annexo* or *de bonis non* of such Estate, and the person entitled to such Letters of Administration shall be unknown or shall refuse to take out such Letters of Administration or shall be absent from the Falkland Islands without having an agent therein.
- (3). Every Estate whereof the Executors or Administrators shall be absent from the Falkland Islands without having an agent therein.

PART I.

PROBATE AND LETTERS OF ADMINISTRATION.

Form of Will.

2.—A Will partly written and partly printed made out and duly executed in conformity with the directions therein, on a form printed under the authority of the Governor, shall be as valid to all intents and purposes as if the same had been wholly written in words at length.

Duty to be paid and
bond given before
probate.

3.—No Probate of the Will nor Letters of Administration of the estate and effects of any person deceased shall be granted until the applicant has paid to the Colonial Treasurer the estate duty

payable under this Ordinance and has given a bond in such form as the Chief Justice shall approve. Such bond shall be in a penalty of double the amount of the value of the estate as stated in the petition on which the grant is made or in such other amount as the Chief Justice may direct.

Penalty for taking possession of estate without authority.

4.—If any person shall take possession of and in any way administer any part of the estate or effects of any person deceased without obtaining Probate of the Will or Letters of Administration of such estate within six calendar months after the death, every person so offending shall be liable to a penalty not exceeding Twenty Pounds in addition to the estate duty payable under this Ordinance

Petitions.

5.—Applications for Probate or Letters of Administration shall be made by petition to the Chief Justice and the allegations contained in such petition shall be verified on oath, and

By Executor. (1) In the case of a will, the petition must state the death of the testator, that the document produced is believed to be his last will and testament, that the petitioner is the person named as the executor and that the petitioner knows of no other later will made as the last will of the testator.

In Intestacy. (2) In the case of intestacy, the petition must state the death of the intestate and that he died without leaving a will and it must briefly set forth the grounds on which the petitioner has applied for Letters of Administration.

To Administrator. (3) In the case of a petition for Letters of Administration with the will annexed, the petition must set forth the grounds on which the application is based.

Applications to be published.

6.—Notice of application for Letters of Administration must be given in the Gazette for three weeks before such letters shall be granted, except in cases where the Chief Justice shall be satisfied by affidavit or otherwise of the existence of any urgent necessity that such grant should be made before the expiration of such three weeks and shall likewise be satisfied that notice of the application has been given to all persons residing within the Colony whose claim to such grant may be prior or preferable to that of the applicant. In every such case the Chief Justice shall have the power to grant to such applicant Letters of Administration, limited or otherwise, as the circumstances of the case shall seem to require within such time before the expiration of such three weeks as to him may seem necessary: Provided always that in no case shall such administration be granted until notice of application therefor shall have been published once at least in the Gazette.

Value of Estate to be estimated.

7.—Together with every petition for Probate or Letters of Administration there shall be delivered an account signed by the petitioner of the particulars of the estate of the deceased situate in this Colony and of the estimated value thereof in such form as shall be prescribed by any Probate Rules made under the Administration of Justice Ordinance, 1901.

Refund of excess duty.

8.—If any executor or administrator at any time within one year after having paid estate duty shall discover that the estate of the deceased person was estimated at too high a value in the account delivered by him and that the amount of duty paid by him was consequently greater than he was liable to pay and shall make the same appear to be the case to the satisfaction of the Governor in Council, it shall be lawful for the Governor to issue his Warrant on Public Treasury for the return to such executor or administrator of any excess of payment so shown to have been made by him.

9.—If any executor or administrator shall through mistake or otherwise without fraud have omitted from the account delivered by him any part of the estate situate in this Colony he shall immediately after the discovery of such omission notify the Chief Justice of the same and within three calendar months thereafter amend his account and pay the additional duty due on the estate of the deceased without being liable to any penalty or forfeiture under this Ordinance.

Under payment of
duty.

10.—The Court may, on application made on motion or petition in chambers in a summary way and on being satisfied that the condition of any bond given to the Chief Justice has been broken, order the assignment of the same to some person to be named in such order, and such person, his executors, or administrators, shall thereupon be entitled to sue in his or their own name as if the same had been originally given to him instead of to the Chief Justice and shall be entitled to recover thereon as trustee for all persons interested the full amount recoverable in respect of any breach of the condition of the said bond.

Enforcing bond.

11.—Where a caveat shall be entered against the grant of any probate or any application for Letters of Administration before any grant of probate or of administration shall have been made or when in the opinion of the Chief Justice sufficient objection shall appear against the making of any such grant, before such grant shall be made all parties concerned or interested therein or so many of them as the Chief Justice may think necessary shall be cited to show cause before the Chief Justice why probate or administration as the case may be should not be granted to the applicant and the Chief Justice, having heard the case and the parties and having considered the evidence, shall make such order touching the premises as may seem just.

Caveats.

Hearing of

12.—When any of the parties do not appear and answer (due proof of citation on them having been made) the proceedings may be heard and determined *ex parte* or such further time may be given for appearance and on such terms as the Court may direct.

Hearing of ex-parte.

13.—The Court may require the attendance of any person whom it may think fit to examine or cause to be examined in any proceedings in respect of matters testamentary and may examine or cause to be examined upon oath or affirmation as the case may require parties and witnesses by word of mouth and may either before or after or with or without such examination cause them or any of them to be examined on interrogatories or receive their or any of their affidavits or solemn affirmations as the case may be and the Court may by writ require such attendance and order to be produced before itself or otherwise any deed, evidences, or writings being or purporting to be testamentary or otherwise in the same form or as nearly as may be as that in which a writ of "subpœna ad testificandum," or of "subpœna duces tecum," is now issued out of the Supreme Court and every person disobeying any such writ shall be considered as in Contempt of Court and also be liable to forfeit a sum not exceeding Fifty Pounds.

Witnesses
must attend.

14.—Any party interested in a will may by a petition verified by affidavit pray that such will be proved in solemn form and such petition shall be dealt with as other petitions to the Supreme Court.

Proof of Will in
solemn form.
By
person interested.

15.—Any executor or party desiring or having execution of a will may have the same proved in solemn form at any time before the court by filing a petition therefor verified as aforesaid and such petition shall be dealt with as provided in the last preceding section.

By Executor.

16.—The Court upon sufficient cause being shown may set aside any order or decree obtained in a default upon such terms as to the payment of costs or otherwise as to the Court may seem just.

When order may be
varied.

Administrator may
be substituted for
absentee.

17. When an Executor or Administrator to whom probate or administration has been or shall be granted shall be absent from this Colony for the period of one year without having appointed an attorney to act for and represent him the court may, on petition verified by affidavit showing to the satisfaction of the Court that the interests of parties concerned in the estate are or will be prejudiced by the absence of such Executor or Administrator, appoint an Administrator with the will annexed or an Administrator *de bonis non* as the case may be, who shall respectively during the absence of such Executor or Administrator, on giving sufficient security, have, possess, and exercise the same power and authority as the Executor or Administrator so absent as aforesaid would have had if personally present and in case of contested proceedings the practice and procedure shall be similar to that provided by the eleventh section hereof.

Suits in open Court.
Business

18.—In any contested suit for probate or letters of administration the hearing and adjudication thereof shall be in open court and, subject thereto, all other proceedings and business under this Ordinance may unless the Court shall otherwise direct be transacted in chambers.

20.—All grants of administration and all wills of which probate is granted shall be recorded and such grants and wills together with all the papers in any wise relating thereto shall be in all cases made up and filed together in a convenient form and arranged and preserved in alphabetical order.

Real Estate vests in
Administrator.

21.—On the grant by the Supreme Court of the Falkland Islands of Probate of the Will or Letters of Administration of the Estate of a deceased person who dies after this Ordinance has come into operation, the real estate of the deceased person shall vest in the executor or administrator in the same manner as his personal estate and the executor or administrator shall have the same power of dealing with such real estate for the purpose of administration as he has of dealing with such personal estate but nothing herein contained shall affect the beneficial interest in such real estate.

24.—Letters of Administration shall not be granted to any person in the character of a creditor, but in every case where but for this Ordinance Letters of Administration of any Estate would be granted to a creditor thereof, such Estate shall be considered as unrepresented within the meaning of this Ordinance, provided that, under special circumstances where it may appear to the Court to be just or expedient, probate or administration may be granted to some person other than the person ordinarily or by law entitled to such probate or administration.

Creditor may not act.

25.—There shall continue to be an Official Administrator and whenever that office shall be vacant the Governor may appoint an Official Administrator, who, previously to entering upon the duties hereinafter defined, shall enter into recognizance with two sureties in such sum as the Governor shall order and shall take and subscribe the following oath :

Official Administrator.

“ I do swear that I will faithfully, honestly and diligently perform the duties of Official Administrator without fear or favour, partiality or affection.—So HELP ME GOD.

and until such appointment is made and thereafter whenever there shall be no Official Administrator so appointed the Colonial Secretary shall be ex-officio Official Administrator.

26.—The Official Administrator shall not act as the agent of any person, nor as Executor or Administrator of any deceased person unless of any member of his own family not more remote than the fourth degree, and shall be personally responsible for the honesty and fidelity of every clerk and other person whom he may deem it necessary to employ in the execution of the duties of his Office.

Perpetual succession.

28.—The Official Administrator shall, whenever he shall become aware of any Estate which he shall consider unrepresented, present a petition to the Court in the Form in the First Schedule hereto, stating the particulars of such Estate and praying for an order to collect and receive the same, and the Court shall, upon being satisfied that such Estate is unrepresented, grant such order accordingly, and thereupon the Official Administrator shall forthwith cause an inventory to be made of the Estate mentioned in such order and shall file the same in the Court.

To petition Court for order to act.

When he may act
before order.

29.—The Official Administrator shall, if he think fit so to do, immediately on becoming aware of any unrepresented Estate, and before obtaining the order in the preceding section mentioned, enter upon the Estate for the purpose of sealing up or making such other dispositions for the security of such Estate as he may deem necessary.

Order may be
revoked.

30.—If upon the representation of any person claiming to be legally entitled to the Administration or management of any Estate in respect of which any such order shall have been made as aforesaid, the Court shall be satisfied that the applicant is so entitled, the Court may revoke such order and direct the Official Administrator to desist from interfering with such Estate or may make such other order as to the Court shall seem meet. Provided always that all matters and things which shall have been *bona fide* done or performed by the Official Administrator previously to the determination of such order shall be valid and effectual to all intents and purposes whatsoever.

Shall collect Estate.

31.—The Official Administrator shall, as soon as possible after obtaining an order to collect any Estate, get in and collect all debts due to the same and institute such legal process as may be requisite for compelling payment thereof. All such process shall be carried on in the name of the Official Administrator.

Shall claim interest
on money detained
after demand.

to creditors.

33.—The Official Administrator shall, immediately after obtaining an order to collect any Estate, publish in the Falkland Islands Gazette and shall also affix on the Government Notice Board in Stanley, a Notice calling upon the Creditors of the Estate mentioned in such notice to come in and prove their claims on or before a certain day to be therein named, or in default thereof to be excluded from any benefit arising from such Estate, and if so ordered by the Court shall also publish such notice in one or more papers published out of the Colony to be selected by the Court, and shall repeat such notices as often as the Court shall order, and claimants or creditors residing within the Colony shall be bound to file their claims at the Office of the Official Administrator within three months after such notice aforesaid; and claimants or others residing out of the Colony shall be bound to file their claims within six months after the publication of the last notice in such foreign paper as aforesaid, on pain, in default thereof, of being excluded from any benefit arising from such Estate.

If sufficient money shall not remain, after the satisfaction of Subsections (1), (2), and (3), for the payment of all creditors in full, then the amount shall be divided rateably among the creditors.

DOWNING STREET,

13th NOVEMBER, 1901.

Sir,

With reference to my despatch No. 44 of the 27th June, 1900, I have the honour to transmit to you, for your information, copies of remarks by the Colonial Defence Committee on a Report, dated the 27th March, 1901, from the Commodore on the South-East Coast of America Station on the Volunteer Force of the Falkland Islands.

The Secretary of State for War and the Lords Commissioners of the Admiralty have expressed their concurrence in these Remarks and a copy has been communicated to the Commodore on the Station.

I have the honour to be,

Sir,

Your most obedient,

REPORT.

The Colonial Office, at the request of the Admiralty, have referred to the Colonial Defence Committee a Report, dated the 27th March, 1901, from the Commodore on the South-East Coast of America Station on the Volunteer Force of the Falkland Islands.

The Report is printed as an Appendix to these Remarks.

2. Since the last report some increase has taken place in the strength of the Force, which now numbers 105 of all ranks, as compared with 86, 89, and 71 at corresponding dates in the three previous years. The attendance at the inspection, viz., 37, still falls considerably short of what should be expected from a corps which is largely drawn from the immediate neighbourhood of its headquarters. The number of men who have been put through a course of musketry is only 28, and there has been no drill or practice with the field guns since the last inspection.

The Report cannot therefore be considered satisfactory, and the Volunteer Force in its present condition might not improbably be found unequal to the demands that might be made on the Colony in time of war on behalf of its own interests and those of the Empire generally. The moderate character of these demands has been fully explained by the Colonial Defence Committee in their observations on the two preceding Reports. They note with satisfaction that the present Colonial Secretary has joined the corps, and is thus continuing the traditional association between the Volunteer Force and the staff of the Colonial Government, but they do not trace much evidence of the increased encouragement by employers of labour, which it was the object of their Memorandum No. 220 M, dated the 31st day of May 1900, to elicit.

3. Since the date of the present Report the Imperial Government have sanctioned, on the recommendation of the Colonial Defence Committee, the substitution of .303-inch magazine rifles for the Martini-Henry rifles with which the Volunteer Force is armed, and also a loan of two 2.5-inch R.M.L. mountain guns with carriages, stores, and ammunition. This improvement in the armament, which has the incidental advantage of enabling the Volunteers to take part in rifle competitions with the Navy, should go far to increase the popularity of the corps, and this is also being furthered by the provision by the Colonial Government of a smart and workmanlike uniform. The experience of other Colonies tends, however, to show that real efficiency can only be attained when the corps is not in a position to offer interests and advantages to its members, but also the support of an enlightened public

opinion which understands and appreciates its value in protecting the Colony against insult and in maintaining British prestige in war.

Secretary,
Colonial Defence Committee.

APPENDIX.

"Flora," at Montevideo.

March 27th, 1901.

Sir,

In accordance with your instructions contained in Article XIII of my confidential Standing Orders I have the honour to inform you that I inspected the Falkland Islands Volunteers on the 16th instant, and beg to report as follows:—

2. The total strength of the force is now given at 105, including officers, an increase on the numbers last year. At my inspection they mustered 37.

3. What drills I witnessed (the inspection was curtailed on account of the weather) were fairly well carried out.

4. I was informed by the Commanding Officer (Lieutenant F. Durose) that 28 men had been through the rifle course, but that the field guns have not been out since my last inspection.

5. As already reported to their Lordships, I have supplied on loan 14 Lee-Metford rifles and ammunition (the latter on repayment) to the Colonial Government for the use of the Volunteers in anticipation of their being re-armed with this Weapon by the Imperial Authorities.

6. There seems to be a wish generally in the corps to improve, and several new recruits have joined, notably Mr. HART-BENNETT, the recently-arrived Colonial Secretary. New uniforms of a more serviceable pattern have been ordered from England in order to attract recruits. A new Instructor has also arrived, who is more likely to bring the men up to date in the matter of drill.

7. Of the movement as regards "Camp Detachments" I have heard very little, but I do not think the idea will have any widespread effect, owing to the indifference of the men.

I have, &c.

Stock Inspector's Report for 1901.

No. 23

Stanley,
21st February, 1902.

Sir,

I have the honour to submit to His Excellency the Governor my report for 1901.

The number of sheep returned in March, 1901, 762,357 as compared with 778,026 in March, 1900, shows a decrease, which is due to boiling down, with the exception of 300 rams exported to Patagonia.

The lambing in the year has been most satisfactory, the average being about 70 per cent.; an exceptionally good spring accounts for the high per centage.

The wool clip for the present season is still increasing. The farmers have awakened to their own interests, and to the fact that it pays to select and cull, and

import fresh blood into their flocks. The sale of wool in the English market was lower than ever has been experienced since the sheep farming industry was started.

The live stock imported during the year were as follows:—

14 Romney Marsh Rams from England, 22 Horses from Patagonia.

During the year a new Live Stock Ordinance was passed.

The Proclamation prohibiting the importation of cattle, sheep and alfalfa from South America on account of the prevalence of Foot and Mouth Disease and Anthrax still continues in force.

I am pleased to say that no Scab has been seen since the last station was released in May, 1900; there have been a few cases of lice in some of the flocks but these are almost eradicated now.

The grass seed growing experiment is not so successful as it should be; the farmers do not realize its value and the improvement it would cause to their land.

I have, etc.,

Chief Stock Inspector.

- (k) Any person authorized by the Governor shall be entitled to enter upon any land for the purpose of surveying or for inspecting fences or for any other special purpose which the Governor shall specify in writing.

10. The Governor may at any time cause, subject to the provisions of section 15, a lease of any Waste lands of the Crown to be put up to auction upon such terms and subject to such reservations, conditions, and restrictions as may seem expedient to the Governor in Council and as shall be notified in the Gazette, and the Governor, with the approval of the Secretary of State, may, upon the application of the occupant of any land whose lease has expired or will expire within one year, grant to him either a renewal of such lease or a new lease upon such terms and subject to such reservations, conditions, and restrictions as may seem expedient to the Governor in Council, but such renewal shall not, and such new lease shall not, unless otherwise therein expressly provided, have effect until the determination of the then current lease and shall not:

In the case of Country land (not being a Reserve), exceed the term of twenty-one years.

In the case of Suburban land or a Reserve, exceed the term of three years.

In the case of Town lands, exceed the term of 60 years, and whenever the Governor shall decline to renew any lease and whenever the former lessee shall decline to accept a new lease on the terms offered by the Government, there shall be paid by the Government to the outgoing tenant the value of all improvements assessed as hereinafter prescribed, provided that no compensation shall be paid for any improvement in respect of land when the former lessee declines to accept the renewal of his lease or when such improvements are in respect of land held upon a lease which has become null and void.

11. (1) Whenever the holder of any lease which expires or is within one year of expiring after the passing of this Ordinance shall decline to accept a renewal of such lease; or, if the Government has refused to renew such lease, shall decline to accept a new lease of such land upon the terms approved by the Governor in Council with reference to such lease, and—

(2) Whenever any lease shall become null and void, or shall be so declared under section 13.

the Governor shall cause a new lease of the land thus lapsing to the Crown to be put up to public auction unless the Governor in Council shall direct that such land be sold by auction as provided for in section 15 of this Ordinance.

12. The sum to be paid on account of improvements shall be determined by some one or more fit and proper persons appointed by the Governor and the assessors shall certify that every improvement of which they have assessed the value is to the best of their knowledge and belief suitable and appropriate to the station or lot or was authorized by the Governor in Council as witnessed by writing under the hand of the Governor, provided that the assessed value of such improvements shall never exceed the actual cost thereof.

13. Whenever any lessee shall fail to perform or observe any of the conditions of any lease held by him or to pay any rent due to the Government in respect of any lease within three months after it has become due, every lease held by such lessee from the Crown shall be null and void, and whenever a lessee shall decline to accept a renewal of any lease held by him it shall be lawful for the Governor in Council to declare every lease held by such lessee from the Crown null and void.

14. The holder of any country land may, at any time not less than two years before the termination of his lease (or soonest-to-expire lease if he have more than one), purchase the whole of the land rented by him in accordance with the acreage set forth in his leases at the rate of three shillings an acre, and, if no acreage be specified in one or more of such leases, then in respect of the number of acres computed by the Governor as the acreage of any such leases and the purchase money in respect of any land dealt with under this section shall be payable in the same manner as is laid down in section 18 in the case of sales by auction, and no rent shall be payable in respect of such land from the date on which the first instalment of the purchase money shall be paid.

15. The Governor may at any time sell by auction any Waste land not being a Reserve and lease by auction any Waste land in such size or lot as to the Governor in Council may seem expedient and the upset price in the case of a sale shall not be lower than at the rate per acre of one hundred pounds for Town land and two pounds for Suburban land and three shillings for Country land, and in the case of a lease the upset price per acre per annum shall not be lower than at the rate of four pounds for Town land, two pence for Suburban land, and one penny for Country land, save when the Secretary of State shall authorize any specified land to be put up at a lower rate, provided that it shall be lawful for the Governor, if he shall deem it expedient, to dispose by private contract of any frontage or other lot of land in Stanley or any other town to the owner of the adjacent land at a price to be fixed by the Governor in Council, which price shall in no case be lower than at the rate of one hundred pounds per acre.

16. Every auction held under this Ordinance shall have been publicly advertised for not less than three months before the date of such auction and such advertisement shall show as fully as may be:

- (1) The situation, boundaries and acreage of the land and whether the acreage is the assessed number of acres or has been ascertained and determined by survey, and the names of the owners or lessees of the adjoining lands.
- (2) If a Town lot, the length of the boundary line between the lot and every adjoining lot
- (3) The mode in which the purchase money or rent shall be paid and the price at which the land will be upset.
- (4) In the case of sale, the date when possession will be given, which if the land be held on lease shall not be until the termination of the current lease.
- (5) The value of the improvements as assessed and ascertained under section 12.
- (6) When any land has been surveyed, that a copy of the plan is open to inspection at the Government offices.

17. It shall be lawful for the Governor to lease or sell privately at not less than the upset price, any land not let or sold when put up to auction or to renew the lease of the former lessee, subject to the provisions of section 10 of this Ordinance as to the renewal of leases.

18. The following provisions shall have effect with respect to any land put up to sale by auction:

- (1) Every lot of land so put up for sale shall, if surveyed, have a plan shewing the situation and boundaries of the lot, the number of acres which it contains as ascertained by the survey, the names of the owners or lessees of the adjoining lands, and the length of the boundary line between the lot and the land of each adjoining owner

or lessee exhibited at the sale by the Auctioneer and a copy of the plan (if any) shall be given to the purchaser. The matters hereby required to be shewn on the map shall also be stated in printed particulars of Sale.

(2) The purchase money shall be payable by such number (not exceeding 15) of equal yearly instalments as the Governor in Council shall determine and as shall be notified in the Government Gazette before the sale. The first instalment shall be paid at the conclusion of the sale and each subsequent instalment, together with interest at the rate of $2\frac{1}{2}$ per centum per annum on the unpaid balance of the purchase money for the time being from the date of payment of the last previous instalment, shall be paid at the expiration of one year from the day on which the last previous instalment was payable. But the purchaser may at any time pay the whole of the purchase money remaining unpaid with the interest thereon which has accrued since the date of the last previous payment of an instalment.

(3) The highest or only bidder for every lot put up for sale at or above the upset price shall be the purchaser.

Immediately upon the conclusion of the sale the purchaser shall sign an agreement to complete the purchase and to fulfil the conditions of sale. If any purchaser, whether the original purchaser or a purchaser substituted under this sub-section, shall fail to pay the first instalment or to sign the said agreement, the sale to him shall be void and the next highest bidder (if any) at or above the upset price shall be the purchaser.

(4) If any purchaser shall fail to pay the second or any subsequent instalment of purchase money or any interest for the time being payable by him on the day on which such instalment or interest becomes payable or within twenty-one days thereafter, the Governor may, and if such default shall continue for three months from the day on which such instalment or interest becomes payable, the Governor shall cause the land purchased by such purchaser to be again put up for sale by public auction at the same upset price and on the same conditions as at the previous sale.

(5) If any land shall be again put up for sale as aforesaid, the previous sale thereof shall henceforth become void and the purchaser at the previous sale shall give up possession thereof and shall have no further right or interest in or lien upon such land.

(6) If, after payment in full of the purchase money and interest payable by the purchaser at the second sale, the Government shall have received in respect of such purchase money and interest an amount exceeding the purchase money and interest which the Governor would have received from the purchaser at the previous sale if he had complied with the conditions of sale, then out of such excess, after deducting therefrom the expenses of the second sale, the Government shall repay to the purchaser at the previous sale the amount of the instalments of purchase money and interest which he shall have actually paid or so much thereof as such excess shall suffice to repay but in no other event shall a purchaser have any claim for repayment of instalments of purchase money or interest paid by him.

(7) Every purchaser whether at a first or second sale shall be let into possession of the land purchased by him upon the date advertised in the conditions of sale and upon payment of the first instalment of purchase money and upon his signing the above mentioned agreement, but no grant of the land shall be issued to him until he shall have paid the whole of the purchase money and all interest payable under the conditions of sale.

(8) The sum of money (if any) payable by the purchaser of each lot put up for sale as the value of improvements thereon under sections 10 and 12 shall be paid by the purchaser to the Government within thirty days from the date of the sale. If the purchaser at a first sale shall not pay the said sum of money within the said thirty days the lot shall be again put up for sale by auction in the same manner, and with the same consequences as if such purchaser had made default for three months in payment of an instalment of purchase money.

(9) The purchaser of every lot, his heirs or assigns, shall, before the expiration of two years from the date of the sale, erect on such lot a suitable and substantial dwelling house to the satisfaction of the Governor in Council. Default in compliance with this sub-section shall entail the same consequences as default in payment of a second or subsequent instalment of purchase money for three months.

19. The following provisions shall have effect with respect to fences and fencing :

(1) Where there shall be no sufficient natural boundary or no boundary fence to any part of any land or where any boundary fence is not a sufficient fence, any owner may by notice in writing call on the owner of the adjoining land to come to an agreement as to the extent or nature of the fence to be erected or the repairs or work to be done to the existing fence and such owners may agree, in writing, that such boundary fence shall not exactly follow the boundary of the land described in their leases when the physical features of the ground render a deviation necessary, and such owners may without resorting to proceedings arrange with each other for the erection of a dividing fence upon the basis of a claim for the improvements proportionate to the outlay incurred, and the lessee who pays the whole or more than half the cost shall stand in the place of the other as regards compensation on the determination of the lease of the other in proportion to so much of the amount so paid by him in excess of his own share as shall not then have been repaid to him.

(2) If the parties shall fail within fourteen days after the giving of such notice to come to such agreement as aforesaid it shall be lawful for the party who gave the notice to apply to an Inspector to view the boundaries and to report upon the necessity for a fence, the line of such fence or what repairs or additions to the existing fence are necessary to make it sufficient, provided that, where an Inspector is called in, his reasonable expenses shall be borne by the parties.

And where an agreement has been made under the sub-section last preceding and one of the parties fails to complete his part thereof, the other party shall have power to call in an Inspector in the same manner as if the said parties had failed to come to an agreement.

(3) The Inspector shall when so applied to carefully view and inspect the land and report in writing upon the extent of fence that it is necessary to erect or what repairs or improvements are necessary to make the existing fence sufficient, which report shall be delivered as soon as practicable to a Magistrate.

(4) Upon the receipt of the report the Magistrate shall require the attendance of the parties interested and in a summary way hear and determine the question at issue, and if satisfied that an existing fence should be repaired or that a new fence is necessary he shall issue an order to the owners of such land for the repair or erection of such fence within such period as shall be shown to the satisfaction of the Magistrate to be sufficient for the proper completion of the work.

(5) Any owner of land who shall wilfully neglect to complete his share of the work of repairing or erecting a dividing fence within the time named in an order issued under the preceding sub-section shall be liable to a penalty not less than ten pounds, and not more than twenty pounds for every month he shall remain in default.

(6) In the event of its being proved to the satisfaction of the Magistrate before whom an enquiry is held that the owner of land who shall have failed to agree to fence has not the means to immediately pay his proportion of the cost of the work of repairing or erecting a dividing fence, then the Magistrate upon the application of the other owner may grant such other owner leave to erect or repair the whole of such dividing fence and on a certificate of the Inspector that the work has been properly done, the owner who has done the work shall be entitled to recover from the other owner one half of the cost of the work so done.

(7) The Magistrate hearing any action brought under the foregoing sub-section may, upon being satisfied that the defendant is unable from want of capital to immediately pay his proportion

of the cost of the work, issue an order granting the defendant time, upon good and sufficient security being given to the satisfaction of the said Magistrate for the payment of the amount with interest at the rate of Four Pounds per centum per annum at such periods and by such instalments as shall be ordered by the Magistrate; provided however that it shall not be lawful to extend the time for payment in such cases beyond a period of three years from the date on which the work of repairing or erecting the dividing fence shall have been completed.

(8) If a defendant to whom time has been granted under the preceding sub-section shall fail to comply with the terms of the order made by the Magistrate either by the non-payment of an instalment when due or otherwise the plaintiff in the action shall be entitled to at once issue execution under the judgment for the full amount of the principal and interest which may at that time remain unpaid and in the event of the sheriff or other officer appointed to levy making a return after levy upon and sale of the defendant's property that this was not sufficient to satisfy the claim, the plaintiff shall be entitled to at once take proceedings to recover payment of the balance due against any surety or sureties who may have entered into bond before the Magistrate as security for the payment of the judgment debt by the defendant.

(9) The judgment in any action under the preceding sub-sections shall bind and affect all real and personal property of the defendant as to and against all subsequent purchasers, mortgagees, or creditors and when a bond shall have been entered into by sureties as security for the satisfaction of the judgment by the defendant at the period and time allowed by the Magistrate, such bond when recorded shall constitute a preferable lien on all property of such sureties and shall not be in any wise extinguished by any subsequent sale, mortgage or other incumbrance whatsoever of such property.

(10) When any damage shall be done to a dividing fence which is a sufficient fence by any stock which is suffered by the owner of the land to be thereon, such owner shall bear the entire cost of repairing such fence and if he refuses or neglects so to repair the said fence the adjoining owner may at once proceed to repair the same and shall be entitled upon completion of the work immediately to recover the cost thereof from the owner of the land on which the the stock was suffered to remain in an action or suit before a Magistrate.

(11) Any person who shall wilfully break down, injure or leave open any gate on any land or break down or injure any fence erected thereon shall be liable on conviction to imprisonment with or without hard labour for a period not exceeding six months in addition to a fine not exceeding Ten Pounds.

(12) In the case of Crown land occupied by Government or let by Government for any period not exceeding one year the Government Storekeeper shall be deemed to be the owner for the purposes of this section.

20. The owner of any land in any Town shall erect and keep in repair on the boundary line separating any such land from any Crown Waste land or any public road a sufficient fence or such other form of fence as the Governor in Council may approve and as shall be notified under the hand of the Colonial Secretary, and the Government Storekeeper shall for the purposes of this section be deemed to be the owner of such Crown Waste land or public road as the case may be, and the procedure in respect of compelling the owner to erect such fence shall be as nearly as may be that laid down in the preceding section save that the whole cost of the erection of such fence shall be borne by the owner, provided however that should any fence so erected be a sufficient fence and thereafter become the boundary fence between any two private owners, the owner who paid for the erection of the fence shall be entitled to recover from the adjoining new owner one half of the value of such boundary fence, such value to be ascertained at the time the new owner takes possession of his land, and if such owners cannot agree as to the value of such fence the value thereof shall be assessed as in the case of an improvement under this Ordinance.

21. It shall be lawful for the Governor in Executive Council to make rules and regulations with reference (amongst other things) to the forms of leases and Crown grants, the characteristics of a "sufficient fence" and other matters incident to the carrying out of this Ordinance.

22. The Ordinances mentioned in the Schedule to this Ordinance are hereby repealed to the extent specified in the third column of that Schedule.

Proclamation.

By His Excellency W. HART BENNETT,
Administrator of the Colony of the Falkland Islands.

Whereas the "Falkland Islands Currency Note Order in Council, 1899." amongst other things, declares that the fixed proportion of the Guarantee Fund to be kept in coin in the custody of the Currency Commissioners shall be in the first instance two-thirds, but if the Governor satisfies a Secretary of State that, having regard to the amount of notes, which are always outstanding, the fixed proportion may be diminished without danger to the convertibility of the Currency Notes, and obtains the authority of a Secretary of State for the purpose, he—the said Governor—may by Proclamation, fix another proportion so that it be not less in any case than one-half.

And Whereas the authority of the Secretary of State for the Colonies has been obtained to fix the said proportion at one-half.

Now Therefore, I, WILLIAM HART BENNETT, in pursuance of the requirements of the said Order in Council do hereby proclaim that the said proportion of the said Note Guarantee Fund shall in future be one-half instead of two-thirds.

Given under the hand of the Administrator at Government House, Stanley, this 1st day of July, 1902.

Queen's Memorial.

The Administrator directs the publication of the following correspondence with respect to the contribution from the Falkland Islands to the Queen Victoria Memorial Fund.

11th July, 1902.

From Governor to Secretary of State.

21st April, 1902.

Sir,

With reference to your Circular Despatch of the 10th of June last, I have the honour to enclose a cheque for £118 15s. 6d. which my wife has collected for the Memorial of our late Queen.

2. The subscription lists have been signed by members of very nearly every family in the Colony, and bear the signatures of 1443 persons of whom 1353 are Colonists and 90 visitors.

3. Though this contribution may appear small it will be seen how very large it is in reality when I state that the total population of the Colony on the 31st December, 1901 was 2076, and that, to equal it, relatively, more than 28,000,000 persons in the United Kingdom must subscribe and their contributions must exceed two and a quarter millions sterling.

I have, &c.,

(Signed) W. GREY-WILSON.

From Secretary of State to Administrator.

6th June, 1902.

Sir,

I have the honour to acknowledge the receipt of Mr. GREY-WILSON's despatch of the 21st April, 1902, enclosing a cheque for £118 15s. 6d. which has been collected in the Colony as a contribution towards the proposed Imperial Memorial to the memory of the late Queen.

2. I caused the cheque to be forwarded to the Lord Mayor whose receipt is enclosed, and have to express my appreciation of the loyalty and affection for the memory of Queen Victoria, evinced by the large number of contributors in the Falklands; and I will also take an opportunity of conveying to Mrs. GREY-WILSON an expression of my appreciation of her efforts in the matter.

Resolution.

Minutes of Special Meeting of the Legislative Council of the Falkland Islands held at Government House, Stanley, on 26th June, 1902.

Present:

H.E. THE ADMINISTRATOR.
THE HON. THE ACTING COLONIAL SECRETARY.
THE HON. THE COLONIAL SURGEON.
THE HON. J. J. FELTON, J.P.

We, the members of the Legislative Council of the Colony of the Falkland Islands, desire, on behalf of the Community, to express, on this auspicious day, our respectful and heartfelt congratulations on the occasion of the Coronation of their Majesties KING EDWARD VII. and QUEEN ALEXANDRA.

We realize that the great event which is this day taking place in England is one without parallel in the glorious history of the Empire of which this Colony is proud to form a part.

Distant though the Falkland Islands be from the Mother Country, and few and scattered their inhabitants, they yield to none of the British Dominions beyond the Seas in loyalty to the Crown and in loving devotion to their King and Queen.

We feel that we are only echoing the sentiments of every resident of this Colony when we say that the solemn and unique Ceremony which is to-day being performed in Westminster Abbey inspires in all of us the liveliest feelings of patriotic love for our Sovereign Rulers, and we humbly beg that this, our Resolution, may be transmitted to the Right Honourable the Secretary of State for the Colonies, with the request that it may be laid at the foot of the Throne.

SUPPLEMENT TO

THE FALKLAND ISLANDS GAZETTE.

(SEPTEMBER 10TH, 1902).

Message from the King.

The Administrator has received to-day (4th September, 1902) the following telegram from the Secretary of State, dated 7th August, 1902.

“The following is text of letter which His Majesty the King has written to his people on the occasion of Their Majesties' Coronation.”—

On the eve of my Coronation, an event which I look upon as one of the most solemn and important in my life, I am anxious to express to my people at Home and in the Colonies and in India my heartfelt appreciation of the deep sympathy which they have manifested towards me during the time that my life was in such imminent danger. The postponement of the Ceremony owing to my illness caused, I fear, much inconvenience and trouble to those who intended to celebrate it, but their disappointment was borne by them with admirable patience and temper. The Prayers of my people for my recovery were heard and I now offer up my deepest gratitude to Divine Providence for having preserved my life and given me strength to fulfil the important duties which devolve upon me as the Sovereign of this great Empire.

(Signed) **EDWARD R. and I.**

Persons apprehended to be taken to the lock-up.

PROCEDURE BEFORE HEARING.

16.—Whenever an information is laid before a Justice that any person has or is suspected to have committed any act for which he is liable by law to be imprisoned or fined or otherwise punished, and also in cases where a Summary Court has authority by law to make any order for the payment of money or otherwise such Justice may issue a summons or warrant as hereinafter provided, and every such summons or warrant shall be under the hand and seal of the Justice issuing the same.

Summonses and Warrants.

Summons how served.

17.—A summons shall state shortly the matter of the complaint and shall name a day and hour for the defendant to appear at the Court, and such summons shall be served by delivery to the person to whom it is directed or by leaving it at his usual place of abode, or in such other special manner as the Justice may direct, provided that nothing herein shall oblige any Justice to issue any summons in any case where the application for an order is to be made *ex parte*.

Proof of service.

18.—A witness may be summoned by any Justice upon the oath of a credible person that such witness is able to give material evidence and will not come voluntarily. Proof of the service of a summons upon a defendant or witness shall be upon oath.

When warrant of arrest may issue.

19.—It shall be lawful for a Justice to issue a warrant of arrest in any of the following cases; that is to say :—

(1.) Where an information of a felony or of an offence punishable on conviction by imprisonment is supported on oath and it shall appear to him advisable that the person charged with committing the same should be immediately arrested to secure the ends of justice.

(2.) Where any person fails to appear at the time and place mentioned in any summons, and due proof of the service of such summons is given, and that such service has allowed a reasonable time for the defendant to appear, and that the case cannot or should not be heard in the absence of the defendant or his representative; provided that the Court may, instead of issuing a warrant, proceed *ex parte* to hear the complaint and adjudicate thereon as fully and effectually as if such party had personally appeared.

(3.) Where any witness shall neglect or refuse to attend and no just excuse shall be offered for such neglect or refusal, and proof has been given that the witness was summoned and that a reasonable sum was tendered to him for his expense in that behalf, provided that instead of committing such witness to prison the Court may in a summary way impose a fine not exceeding Ten Pounds.

(4.) Where such Justice is satisfied by evidence upon oath that it is probable that a witness will not attend and give evidence if summoned.

A warrant may be executed by any Constable or person to whom it is directed and shall state shortly the matter of the information, and the name or some description of the person against whom it has been issued, and such warrant shall remain in force until it is executed, and any Constable or other person directed to execute such warrant may apprehend the said defendant. When executing such warrant the constable or other person shall have the said warrant with him, except in cases of felony.

Aiders and Abettors.

20.—Any person who shall aid, abet, counsel, or procure, or attempt to commit or procure the commission of any offence punishable on summary conviction shall be liable to be proceeded against and convicted for the same, either together with the principal offender, or before or after his conviction, and shall be liable on conviction to the same penalty to which such principal offender shall be by law liable.

Search warrant.

21.—If any information shall be given upon oath to any Justice that there is reasonable cause to suspect that anything stolen or unlawfully obtained is concealed or lodged in any dwelling-house, ship, or other place, it shall be lawful for such Justice by warrant under his hand directed to any Constable to cause any such dwelling-house, ship, or other place to be entered and searched at any time of the day or by night (if power for that purpose be given

by such warrant), and the said Justice, if it shall appear to him necessary, may empower such Constable, with such assistance as may be found necessary (such Constable having previously made known such his authority), to use force for the effecting of such entry, whether by breaking open doors or otherwise, and if upon search thereupon made any such thing shall be found, then to convey the same before a Justice, or otherwise dispose thereof in some place of safety, and to take into custody and carry before a Justice any person found in such house, ship, or place, who shall appear to have been privy to the deposit of any such thing knowing or having reasonable cause to suspect the same to be stolen or otherwise unlawfully obtained.

PROCEEDINGS ON HEARING.

22.—Every complaint cognizable on summary judication shall be heard and determined (either on the oath of one or more credible witnesses or on the confession of the person charged) in an open Court to which the public shall have access so far as the same will conveniently contain them, and the Court shall, in every case, take notes in writing of the evidence, or of so much thereof as is material, in a book to be kept for that purpose.

Complaints to be heard in open Court.

23.—On the hearing of any complaint cognizable on summary judication the Court shall state to the defendant the substance of the complaint and shall ask him what answer, if any, he desires to make thereto.

Procedure on hearing.

(1.) If the defendant thereupon admit the truth of the complaint and show no sufficient cause why an order should not be made against him the Court shall make such order against him as the justice of the case requires.

(2.) If the defendant does not admit the truth of the complaint the witnesses on both sides shall, unless the Court in any case makes order to the contrary, be placed out of Court.

(3.) The Court shall then proceed to hear the complainant and such witnesses as he may examine and then the defendant and such witnesses as he may examine and then such witnesses as the complainant may examine in reply if the defendant has examined any witness or given any evidence other than as to his the defendant's general character, but the complainant shall not be entitled to make any observations in reply upon the evidence given by the defendant nor shall the defendant be entitled to make any observations in reply upon the evidence given by the complainant in reply as aforesaid.

24.—It shall be lawful for the Court to order that no person shall be present without the permission of the Court at the holding of a preliminary investigation when the offence charged is only triable before the Supreme Court and the Court is of opinion that the ends of justice will be best answered by making such order.

Power of Court to sit with closed doors.

25.—All evidence given at a preliminary investigation shall be taken down in writing and such depositions shall be read over to and signed respectively by the witnesses who shall have been examined, and shall also be signed by the Court.

Depositions.

26.—After the examination of all the witnesses on the part of the prosecution the Court shall read to the accused the whole of the depositions taken against him and shall say to him these words or words to the like effect:—“*Having heard the evidence do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so, but whatever you say will be taken down in writing and may be given in evidence against you on your trial.*”

Charge.

Adjournment.

27.—The Court may at any stage in the hearing of any case adjourn the hearing of the same to a certain place and time to be then appointed and in the meantime the Court may,

- (1.) Suffer the defendant to go at large, or
- (2.) Commit him to prison or a place of security, or
- (3.) Discharge him on his entering into a recognizance with or without sureties conditioned for his appearance at the time and place to which such hearing shall be so adjourned.

Judgment.

2. The Registrar General may appoint in writing under his hand such Registrars as he may deem necessary for the purposes of this Ordinance, and all appointments so made by the Registrar General shall be subject to the approval of the Governor and shall be during pleasure only.

Registrars how appointed.

3. Every marriage which by the law of England would be valid, and every marriage celebrated in this Colony prior to the passing of this Ordinance by any Minister of Religion or by a Registrar shall be deemed a perfectly legal and valid marriage to all intents and purposes, provided that nothing herein contained shall legalize any marriage.

Valid marriages.

(a) declared or made invalid by any law of the Colony at the time of its celebration.

(b) declared or made (or which shall hereafter be declared or made) invalid by any competent Court.

4. Every marriage hereafter celebrated by a Minister or by a Registrar in conformity with the provisions of this Ordinance shall be a legal and valid marriage to all intents and purposes, and no other marriages except as hereinafter provided, celebrated in this Colony, shall be valid for any purpose, provided that no marriage in fact shall be avoided by reason only of the same having been celebrated by a person not being empowered under this Ordinance to celebrate marriages if either of the parties to the marriage shall at the time *bona fide* have believed that such person officiating was so empowered ; provided also that nothing herein shall legalize any marriage which, by reason of relationship or of fraud or of incapacity to contract marriage or by the law of England for the time being, would be void.

Valid marriages.

Wrongful
celebration.

5. Any person who shall wilfully and knowingly celebrate any marriage contrary to the provisions of this Ordinance or where the provisions of this Ordinance have not been complied with shall be guilty of a misdemeanour and be liable to a fine not exceeding five hundred pounds either alone or with imprisonment with hard labour not exceeding two years, but such marriage shall not necessarily be invalid or illegal.

6. Every Minister of Religion ordinarily officiating as such in this Colony at the time of the passing of this Ordinance shall be deemed to be a Minister registered for celebrating marriages and any Minister of Religion or the head of any religious denomination may apply hereafter to the Colonial Secretary to be registered as a Minister for celebrating marriages and the Governor may grant a Certificate of Registration under the Seal of the Colony to any person so applying, provided that it shall be lawful for the Governor to refuse any application for registration and also to remove from the Register the name of any person, and the Governor shall forthwith report any such refusal or removal to the Secretary of State; and there shall annually be published in the Gazette a list of all persons then entitled to celebrate marriages.

Consent of parents, &c. in case of minors

16. Any person may enter a caveat against the issue of a marriage licence by writing upon the notice of marriage the word "forbidden" and signing his name, provided that at the same time he serves upon the Registrar General a notice in writing stating the grounds of objection to the intended marriage which notice shall be signed by himself or by the person on whose behalf he presents the same; and no marriage licence shall in any such case be issued without the consent in writing of the Chief Justice.

Forbidding marriages.

Caveat and enquiry.

18. Any person who shall enter a caveat against the issue of a licence on grounds which the Chief Justice shall declare to be frivolous shall be liable for the cost of the proceedings and for damages to be recovered in a special action on the case by either of the persons against whose marriage such caveat shall have been entered.

21. The Registrar General shall forthwith cause every certificate of marriage to be entered into the marriage register book and certify the accuracy of the entry and file and index the certificate of marriage.

Defects.

22. No marriage shall be deemed to have been unduly celebrated by reason only of any mere defect or error in the declaration made respecting the same where the identity of the parties to the marriage shall not be in question. Nor shall it be necessary, in support of any marriage, to give proof of the consent of any person whose consent thereto is required by law, nor shall any evidence be given to prove the contrary in any suit touching the validity of such marriage.

Proof of marriage.

23. A copy of the certificate of any marriage registered by a Minister or a Registrar under his hand shall be deemed *prima facie* evidence in all proceedings of the fact of such marriage having been duly celebrated, until the contrary is shown.

Perjury.

24. Any person who shall knowingly and wilfully make any false declaration, or sign any false notice or certificate required by this Ordinance, for the purpose of procuring any marriage, and any person who shall forbid the issue of any certificate by representing himself to be a person whose consent to such marriage is required by law, knowing such representation to be false, shall be guilty of a misdemeanour; and the forfeiture of all estate or interest in any property accruing to any person procuring a marriage by means of any such false declaration, notice or certificate may be sued for by any person duly appointed for that purpose by the Governor, and the proceedings thereon and consequences thereof shall be the same as are provided in the like case by the law of England.

24.—It shall be lawful for the Court to order that no person shall be present without the permission of the Court at the holding of a preliminary investigation when the offence charged is only triable before the Supreme Court and the Court is of opinion that the ends of justice will be best answered by making such order.

Volunteer Force.

Remarks by the Colonial Defence Committee
On Report by Commodore, April, 1902.

The Colonial Office, at the suggestion of the Admiralty, have referred to the Colonial Defence Committee a Report, dated the 26th April, 1902, from the Commodore Commanding on the South-East Coast of America Station on the Volunteer Force of the Falkland Islands.

The Report is printed as an Appendix to these Remarks.

2. At the date of the Report the strength of the force was 106 of all ranks, as compared with 105, 86, and 89 at corresponding dates in the three previous

years. The attendance at the inspection was 56, as against 37, 23, and 26 in preceding years. Although no detailed statistics as to efficiency or musketry are given it is stated that many efficient have been got rid of, and that there is some improvement in musketry. It is satisfactory to find that for the first time since 1899 practice has taken place with the artillery armament, which now consists of the two 2.5-in. R.M.L. guns lent by the Imperial Government.

3. The general improvement reported in the condition of the corps appears to be due more to the energy of the officers and to the assistance given by the Imperial and Colonial Governments in the form of grants of new armament and uniforms than to any increased encouragement of the Force on the part of employers of labour.

With a view to arousing public interest in the proceedings of the Force and increasing the attendance at the annual inspection, the Colonial Defence Committee suggest that the parade for the Inspecting Officer should take the form of a field-day in conjunction with a force of bluejackets. If this field-day were arranged so as to illustrate the advantages of the defensive in the case of an opposed landing, and if the men employed on the sheep-farms near Stanley (whose attendance at inspection usually compares very unfavourably with that of those living in the town) took part in the field-day mounted, after undergoing the necessary preliminary training, a valuable object-lesson would be given to employers of labour, and this might possibly lead to the raising of a company of mounted infantry drawn from the country districts, a measure which has been advocated for many years past by successive Commodores and by the Colonial Defence Committee.

4. The Colonial Defence Committee also recommend that the Report of the Inspecting Officer should in future be accompanied, as in the case of other Colonies, by

an Annual Report drawn up by the Officer Commanding the Volunteer Force, describing the progress of the Force during the year, and, in particular, giving detailed statistics of the number of the efficient and the results of the annual course of musketry. The first report should contain particulars of the conditions of efficiency, and should give a description of the musketry training and of the course fired, in order that the expert advice of the Commandant of the School of Musketry may be obtained on these matters.

Colonial Defence Committee.

APPENDIX.

"Cambrian" at Monte Video,
April, 26th, 1902.

Sir,

In accordance with instructions contained in Article XIII of my Standing Orders, I have the honour to inform you that I inspected the Falkland Islands Volunteers on 19th instant, and beg to report as follows:—

2. Although the total strength of the force, viz., 106 only shows an increase of one on last year's numbers, I am informed that many "inefficients" have been got rid of and good recruits obtained in their place.

3. The company on parade numbered 56 officers and men, as against 37 and 23 respectively last year and the year before.

4. The drills were fairly carried out, but the men require to become better acquainted with the magazine of the Lee-Metford rifle, with which they have recently been armed.

5. The corps has recently been supplied with 2·5-in. R.M.L. guns, with which they have already carried out firing practice on two occasions.

6. The musketry returns since my last inspection show some improvement, but practice has been retarded for the want of Lee-Metford ammunition.

7. The new uniforms have now arrived, and the men presented a far smarter appearance than on the two previous occasions.

8. In remarking on the improved state of the corps, I told the members that, in my opinion, they would be of far greater use to the Colony as a body of mounted infantry, in which capacity fifty men could oppose with advantage the landing of 500.

9. The men can all ride well and the majority of them keep horses; and, taking into consideration the condition of the islands generally, I would again advocate the formation (in addition to the central body at Stanley) of small "commandos" at the various stations; but, as previously pointed out, any movement in this direction can only meet with success provided the owners and managers of the various camps give the necessary lead and encouragement.

I have, &c.,

(Signed) R. GROOME, *Commodore.*

The Administrator has confirmed Mr. W. Atkins, Senr., in the appointment of Senior Constable. Dated 8th Feb., 1902.

No. 76.

Notice.

Notice is hereby given that if any person shall give, sell, purchase or procure for or on the behalf of David Carey, for his use during the period of twelve months from the date hereof, any liquor, he or she shall forfeit upon conviction for every such offence a sum not exceeding five pounds.

SAVINGS BANK, 1901-2.

POST OFFICE,

STANLEY, 6th DECEMBER, 1902.

SIR,

I have the honour to forward the following report on the Savings Bank for the year ending 30th September, 1902.

During the year 57 accounts were opened and 46 have been closed; leaving a total of 390 depositors, amongst whom the balance in hand amounting to £50342 15s. 3d. is distributed. This gives an average of over £129 1s. 8d. standing to the credit of each account, or £24 12s. 9d. per head of the population of the Falklands (2043).

Interest amounting to £1070 1s. 7d. has been paid and credited to depositors during the year, being £70 6s. less than that credited in 1900-1 and the amount of deposits for year exceeds that of the withdrawals for the same period by £1247 3s. 6d. as shown in the Monthly Summary of Savings Bank Transactions transmitted herewith.

In order that it may be understood what advantage is gained by depositors placing their money in the Savings Bank I might here state that in 1889 a deposit of £72 was made, to which nothing further was added except the interest as it became due at the end of each year. The balance to the credit of this account on the 30th September with its accumulated interest to the same date amounts to £99 19s.

The income earned by the Bank during the year has been £1500 18s. 3d. and the expenses incurred £1070 9s. 9d. leaving a profit of £430 8s. 6d. as shown in the profit and loss account for the year ended 30th September, 1902.

I have the honour to be,

Sir,

Your obedient Servant.

W. A. THOMPSON,

Colonial Treasurer.

The Colonial Secretary,
Falklands.

Fences. 22. The following provisions shall have effect with respect to fences and fencing:

Owners must join in making.

(1) Where there shall be no sufficient natural boundary or no boundary fence to any part of any land or where any boundary fence is not a sufficient fence, any owner may by notice in writing call on the owner of the adjoining land to come to an agreement as to the extent or nature of the fence to be erected or the repairs or work to be done to the existing fence and such owners may agree, in writing, that such dividing fence shall not exactly follow the boundary of their lands when the physical features of the ground render a deviation necessary, and such owners may without resorting to proceedings arrange with each other for the erection of a dividing fence upon the basis of a claim for the improvements proportionate to the outlay incurred, and the lessee who pays the whole or more than half the cost shall stand in the place of the other as regards compensation on the determination of the lease of the other in proportion to so much of the amount so paid by him in excess of his own share as shall not then have been repaid to him.

(2) If the parties shall fail within fourteen days after the giving of such notice to come to such agreement as aforesaid it shall be lawful for the party who gave the notice to apply to an Inspector to view the boundaries and to report upon the necessity for a fence, the line of such fence or what repairs or additions to the existing fence are necessary to make it sufficient, provided that, where an Inspector is called in, his reasonable expenses shall be borne by the parties.

Failing to agree.

And where an agreement has been made under the sub-section last preceding and one of the parties fails to complete his part thereof, the other party shall have power to call in an Inspector in the same manner as if the said parties had failed to come to an agreement.

(3) The Inspector shall when so applied to carefully view and inspect the land and report in writing upon the extent of fence that it is necessary to erect or what repairs or improvements are necessary to make the existing fence sufficient, which report shall be delivered as soon as practicable to a Magistrate.

Inspector to report.

(4) Upon the receipt of the report the Magistrate shall require the attendance of the parties interested and in a summary way hear and determine the question at issue, and if satisfied that an existing fence should be repaired or that a new fence is necessary he shall issue an order to the owners of such land for the repair or erection of such fence within such period as shall be shown to the satisfaction of the Magistrate to be sufficient for the proper completion of the work.

Magistrate to issue order.

(5) Any owner of land who shall wilfully neglect to complete his share of the work of repairing or erecting a dividing fence within the time named in an order issued under the preceding sub-section shall be liable to a penalty not less than ten pounds, and not more than twenty pounds for every month he shall remain in default.

Owner neglecting to comply.

(6) In the event of its being proved to the satisfaction of the Magistrate before whom an enquiry is held that the owner of land who shall have failed to agree to fence has not the means to immediately pay his proportion of the cost of the work of repairing or erecting a dividing fence, then the Magistrate upon the application of the other owner may grant such other owner leave to erect or repair the whole of such dividing fence and on a certificate of the Inspector that the work has been properly done, the owner who has done the work shall be entitled to recover from the other owner one half of the cost of the work so done.

When owner too poor to meet expenses.

(7) The Magistrate hearing any action brought under the foregoing sub-section may, upon being satisfied that the defendant is unable from want of capital to immediately pay his proportion of the cost of the work, issue an order granting the defendant time, upon good and sufficient security being given to the satisfaction of the said Magistrate for the payment of the amount with interest at the rate of Four Pounds per centum per annum at such periods and by such instalments as shall be ordered by the Magistrate; provided however that it shall not be lawful to extend the time for payment in such cases beyond a period of three years from the date on which the work of repairing or erecting the dividing fence shall have been completed.

Time may be granted.

(8) If a defendant to whom time has been granted under the preceding sub-section shall fail to comply with the terms of the order made by the Magistrate either by the non-payment of an instalment when due or otherwise the plaintiff in the action shall be entitled to at once issue execution under the judgment for the full amount of the principal and interest which may at that time remain unpaid and in the event of the sheriff or other officer appointed to levy making a return after levy upon and sale of the defendant's property that this was not sufficient to satisfy the claim, the plaintiff shall be entitled to at once take proceedings to recover payment of the balance due against any surety or sureties who may have entered into bond before the Magistrate as security for the payment of the judgment debt by the defendant.

Default.

Real and personal
estate bound by
judgment.

(9) The judgment in any action under the preceding sub-sections shall bind and affect all real and personal property of the defendant as to and against all subsequent purchasers, mortgagees, or creditors and when a bond shall have been entered into by sureties as security for the satisfaction of the judgment by the defendant at the period and time allowed by the Magistrate, such bond when recorded shall constitute a preferable lien on all property of such sureties and shall not be in any wise extinguished by any subsequent sale, mortgage or other incumbrance whatsoever of such property.

Person causing dam-
age to repair.

(10) When any damage shall be done to a dividing fence which is a sufficient fence by any stock which is suffered by the owner of the land to be thereon, such owner shall bear the entire cost of repairing such fence and if he refuses or neglects so to repair the said fence the adjoining owner may at once proceed to repair the same and shall be entitled upon completion of the work immediately to recover the cost thereof from the owner of the land on which the the stock was suffered to remain in an action or suit before a Magistrate.

Wilful damage or
leaving gates open.

(11) Any person who shall wilfully break down, injure or leave open any gate on any land or break down or injure any fence erected thereon shall be liable on conviction to imprisonment with or without hard labour for a period not exceeding six months in addition to a fine not exceeding ten Pounds.

"owner" of Govern-
ment land.

(12) In the case of Crown land occupied by Government or let by Government for any period not exceeding one year the Chief of the Police shall be deemed to be the owner for the purposes of this section.

Fencing of Town
land.

23. The owner of any Town land shall erect and keep in repair on the boundary line separating any such land from any Crown Waste land or any public road a sufficient fence or such other form of fence as the Governor in Council may approve and as shall be notified under the hand of the Colonial Secretary, and the Chief of Police is hereby authorised, empowered and required to act on behalf of and represent the Government in respect of such waste land or public road and to take such steps as may be necessary to secure the erection or restoration of any such fence and the procedure in respect of compelling the owner to erect or repair such fence shall be as nearly as may be that laid down in the preceding section save that the whole cost of the erection of such fence shall be borne by the owner, provided however that should any fence so erected be a sufficient fence and thereafter become the boundary fence between any two private owners, the owner who paid for the erection of the fence shall be entitled to recover from the adjoining new owner one half of the value of such boundary fence, such value to be ascertained at the time the new owner takes possession of his land, and if such owners cannot agree as to the value of such fence the value thereof shall be assessed as in the case of an improvement under this Ordinance, provided that whenever it shall be made to appear to the Governor in Council that it would be of public advantage or that there are other good and sufficient reasons to allow any lot to remain unfenced, and whenever the owner of any land intimates, in writing, to the Colonial Secretary, that he desires to leave his lot an open space and will keep it free from rubbish, the Governor may grant the owner thereof a permit to leave such property unfenced wherever it abuts on waste land or any public road, and such permit shall be produced upon demand by the Colonial Secretary and shall continue in force until revoked by the Governor in Council.

Relief from.

Ownerless land may
be forfeited.

24. Whenever, for the purposes of the two preceding sections, no owner to a property can be found in the colony; and whenever any owner intimates in writing to the Colonial Secretary that he abandons all claim to any property, it shall be lawful for any Magistrate upon proof, to declare such property provisionally escheated to the Crown and such provisional forfeiture may be made absolute by the Supreme Court two years after notice of such

provisional forfeiture shall have appeared in the Gazette or in every local paper, provided that no notice of appeal shall have been sooner given, and that a notice of such provisional forfeiture was affixed to the property affected and a copy thereof sent to the last known address (if any) of the owner not less than six months before application is made to the Supreme Court to make absolute such provisional forfeiture.

25. The Government may take immediate possession of any property provisionally forfeited, and any one appealing against such forfeiture shall repay to the Government any necessary expenses incurred by the Government in respect of such property before he can obtain restitution thereof.

Government may occupy ownerless land.

26. The Governor in Council may make rules and regulations with reference (amongst other things) to the forms of leases and Crown grants, the characteristics of a "sufficient fence" and generally with reference to any other matters incident to the carrying out of the provisions of this Ordinance.

Rules, forms.

27. The Ordinances mentioned in the Schedule to this Ordinance are hereby repealed to the extent specified in the third column of that Schedule.

Stock Report, 1902.

STANLEY,
3rd March, 1903.

Sir,

I have the honour to submit to His Excellency the Governor my report for 1902:—

The number of sheep in the Islands returned in May, 1902 shows a large decrease as compared with March, 1901, the figures being respective 713,934 against 762,357, the decrease is owing to the annual returns being later, the numbers killed were not returned as in previous years, and the high price of tallow induced the farmers to boil down as many as possible.

The lambing in the year has been nowhere near the usual average and will not exceed much above 55 per cent. which is owing entirely to the bad winter and spring, and will also prove detrimental to this season's wool clip. Most of the farmers are devoting their attention to selection, and improving their flocks by imported blood.

The Live Stock imported during the year are as follows:—6 Shropshire from England, 3 Romney Marsh from England, 12 Merino from New Zealand.—Total 21.

Other Stock imported were 99 horses from South America

Exportation nil.

The Proclamation still remains in force prohibiting cattle, sheep and alfalfa from South America on account of Foot and Mouth and Anthrax diseases.

For the last three years Scab has been fully eradicated; lice were more prevalent this last year than previously, the farmers used their utmost endeavours to stamp them out.

The grass seed experiment has been tried with better results and a few of the more enterprising farmers have despatched large orders for this next year's sowing, and it remains to be proved which is the more beneficial, the autumn, or spring sowing.

I have, &c.,

2. The Board suggest, however, that the desirability of bringing the laws of these Islands, as regards diseases of animals and the importation of animals into conformity with those of this country should be taken into consideration.

I am, &c.,

Volunteers. Commodore's Report.

His Excellency the Governor has been pleased to direct the publication of the following report from the Commodore on the Volunteer Force, dated 26th March, 1903, as follows: (C.S. No. 26/03.)

"CAMBRIAN" at Port Stanley, F.I.,
26th March, 1903.

Sir,

In accordance with Art., XII, cl. of my Standing Orders I have the honour to report that I inspected the Falkland Islands Volunteers on 25th March, 1903.

2. The total strength of the Force remains about the same, viz: 108, as against 106 last year.

2. The numbers on parade were 45, as against 56 last year. These small numbers as compared with the total strength are due to the fact that during the summer months the men employed on the sheep farms, who form the great majority of the absentees, are unable to spare the time to come into Stanley.

4. The uniform of the Company was in good condition and the arms very clean and in good order.

5. The drills were well executed. I gave a the Company a practical inspection, handing the the Commanding Officer a telegram from the Lighthouse stating that enemy's boats were entering the harbour. An excellent position was immediately taken up by the Commanding Officer to repel the same.

6. The field guns had not been out for drill during the year, with the exception of firing from the 2.5 in. R.M.L. guns on one occasion.

7. In the remarks by the Colonial Defence Committee on last year's inspection (C.O. No. 21874, Admiralty No. M.0455 of July, 1902) it was suggested that the parade for the Inspecting Officer should take the form of a field day; I was however assured that this would produce no beneficial results as regards the numbers attending, and, as "Cambrian" was carrying out rifle practice and also coaling, and moreover as the general weather experienced in March was such as to show that an average field day would as likely as not be spoiled by adverse weather conditions, I decided not to carry out the suggestion this year.

8. I enclose report by the Officer Commanding the Volunteer Force as asked for by the Colonial Defence Committee, and in conclusion beg to state that I concur in the general opinions expressed by my predecessors in their inspection reports of the past.

I have the honour to be,

Sir,

Your obedient servant,

(Signed) FRANK FINNIS,

Commodore.

of the Admiralty.

SAVINGS BANK, 1902-3.

No. 188/03.

TREASURY OFFICE,

STANLEY, 1st DECEMBER, 1903.

SIR,

I have the honour to forward the following report on the Savings Bank for the year ended 30th September, 1903.

During the year 53 accounts were opened and 68 closed; leaving a total of 375 depositors, amongst whom the balance in hand amounting to £47411 6s. 1d. is distributed. This gives an average of over £126 14s. standing to the credit of each account, or £22 7s. 8d. per head of the population of the Falklands, computing the population at 2100.

Interest amounting to £1233 8s. 11d. has been paid and credited to depositors during the year, being £163 7s. 4d. more than that credited in 1901-2 and the amount of withdrawals for year exceeds the deposits for the same period by £2931 9s. 2d. as shown in the Monthly Summary of Savings Bank Transactions transmitted herewith. (Enclosure *E*.)

The income earned by the Bank during the year has been £1615 11s. 5d. and the expenses incurred £1238 8s. 11d. leaving a profit of £377 2s. 6d. as shown in the profit and loss account for the year ended 30th September, 1903. A summary of the Profit and Loss Account from the establishment of the Bank will be included in next year's Report. The net profit from the establishment of the Savings Bank in April, 1888 to the year ended, 30th September, 1903 amounted to over £1757.

The following is an extract from the Treasurer's Report for the year 1891-2:—"Should the business of the Bank increase at the present ratio, it will be necessary before long to appoint a Special Manager for it." A glance at enclosure *A* will show the increase of the Bank, as will also be seen upon comparing the following figures with enclosures *B* and *D*. Face value of Investments held on 30th September, 1892 £20661 13s. 1d. Interests on Investments received 1891-92 £583 6s. 1d. The Bank is still carried on without any expense for management.

I have the honour to be,

Sir,

Your obedient Servant,

W. A. THOMPSON,

Colonial Treasurer.

The Colonial Secretary,
Falklands.

PROCLAMATION.

By His Excellency WILLIAM GREY-WILSON, Companion of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief in and over the Colony of the Falkland Islands, and Vice-Admiral of the same.

WHEREAS His Majesty the King is happily at peace with all Sovereigns, Powers, and States;

And whereas His Majesty the King has by Proclamation made known that a state of war unhappily exists between His Majesty the Emperor of all the Russias and His Majesty the Emperor of Japan, and between the subjects and citizens of those countries.

And whereas His Majesty is on terms of friendship with each of these States, and with the subjects and inhabitants of those countries, and being desirous of preserving to His subjects the Blessings of Peace, is firmly purposed and determined to maintain a strict and impartial neutrality.

NOW, THEREFORE, I, WILLIAM GREY-WILSON, do hereby publish, promulgate and proclaim, that His Most Excellent Majesty the King hath strictly charged and commanded all His loving subjects to govern themselves accordingly and to observe a strict neutrality in and during the aforesaid war and to abstain from violating or contravening either "an Act to regulate the conduct of Her Majesty's subjects during the existence of hostilities between Foreign States with which Her Majesty is at Peace," or the Laws and Statutes of the Realm in this behalf, or the Law of Nations, or any Treaty made by His Majesty in relation thereto, or the Rules which His Majesty has directed to be observed during the continuance of the present state of war, as they will answer to the contrary at their peril.

And I do further proclaim that the following Rules will be put into execution forthwith:—

Rule A. No Ship of War of either Belligerent may use British waters as a place of resort for warlike purposes or equipment or may leave British waters until twenty-four hours after any ship of other Belligerent, whether ship of war or merchant ship.

Rule B. Every such ship of war shall be required to put to sea within twenty-four hours after entrance unless in the event of stress of weather or necessity for repairs or provisions, in which case she must leave as soon as possible, and certainly within twenty-four hours of completion of repairs.

Rule B is subject to Rule A and time may be extended accordingly.

GOD SAVE THE KING.

Given under my hand at Government House, the Falkland Islands, this 24th day of February, 1904.

By Command of His Excellency the Governor.

W. HART BENNETT,
Colonial Secretary.

By His Excellency WILLIAM GREY-WILSON, Companion of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief in and over the Colony of the Falkland Islands, and Vice-Admiral of the same.

Whereas by a Proclamation, dated 30th December, 1901, it was ordered:—

1. That from the date thereof, no cattle, sheep, or alfalfa should be imported into this Colony from any part of South America.

2. That should any vessel arrive in this Colony from any part of South America having on board any alfalfa intended to be imported to this Colony, such alfalfa should be immediately destroyed by the Government Stock Inspector or by any Government Officer.

3. That the said Proclamation should continue in force until the 31st day of December, 1902, unless sooner by the Governor in Council revoked.

And Whereas by a Proclamation dated 30th December, 1902, it was ordered that the above provisions should continue in force until the 31st December, 1903.

And Whereas it is expedient that the said Proclamation should continue to be of effect.

NOW, THEREFORE, I, WILLIAM GREY-WILSON, in Council, in pursuance of the powers vested in me by the "Live Stock Ordinance, 1901," do hereby proclaim that the above provisions of the said Proclamation of 30th December, 1901, shall continue in force from the 1st day of January, 1904, until further orders.

STANLEY,

18th February, 1904.

SIR,

I have the honour to forward to you herewith my Report for the year 1903.

2. The decrease of the number of sheep returned in May, 1903 is due entirely to the bad winter previously, the numbers being 681,209 and 713,934 respectively.

3. The lambing in the year was most satisfactory, giving a high percentage—about 75 per cent.

4. I suggest that it should be made compulsory in Section 30 of the Live Stock Ordinance, that all Farmers should use *Pliers* instead of the Knife for ear-marking.

5. The wool clip for the year was not so good owing to the previous winter; it was tender and had a break in it, but fortunately the price of wool rose.

6. Most of the Farmers are doing their utmost to improve their flocks by selecting and importing new blood into them. I notice a vast improvement in a great many of the flocks.

7. The sheep imported during the year are as follows:—

| | | |
|-------------------|-----|-----------------------|
| From New Zealand, | 297 | Romney Marsh Rams. |
| „ | „ | 75 Border Leicester „ |
| „ | „ | 60 Lincoln „ |
| „ | „ | 54 Merino „ |
| „ | „ | 59 Romney Marsh Ewes. |
| Total ... | | 515 |

8. Unfortunately a few of both consignments were found to be suffering from foot-rot which had been contracted on the voyage; with due precaution on arrival they were shipped to their destination alright.

9. Other stock imported were 64 horses from Patagonia

10. Lice were very prevalent last year; the farmers have been most successful in exterminating them: only a few cases have been seen this year.

11. In my last year's report I mentioned that the grass seed experiment proved most successful. The experiment was made at Darwin, Lively Island, Fitzroy, Stanley and Quarantine paddock; the seed used, viz:—cocksfoot, rye, and clover, in all parts has taken well. I would recommend the Spring for sowing.

I have the honour to be,

Sir,

Your obedient servant,

JAMES ROBERTSON.

Chief Inspector of Stock.

The Honourable
The Colonial Secretary.

SIR,

As it is undeniable that some anxiety if not suspicion exists in regard to the Land Ordinance which has just come into force, the Governor deems it desirable to offer some explanation, not only as to the objects which the Government had in view in framing the consolidating and amending Ordinance, but also as to the action proposed to be taken under it

2. The 16 repealed Ordinances relating to land cover the period from almost the earliest settlement of the Colony for pastoral purposes to the present day. Time had rendered many of their provisions obsolete; legislation by reference had rendered many obscure, and some contradictory, and experience had shown some of them to be harsh: *e.g.* the power conferred upon the Government to sell leased land at any time by auction; the very limited interpretation of the term "improvement;" and the provision that no compensation should be paid in respect of Suburban land.

3. The price fixed from time to time by the Government as the freehold value of land per actual acre was 8/- in 1847, 9/- and 12/- in 1860, 19/- in 1863, 8/- in 1865, 2/- in 1872, 8/- in 1873, 4/- in 1874, 2/- in 1881, 4/- in 1885, 3/- in 1890 and 4/- in 1895. The only considerable quantity of land ever sold by auction realized 4/- an actual acre in 1895. This was a sale under exceptional circumstances and the purchaser was no doubt under very considerable compulsion to acquire the land in self defence, but very large tracts of land have been sold privately at 3/- a reputed acre and it has more than once been urged upon the Governor that the right conferred by Ordinance 9 of 1890 to purchase at 3/- an acre—which right was subsequently suspended—should be revived.

4. These are the circumstances that impelled the Governor to grapple with the question and attempt to substitute order for confusion and uncertainty and to crystallise, as it were, the freehold value of land at an equitable price, and proportion the rental of land to the freehold value at the low interest of $2\frac{3}{4}$ per cent.

5. The action which the Government proposes to take under the Ordinance is as follows:—

(a) No leases in existence at the time of the passing of the Ordinance will be renewed upon precisely the same terms.

(b) The holder (at a rental of less than £25 a year per 6,000 reputed acres) of a lease of country land, which lease was granted prior to the passing of the Ordinance, will, on applying to the Colonial Secretary two years or thereabouts prior to the expiry of his lease, be informed either that the land will be sold by auction or that the land or any portion of it will be declared a reserve under section 7 of the Ordinance or that he will be granted a new lease under the 1903 Ordinance at a rental of £25 a year for a section of six thousand reputed acres upon the conditions specified in section 21 of the Ordinance and such special additions thereto or exceptions therefrom as may be specified, *e.g.* conditions might be imposed—

(1) in cases where Lessees hold two or more existing leases and one of the stations concerned is necessary to the other or others or useless without it or them, that the Lessee shall on the expiration of any lease granted prior to the passing of the Ordinance accept, if required by the Government, a new lease in respect of any land held by him from the Crown provided its terms are similar to those of his first lease under the Land Ordinance, 1903.

(2) In cases where it appears essential in the public interest that travellers' horses be allowed to graze.

(3) In cases where it appears to be either in the interest of the farmer or of the community that sand or other grass seed should be sown.

(4) In cases such as the present leases of the Peninsula, Fox Bay, and Moody Valley Stations that the Government should have free grazing for a specified number of horses.

The Governor has never contemplated using the right (which is no doubt elastic and necessarily so) conferred by the Ordinance to insert conditions in a lease in an arbitrary or oppressive manner or in any way save for the protection of the Government or the good of the public.

(c) If the holder of such lease or leases declines to accept a new lease he will be entitled to compensation for all "improvements" in accordance with the terms of the Ordinance.

(d) If the holder of such lease or leases accepts the new lease, the latter will not have effect until the determination of the then current lease.

6. With reference to section 7 which confers upon the Governor the right at any time to declare any land a reserve, I am to state that this power would only be used for some public purpose and never during the currency of a lease except with the sanction of the Secretary of State.

There is no present intention of alienating from any farmer any land he now holds, and if hereafter at any time it should be deemed expedient in the public interest to attempt to effect a closer settlement of the land, the Governor is of opinion that it would be equitable to proceed under the Public Lands Ordinance, 1902 and pay full value for the freehold as well as the leasehold land to be acquired.

7. Some anxiety has been expressed that under section 15 a small portion of a large station might be put up to auction by the Government and an exorbitant rent offered and that an outsider having ousted the former holder, and having no other land, might immediately elect to "purchase the whole of the land rented by him" at 3/- an acre. I am to state that no such danger need be anticipated, as the sale by auction would operate in the manner following:—the rent to be paid under the lease would be fixed by the Governor and announced in the advertisement and the lease would then be put up at an upset price under section 19 and sold; the purchaser having to pay for the lease within two months from the date of the sale by auction.

8. The Governor will be prepared to give careful consideration to any application for an amalgamation of existing leases, within reasonable limits and with due regard to the situation and surroundings of the land. The "reasonable limit" applicable to most holdings would be an amalgamation of leases dealing with from 20,000 to 30,000 reputed acres

9. The Governor would also be prepared to give careful consideration to any application for the purchase of a portion only of a lessee's holding, provided the portion to be purchased was separate from and not essential to any other portion of the lands held. It must however be understood that the Governor has no power under the Ordinance to sanction such a purchase without the approval of the Secretary of State. I am to add that the Governor is of opinion that in many instances such a separation of a hold-into freehold and leasehold land would promote eventually by mere evolution that which the Government earnestly desires in the public interest—a closer settlement of the land.

10. As section 23 relating to the fencing of Town land has raised much anxiety, I am to state that the Governor is of opinion that owners should be compelled to restore or remove dilapidated fences, and, subject to this, that the compulsory fencing of Town lands should not be pressed, except in cases where such fencing appears on sanitary or other grounds essential.

11 The Governor expresses an earnest hope that the explanations now offered with the approval of the Secretary of State may convert any suspicion that has existed as to the action of the Government in relation to land into a conviction that there is no intention to deal in any way inequitably or harshly with Lessees or the large stake they hold in the prosperity of the Colony.

12. Appended to this letter is an Extract from the Minutes of the Legislative Council of 16th December, 1903.

I am, Sir,
Your obedient servant,
W. HART BENNETT,
Colonial Secretary.

Extract from Minutes of Legislative Council, 16th December, 1903.

The President, in the course of his reply to remarks by the Hon. J. J. Felton, stated as follows :—

* * * * *

“I would say that if any Governor gives an undertaking, or makes a promise, which is contrary to the provisions of any Ordinance, such undertaking or promise is of no value ; but if a Governor indicates the action that it is proposed to take under any Ordinance and such action is not repugnant to the provisions of the Ordinance and the announcement has the sanction and approval of the Secretary of State, it is binding upon the Government.”

An Ordinance to simplify Conveyancing and Titles to Land.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands with the advice and consent of the Legislative Council thereof as follows :—

1. In this Ordinance—

Interpretation.

“Land” shall include Messuages, Tenements, Hereditaments, Houses, Buildings and Easements, and any estate or interest whatever in real property.

2. A deed made in one of the forms 1, 2, 3. and 4 set forth in the first Schedule hereto shall, without being sealed, have effect as a conveyance in fee simple, a mortgage in fee simple, or a lease, as the case may be, of the land described therein, or as a transfer of the mortgage on which it is written or to which it is annexed, and shall be taken to express :—

Simplifying deeds.

(a) In the case of form 1, that the grantor, for himself, his heirs, executors, and administrators, covenants with the grantee, his heirs and assigns for the right to convey the land free from incumbrances (except as therein described), for quiet enjoyment, and for further assurance.

Conveyance.

(b) In the case of form 2, that the mortgagor for himself, his heirs, executors and administrators, covenants with the mortgagee, his heirs, executors, administrators, and assigns for the right to convey the land free from incumbrances. (except as therein described) and for further assurance, that the mortgagee shall have a power of foreclosure of the mortgage in case of default of payment, either of principal or interest, but that, until such default, the mortgagor shall quietly enjoy the land.

it shall be lawful for the lessor to re-enter; but that, until such default, the lessee shall have quiet enjoyment.

Registration.

3. Every deed other than a Crown grant or lease, or agreement for a lease or assignment of a lease shall be registered in words at length in the Registrar General's Office; and if registered within sixty days of the execution thereof when the parties are resident in the Colony, or within one year when either party is not resident, the fees set forth in Section 13 shall be paid, but if registered after the times above stated double those fees shall be paid, and any Deed not registered as aforesaid shall be deemed void against any subsequent purchaser or mortgagee for valuable consideration unless such Deed shall be registered before the registering of the Deed under which such subsequent purchaser or mortgagee shall claim.

7. A copy certified by the Registrar General of any registered Deed shall be accepted in all cases as sufficient evidence of such Deed.

Satisfaction of mortgage.

8. An acknowledgment upon the mortgage Deed of the receipt either of the debt in full or of any less sum in satisfaction thereof shall upon being registered operate as a full discharge of the mortgage debt, and whenever the mortgagee fails to give such acknowledgment the Chief Justice may order the Registrar General to cancel the mortgage upon proof of the satisfaction thereof.

Fresh title.

9. Any person, lawfully entitled, may petition to be registered as the owner in fee simple of any land, and such petition shall be published in such manner as the Court may direct not less than three months before it is heard, and copies of such petition shall be given to all persons whom the Court may think interested in opposing it, and the Chief Justice, after hearing the case and on being satisfied as to the claim of such petitioner, may, notwithstanding the opposition (if any) thereto, make a decree *nisi* for the issue of a title.

Probationary for one year.

10. A decree *nisi* shall not be made absolute until after the expiration of one year from the pronouncing thereof.

11. At any time after a decree *nisi* for the issue of a title, and before such decree shall have been made absolute, any person may show cause why it should not be made absolute.

Cause may be shown against issue of fresh title.

12. The Registrar General, after a decree *nisi* for the issue of a title has been made absolute, shall prepare a Deed in the form 5 in the First Schedule to this Ordinance, and as soon as the Chief Justice has countersigned such Deed and the copy thereof in the Deed book, such title shall be deemed indefeasible.

2. The Corps shall consist of—(1) Enrolled members, consisting of efficient and non-efficient,—(11) Honorary Members, the latter contributing to the funds of the Corps a sum of not less than 10s. per annum, but not being enrolled for service.

3. All subscriptions shall fall due on, and the necessary drills and musketry exercises be completed by the 30th June in each year.

4. Any Officer or Member who has been supplied with uniform and who is returned as non-efficient in the annual returns of the Corps, shall pay to the funds of the Corps a sum equal to the Capitation Grant which he failed to earn. The Commanding Officer may, with the advice of the Finance Committee, remit such payment in special cases.

6. No person shall be admitted as a Member unless with the approval of the Commanding Officer, and on the proposal of two or more Members of the Corps.

10. The Commanding Officer shall cause an abstract of the accounts to be annually prepared for the information of every Member of the Corps.

11. Honorary Members may, in accordance with regulations, wear the uniform of Privates of the Corps, to be provided at their own expense, with such distinguishing marks on the sleeve as may be approved by the Commanding Officer. They are not to interfere in any way with the Military duties of the Corps, but they may, when the Commanding Officer approves, attend "plain clothes" drill.

13. The Commanding Officer shall fix the time and place of parades, drills, and rifle practice.

2. It shall be lawful for the Governor in Council to define by notice in the Gazette the limits within which the Council shall exercise jurisdiction, and from time to time to alter, extend or diminish such limits; and the said limits shall be called the "Municipal limits."

3. Whenever a majority of the Electors of any Town present a petition to the Governor praying that the Council of such Town may be abolished, and setting forth in such petition a scheme for securing the discharge of all liabilities incurred by such Council, and for satisfying all vested interests which may have accrued in consequence of the creation of such Council, and the Governor in Council shall be satisfied that such scheme provides ample security for the protection and satisfaction of all equitable claims, rights, titles and interests, it shall be lawful for the Governor by Proclamation to abolish such Council as on and from a date to be therein named, and the affairs of such Town shall thereupon be managed as though a Municipal Council had never existed therein, and all real and personal estate belonging to such Council shall thereupon vest in the Colonial Secretary for the time being, and shall be dealt with by him as directed by the Governor in Council.

4. The Council shall consist of a Chairman and six Councillors or such greater number of Members as shall from time to time be determined by the Governor in Council and notified in the Gazette and one half of such Members shall be elected as hereinafter provided and the other half of such Members and the Chairman shall be nominated by the Governor and appointed under his hand and the seal of the Colony and such nominated Members shall hold office during the Governor's pleasure.

7. For the purpose of the first election of any Council under this Ordinance, it shall be the duty of the Colonial Secretary or such other Officer as may be appointed by the Governor to prepare, on or before the 1st day of February in the year next following the creation of a Council as laid down in section 1 hereof, a list of all electors duly qualified under this Ordinance.

Such list shall be affixed to the Court House and other conspicuous places in the Town and shall be accompanied by a notice that all objections to the said list will be heard at a date to be therein named at the Police Court.

8. On the date named in the aforesaid notice the Magistrate, or some other person appointed by the Governor, shall hear all objections that may be made in respect of the said list, and all applications for the insertion of names therein or removal of names therefrom, and shall sign a corrected copy of the list, in which the names shall appear in alphabetical order and with a numeral against each name.

9. The corrected list shall thereupon come into force, and shall be posted in conspicuous places within the Municipal limits and be published in the Gazette.

10. The aforesaid list shall remain in force until a new list shall have been made as hereinafter provided.

11. For the purpose of every election subsequent to the first, it shall be the duty of the Council to prepare a list of all qualified electors. Such list shall be prepared in every year by the last day of February and the procedure with regard to the revision and coming into force of the list shall be the same as that prescribed by this Ordinance with regard to the first or original list.

III. Elections and Councillors.

12. No person shall be elected or nominated to the Council unless he is an "elector" as defined in section 6.

he shall *ipso facto* cease to be a Councillor and a notification of any vacancy so caused shall be made to the Colonial Secretary and by him published in the Gazette, but any Councillor thus removed may be re-elected or re-nominated subject to the provisions of section 12.

15. If any Member of the Council refuses to obey the ruling of the chair or to comply with the rules of the Council, the Council may, after affording him full opportunity of defending himself, by resolution expel such Member and declare his seat vacant, and his seat shall thereupon become vacant accordingly

16. Any ten electors may nominate any elector a candidate for the Council by signing and forwarding not later than the 14th day of April to the Colonial Secretary or Returning Officer a paper in the following words :—

“ We, the undersigned, hereby request you to enter the name of _____ on the ballot paper for the next Municipal election,”

“ I accept this nomination _____
(Signature of candidate.)

17. Subject to the provisions of this Ordinance, the election of Councillors shall take place in such manner and at such time and subject to such regulations as to the recording and counting of votes and otherwise as may be prescribed by the Governor in Council.

18. Every election shall take place under the presidency of a Returning Officer, to be named by the Governor, and the votes shall be given by ballot.

19. The ballot of every elector shall consist of a paper called a “ ballot paper ” on which shall be entered the names of all candidates duly nominated.

At the time of voting, a ballot paper bearing a number corresponding with the number opposite his name on the list of electors shall be handed to the elector who, having placed against the names of the candidates the number of votes he desires to record in favour of each, shall place it in a ballot box in the presence of the Returning Officer.

20. Every elector may give one vote and no more in respect of each vacant seat on the Council, but he may give all his votes to one candidate or some to one and some to another.

21. At the close of the election the Returning Officer shall count the votes recorded and declare the result, and give to each Councillor a certificate of election, setting forth the number of votes he has received.

22. When an equality is found to exist between any candidates at any election, and the addition of one vote would entitle any of such candidates to be declared elected, the Returning Officer may give such additional vote.

23. The election shall be completed by the 30th day of April.

24. Within seven days after any election, any person may by petition to the Supreme Court show cause why any Councillor should be declared not duly elected and any other person declared duly elected, and the Chief Justice, having heard the complaint, may make such order as justice requires, and direct the Returning Officer to issue his certificate to the person duly elected.

25. Any casual vacancy in the office of Councillor may be filled by a person nominated by the Governor in Council and appointed under the hand of the Governor and seal of the Colony, provided that any Councillor so appointed shall vacate his seat on the 14th day of April next following the date of his appointment.

26. After each election every Councillor whether nominated by the Governor or elected or declared elected on petition as hereinbefore provided shall attend in the Supreme Court at such time or times (not less than seven days after the election) as may be appointed for the purpose by the Chief Justice and the elected Councillors shall then produce for the information of the Chief Justice the certificates of election furnished to them under section 21 or section 24 of this Ordinance, and the Chief Justice shall administer to each Councillor an oath in the following terms:—

I _____ do sincerely promise and swear that I will faithfully and diligently execute to the utmost of my abilities the duties of a Municipal Councillor within the Municipality of _____.

And after the elected Councillors have taken the oath the Chief Justice shall countersign their certificates, and the certificates so countersigned shall be their warrants of admission to the Council.

27. The Colonial Secretary shall fix a day and hour for the first meeting of the Council after each election; and such day shall be not less than seven days nor more than sixteen days after the election; and the Colonial Secretary shall publish a notice of the day and hour so fixed in the Gazette not less than three days before the day fixed for the meeting, and shall cause due notice to be given to each elected Councillor of the appointed time and the place of the meeting, and such notice shall set forth the terms of section 28 of this Ordinance, and shall specify any other business to be dealt with at the meeting.

IV. Councils and Officers.

28. At the first meeting of the Council after each election, the names of the Councillors duly elected shall be entered in the Minute Book, and opposite each name shall be noted the number of votes received by each as shown in the Returning Officer's Certificates issued, as prescribed in sections 21 and 24.

The Council shall then appoint one of their number to be Vice-Chairman.

29. The Chairman shall preside at meetings of the Council and shall have such other functions and powers as may be from time to time assigned to him by the Council.

He shall have an original vote and, in case of an equality of votes, a second vote.

30. (1) The Council shall meet once in every month and at such other times as may be fixed by the rules, or when convened by the Chairman.

33. The Chairman shall, during the term and by virtue of his office, be a Justice, but, before acting as such, he shall, if he has not already done so, take the oaths required to be taken by a Justice, and such Chairman, in his capacity as Justice, shall be subject to the same restrictions, disqualifications and powers of removal as any other Justice.

34. The Council may appoint a Secretary and Treasurer—not being one of their own number—who shall act as Clerk of the Council, and such other Officers as they may think necessary for the performance of the duties of the Council, and every Officer so appointed shall hold office during the pleasure of the Council and shall be paid such remuneration as the Council may assign to him and the Governor approve: and the Council shall take from any Officer who receives or pays any money on behalf of the Council such security as may be fixed by the Council and approved by the Governor.

35. The Council shall record in a book to be kept for that purpose minutes of their proceedings, and no business shall be entered upon until the minutes of the last preceding meeting shall be read over and confirmed or amended, as the case may require.

36. (1) A copy of any minute of the Council or of one of its Committee signed and certified by the Chairman thereof may be received in evidence, without further proof, for any purpose whatsoever.

(2) Until the contrary is proved, every Meeting of the Council or of one of its Committee in respect of which a minute has been duly confirmed shall be deemed to have been legally convened and held, and the Members thereat to have been duly qualified and to have had power to deal with the matter referred to in such minute.

V. Vesting and disposal of Property.

37. The annual revenues arising within the town of Stanley from the Dog Tax, the Publicans' Licenses, the Tobacco and Billiard Table Licenses under the several Ordinances relating thereto, and from the charge for depasturing on the Common shall be vested in the Municipal Council of Stanley whenever duly constituted, and shall be known as the "Municipal Fund" and shall be applied to discharge any lawful expenditure incurred by the Council under this Ordinance; provided that the Government shall retain for its own use five per cent of such revenues in consideration of the expense and labour of collecting them and shall deduct from such revenues the sum of Fifty Pounds annually in liquidation of the balance due on account of the sum advanced in 1897 from the Land Sales Fund for the purchase of a Steam Fire Engine or in liquidation of any loan hereafter made to the Council and in paying interest at the rate of $3\frac{1}{2}\%$ per annum on so much of any such loans as shall remain due on the first day of January in each year, and provided that the sum to be paid by the Government on account of the revenues hereby allocated to the Municipal Council of Stanley in respect of the year in which the Council comes into existence shall be assessed and determined by the Governor in Council, and paid from the Treasury by Warrant under the hand of the Governor.

38. The income of all Municipal property and all fines, fees and other revenues received shall be carried to the account of the Municipal Fund, and the debts of the Municipality, the salary of officers and expenses of the Council shall be paid out of the Municipal Fund.

VI. Rates.

39. In the event of the aforesaid Municipal Fund being insufficient to meet the authorized lawful expenditure, the Council may, with the consent of the Governor in Council, impose a rate upon all real estate within the Town limits in the manner following:-

40. On or before the first Monday in July in every year the Council may cause to be prepared (in an assessment book to be kept for that purpose) a list in alphabetical order of all persons liable to be rated and the amount at which each is assessed.

41. Every rate so made shall be made upon an estimate of the net annual value of the real estate in respect of which the rate is levied, and shall not exceed the sum of 4/- in the pound.

42. The Council, when the assessment list has been prepared, shall publish a notice that such list has been made and may be inspected at the office of the Council on any day between such hours as are notified, and that all objections to the said list will be heard by the Council at their office on the third Monday in July.

On the said date the Council shall hear any objections that may be made, and insert in the said list any person liable to be rated and strike out of the said list any person who shall not be liable to be rated, and correct all errors in the said list and sign the same.

43. Any person whose name shall be upon any such list duly allowed and signed by the Council may, between the third Monday in July and the end of September, apply by petition to the Supreme Court for the removal or insertion of his own or any other person's name, or for the increase or the reduction of the amount at which he or any other person is assessed, and the Chief Justice may require the attendance of an officer of the Council with the assessment book and summarily hear and deal with any such petition and if he sees fit amend the assessment book, and award costs to be paid in such manner and by and to such parties or persons as he may think just.

44. At any time after the last day of September, the Council may submit the assessment book to the Chief Justice for his signature, and the list when so signed by the Chief Justice shall be the assessment roll upon which the rates shall be levied until a new list shall be signed by the Chief Justice.

45. If any person assessed to any rate under this Ordinance fails to pay the same within fourteen days after payment has been lawfully demanded in writing, the Council shall take proceedings in a Court of Summary Jurisdiction to compel the defaulting party to pay the rate.

46. The Council may remit wholly or in part any rate or tax on the ground of the poverty of the person liable to pay the same, or that the property in respect of which the rate or tax is payable has become deteriorated and that the rate is oppressive.

VII. Borrowing Powers.

49. The Auditor may disallow any item of account contrary to law and surcharge the same on the person making or authorizing the making of the illegal payment.

50. Any person aggrieved by such disallowance may appeal to the Supreme Court and, thereupon, the Chief Justice may decide summarily upon the question at issue.

Stock Inspector's Report 1905.

Stanley,
Falkland Islands,
18th February, 1905.

SIR,

I have the honour to forward to you herewith my report for 1904.

Sheep.—The number of Sheep in the Islands returned in May 1904 amounts to 702,444, consisting of 349,680 males, and 352,764 females, showing an increase of 121,235 as compared with 1903.

The increase is due to the good lambing during the preceding year and the exceptionally good weather throughout the year. There is a marked improvement in many of the flocks.

Wool.—The wool clip in most flocks was about half a pound better than last year, and the prices realized in England were much better than had been experienced for some years.

Lambing.—The lambing in the year has been most satisfactory, the average being about 73%. A higher percentage would have been obtained, but the severe weather in the spring produced a heavy death rate.

The only live stock imported during the year were 10 horses from Patagonia.

Other stock in the Colony are:—

| | | |
|--------|-------|----------------|
| Horses | 3,200 | } approximate. |
| Cattle | 4,000 | |
| Pigs | 100 | |

No amendments have been made in the Scab Ordinance.

There were still a few cases of lice existing last winter among some of the smaller flocks on the East. I have not seen any this shearing.

The results from the grass seed experiment are fairly satisfactory in places where it has been sown to any extent.

I have, etc.,

J. ROBERTSON,
Chief Inspector of Stock.

The Honourable
The Colonial Secretary.

Education Report, 1904.

In Stanley. The Government Senior and Infant Schools, the Roman Catholic and one Private School carried on the work of Education uninterruptedly during the year.

The Annual Examination of the Government and Roman Catholic Schools was held by ALEXANDER MOIR, M.A., in December. The report is in the hands of the Government.

In the Camps. Two Teachers in addition to the three already at work were appointed by the Government, thus making three teaching on West Falkland and five adjacent Islands, and two on the north of East Falkland.

The two additional Teachers were much needed: the Camps are well supplied with Teachers and as far as can be judged, the work has proceeded most satisfactorily.

The Falkland Islands Company have one Schoolmaster—a Master of Arts in Darwin and two Teachers for their Camp—the south of East Falkland. They are also doing good work and fully meet the educational needs in their Camps.

Below is appended the number of children being educated in the Colony. In Stanley several children drift between the Government and Roman Catholic Schools, hence the number returned for Stanley should be reduced by some twelve or fifteen children.

— RULES. —

The following Rules approved by the Governor in Council are applicable to the issue and payment of Postal Orders:—

1. British Postal Orders are sold and paid during the hours that the Post Office is open for the transaction of Money Order business.

2. The Postmaster must, before handing a Postal Order to an applicant, insert the name of the person to whom the amount is to be paid, and the person to whom the Order is issued may fill in the name of the Money Order Office at which the amount is to be paid.

Every person to whom a Postal Order is issued should keep a record of the particulars thereof on the counterfoil to facilitate enquiry if the Order should be lost.

The Postmaster General in London cannot undertake to trace any Order with a view to accounting for its loss or miscarriage unless proof can be given that the name of the payee was inserted in the Order before the holder parted with it and unless the number can be furnished.

3. Before payment of a Postal Order can be made the payee named therein must sign the receipt at the foot of the Order and must also fill in the name of the Money Order Office, if that has not already been done.

If the Order has been receipted before presentation, the person presenting it may be required to sign his name on the back of the Order, whether such person be the payee or not.

4. If a Postal Order be crossed, payment will only be made through a Banker, and if the name of the Banker be added, payment will only be made through that Banker.

No Postal Order will be paid, even though presented for payment by a Banker, unless the name of the payee be inserted in the body of the Order.

5. After a Postal Order has once been paid, to whomsoever it is paid, the Postmaster General will not be liable for any further claim.

6. If any erasure or alteration be made, or if the Order be cut, defaced or mutilated, payment may be refused.

7. Payment of a Postal Order may be refused or delayed by the Postmaster.

8. If an Order be not paid within three months from the last day of the month of issue, a commission equal to the amount printed on the Order will be charged to the payee in respect of each further period of three months, or any fraction of three months, which has elapsed.

Postal Orders presented for payment more than six months after the month of issue will not be paid until reference has been made to the Chief Office in London.

By Command,

W. HART BENNETT,

Colonial Secretary.

SAVINGS BANK, 1903-4.

TREASURY OFFICE,

STANLEY, 1st December, 1904.

SIR,

I have the honour to forward the following report on the Savings Bank for the year ended 30th September, 1904.

2. During the year 51 accounts were opened and 70 closed; leaving a total of 356 depositors, amongst whom the balance in hand amounting to £49634 5s. 11d. is distributed. This gives an average of over £139 8s. 5d. standing to the credit of each account, or £24 16s. 2d. per head of the population of the Falklands, computing the population at 2,000.

3. Interest amounting to £1,119 14s. 4d. has been paid and credited to depositors during the year, being £113 14s. 7d. less than that credited in 1902-3 and the amount of deposits for the year exceeds the withdrawals for the same period by £2,222 19s. 10d. as shown in the Monthly Summary of Savings Bank Transactions transmitted herewith. (Enclosure D.)

4. The income earned by the Bank during the year has been £1633 0s. 5d. and the expenses incurred £1,119 14s. 4d. leaving a profit of £513 6s. 1d. as shown in the profit and loss account for the year ended 30th September, 1904.

5. As stated in the 4th paragraph of the last Report on the Savings Bank for the year ended 30th September, 1903, a Summary of the Profit and Loss Account since the establishment of the Savings Bank in April 1888, is enclosed. (Enclosure E.) I have entered the earnings of the Bank separately under different heads, as by the "Financial Records," of the Colony. Dividends have been received on account of a "Surplus Fund," prior to the establishment of the Savings Bank, and as far back as October 1886, when £3000 was invested on account of "Land Sales Account" and £1000 on account of "Surplus Fund." After the establishment of the Savings Bank and during the years from 1891 to 1898, the Investments then standing to the account of a "Surplus Fund" were transferred to the Savings Bank Account, and on the transfer of the following Stock, a profit of £79 4s. 6d. was made and given to General Revenue.

| Year. | Stock. | Profit. |
|-------|-----------------------|---------------------|
| 1893 | Canada 3½% | £61 4 6 |
| 1898 | Barbadoes 3½% | £ 4 19 6 |
| 1898 | New Zealand 4% | £13 0 6 |
| | | <hr/> £79 4 6 <hr/> |

6. The following is an extract from the Treasurer's Report for the year 1891-2:—"Should the business of the Bank increase at the present ratio, it will be necessary before long to appoint a Special Manager for it." A glance at enclosure A will show the increase of the Bank, as will also be seen upon comparing the following figures with enclosures F and C. Face value of Investments held on 30th September, 1892 £20661 13s. 1d. Interests on Investments received 1891-92, £583 6s. 1d. The Bank is still carried on without any expense for management.

I have the honour to be,

Sir,

Your obedient Servant,

W. A. THOMPSON,
Colonial Treasurer.

The Colonial Secretary,
Falklands.

SUPPLEMENTARY ESTIMATES, 1904.

(MESSAGE INTRODUCING.)

Read in Council, 25th March, 1905.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

Although it has not been usual in this Colony for the Officer Administering the Government to prepare a Message to accompany the Estimates the practice is quite common elsewhere and appears to me to carry with it so many advantages, not the least being that it affords the opportunity to lay the financial position of the Colony in as simple a manner as possible before the Public and at the same time assists the Colonists to take a practical interest in matters which directly concern them, that I propose to adopt it in future.

2. I have the honour to lay before you herewith the Supplementary Estimates for the year 1904.

3. The revenue for the year exclusive of Land Sales and amounts received under the Stock Ordinance produced £15,689 6s. 1d. being £603 6s. 1d. in excess of the estimate. The expenditure amounted to £14,249 5s. 2d. (£14,334 6s. less £85 0s. 10d. overpayments recovered) being £467 under the estimate. The actual excess of Revenue over expenditure on the year's operations was therefore £1,440 0s. 11d.

4. Although the revenue for 1904 was £1,705 less than the actual revenue for 1903 (£17,393 exclusive of Land Sales and Scab rate) and Customs fell short of the estimate by £1,223, or nearly 23%, the result would have been still less satisfactory had it not been for a somewhat fortunate windfall of £1,000 obtained from the sale of the lease of Bluff Cove. Attached is a comparative statement (A.) of the estimated and actual revenue under the various heads.

5. There was a considerable saving of expenditure as shewn in the comparative statement (B.) attached amounting in the aggregate to £1,418 2s. 1d., but part of this *i.e.* the Mail subsidy for the last quarter of 1904 (£625) will have to be made good to the Pacific Steam Navigation Company in 1905. If this amount be deducted the saving is reduced to £793 2s. 1d.

6. The expenditure in excess of the amount already sanctioned by Council under the Appropriation Ordinance, No. 8 of 1903, and for which you will be asked to pass a Supplementary Appropriation Bill, is £971 1s 7d. The details are as follows:—

Division I.—**Pensions £54 9s. 4d.** A compassionate allowance of £50 was granted to MRS. WILMER the wife of the late CAPTAIN WILMER, Government Pilot; and a small increase was sanctioned to the pension of MR. H. P. MILLETT, late Gaoler.

Division III.—**Colonial Secretary £104 17s. 8d.** A sum of £69 13s. 4d. was due to the COLONIAL SECRETARY for salary undrawn in 1903; and there was a further expenditure on account of the overlapping of the salaries of the late printer MR. GILBERT and the present printer MR. McCONOMY.

Division V.—**Audit £1 16s. 6d.** The audit and other incidental expenses of the accounts of the Commissioners of Currency occasioned this excess

Division VII.—**Legal £21 15s. 3d.** MR. HURST late Stipendary Magistrate, West Falkland, on being transferred to headquarters became entitled to quarters or a house allowance in lieu thereof. Government had no suitable quarters to offer him. A sum of £12 11s. 8d. is the first instalment of certain expenses in connection with the extradition of a British subject in Chile. The total cost to the Colony is likely to exceed £100.

Division VIII.—**Police. £29 15s. 3d.** This sum includes not only the clothing of the Police but that of the Gaoler, Pilot, and Prisoners. A share should have been charged to the Prison and Pilot clothing votes respectively.

Division X.—**Medical £134 15s. 2d.** The exigencies of the service demanded that DR. HAMILTON should draw full pay while acting as Colonial Surgeon after DR. KEAY's retirement and departure in March, 1904, and until DR. BORN's arrival in October last to take up his new appointment. It was impossible to leave Stanley during this period without a Medical Officer. There was an overlapping of the salary of the post of Assistant Colonial Surgeon from 1st September, the date of the arrival of DR. BOLUS in the Colony, until 28th October, when DR. BORN reached Stanley.

Division XIV.—**Miscellaneous £280 5s. 7d.** The principal items of excess were Stationery £116 13s. 3d., Ammunition £104 17s. 5d., and Fire Brigade £69 9s. 3d. Stationery:—Material imported for the Schools was inadvertently charged to this vote. There was an unforeseen expenditure of £17 on account of a Typewriter which in conjunction with certain land forms, Saving Bank stationery, Intestate and other account books as also printing paper are responsible for this excess. Ammunition:—The cost was considerably under-estimated, and there was a charge of £23 12s. 5d. which properly belongs to 1903. A sum of £22 10s was expended locally on the purchase of powder as it was being sold cheap at the Naval Works. Ammunition has hitherto been brought to the Colony without charge in H.M.'s Ships, but there is an item of £9 11s. 6d. for freight in 1904, and this item is likely to be recurrent in the future. Fire Brigade:—Now that the loan is wiped out and a Sinking Fund established the general question will receive further consideration. As the Division Miscellaneous was incorrectly totalled in the 1904 Estimates as £881 instead of £901 provision has now to be made for £20 on this account.

Division XVII.—**Public Works £239 15s. 9d.**

(A.) Roads, bridges, drains, and jetties £116 18s. 4d. It was found necessary somewhat late in the year to place certain of the roads in Stanley in a somewhat better state of repair prior to the peat carting season.

(B.) Repair of buildings and furniture.—This item also includes ‘stores’ *i.e.* all building material for repairs, alterations and small additions, galvanized iron for roofing, cement, lime, paint, stoves, nails, nuts, bolts, screws, &c. &c. The indents for stores imported in 1904 do not appear to have been sufficiently carefully scrutinized beforehand in conjunction with the amount voted by Council.

Division XIX.—**Drawbacks & Refunds £103 11s. 1d.** This excess was mainly owing to the surrender of certain old leases and the issue of fresh leases under the 1903 Ordinance. Refunds became necessary in respect of rents paid in advance under the old leases.

7. The excess of assets over liabilities, or the accumulated surplus to the credit of the Colony, stood on the 31st December, 1904 at £1,486 5s. 5d. This is exclusive of a sum of £27,289 5s. on account of Land Sales which in accordance with the Secretary of State’s instructions has now been omitted from the liability side of the statement and raises the total excess of assets to £28,775 10s. 5d. As you are aware a considerable sum accrues annually to General Revenue in the shape of interest from Land Sales investments.

8. Although the Colony is perfectly sound financially, and we are fortunate in having no Public Debt, the prospects for the future cannot be regarded as altogether encouraging. The closing down of the Naval Works, the discontinuance of Stanley as the headquarters of the Canadian Sealing fleet, and the fact that under the new Admiralty policy the summer visit of several of H.M.’s Ships to this Colony is almost certain to be discontinued, all seem to point to a probable decrease in the European population at an early date—unless some new industry is started—and a proportionate shrinkage of revenue. Under these circumstances I feel bound to emphasize the necessity that exists for the very greatest care and economy.

Swedish Marriage Regulations.

His Excellency the Governor is pleased to direct the publication of the following letter from the Swedish Legation.

April, 1905.

W. HART BENNETT.
Colonial Secretary.

LEGATION
DE
SUEDE ET NORVEGE.

59, Jermyn Street,
London S.W., February, 7th 1905.

Sir,

Certain authorities require a subject of a foreign country who may wish to contract a marriage within their jurisdiction to produce a certificate declaring that he or she is free to contract marriage with the party in question in accordance with the law of his or her native land.

In order therefore to enable Swedish subjects residing abroad to prove their capacity to contract a marriage in accordance with the law of their own country and thereby to ensure its validity in Sweden, a new Swedish law provides that certain diplomatic and consular officers shall be empowered by the King to issue certificates to the effect that the holder is unimpeded by Swedish law to contract marriage with the other person mentioned in the certificate.

His Majesty the King having by decree of November 11th ultimo empowered the chief of this Legation to issue such certificates for Swedish subjects domiciled within certain enumerated parts of the British Empire comprising your consular district, I have the honour to inform you that should a Swedish subject residing within the said district and wishing to contract marriage before any other than a Swedish authority apply to you for a certificate of the said nature, his or her request should be referred to this Legation and should be accompanied by the documents necessary for issuing the certificate, *viz*:— statements of the full names, ages, places of birth, occupations, actual residence and places of residence of both parties within the last year before the date of the application, and also whether there be relationship or connection by a marriage between the parties interested, and if so, in what degree.

In places where an official register is kept an extract of the said register should be furnished; where no such register is kept by the local authorities an attestation made by two trustworthy persons and certified by the Consulate will be accepted as proof of the required statements.

On receipt of the application with the necessary information, the Legation will cause an advertisement to be inserted in a London newspaper and in a local newspaper of the places of residence of the interested parties, and if no legal objection be proven, will deliver the certificate, which will be issued in the Swedish language, and accompanied, if so desired, by a certified translation in English.

It is desirable that the person applying for the certificate should deposit at the Consulate a sum of One Pound (£1) to cover the expenses of the Legation, which will mainly consist in the advertising. Any part of the sum not expended will be refunded.

I have, etc.,

Attestation of Documents.

Attention is drawn to the following Colonial Regulations relating to the attestation of documents :—

The attestation of Signatures to Documents can only take place upon a full knowledge or intimate belief in the genuineness of those Signatures, and, as a general rule, the Secretary of State can only undertake to attest those of Governors or Officers administering Government.

Persons, therefore, who may have occasion to instruct their friends or agents in any Colony to send to them certificates, or powers of attorney, or judicial acts, for legal use in this Country should take care to have these documents authenticated in the Colony by the Officer administering the Government.

The same rule must particularly be observed by the Governor in sending home documents which, after being verified in England, are intended to be used in foreign Countries. The last signature attached by way of attestation to any such document must invariably be one which is known and can therefore be certified to in this Department. If possible it should always be that of the Officer administering the Government.

and it is notified that intimation has been received that, save under exceptional circumstances, the Secretary of State will not feel justified in authorising the certification for legalisation of any signatures except those of the Governor or Officer Administering the Government.

Sir,

I have the honour to acknowledge the receipt of your despatch Nos. 34 and 42 of the 10th April and 18th May respectively as to the possibility of growing Sand Binding Grasses with advantage in the Falkland Islands and in reply to transmit to you for your information, copies of letters from the Director of Kew Gardens and the Board of Agriculture on the subject.

2. Both authorities recommend Marram Grass and the Board of Agriculture suggest that a trial should also be given to Sea Lyme Grass. The Board have also been kind enough to furnish particulars as to the price &c. of the seeds of these grasses. I note what you say in paragraph 7 of your despatch No. 42 of the 18th May as to the arrangements you have made for obtaining roots of Marram Grass, but in view of the infrequent communication with Lively Island I thought you might prefer to receive seeds of this grass at once, as well as seeds of Sea Lyme Grass. I am therefore requesting the Crown Agents for the Colonies to purchase and send to you as soon as possible the quantities of both seeds suggested by the Board.

STANLEY, 27th July, 1905.

Sir,

I have the honour to report for the information of His Excellency the Governor that :—

During my last visit to the West Falkland Islands (10) in or about 87 children were examined.

On the whole the answering and work done were quite as good as could be expected. Every child is getting a good grasp of reading, spelling, writing and arithmetic.

I would specially mention the children in Mr. J. Innis Wilson's "beat," they show throughout great progress and interest in their work.

In the camps visited the children seem almost without exception to take much interest in their work, and to be carrying out, under their parents guidance, the various "home lessons" left for them to do, while the Teacher is absent on the rest of his "beat." In one case a girl was bravely working through 150 sums and entering them in her exercise books.

Trade Marks.

The Attention of traders in this Colony is called to the importance of registration in the Argentine Republic of marks well known and therefore valuable. According to the Argentine law it appears to be permissible for anyone to register in the Republic a trade mark for one class or for any number of different classes of goods, provided that that mark has not already been registered in that country. The cost of registration including Agents' fees is about £10, and the time necessary to obtain registration about six weeks, and that registration gives protection for ten years.

Particular attention is called to the serious disadvantage which may result from non-registration. A person not necessarily being the real owner of a particular trade mark, but having registered that mark in the Argentine, can lay an embargo on any goods he may find bearing that mark, although such goods may have been made by the original owner of the mark and have been legitimately introduced into the country.

Registration can be affected by an Agent under a Power of Attorney (form can be seen at the office of the Colonial Secretary) which should be certified to by an Argentine Consul.

The Honourable

The Colonial Secretary.

Sir,

I have the honour to report on the examination of the Schools in Stanley, held by me 25th, 26th and 27th September,—the Merit List having already been forwarded.

I would preface my remarks by calling your attention to some important factors, bearing on the school work of last session.

(1.) The session was curtailed to one of nine months, and, as I fully expected, the Arithmetical results suffered somewhat in consequence. In this subject it is impossible to shorten the period of study and produce the same satisfactory results.

(2.) In the Government School there was a re-arrangement of the staff, consequent on the Headmaster's being on furlough; and all the teachers had at least some new work thrown on their hands. This re-arrangement if retained, will in my opinion work very satisfactorily. From experience, I would advocate that an occasional change of work is beneficial to the teacher, who otherwise is apt to fall into a groove.

Beyond this however, as I pointed out in my last Report, more time will be at the disposal of the Headmaster, which will permit of his broadening out in the higher Standards, especially after VI, where a fresh subject would help to retain the interest of the few pupils, who continue at school after passing this Standard.

(3.) The Roman Catholic School laboured, probably under greater disadvantage, the teacher taking charge in the middle of the session.

I was quite satisfied however, that each and all of the teaching staff had worked strenuously to bring their pupils up to a higher degree of efficiency; and the examination reflected great credit on them; handicapped, as they were.

Arithmetic.—The short session told most upon Standard IV, and upwards. It is generally conceded that in this subject Standard IV is a difficult Standard, entering as it were, from the Simple to the Compound Rules,—still, longer practice, and a little more freedom in using the Tables will set this right.

In the higher Standards especially the want of time for revision was obvious, affecting as it did speed, accuracy, and knowledge of method.

I would instance the Vulgar Fraction, which was really very simple, when worked as a whole, as of course it ought to have been. When broken into parts, as one and all did, it assumed such a complicated form, that while some, after considerable labour arrived at a correct solution, the majority got lost in the mazes which they had created.

Many were also uncertain about the Decimal Point

Composition.—The papers were very creditable indeed.

Geography.—In all the Standards this subject had apparently received great attention, and most of the pupils had a good grasp of the work professed.

Grammar.—The Text book was quite “at their finger ends”—the subordinate clauses in the analysis being most puzzling to the majority.

History.—If knowledge of this subject were to be judged, by what the pupils knew of the Ancient Britons, King Alfred, William the Conqueror, and the Battle of Hastings, the pronouncement could not be too favourable, but one is apt to question its value, when an almost complete ignorance is found of the “Dogger Bank incident” and the “Invasion of England.” Only one pupil No.3 showed knowledge of topics, which have been on everyone’s lips.

The Syllabus is in my opinion at fault. In a former report I expressed the opinion, that up to the reign of Queen Elizabeth, a few introductory lectures by the teacher, would almost suffice to put the pupils in possession of all they want to know, “Of old, unhappy, far-off things and battles long ago.”

We are more immediately concerned with the knowledge of the new, and deeds, that have built up our great Empire; of the questions and the problems, which to-day our statesmen, and soldiers, and sailors are trying to answer and solve.

I would specially remark on the usual excellence of the Infant Department.

This report, I consider would be incomplete, without reference to the ability displayed by the pupils, forming VII & ex VII.

No teacher could desire finer educational material. Each had individual merits, and a series of examinations might very easily alter the order of merit.

In conclusion I think these yearly examinations have had great educational value, providing a certain objective to both pupil and teacher.

To the former the necessary practice, from an early stage, in setting down their thoughts in writing has given a certain amount of facility in expression, which might not otherwise have been obtained.

I have &c.,

Examiner.

ESTIMATES, 1906.

(MESSAGE INTRODUCING.)

Read in Council, 8th September, 1905.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you herewith the Estimates of Revenue and Expenditure for the year 1906. They are in a slightly altered form to that in which they have hitherto been presented to you, the items have been numbered, and on the expenditure side an additional column has been inserted showing the actual expenditure for 1904.

REVENUE.

2. The Revenue for 1904 exclusive of Land Sales and Scab Rate amounted to £15,689. The Revenue for the current year has been estimated at £15,170, but it is not now expected to realize quite as much. The Revenue for 1906 has been estimated at £14,728. The decrease in Crown Rents is balanced by the additional interest obtained from Land Sales, and has been occasioned by the purchase of his leases by the Hon. J. J. Felton.

EXPENDITURE.

3. The Expenditure for 1904 exclusive of Scab eradication amounted to £14,249, leaving a credit balance of £1,440. The expenditure for the year 1906 is estimated at £14,524, which leaves an estimated surplus of Revenue over Expenditure of £204.

4. *Personal Emoluments.*—The total provision under 'personal' including pensions in the Estimates for 1906 amounts to £6,075 or £168 less than the estimate for the current year. A reference to Appendix 2 will shew the several additions as also the reductions which have been effected.

Division III, item 1.—The salary of the Colonial Secretary has been fixed at £500 without quarters and allowances.

Item 3.—A small addition of £6 has been made to the salary of the Government Printer as his present emolument of £7 per mensem without allowances makes him an underpaid officer.

Item 4.—Provision has likewise been made for an apprentice in the Printing Office. Should anything happen to the Printer there is no one to take his place.

Division VI, item 5.—A small sum of £20 has been inserted on account of buoys and beacons. A very much larger sum than this could be advantageously expended in this direction for the benefit of the mercantile community in this tempestuous region were funds available.

Division VII.—The post of Magistrate for the West Falkland from which source Mr Hurst has been drawing his salary for several years past although resident in Stanley has been done away with, and he has been given the conjoint appointments of Postmaster, Manager of Savings Bank, and Registrar General and draws his salary from division XV. This redistribution of work will I trust bring about a higher standard of efficiency.

Division IX, item 3.—The Matron at the Goal has hitherto been paid £24 from vote for Gaoler. This now appears as a separate item. The provision for Warder has been reduced from £84 to £24 as such extra assistance is seldom required.

Division X, item 7.—Provision has been made for a Sanitary Inspector at £24. The late outbreak of epidemic diseases in the adjacent Republics points to the necessity for greater sanitary precautions than exist at present.

Item 8.—A sum of £50 has been provided for a Trained Nurse and Midwife. This I understand to be a somewhat delicate subject more especially as the two nurses obtained in the past were, from causes which it is unnecessary to allude to here, failures. The only terms upon which I could consent to allow the sum placed upon the Estimates to be appropriated to this purpose would be that the nurse was to be entirely under the control of the Colonial Surgeon, and that the Public guaranteed a not less amount for three years, which I understand they are willing to do. Certain small fees would require to be paid by non-guarantors. I am more than satisfied that the services of a properly qualified nurse and midwife are urgently needed.

Division XIV.—A considerable saving has been effected under the item Fire Brigade as the loan has now been paid off.

Division XVI, item 3.—There is an increase under this item of £84, which raises it from £120 to £204. The previous vote of £120 was little more than sufficient to provide for the services of one carpenter who in conjunction with the Foreman of Works comprised the carpenter staff. The services of two men are altogether inadequate to cope with the very extensive repairs to Government property which are necessary and a third carpenter has been employed for some time past. Although a good deal has been effected much still remains to be done. The preparation of the timber for the new school has already been commenced by the Government carpenters and they will continue to be so employed in conjunction with certain extra hands till its completion, possibly in March next, and other work must meanwhile stand over.

Division XVII.—*Public Works Extraordinary*.—Provision has been made for a Government contribution of £500 towards the cost of a telephone to be jointly owned and erected by the Government and the Falkland Island Company Ltd between Stanley and Darwin. The Public will have the use of the wire at certain hours daily, and at certain rates which will be arranged later. I am sure that this effort to break down the isolation which exists between Stanley and different parts of the Colony will receive from all Colonists the support which it deserves, and I trust that it will merely be the commencement of a more extensive telegraphic system.

Memorandum.

The extraction of Carbonate of Soda and Iodine from the Seaweed, known generally under the name of "Varech" in France, is chiefly carried on in Brittany and to a lesser extent in the South of France on the shores of the Mediterranean.

His Majesty's Consuls at Marseilles and Brest to whom application was made, state that they have had considerable difficulty in obtaining any details of the processes employed, which seem to be of a very primitive description and not to entail any expense in the construction of furnaces &c.

The "Varech" or sea-weed is collected on the sea-shore and salt lakes adjoining, and stacked to dry. The process of incineration is very simple a trench is dug and a quadrangle of rough stones is built round it, in which the seaweed is placed and a wood fire lighted under it. As it becomes consumed it leaves a deposit of hard lumps, which is then treated chemically for the extraction of the Soda and Iodine.

I understand that large quantities of Kelp are now being worked in the Hebrides and Islands on the West Coast of Scotland, and most probably it would be possible to procure there far more complete information than has been obtained in France.

I would suggest application to the British Chemical Company of Clydebank, Glasgow, who are stated to be largely engaged in this industry. (See "Daily Mail" of the 17th of October, 1905.)

Medical and Sanitary Report on the Falkland Islands for the Year 1905.

STANLEY,

9th February, 1906.

Sir,

I have the honour to submit for the information of His Excellency the Governor the Medical Report on the health and sanitary condition of the Colony for the year 1905, together with returns appended thereto.

I have, etc.,

E. T. BORN,

Colonial Surgeon.

The Honourable

The Colonial Secretary,
Port Stanley.

VITAL STATISTICS.

1. Population.

The estimated population of the Colony for 1905 was 2,000.

There were 59 births and 11 deaths; of the latter 2 were due to accidental drowning.

The birth rate was 29·20 per 1,000 as against 32·35 per 1,000 in 1904.

The death rate was 5·40 per 1,000 as against 10·95 in 1904, being a reduction of 11 on the figures for the previous year.

The death rate was low.

2. Public Health.

During the year under review the general health of the inhabitants of the Colony has not been so good as in previous years. This may be accounted for by an epidemic of Influenza followed by one of Measles, which swept over the East Falklands.

Apart from diseases of an epidemic character, there was more than the usual amount of sickness, more particularly in the town of Stanley, where the local sanitary conditions are especially unsatisfactory.

The medical requirements of the Colony are attended to by a staff of three medical men. Of this number, two are Government Medical Officers and the third is Medical Officer to the Falkland Islands Company's Settlement at Darwin.

The total number of cases treated during the year was as follows:—

| | | | | | | | |
|----------------|-----|-------|---------------------------|-----|-----|-----|-----------|
| Port Stanley | ... | 939 | ... | ... | ... | ... | 8 deaths. |
| Darwin | ... | 16 | (No complete record kept) | ... | ... | ... | 2 „ |
| West Falklands | ... | 260 | ... | ... | ... | ... | 1 „ |
| | | Total | 1,215. | | | | |

3,887 Medicines were dispensed and 2,238 visits paid in the town of Stanley alone.

The attendances at the Surgery numbered 1,302.

During the past year an appeal was made to the Public to decide as to the propriety of securing the services of a Trained Nurse and Midwife for the Town (estimated population 800). A sum of over £50 was guaranteed towards furthering the scheme and a similar sum was granted by the Government. It was resolved to import a Nurse during the course of the present year.

The district has no hospital accommodation for cases of dangerous infectious disease. Though there has been freedom from dangerous epidemic disease during the year, a severe epidemic may come at any time, but whether the cases be few or many, there should be the necessary isolation hospital prepared to meet the requirements of all emergencies.

In view of the severe epidemic of Small Pox which prevailed at Valparaiso (Chile) and at Punta Arenas (Chile) during six months of the year under review, it was deemed expedient to quarantine all vessels from the above ports. Passengers on landing in the Colony were isolated for a period of twelve days.

On two occasions Small Pox broke out on board the Mail Steamer shortly after her departure from Port Stanley.

PREVALENCE OF SICKNESS DURING THE YEAR AND GENERAL CHARACTER
AS TO MILDNESS OR SEVERITY OF THE DISEASES PREVAILING.

Diseases of the Respiratory System.

Coryza, Laryngitis, Bronchitis and Asthma are prevalent in the Colony. The conditions of the climate and soil are favourable to such diseases.

Phthisis.

Pulmonary Tuberculosis is by no means uncommon, in the Falklands. The climatic conditions are such as tend to affect Phthisis prejudicially, namely, a damp soil and the bleakness of the climate owing to the prevailing strong, cold winds.

The influence of exposure to cold and rainy winds appears to have a greater effect in increasing the prevalence of Phthisis than the other influences which are known to affect Phthisis; namely, density of population, overcrowding, insanitation, poverty and certain occupations, all of which have a definite influence, but in the Falkland Islands these influences are less marked than elsewhere and may be excluded to a great extent, the majority of the inhabitants leading an open air life.

The Islands are however wind swept and much exposed. Although the inhabitants have endeavoured to build their dwellings almost every where in shelter, they are nevertheless much exposed to the force of the strong cold winds which prevail here at all seasons. Such exposure conduces to Phthisis mainly by inducing Catarrhs and lowering the general vitality of the inhabitants, so that many become predisposed to the pathogenic action of the tubercle bacillus.

The mean temperature of the Falklands is 42 F., but temperature has little, if any effect on the prevalence of Phthisis. In Iceland for instance, Phthisis is said to be rare. The Falkland Islands should be avoided by the phthisical.

Influenza.

An epidemic of Influenza broke out in the Colony during the months of July and August. The type was mild, the acute symptoms lasting three to four days. Nearly all the inhabitants of Stanley were laid low. There were no deaths or sequelæ. Both adults and children suffered. As regards origin, it appears most probable that the disease was carried by a Coasting Schooner from Punta Arenas (Chile), where at the time the disease was prevalent.

Measles.

An outbreak of Measles occurred during the year under review. All the cases were quite typical of Measles. There was one death due to Encephalitis. Enlarged glands and running ears were among the sequelæ.

The numbers treated were East Falklands 170, West Falklands 2.

The first case was imported into the Colony, when isolation measures were taken, (as far as was possible in a community unprovided with hospital accommodation) to prevent the spread of the disease.

Febricula or Mild Fever.

Illnesses attended with Fever of one or two days duration are common, especially in children. They are generally due to chills, digestive disorders or the result of improper food.

Diarrhœa Epidemica.

This disease is of somewhat common occurrence in the Falklands, more particularly during the Summer and Autumn months. It occurs in small outbreaks—children and adults being attacked. Nausea, vomiting, headache, prostration and diarrhœa are the chief symptoms. Pyrexia is slight or may be absent. Cases last from one to four days. Recovery is the rule. The disease is of more frequent occurrence in the town of Stanley than in the outlying settlements. There is no common factor in the way of food or water. In some cases spring water and in others rain water being drunk. Cases have been noticed to occur with greater frequency after a heavy fall of rain. The disease is probably caused by a poison produced by an unknown organism which has its habitat in polluted and suitable soil, the virus being absorbed by milk and other food stuffs.

Diseases of the Digestive Tract.

Constipation and Dyspepsia are unusually prevalent in the Colony, The causes may be enumerated as follows:—

1. An insufficiency of fresh vegetables and fruits.
2. An almost exclusive meat diet, together with the consumption of large quantities of strong tea and coffee.
3. The prevalence of dental diseases.
4. The absolute monotony of the food which is obtainable, a sameness in the food tending to exhaust the manufacture of the particular juices required for its digestion.

An advantage may be gained by cooking the food differently, but the majority of the inhabitants have not as yet acquired the art of cooking.

5. Inordinate indulgence in alcoholic beverages.

Dental Diseases.

Dental diseases are prevalent among all classes of the community. There is perhaps no single condition more inimical to physical well being, especially in adolescence, than defect or disease of teeth. Much of the disease is due to defective diet of children, prenatal and postnatal, the consumption of large quantities of meat (the cheapest article of food procurable) and the absence of lime salts in our potable water. In many cases it is certain that much of the loss and decay could have been prevented by the exercise of ordinary hygienic care of the mouth and teeth.

His Excellency the Governor on being apprised of the urgent need that existed in the Colony for the services of a Dentist, imported at his own expense a qualified gentleman from Monte Video.

Rickets.

The majority of the children here between the ages of twelve months and two and a half years are attacked by this disease. The children of the poor are more frequently affected than those of the richer classes, but the latter are not exempt. Laryngismus Stridulus (childcrowing) is a frequent accompaniment. The chief element of causation is undoubtedly defective hygienic conditions, especially in the matter of food and air supply.

Lactation is frequently continued far into the second year, or the mother's milk is substituted for infants food, of which a large number contain a high percentage of starch and before the infant is able to digest starch. The most frequent cause is due to the ingestion through ignorance of the parents, of meat, bread and potatoes or other adult food, either alone or in addition to the mother's milk or the artificial substitute.

Fresh cows milk is not, as a rule, procurable during the winter months, and then only at a prohibitive price. The milk, when procurable, is moreover poor in quality with insufficiency of fat. The prolonged use of sweetened condensed milk together with the absence of lime salts in our potable water also operates deleteriously.

Again, owing to the bleakness of the climate, many mothers confine their infants to the house during the earlier months of life.

There can be little doubt that in these several deficiencies lies the cause of Rickets in the great majority of the cases.

Cancer.

No case of malignant disease has been met with in the Colony for very many years.

The efforts that have been made to show that Cancer is more prevalent in low lying damp situations with clay soils, such as, for instance, are met with in this Colony, tend to prove that soil has no bearing whatever upon the disease.

Rheumatism.

Rheumatism in its chronic form, more particularly Muscular Rheumatism is endemic, while Acute Rheumatic Fever is rarely met with in the Colony.

The humidity of the climate combined with an excess of nitrogenous food conduces to Rheumatism.

Lunacy.

Three cases of Insanity occurred during the year. One case of Delusional Insanity, which at no time required to be put under restraint and which subsequently recovered. Two cases of mania.

The cases of mania were confined to the gaol pending their removal to England for Asylum treatment.

Vaccination.

During the year under review the number of vaccinations performed in the Colony was 148; of this number the Public Vaccinator at Port Stanley performed 131, the number performed on the West Falklands was 12 and the number performed at Darwin being 5.

For many years past the Vaccination Ordinance had not been enforced. During the year 1905 efforts were made to carry out its provisions. The results have on the whole been satisfactory. The vaccinations are chiefly primary infants. There is no serious opposition to the enforcement of the Vaccination Act.

The number of successful cases may be gathered from the following table:—

Vaccination Return for the Colony for the year 1905.

| Stanley | 131 |
| West Falklands | 12 |

Meteorology.

The total rainfall registered at Port Stanley during the year was 27·635 inches. The number of rainy days was 223.

The mean temperature was 42° F. with a maximum of 66° F. and a minimum of 29° F. Stanley is situated, Latitude 51° 41" South, Longitude 57° 15" West.

Sanitation.

A sanitary condition of the Town of Stanley may be said not to exist; the sanitary arrangements being most primitive.

The number of dwelling houses in Stanley is 172, the number of persons in each house averages five. (population 800 approx.)

Except in certain cases, the Town cannot be said to suffer from overcrowding, but there is a necessity for more housing accommodation at a low rental.

The majority of the houses are constructed of wood, more like cottages and there is plenty of air space around them. But they are far from perfect. For instance, they are not provided with bathrooms and there is the old grievance that the inhabitants do not ventilate their houses sufficiently. For hot water the inhabitants have ordinarily to depend on the use of the kettle.

The houses are built on damp sites without drainage and without a damp proof course. Few have any paved area behind, the backs of the houses abutting on the bare uneven earth.

The majority of these houses were built apparently before drains had been constructed and a number of houses still suffer from the nuisance inseparable from absence of house drains. The result of these inconveniences is that waste water and household slops; which ought speedily to be removed, are retained within the dwellings, thus seriously endangering the wholesomeness of the tenements.

There are many houses in bad repair, the roofs leaky, the windows and doors dilapidated and the floors damp with light and ventilation defective.

There are no building by-laws in force.

The soil in the neighbourhood of many of the houses is extensively polluted owing to the existing insanitary methods attending the disposal of night soil. The garden space attached to the majority of the houses is not sufficient to permit of the continued disposal of excreta, year in and year out, without creating a nuisance arising from filth accumulation.

The soil is sewage sick; and the inhabitants live in houses rendered damp by contaminated and undrained subsoil.

The fact that the Town was formerly built on soil which had not been inhabited previously must be borne in mind. It explains why the fatal consequences of insanitation have not as yet made themselves felt more emphatically and thus accounts for the comparatively favourable results of the vital statistics. The natural salubrity of these wind swept South Atlantic Islands is a further factor.

The difficulties which arise from want of garden space can be overcome if the sanitary authority were to provide a spare corner of ground, at some little distance from Stanley, where excreta can be safely disposed of. A plot of land 600 square yards equal to about $\frac{1}{8}$ of an acre is sufficient for the disposal of the excreta of 100 persons per annum.

Dumping is done without any sorting and from open carts. Therefore the dust and lighter articles are blown away for a distance. The cinders and refuse are thrown into uncovered receptacles so that a good deal escapes and is blown about. There is, in consequence considerable risk of water pollution; fortunately there is plenty of wind and of open space for it to undergo the process of natural purification.

The majority of the house drains leading into the public drains are not satisfactory according to modern standards, the main drains themselves leave a good deal to be desired. Many of the drains are merely gutters, which are so unevenly laid, that after rain, small stagnant pools are to be seen through their whole extent, or the pools may consist of slop water thrown out from the adjoining dwellings.

During the year under review, a new main drain was constructed. which marks a step towards sanitary progress.

The population of Stanley are mainly dependent on the rain fall for their water supply which is collected from the roofs in galvanized iron tanks and barrels. As many of these tanks are not properly covered in, there is considerable risk of water pollution.

In the comparatively dry months of Summer the rain water supply frequently runs short, the inhabitants then obtain their water from the public reservoir. The public water supply is derived from a hill spring which reaches the reservoir by gravitation. There is no system of filtration. The water is discoloured and contains traces of vegetable acids from the decomposition of peat. An analysis of the water, however, showed that it is a good potable water.

The town of Stanley requires proper scavenging and an improved pail system and in general needs some approach to efficient sanitary administration, which is now wanting. This is however, impossible without adequate financial aid. The authorities find it difficult to enforce hygienic regulations among a population that seem to fail to realize the risk of infection.

Colonial Surgeon.

Annual Report of the Chief Inspector of Stock, for the year 1905.

Stanley,
Falkland Islands,
16th March, 1906.

SIR,

I have the honour to submit my Annual Report for the year ending the 31st December, 1905.

Sheep.—The total number of Sheep in the Colony at the end of May 1905 was 700,894. This represents an increase of 1,450, taking into consideration that one Farm, capable of grazing 3,000 sheep, was not stocked.

Wool.—The clip was in some cases below the average as regards weight, but was good and clean, and realized an appreciable advance on last season's prices.

It is most satisfactory to note that in cases where Farmers have imported Rams, and where attention has been paid to the selection and culling of Ewes, good results have been obtained. For instance, the yield of wool in some flocks within the last few years has risen from 5 to $8\frac{1}{2}$ lbs per sheep. But there is considerable room for further improvement, and Farmers would do well to import more pure blood, or even pay a fair price for locally bred Rams, and so establish their flocks on a better foundation.

There are two pure bred flocks in the Islands, viz.—Romney Marsh, at Darwin, and Lincolns, at Dunnose Head. The Romneys in my opinion are to be preferred as best suited to all the conditions of the camp. The Lincolns do not seem to thrive or increase so well on wet as on dry camp, but are wool producers in suitable places. Several Farmers have imported Merino Rams. I do not think that they will improve their flocks greatly by this cross, if carried to any extent.

Shropshires have also been imported and the progeny from the pure bred are very good. This class of sheep is a fine mutton sheep but not a wool producer.

Lambing.—The results in this respect were satisfactory, for while the percentage in some flocks was as low as 50%, the percentage in the majority of cases was 75% to 88%.

Dipping.—Although the work of dipping the sheep was generally well done, lice-infested sheep were found on several new Stations. I am convinced that if Farmers would only take a little more care when dipping their flocks they would not have much trouble with lice or ticks.

There are four essentials if success in dipping is to be secured.—

1. A thorough muster of all sheep.
2. A properly prepared dip.
3. The sheep must be dry before dipping.
4. The weather must be suitable.

The Live Stock imported during the year were as follows:—

5 Romney Marsh Rams from England.
52 Horses from Patagonia.

Live Stock exported:—

872 to Punta Arenas.
157 „ Gallegos.

An Ordinance amending the Live Stock Ordinance, 1901, and making provision for the diminishing of Geese came into force on 1st October. The number of beaks to be purchased for the year for the East and West Falklands, respectively, were :—

East Falklands, 25,000.

West Falklands, 25,000.

The number purchased on the—

East Falklands was 24,530.

West Falklands „ 248.

The grass seed sowing experiment is not being followed up as energetically as it should be. The few Farmers who have sown seed have had very fair results. I am persuaded, from what I have seen, that if the sowing was carried on systematically on the good camp, in sheltered places, &c., and not in peaty land, results would be obtained which would considerably improve the carrying capacity of the land. The experiments at Darwin, Hill Cove, and Lively Island, have been eminently successful

Stanley, 8th March, 1906.

Sir,

I have the honour to report that in the month of January of this year, I made a complete audit of the transactions of the Commissioners of Currency, to the end of the year 1905.

1. The following is the description and value of the Notes I found in the safe of the Commissioners of Currency :—

| | £5. | | £1. | | 5/-. | | Value. |
|-----------|------------|-----|-------------|-----|-------------|-----|--------------|
| Unsigned | 400 | ... | 1900 | ... | 3600 | ... | £4800 |
| Withdrawn | 2 | ... | 240 | ... | 1800 | ... | 700 |
| Total ... | <u>402</u> | ... | <u>2140</u> | ... | <u>5400</u> | ... | <u>£5500</u> |

2. The Description and value of the Notes in circulation, and the amounts of newly signed Notes issued each year to the Colonial Treasurer, were as follows :—

| Year. | | £5. | | £1. | | 5/-. | | Value. |
|------------------------|-----|------------|-----|-------------|-----|-------------|-----|--------------|
| 1899 | ... | 100 | ... | 500 | ... | — | ... | £1000 |
| 1900 | ... | 100 | ... | 500 | ... | — | ... | 1000 |
| 1901 | ... | 200 | ... | 1000 | ... | 2000 | ... | 2500 |

| Total ... | ... | <u>600</u> | ... | <u>3100</u> | ... | <u>2400</u> | ... | <u>6700</u> |
| Withdrawn ... | ... | <u>2</u> | ... | <u>240</u> | ... | <u>1800</u> | ... | <u>700</u> |
| Leaving in circulation | | <u>598</u> | ... | <u>2860</u> | ... | <u>600</u> | ... | <u>£6000</u> |

3. The total number of the different values received by the Commissioners of Currency was, 1,000 Five Pound Notes, 5,000 One Pound Notes, and 6,000 Five Shilling Notes. There was a fresh issue of the last named, of a different colour, as it was found that the Green Notes by lamplight were liable to be mistaken for one Pound Notes. The total value of the Notes received amounts to £11,500.

4. The following Advances have been made to the Note Fund and were repaid as follows :—

| Year. | | Advance. | | | | Repayment. |
|-------|-----|----------|----|---|-----|------------|
| 1899 | ... | £17 | 2 | 6 | ... | — |
| 1900 | ... | 38 | 0 | 6 | ... | £ 9 17 11 |

| 1904 | ... | 76 | 16 | 7 | ... | 40 3 0 |
| 1905 | ... | — | — | — | ... | 36 16 7 |

5. The Profit and Loss for each year since the establishment of the Note Fund stands thus :—

| Year. | Profit | Loss. |
|-------|----------|----------|
| 1900 | ... | £45 5 1 |
| 1901 | ... | 28 17 11 |
| 1902 | ... | 13 11 1 |
| 1903 | £25 2 8 | ... |
| 1904 | 62 17 2 | ... |
| 1905 | 80 14 11 | ... |

The Profit and Loss includes the One per Cent on the investments placed to the Credit of the Depreciation Fund.

6. There is now £3,000 in Gold deposited in the Currency Commissioners' Safe and the Investments are as they appear in the Gazette.

7. The sum of £106 ls. 1d., now stands to the credit of the Depreciation Capital Account, of which £98 6s. 7d. is invested in Lagos Government Scrip and £7 14s. 6d. is the dividends on the said Investment.

SUPPLEMENTARY ESTIMATES, 1905.

(MESSAGE INTRODUCING.)

Read in Council, 24th March, 1906.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you herewith the Supplementary Estimates for the year 1905.

2. The revenue for the year, exclusive of land sales and amounts received under the Live Stock Ordinance, produced £15,228 17s. 4d., being £58 17s. 4d., in excess of the estimate. The expenditure amounted to £14,825 6s. 5d., being £413 0s. 3d. under the estimate. The actual excess of revenue over expenditure on the year's operations was, therefore, £403 10s. 11d.

3. Unfortunately the revenue derived from Customs (£4,761) fell short of the estimate (£5,360) by £598 17s. 11d., while the receipts under licenses and internal revenue were less than the estimate by £61. The decrease of £255 under Rent is accounted for by the sale to the Hon. J. J. Felton of his leases, and is adjusted by the increase under the head of Interest. The increase of £379 in excess of the estimate under the head of Fees of Court is explained by the probate duties received from the estate of the late Mr. H. Dean. It is satisfactory to note that there is a small increase of £175 under the head of Post Office. Attached is a comparative statement (A) of the estimated and actual expenditure under the various heads.

4. Notwithstanding the very greatest care and economy the expenditure amounted to £14,825. This includes an item of £973 15s. 7d., under Public Works Extraordinary, for the new School. The comparative statement (B) attached, shews in detail the savings and overpayments under the different heads.

5. The expenditure in excess of the amount already sanctioned by Council under the Appropriation Ordinance No. IX. of 1904, and for which you will be asked to pass a Supplementary Appropriation Bill, is £449 0s. 9d. The details are as follows.—

Division I.—**Pensions £8 12s. 3d.** Mr. G. Travis, late Treasurer and Collector of Customs, became entitled to a small pension.

Division IV.—**Treasury £30 8s. 10s.** Certain clerical assistance was necessary in the Treasury during the early part of the year.

Division IX.—**Prisons £11 15s. 1d.** The maintenance of certain lunatics caused this excess. As we have had to receive no less than three lunatics for treatment during the last twelve months, and all have had to be removed to England owing to lack of suitable accommodation, a charge for the cost of their maintenance is pretty certain to become recurrent.

Division X.—**Medical £100 7s. 2d.** Owing to a severe outbreak of smallpox at Punta Arenas and Valparaiso it was necessary to enforce quarantine, and to establish a quarantine station on the north side of the harbour. These precautionary measures undoubtedly prevented an outbreak in Stanley where little attention has hitherto been paid to vaccination, and the Colony is proportionately indebted to the Colonial Surgeon, Dr. E. T. Born. Mention should likewise be made of the indefatigable energy of the Chief Constable, Mr. W. Atkins.

Division XI.—**Education £107 9s. 1d.** This sum includes the expenses of sending Mr. Durose to England in order to attend an academical course which was recommended by the Board of Education, and to make himself acquainted with the improvements that have been effected of recent years in school work there.

Division XVI.—**Colonial Engineer £14 16s. 9d.** The services of an additional carpenter were necessary in order to effect certain extensive and much needed repairs to Government property.

Division XVII.—**Public Works Extraordinary £73 15s. 7d.** The estimate of £900 (on account) appearing under the head of New School was exceeded by this amount.

Division XIX.—**Drawbacks and Refunds £65 16s. 0d.** A remission of £88 17s. 8d. had to be made to Mr. Greenshields on the completion of the purchase of Whittington's Rincon and the vote became overdrawn in consequence.

Division XX.—**Currency Note Fund £36.** Disbursements on this account have hitherto been made under audit, but it is considered better that they should appear under a separate item.

6. The excess of assets over liabilities, or the accumulated surplus to the credit of the Colony, stood on the 31st December, 1905 at £41,726 5s. 11d. Although the financial condition of the Colony is quite sound it is somewhat difficult to see how its future development and expansion in several much needed directions is to be brought about unless other sources of revenue are rendered available.

7. The annual estimated expenditure (for 1906 £14,524) has now been reduced to the lowest figure compatible with efficiency, and but few savings, if any, need be expected under the several divisions, leaving as you will observe, with an estimated revenue of £14,728 a small margin of £204 only in favour of revenue. The question must therefore necessarily arise at a non-distant date as to what provision should be made for strengthening our position. A balance of £200 offers but little guarantee that our financial equilibrium will not be upset by some unavoidable unforeseen expenditure. Last year a sum of £5,432 was derived from Customs, Port and Harbour Dues, Licenses and Internal Revenue. I have purposely omitted from this calculation the Tax on Land, generally known as the Scab Rate, as it was imposed for certain specific purposes and is only contributed to by one class of the community. On the basis of a population of 2,016 this would work out at about 53/10 per caput. This compares favourably with the taxation per head of population in the Commonwealth of Australia and New Zealand.

8. A brief retrospect for 1905, with a reference to one or two matters of general importance may not be out of place at this particular juncture.

PUBLIC WORKS.

9. During the year under review Barrack Road was broadened, drained, and metalled throughout, and a six inch drain pipe laid along the east side with separate chambers opposite the several dwelling houses. Two thirds of Hebe Street was likewise metalled. With a total available sum of £500 only to meet the expenses of both labour and material, and a staff of five to six labourers, at a yearly salary of £78 each (the current rate of wages), and these liable to be called off periodically to other equally important work, it is impossible to make much headway. A section of the seawall in the Dockyard has been rebuilt, but its general condition from one end of the town to the other is far from satisfactory.

10. Many of the Government Buildings have been overhauled and painted. A much needed room was erected at the Deanery, a very small and inadequate hot house at Government House was enlarged and added to, a considerable extension was made to the parcel post room at the Post office, the Treasurer's office was enlarged, certain additions and alterations were made to the Colonial Surgeon's quarters, and extensive repairs effected to the Colonial Secretary's house which is now in thoroughly good order.

EDUCATION.

11. The foundations of the new school were commenced on the 1st August, and by the end of September were practically completed. There was an unforeseen delay in the arrival of the timber from England, and the frame of the building was not erected until December. When completed the total cost should not exceed £1,600, including the £974 already spent. The Government have very seriously at heart the improvement of the present educational system as has already been shewn by the visit of Mr Durose to England. It is also hoped that an Inspector from the Board of Education will visit this Colony during the next few months, and although certain improvements in the curriculum have already been effected, such as the introduction both in Stanley and in the Government Camp Schools of the monthly Victorian School Readers, which have been kindly supplied by the Minister for Education in Melbourne, it is anticipated that the experience and advice of the Inspector will materially assist the cause of education in this Colony.

12. I desire to express my satisfaction at the manner in which Mr. J. Slater performed the duties of Schoolmaster in Stanley during the seven months Mr. Durose was absent from the Colony, and at the same time place on record my appreciation of the efforts made by the several Itinerant Schoolmasters to further the cause of Education in the Camps of the East and West Falklands.

COMMUNICATIONS.

13. The Colony is still suffering owing to its isolation from the rest of the world, while its interinsular mail and passenger service leaves much to be desired. Negotiations were lately opened up between the Government and the Directors of the Pacific Steam Navigation Company and the Falkland Islands Company in London, and the position placed before them, but the question of a local steamer vice the present irregular schooner service has once more lapsed—temporarily at any rate—owing to lack of the necessary funds. The Government was however successful in obtaining a small reduction on the through freight on wool from the different settlements in this Colony to London.

PASTORAL.

14. Sheep farming, the main, indeed the only industry of the Colony, has proceeded satisfactorily during the year. An open winter was followed by a successful lambing, and by a continued high price in wool. Several applications have been received from Farmers for the purchase of their leases under the Lands Ordinance 1903, and these have been favourably considered and sanctioned. There are one or two points however to which a number of the Farmers do not appear to me to have given sufficient attention. I refer to the introduction of fresh stock, in conjunction with the careful selection of what they have already got, and to the planting of extended areas of imported grasses. To those who are inclined to be dubious on these questions the results already obtained by Mr A. L. Allan, the Falkland Islands Company's Manager at Darwin, and others, are worthy of consideration.

15. In South America and elsewhere great advances have been made within the last few years in the matter of canneries, and freezing establishments, and a more profitable market than heretofore has thus been found for surplus stock. There seems to be no reason why an enterprising firm with the co-operation of Farmers should not find a remunerative field in the Falklands, and I am glad to think that there is some prospect of a meat preserving factory being started at a non-distant date.

CAPE PEMBROKE LIGHTHOUSE.

16. All masters of vessels and the seafaring community generally will be glad to learn that the Board of Trade have decided to substitute a new lighthouse at Cape Pembroke with a modern dioptric light in place of the present one which was erected about 1850. With a good light, a well-found steam tug, and expeditious repairs, distressed vessels from the Horn and elsewhere ought to make Stanley a more frequent port of call than has been the case of late years.

SOUTH GEORGIA.

17. The negotiations which have been proceeding for some months past with regard to our Dependency of South Georgia have resulted in the lease to the Argentine Fishery Company of Buenos Aires of a portion of Grytviken Harbour as a depôt for their whaling operations. The Company has amongst other things undertaken to erect and maintain two lights at the entrance to Cumberland Bay and Grytviken Harbour respectively, and to keep detailed meteorological observations, copies of which will be transmitted to the Government. Application has likewise been made by a second Company for certain grazing, whaling, and mineral rights in and around South Georgia and these are being favourably considered by Government.

The late Mr. Matthew Brisbane.

M.P. 106/1906.

ADDRESS.

MY LORD, LADIES AND GENTLEMEN.

We are assembled here to-day on the site of the old capital of this Colony, at a place which is brimful of historical interest in as much as it was successively the seat of Government in these Islands of three great colonizing nations, the French, the Spanish, and the British, in order to do honour to the memory of a man who in his day and generation served his country with a devotedness, a courage, and a daring which every loyal British subject of His Majesty must admire and revere.

Should corroborative evidence be necessary it is supplied by the old oak headstone itself which was erected by his appreciative fellow countrymen nine years after his death, and which, notwithstanding over sixty years of Falkland weather, is still clearly decipherable and runs as follows:—

“To the memory of Mr. Matthew Brisbane who was barbarously murdered on the 26th August, 1833.

“In the Command of the Beaufoy Cutter he was the able and zealous companion of Captain James Weddell, during his enterprising voyage to beyond the 74th degree of South Latitude in February, 1823.

“His remains were removed to this spot by the Crews of H.B.M. Ships Erebus and Terror, on the 25th August, 1842.”

In this connection it is interesting to look back to Captain Weddell's own account of his voyages from which I take the following extract:— “On the 17th September, 1822, I gave Mr. Matthew Brisbane his instructions, and at five o'clock in the afternoon the vessels (the Brig Jane, 160 tons, and the Cutter Beaufoy, 60 tons) weighed and made sail out of the Downs.”

Mr. Brisbane therefore was the coadjutor of Captain Weddell in his celebrated voyages to southern latitudes in 1822, 1823, 1824, during which period he twice visited the Falklands.

In 1831 Mr. Brisbane proceeded to Port Louis as the Agent of Mr. Lewis Vernet who had colonized the East Falkland, and had been appointed Governor by the then Buenos Aires Government.

On the 31st December of that year, Captain Duncan, of the United States cruiser Lexington, paid a visit to Port Louis, as a consequence of the detention some months previously of certain American sealers by Mr. Vernet, who at this time was in Buenos Aires. Captain Duncan destroyed the Settlement, and made prisoners of Mr. Brisbane and others, and conveyed them to Buenos Aires, where they were handed over to the Government.

On 2nd January, 1833, Commodore Onslow, in H.M.S. “Clio,” hoisted the British flag at Port Louis, and left it in charge of Mr. Dickson, Mr. Vernet's Agent. In April of the same year, Mr. Vernet despatched his principal Agent, Mr. Matthew Brisbane, to Port Louis to take charge, and on 26th August, 1833, to quote Mr. Vernet's own words, “Three gauchos and six Indians, assisted by “some deserters from vessels who supplied them with firearms, murdered my Agents Messrs Brisbane and Dickson.” This is briefly the story of the events of 1831-1833, and we are here to-day to formally place in position a new oak tombstone, on the reverse side of which is affixed the original tablet somewhat restored, and, in doing so, do honour to the memory of an Administrator whose task was an extraordinarily difficult one, and who while endeavouring to do his duty was barbarously murdered.

“Not once or twice in our rough island story
The path of duty was the way to glory.”

Report on Peat from the Falkland Islands,

by PROFESSOR WYNDHAM R. DUNSTAN, M.A., F.R.S., Director.

IMPERIAL INSTITUTE,

SOUTH KENSINGTON, LONDON, S.W.

In a despatch, No. 19 dated the 28th February, 1905 and addressed to the Secretary of State for the Colonies, the Governor of the Falkland Islands drew attention to the extensive deposits of peat which occur in the Colony, and suggested that it might be possible to develop these resources with the view of supplying the present demand for fuel in the Southern portion of the mainland of South America.

In forwarding to the Imperial Institute a copy of this despatch, the Colonial Office requested that any available information relating to the methods employed in compressing peat and making peat briquettes should be supplied to the Governor.

This information was furnished by the Imperial Institute in a letter dated the 6th April, 1905, in which it was suggested that a representative sample of the peat should be forwarded for examination in order that its composition and calorific value could be determined and its suitability for technical use ascertained.

Three samples of peat taken from depths between one and nine feet were accordingly sent to the Imperial Institute and are referred to in a letter from the Governor dated the 23rd May, 1905.

The samples have been examined in the Scientific and Technical Department of the Imperial Institute and have furnished the following results:

SAMPLE NO. 1.

This sample weighed about 10 lb. and was described as "Brown mossy peat; the first sod obtained after removing the top sod."

The material consisted of the dried and partially decayed remains of the moss from which the peat is formed. It was very loosely compacted and could be readily disintegrated. This kind of peat is chiefly utilised as litter for stable use in place of straw. In Europe there has been a constantly increasing demand for this material, which, on account of its absorbent and antiseptic properties, forms a cleaner litter and, when spent, is a more valuable manure than straw litter.

SAMPLE NO. 2.

This sample weighed about half a hundredweight and was described as "Black peat, one to two years old, obtained at a depth of from two to four feet."

The material consisted of blocks of peat which were black and dull, and contained little plant remains still showing structure. It contained a quantity of the soil in which the moss had grown, as is shown by the higher percentage of ash, and would be described as "mud peat."

SAMPLE NO. 3.

This sample weighed about 20 lb. and was described as "Black peat obtained at a depth of nine feet."

This peat contained more plant remains still showing signs of structure than No. 2 and this fact may indicate its derivation from a drier locality in which decay has not been so rapid.

RESULTS OF EXAMINATION.

The following are the results of the chemical examination of the three samples of peat.—

| | I. | II. | III. |
|---------------------------|---------------|---------------|---------------|
| | Per cent. | Per cent. | Per cent. |
| Ash | 2·71 | 6·52 | 2·72 |

| | Calories* | Calories* | Calories* |
| Calorific value | 4728 | 4241 | 4033 |

* 1 calorie is the amount of heat required to raise 1 gram of water from 0° to 1° C.

The ash was analysed but the percentages of potash, lime, and phosphoric acid, are too low to make the ash of any value as a fertiliser.

CONCLUSIONS AND RECOMMENDATIONS.

Compared with peat from other sources, No. 3 of the present samples may be said to be of the best quality, whilst No. 2 is of average quality. Analyses of European peat show that the amount of mineral matter (ash) present varies from 1 to 25 per cent, the average being about 5 per cent. The calorific values, determined by the bomb calorimeter, of the samples (Nos. 2 and 3) which are suitable for fuel were 4241 and 4033 respectively. The calorific value would be increased by briquetting since in this process a large proportion of the water would be eliminated.

The suitability of Falkland Islands peat for briquetting purposes can only be definitely determined by practical trials, but according to the Canadian report, of which a copy was forwarded by the Imperial Institute with the letter of the 6th April, 1905, there is no difficulty in carrying out the process of briquetting peat provided that the latter is of good quality. From the results obtained it seems likely that the Falkland Islands peat will prove to be quite satisfactory for the purpose.

Education Report, 1905.

1. During the year, Mr. Durose, the Government Schoolmaster in Stanley, was granted leave of absence to enable him to visit England and become personally acquainted with the progress of education at home.

2. During his absence, the Senior School was carried on by Mr. Slater, one of the Government Travelling Teachers on the West Falklands. His "beat" for the time being was divided between the other two Teachers.

3. The Annual examination of the School in Stanley was held by Alex. Moir, M.A., the Falkland Islands Company's Schoolmaster in Darwin. His report is in the hands of the Government.

4. The Schools in Stanley were closed for a time near the end of the year through the advent of an epidemic of measles.

5. The new Government School building was commenced during the year and will be a very great advance over the present Senior School—originally built for a coal store.

6. The Victorian school paper, published there monthly, was introduced into the Senior school and sent to the camp Teachers during the year. It has excited great interest among the children, more especially in the camps; and will be of much assistance in giving the children a greater interest in their reading and in other parts of the British Empire. It was also proposed to introduce into the schools a Manual on Health and Temperance; this also will meet a great want in the education of the children; they are now in use.

7. An Inspector is expected to visit the Colony during the year 1906. His report will be of much assistance in improving and expanding the education of the children.

8. The Average attendance, to all intents and purposes, corresponds closely with the number on the rolls.

9. The parents, almost without exception, do their utmost to second the endeavours of the Teachers.

10. The latter are working most satisfactorily—as can be seen from their monthly Itineraries sent in for the information of the Governor, and from the annual examination of the children by the Inspector.

11. In Lafonia, the Falkland Islands Company's camps, the Teachers are provided by the Company. The Darwin school under their Schoolmaster, Alex. Moir, M.A., was carried on as usual. But in the camp, for six months, there were no Teachers, one having left through ill-health and the other having resigned. Two Teachers have, however, arrived from home and are at work (April, 1906).

12. There is not a single "camp" child, capable of receiving education, who is not being taught, either by the travelling Teachers, or privately—children of the Sheep Farmers or Managers: with, however, the following exceptions, one family on Bleaker Island and another on Speedwell Island; but the parents in each case are doing what they can to educate their children themselves.

BRITISH VICE-CONSULATE,

STAVANGER, April 14th, 1906.

Your Excellency,

I beg to excuse that I have not before been able to reply to Your Excellency's despatch of March 6th, because I had to gather informations necessary.

The burning of seaweed takes place on the coast from Mandal in South to Lofoten in North, however it is specially in Lister and Jæddern the largest quantity is burnt.

Three agents living at this place, Fred. Wattne, Andreas Somme, and J. C. Jonasen, are buying the ashes of the seaweed for firms in Glasgow, viz:—

The Scottish Acid and Alkali Co. Ltd., Glasgow,
British Chemical Co., Glasgow,
Mr. H. C. Fairlie & Co., Glasgow.

The price was last year £5 per ton and there were exported from Stavanger 1,581 tons. From Christiansund and Aalesund about 400 tons, in all from Norway 2,000 tons amounting to a value of £10,000.

As Your Excellency will learn from this fact there is no comparison between the profits gained by the burning of seaweed with those gained by fisheries or agriculture in those districts, where the burning of seaweed takes place.

I have, &c.,

(MESSAGE INTRODUCING.)

Read in Council, 10th August, 1906.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you herewith the Estimates of Revenue and Expenditure for the year 1907.

REVENUE.

2. The Revenue for 1905, exclusive of Land Sales and Scab Rate,—the latter is a misnomer which I will refer to later—was £15228 17 4. The Revenue for the current year has been estimated at £14728, and there is a prospect of its somewhat exceeding this amount. The Revenue for 1907 has been estimated at £15504. This estimated increase over 1906 of about £800 is to be attributed mainly to the lease of our Dependency of South Georgia; to an anticipated increase under Division IV, item 1, Supreme Court, which has hitherto been somewhat underestimated; to the removal of the prohibitive tax on seal skins imported into this Colony for transshipment or exportation; to a slight but general improvement in trade; and to a small increase on the duty on spirits which are overproof.

3. Division I, item 1,—duty on spirits. It has been decided to at once introduce a short Bill to slightly amend the Tariff Ordinance. This measure will provide for an increase pro rata on the duty on spirits which are above proof. It has been ascertained that much of the whiskey and rum imported into this Colony is very much above proof, while the spirits sold in the public houses are seldom proof, and frequently many degrees below proof. The section of the community reaping advantage from this state of things is not the consumer but the importer, and a more equitable adjustment is considered advisable. It is anticipated that the revenue may benefit to the extent of £100 owing to this amendment of the Tariff, and the estimated duty on spirits has been increased accordingly.

4. The decrease under Division VII, item 1. Rents, Crown Lands, is to a certain extent adjusted by the increase in Interest from Land Sales Fund under Division V, item 1, owing to the purchase of their leases by certain lessees under section 14 of the Land Ordinance, 1903. To avoid future misapprehension however it is only right that I should point out that under the terms of the above mentioned section the interest received during the first year from the 10% of the purchase money which is paid down on registration of the application is considerably less than the annual rent obtained from the lands. Although this anomaly adjusts itself later, *i.e.* at the termination of the purchase it may be necessary hereafter should applications for large purchases of land continue to be made to seriously consider the desirability of allocating a portion of the purchase money for general revenue purposes in order to make good the decrease in rents and thus maintain our financial equilibrium.

5. Division X,—Live Stock Ordinance (formerly Scab Rate and Fines). Here I may mention that I consider it desirable to discontinue the use of the words 'Scab Rate,' because, to say the least, they are both incorrect and misleading. The rate in question, which has always been a tax on land, was instituted for the purpose of giving effect to the provisions of Ordinance No. 4 of 1895 which dealt with stock and the measures necessary for the eradication of Scab. Hence doubtless the use of the words 'Scab Rate.' This Ordinance was however repealed by the 'Live Stock Ordinance, 1901,' and the perpetuation of such a misnomer as 'Scab Rate' in a pastoral Colony where there is no scab, and where none has existed for many years past, not only casts a serious reflection on the administration which is quite undeserved and which it is desirable to remove, but is detrimental also to the best interests of the Farmers. I propose therefore to refer to the tax in future, as I have already done in the 1907 Estimates, as the land tax under the 'Live Stock Ordinance, 1901.'

EXPENDITURE.

6. The Expenditure for 1905, exclusive of disbursements under Live Stock Ordinance amounted to £14825, leaving a small credit balance of £403. The Expenditure for the year 1907 is estimated at £15250 thus providing an estimated surplus of Revenue over Expenditure of £254. A reference to Appendix 2 will shew the several additions as also the reductions which have been effected.

Division III, item 4.—Mr Kirwan the former Office Keeper and Messenger, who has taught himself short-hand and typewriting, and has shewn considerable aptitude for clerical work, has been promoted to be Junior Clerk at £50 per annum, rising by £5 to £60. The secretariate requires this additional assistance.

Item 7.—The late Caretaker was inefficient and unsatisfactory, and her services had to be dispensed with. The arrangements now in existence, although necessitating an additional expenditure of £12, have already produced a marked and much needed improvement in the way the Offices are kept.

Division IV, item 3.—Custom's Officer. This is a new appointment which has been created with the approval of the Secretary of State.

Division VIII, item 6.—A new Police boat is very badly needed. In addition to Police work it will be at the disposal of the Harbour Authorities and the Colonial Surgeon when required.

Division IX, item 2.—The presence in the gaol of two long sentence prisoners explains the increase under the head of Warder.

Item 9.—It has been found necessary to provide for the maintenance of certain lunatics in England.

Division X, item 8.—Our late experiences have shewn that there should be not only a Quarantine Depôt, but an Isolation Ward as well for infectious cases. Such a building would likewise serve as a hospital should small-pox or other contagious disease break out in Stanley. This very important question affecting as it does the welfare of the whole community has lately received the careful consideration of Government with the result that it has been decided to endeavour to obtain the consent of the Lords of the Admiralty to a lease of the stone building on the north side of the Naval Depôt, which in the opinion of the Colonial Surgeon would, with certain out houses to be erected hereafter, and to which I shall make reference later, be suitable for both purposes. The use of the Cottage on the Naval Range as a Quarantine Station would then be discontinued.

Division XIV, item 2.—The vote for telegrams has been found to be altogether inadequate, and it has been increased accordingly.

Item 3.—The insurance of the new school building and the Cottage lately purchased from the Admiralty, causes the increase on this item.

Item 8.—A temporary increase of £45 has been found necessary in order to raise the stock of ammunition to the standard stipulated for by the War Office as necessary to be maintained as a war reserve.

Item 12.—The vote for stationery has proved for some time past to be too small.

Item 15.—This is a new item. Poor and pauper relief have hitherto been paid from 'Unforeseen,' but there are obvious objections to a continuance of this method of procedure. I have already submitted certain proposals to the Secretary of State on the subject of poor relief which Lord Elgin has been pleased to sanction. They are somewhat as follows. When the present Senior School building is vacated it is intended to alter it, and add to it and in this way convert it into a Cottage Home. As some Members will doubtless recollect public subscriptions were collected in 1897 (the Jubilee year for the purpose of, "perpetuating in this Colony the recollection of the fact that Our Most Gracious Sovereign the Queen will have this year reigned over the British Empire to the happiness and prosperity of her subjects, for a longer period than that recorded by any British Sovereign," and subject to the approval of the contributors, who are about to be communicated with—some of the more distant Station Managers have already had a circular letter addressed to them—it is proposed to appropriate these funds, which now amount to about £170 with accumulated interest, to this purpose. The Government carpenters will be available to affect these alterations and additions. The services of a matron will hereafter be necessary, and it is estimated that her remuneration and the maintenance of the inmates will, in the first instance at any rate, be covered by the vote of £150. Provision has been made under Public Works Extraordinary for furniture.

Item 17.—A spare typewriter is required for the Governor's Office.

Item 18.—It is proposed to aid the lately inaugurated Volunteer Band movement, which has already received some public support, to the extent of £12.

Division XV, item 5.—A daily delivery of letters in Stanley accounts for this item. The messenger will likewise be at the disposal of other Departments when not required by the Post Office.

Division XVII, item 2.—Public Works. The reduction made last year of £100 owing to the exigencies of our financial position has been replaced. The sum of £500 is barely sufficient to keep Government property, which is mostly composed of wood and iron, in a proper state of repair.

Public Works Extraordinary. The several items appearing under this head are for the most part self-explanatory. The £100 on account of the telephone from Stanley to Darwin is the sum in excess of the £500 voted last year which Government under its agreement with the Falkland Islands Company has guaranteed to contribute towards the cost of construction under certain conditions. The indenture itself will be Gazetted hereafter for general information.

Item 4.—To complete the Quarantine Station and Isolation Ward already referred to, a mortuary, a laundry, and some lavatories will be necessary.

Item 8.—The Imperial Defence Committee have recommended the purchase of a machine gun with tripod and ammunition for the Volunteers.

Division XXI.—Live Stock Ordinance. Full particulars of the revenue and expenditure under this head appear for the first time in the Estimates. Although the estimated expenditure is somewhat in excess of the revenue the amount standing at the credit of this Fund on 31st December, 1905, was £1576. and the sum provided for the repairs and alterations to the Quarantine Stock paddock will not be annually recurrent.

Notice.

Proposed Cottage Home in Stanley.

The attention of those persons who contributed to the fund which was raised in the year 1897 for the purpose of worthily commemorating in this Colony the 60th year of the reign of Her late Majesty, Queen Victoria, is called to the following facts.

2. It appears that owing to the divergence of opinion among the contributors to that fund as to the form the proposed memorial should take, the movement never assumed practical shape.

3. The views of the contributors on the subject were divided chiefly between a proposal to establish a Cottage Hospital and one to establish Almshouses in combination with a Pioneer Cottage Hospital.

4. Pending a decision in the matter, the contributions to the fund were deposited in the Savings Bank, and, with the accumulated interest, amount at the present time to about £180.

5. It is requested that if any contributor to this fund has any objection to his subscription being used for the purpose of assisting to establish a Cottage Home in Stanley, for the relief of the aged and infirm poor, he will communicate his objection to the Colonial Secretary on or before the 30th November next.

6. It appears to His Excellency the Governor that the establishment of such an institution would suitably mark the purpose for which the moneys were originally subscribed; and the proposal is made in order to give effect, as far as possible, to the wishes of the subscribers.

By Command,

H. E. W. GRANT,
Colonial Secretary.

The top sod, to a depth of three inches, is not to be reckoned, and the walls of existing peat cuttings must be cut away to a horizontal depth of two inches before measurement can be reckoned.

Tenders should state the number of yards tendered for, and the price per yard.

Half the quantity tendered for must be ready for removal by the 10th December, 1906, and the remainder by the 14th January, 1907, weather permitting.

By Command,

H. E. W. GRANT,
Colonial Secretary.

31st October, 1906.

A BILL

ENTITLED

An Ordinance

To declare the law regulating pensions, gratuities, and other allowances to be granted in respect of offices held in the public service of the Falkland Islands.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands, with the advice and consent of the Legislative Council thereof, as follows:—

1. This Ordinance may be cited as "The Pensions Ordinance, 1906." Short title.

2. Nothing in this Ordinance shall either diminish the rights acquired by any persons before the passing of the Ordinance or affect pensions already granted. Otherwise the provisions of this Ordinance shall apply to all public officers now or hereafter serving in the Colony, and to those who having so served have been transferred to public service elsewhere. Extent.

3. There shall be charged on and paid out of the revenue of the Colony all such sums of money as may, with the sanction of the Secretary of State for the Colonies, from time to time be granted by way of pension, gratuity or other allowance, in accordance with this Ordinance and with any regulations made thereunder, to persons who have been in the service of the Colony. Pensions to be charged on revenues of the Falkland Islands.

4. It shall be lawful for the Governor in Council, with the sanction of the Secretary of State for the Colonies, from time to time, to make, and when made, to vary and revoke, regulations for the granting of pensions, gratuities, and other allowances to persons who have been in the service of the Colony; provided that until any such regulations shall be made, the regulations contained in the Schedule to this Ordinance shall be in force. Governor in Council may make pension regulations.

5. No public officer hereafter appointed shall be entitled to a retiring allowance in respect to any service while under the age of twenty years. Age from which pension may be earned.

Age at which pension may be granted. Certificates required as to conduct, etc.

6. Except in cases of abolition or re-organization of office, no pension, gratuity, or other allowance shall be granted to any public officer who has not attained the age of sixty years, unless on medical evidence to the satisfaction of the Governor in Council or the Secretary of State for the Colonies that he is incapable, by reason of some infirmity of mind or body, of discharging the duties of his office, and that such infirmity is likely to be permanent; nor in any case without a certificate from the Governor that he has discharged the duties of his office with such diligence and fidelity as to justify the grant to him of a pension; provided that, if a public officer, though not suffering from any particular illness or infirmity of mind or body likely to be permanent, becomes unfit, in the opinion of the Governor in Council, for the discharge of the duties of the office to which he has been appointed, and such unfitness is not attributable to misconduct or gross negligence, and when the Governor in Council considers that the special circumstances of the case justify the grant to him of a pension, he may be pensioned at the rate not exceeding that for which he would be qualified if he were suffering from an illness or infirmity likely to be permanent.

Maximum pension grantable.

7. No pension granted under this Ordinance shall exceed two-thirds of the highest salary drawn by an officer at any time in the course of his service, except in cases when the retirement has been necessitated by injuries received in the discharge of duty.

Maximum pension where officer entitled to pension from another source.

8. Where an officer eligible for a pension under this Ordinance is also eligible for a pension from Imperial Funds, or from the funds of some other Colonial or Protectorate Government, the maximum pension which may be granted under this Ordinance shall in ordinary cases be such as, when added to such other pension, does not exceed two-thirds of the highest salary drawn by such officer at any time in the course of his service.

Age for compulsory retirement.

9. It shall be lawful for the Governor in Council, subject to the approval of the Secretary of State, to require any public officer to retire from the public service of the Colony at any time after he attains the age of sixty years, and retirement shall be compulsory for every officer on attaining the age of sixty-five years except that, in special cases where the Secretary of State is satisfied that the retirement of an officer at sixty-five would be detrimental to the interests of the public service, his employment may be extended for a further specified period.

Pensions not of right

10. No officer shall have an absolute right to compensation for past services, or to any pension, gratuity, or other allowance under this Ordinance or under any regulations made thereunder; nor shall anything herein or in such regulations contained, limit the right of the Crown to dismiss any officer without compensation.

Pensions not to be assignable.

11. No pension granted under this Ordinance, or under any regulations made thereunder, shall be assignable or transferable, or liable to be attached, sequestered, or levied upon, for or in respect of any debt or claim whatsoever.

Pensions to cease on conviction.

12. If any person to whom a pension has been granted under this Ordinance, or under any regulations made thereunder, is convicted before any Court in His Majesty's Dominions of any crime or offence for which he is sentenced to death or penal servitude or transportation, or any term of imprisonment with hard labour or exceeding twelve months, and does not within two months after such conviction receive His Majesty's free pardon, then in every such case such pension shall forthwith cease; provided always that the Governor in Council, with the consent of the Secretary of State, may, if he thinks fit, restore the pension in the case of a person who, after conviction as above described, receives His Majesty's free pardon at any time.

13. If any person to whom a pension has been granted under this Ordinance becomes a bankrupt, then such pension shall forthwith cease, provided always that in any case where a pension ceases by reason of the bankruptcy of the pensioner it shall be lawful for the Secretary of State for the Colonies, or, if such pensioner is resident in the Colony, then for the Governor in Council, from time to time during the remainder of such pensioner's life, or during such shorter period or periods, either continuous or discontinuous, as the Secretary of State or Governor in Council shall think fit, to pay all or any part of the moneys to which such pensioner would have been entitled by way of pension had he not become a bankrupt to, or apply the same for the maintenance and personal support or benefit of, all or any, exclusive of the other or others, of the following persons, namely, such pensioner and any wife, child or children of his, in such proportions and manner as the Secretary of State or Governor in Council thinks proper.

Pensions to cease on bankruptcy.

14. This Ordinance shall come into operation on the day of

Date of operation.

SCHEDULE.

Regulations for the granting of Pensions, Gratuities, and other Allowances, to persons who have been in the Service of the Falkland Islands.

1. In these Regulations the term "pensionable office" means an office which has been declared by the Governor, with the sanction of the Secretary of State, by publication in the *Official Gazette*, to be pensionable; provided that any office declared to be pensionable under this section may be declared at any time by the Governor, with the sanction of the Secretary of State, by publication in manner aforesaid to be no longer pensionable, due regard being had to existing rights.

Definitions.

The term "salary" includes personal allowance, house allowance or the estimated value of free quarters, and fuel allowance or the estimated value of free fuel; provided that the amount to be allowed for house rent or the estimated value of free quarters, together with the amount to be allowed for fuel or the estimated value of free fuel, shall not exceed one-sixth of the actual salary of the office.

The term "other Public Service" includes service in a British Colony or Protectorate or under the Imperial Government or the Government of India and such other service as the Secretary of State may determine to be "other Public Service" within the meaning of these Regulations.

2. Subject to the provisions of "The Pensions Ordinance, 1906," and of these Regulations, every public officer holding a pensionable office in the Colony who has been in the service of the Colony for ten years or upwards may be granted on his retirement a pension at the rate of ten-sixtieths of his salary with an addition of one-sixtieth in respect of each complete year of such service in excess of ten until forty years' service is reached, when a pension of two-thirds of such salary may be granted.

Pensions to whom and at what rates to be granted

3. Every officer, otherwise qualified for a pension, who has not completed the minimum period of service qualifying for a pension, may be granted a gratuity, which will be at the rate of half a month's salary for each complete six months of service.

Gratuities.

Abolition of office.

4. If any person holding a pensionable office retire or be removed from the public service in consequence of the abolition of his office, or for the purpose of facilitating improvements in the organization of the department to which he belongs, by which greater efficiency and economy can be effected, he may be granted a temporary pension, subject to the condition that he shall hold himself ready to be recalled to service, provided that if such person is not qualified for other employment, or if there is no reason, in the opinion of the Governor, to expect that he can be shortly re-employed, a pension may be granted to him free from the above mentioned condition.

Rates of pension when offices are abolished.

5. In the case of an officer whose office is abolished, his pension may be increased by the addition of a certain number of fortieths of his salary in the case of a Judge, and of sixtieths in the case of a holder of another pensionable office, that is to say :

- (a) In the case of an officer who has served twenty years 7
- (b) In the case of an officer who has served less than twenty years, but not less than fifteen years... 5
- (c) In the case of an officer who has served less than fifteen years, but not less than ten years ... 3

No addition shall be made under this section so as to entitle an officer to a higher pension than the maximum of two-thirds, or to a higher pension than that to which he would have been entitled by length of service on reaching the age of sixty years.

Rate of gratuity on abolition when service less than ten years.

6. In the case of an officer whose office is abolished and whose length of service is not such as to entitle him to a pension, a special gratuity not exceeding one and a half month's salary for every year of service may be granted.

Officers retiring on account of injuries.

7. Where a public officer whether holding a pensionable or a non-pensionable office has been permanently injured :

- (a) In the actual discharge of his duty, and
- (b) Without his own default, and
- (c) By some injury specifically attributable to the nature of his duty,

and his retirement is thereby necessitated or materially accelerated, he may receive in addition to the pension, if any, granted to him under these Regulations, an annual allowance in proportion to the extent of his injury, as follows:—

When his capacity to contribute to his support is—

| | | | | |
|---------------------|-----|-----|-----|--------------------|
| Slightly impaired | ... | ... | ... | Five-sixtieths. |
| Impaired | ... | ... | ... | Ten-sixtieths. |
| Materially impaired | ... | ... | ... | Fifteen-sixtieths. |
| Totally destroyed | ... | ... | ... | Twenty-sixtieths. |

Provided that in the case of a pensionable officer no such allowance shall, together with the pension, exceed fifty-sixtieths of his salary at the date of the injury. The allowance shall be less than the above mentioned maximum by such amount as the Governor in Council shall think reasonable in the following cases :

- (a) Where the injured man has continued to serve for not less than one year after the injury in respect of which he retires ;
- (b) Where the injured man is fifty years of age and upwards at the date of the injury ;
- (c) Where the injury is not the sole cause of retirement, *i.e.*, the retirement is caused partly by age or infirmity.

8. When the public officer so injured is a pensionable officer but has less than ten years' service, and he is not entitled to an ordinary pension, he may receive in lieu of a gratuity an annual allowance of so many sixtieths as the years he has actually served, in addition to the number of sixtieths that may be awarded to him under Section 7.

9. For the purpose of computing pensions and gratuities, the salary of the permanent office held by the officer at the date of retirement will be taken if he has held such office, or an office with the same salary, for a period of three years immediately preceding such date; otherwise the average amount of the salary of the permanent offices held by the officer during the three years immediately preceding his retirement will be taken.

How salary to be computed for pension purposes.

10. The service in respect of which pensions or gratuities will be granted must be unbroken except in cases where the service has been interrupted by abolition of office or other temporary suspension of employment not arising from misconduct or voluntary resignation.

Service to be unbroken.

11. No service other than service in a pensionable office, on full or half salary, will be taken into account in computing pensions or gratuities, except that where the service in a pensionable office has been immediately preceded by an unbroken period of service in an appointment other than a pensionable office, or of service paid for out of an open vote, or of both such services, such period, or any part of such period, may be taken into account.

Non-pensionable service followed by pensionable service.

Provided always that of the period of service paid for out of an open vote, only two-thirds shall be counted for the purposes of these Regulations (whether appointed before or after the passing of "The Pensions Ordinance, 1906.")

12. The periods during which an officer shall hereafter be absent on leave with half salary shall, for the purpose of computing the amount of his pension, be counted at the rate of one month for every two months of such absence but the period during which an officer has been absent on leave with full salary shall, under all circumstances, be counted at the full rate.

Leave of absence with half salary.

13. Any periods during which an officer has been absent on leave without salary shall not be counted as service, unless such leave has been granted on grounds of public policy, in which case a period not exceeding one year may be counted, for the purpose of these Regulations, as service on full salary.

Leave of absence without salary.

14. Subject to the provisions of Section 5 of "The Pensions Ordinance, 1906," service will be deemed to commence, for pension purposes, at the date on which officers commence to draw salary or half salary.

Commencement of pensionable service.

15. Acting service in a pensionable office will, when continuous with permanent employment, be allowed to reckon as service for pension, provided that the period of such acting service has not been taken into account as part of the service of the previous holder of the office or as part of the officer's other public service.

Acting service.

16. Every officer who has been appointed provisionally, and subject to probation to a pensionable office, and whose appointment shall be afterwards confirmed, shall be entitled to have counted as service for the purpose of computing his pension the period during which he served provisionally and subject to probation.

Service on probation.

17. Except in cases where a claim to pension is sanctioned by the Secretary of State, officers whose whole time is not given to the public service, and professional officers who are allowed the private practice of their professions shall not be entitled to pensions under these Regulations.

Professional officers who are allowed private practice not entitled.

Pensions to abate on pensioner obtaining other public employment.

18. If any pensioner under these Regulations is appointed to another office in the public service of the Colony or in any other public service, then during his tenure of such office so much only (if any) of his pension shall be paid to him as together with any pension received by him from any other Government, and with the salary of such office, makes up an amount equal to the salary of the office which he held at the date of the grant of his pension.

Rights of officers transferred from the Falkland Islands to any public service.

19. Every public officer who, having held a pensionable office in the Colony for a period of at least twelve calendar months leaves the service of the Colony for any other public service, and whose aggregate service would have entitled him, had it been wholly in the Colony, to a pension under these Regulations, shall, on his ultimate retirement from service, be entitled to a pension at the rate of one seven hundred and twentieth ($\frac{1}{720}$) of the amount of his annual salary at the date of his leaving the service of the Colony as aforesaid, for each calendar month of his service in the Colony; provided that his total pension shall in no case be greater than the maximum of two-thirds of the highest salary drawn by him at any time in the course of his service.

Rights of officers transferred to the Falkland Islands from any other public service.

20. Every public officer who, having been in any other public service, is transferred from such service to a pensionable office in the Colony, and whose aggregate service would have entitled him, had it been wholly in the Colony, to a pension under these Regulations, shall, on his retirement from service, and if he has served for a period of at least twelve months in the Colony, be entitled to a pension at the rate of one seven hundred and twentieth of the amount of his annual salary at the date of such retirement for each calendar month of his service in the Colony, and in every such case there may be added at the discretion of the Governor in computing the period of the retiring officer's service in the Colony, a number of months not exceeding (a) one-third of the aggregate of his service elsewhere than in the Colony, nor (b) two-thirds of his service in the Colony, nor (c) in any case sixty months.

Good conduct required.

21. (i) Pensions, gratuities, and allowances, computed at the rates before mentioned, shall only be granted in cases of decidedly faithful and meritorious service.

(ii) Where the fidelity and diligence of the officer fall short of the first degree of merit, the computation may be made at lower rates.

(iii) Where the officer has been guilty of gross negligence, irregularity, or misconduct, the grant of pension, gratuity or other allowance, may be altogether withheld.

Regulations as to ill health.

22. Every pension granted under these Regulations on the ground of ill health shall be subject to the condition that, should the officer's health be re-established, he will be bound to accept, in lieu of his pension, any office, not inferior in value to that from which he retired, which the Secretary of State may think proper to confer on him, due regard being had to circumstances of climate, and if a pensioner so called upon declines to accept the office for which he may have been selected, the payment of his pension may be suspended until he has attained the age of sixty years.

Hair Seal Skins.

With reference to Gazette Notice No. 100 of the 24th September last, His Excellency the Governor directs it to be further notified, for general information, that Professor Dunstan, the Director of the Imperial Institute, reports that he has communicated with the firm of leather manufacturers who are interested in the utilization of the skins of hair seals for book-binding purposes, with the view of a price being offered for 1,000 skins *f.o.b.*, Stanley, but that he has been given to understand that such a plan would not be feasible, as the value of the skins varies considerably with size and condition, *e.g.* their freedom from claw marks, etc., and consequently no definite price can be offered without inspection.

The manufacturers state that two types of skins were formerly received from the Falkland Islands. *viz.* (1) Seal skins with the fin holes close to the head of the Seal and (2) Sea Lion skins with the fin holes approximately in the middle of the body of the seal. On account of the different position of the fin holes, the former are much preferred, as they cut up to greater advantage.

The manufacturers state that they are always open to buy these seal skins in any quantities, and could give 5/- to 7/- each according to size, or even a little more in some cases. They think that some of the skins would be suitable for use by furriers, and suggest that consignments should be picked over in England before sending the remainder of them for the manufacture of leather. The furriers would of course be able to offer a

higher price than the leather manufacturers. This plan could be easily adopted if consignments of the skins were forwarded to London merchants, such as Messrs. Dyster, Nalder & Co., Crosby Chambers, Bishopsgate, or Messrs. A. & W. Nesbitt, Fenchurch Avenue, E.C., and might result in considerable advantage to the exporters.

Professor Dunstan adds that seal skins, in common with hides and skins of every description, are now fetching high prices, and the present condition of the market offers a very favourable opportunity for forwarding consignments from the Falkland Islands.

In order to promote the establishment of an industry in the export of hair seal skins, the Government will be prepared hereafter, on application being made to the Colonial Secretary by exporters, and on the production of Account Sales, to favourably consider the question of a rebate of a portion of the royalty of 2/- on each skin.

By Command,

H. E. W. GRANT,

Colonial Secretary.

No. 5,

1906.

FALKLAND ISLANDS.

WILLIAM LAMOND ALLARDYCE, ESQUIRE,

Companion of the Most Distinguished Order of Saint Michael and Saint George,
GOVERNOR AND COMMANDER-IN-CHIEF.

(30th November, 1906.)

An Ordinance

To declare the law regulating pensions, gratuities, and other allowances to be granted in respect of offices held in the public service of the Falkland Islands.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands, with the advice and consent of the Legislative Council thereof, as follows:—

1. This Ordinance may be cited as “The Pensions Ordinance, 1906.” Short title.

2. Nothing in this Ordinance shall either diminish the rights acquired by any persons before the passing of the Ordinance or affect pensions already granted. Otherwise the provisions of this Ordinance shall apply to all public officers now or hereafter serving in the Colony, and to those who having so served have been transferred to public service elsewhere. Extent.

3. There shall be charged on and paid out of the revenue of the Colony all such sums of money as may, with the sanction of the Secretary of State for the Colonies, from time to time be granted by way of pension, gratuity or other allowance, in accordance with this Ordinance and with any regulations made thereunder, to persons who have been in the service of the Colony. Pensions to be charged on revenues of the Falkland Islands.

4. It shall be lawful for the Governor in Council, with the sanction of the Secretary of State for the Colonies, from time to time, to make, and when made, to vary and revoke, regulations for the granting of pensions, gratuities, and other allowances to persons who have been in the service of the Colony; provided that until any such regulations shall be made, the regulations contained in the Schedule to this Ordinance shall be in force. Governor in Council may make pension regulations.

5. No public officer hereafter appointed shall be entitled to a retiring allowance in respect to any service while under the age of twenty years. Age from which pension may be earned.

Age at which pension may be granted. Certificates required as to conduct, etc.

6. Except in cases of abolition or re-organization of office, no pension, gratuity, or other allowance shall be granted to any public officer who has not attained the age of sixty years, unless on medical evidence to the satisfaction of the Governor in Council or the Secretary of State for the Colonies that he is incapable, by reason of some infirmity of mind or body, of discharging the duties of his office, and that such infirmity is likely to be permanent; nor in any case without a certificate from the Governor that he has discharged the duties of his office with such diligence and fidelity as to justify the grant to him of a pension; provided that, if a public officer, though not suffering from any particular illness or infirmity of mind or body likely to be permanent, becomes unfit, in the opinion of the Governor in Council, for the discharge of the duties of the office to which he has been appointed, and such unfitness is not attributable to misconduct or gross negligence, and when the Governor in Council considers that the special circumstances of the case justify the grant to him of a pension, he may be pensioned at the rate not exceeding that for which he would be qualified if he were suffering from an illness or infirmity likely to be permanent.

Maximum pension grantable.

7. No pension granted under this Ordinance shall exceed two-thirds of the highest salary drawn by an officer at any time in the course of his service, except in cases when the retirement has been necessitated by injuries received in the discharge of duty.

Maximum pension where officer entitled to pension from another source.

8. Where an officer eligible for a pension under this Ordinance is also eligible for a pension from Imperial Funds, or from the funds of some other Colonial or Protectorate Government, the maximum pension which may be granted under this Ordinance shall in ordinary cases be such as, when added to such other pension, does not exceed two-thirds of the highest salary drawn by such officer at any time in the course of his service.

Age for compulsory retirement.

9. It shall be lawful for the Governor in Council, subject to the approval of the Secretary of State, to require any public officer to retire from the public service of the Colony at any time after he attains the age of sixty years, and retirement shall be compulsory for every officer on attaining the age of sixty-five years except that, in special cases where the Secretary of State is satisfied that the retirement of an officer at sixty-five would be detrimental to the interests of the public service, his employment may be extended for a further specified period.

Pensions not of right

10. No officer shall have an absolute right to compensation for past services, or to any pension, gratuity, or other allowance under this Ordinance or under any regulations made thereunder; nor shall anything herein or in such regulations contained, limit the right of the Crown to dismiss any officer without compensation.

Pensions not to be assignable.

11. No pension granted under this Ordinance, or under any regulations made thereunder, shall be assignable or transferable, or liable to be attached, sequestered, or levied upon, for or in respect of any debt or claim whatsoever.

Pensions to cease on conviction.

12. If any person to whom a pension has been granted under this Ordinance, or under any regulations made thereunder, is convicted before any Court in His Majesty's Dominions of any crime or offence for which he is sentenced to death or penal servitude or transportation, or any term of imprisonment with hard labour or exceeding twelve months, and does not within two months after such conviction receive His Majesty's free pardon, then in every such case such pension shall forthwith cease; provided always that the Governor in Council, with the consent of the Secretary of State, may, if he thinks fit, restore the pension in the case of a person who, after conviction as above described, receives His Majesty's free pardon at any time.

13. If any person to whom a pension has been granted under this Ordinance becomes a bankrupt, then such pension shall forthwith cease, provided always that in any case where a pension ceases by reason of the bankruptcy of the pensioner it shall be lawful for the Secretary of State for the Colonies, or, if such pensioner is resident in the Colony, then for the Governor in Council, from time to time during the remainder of such pensioner's life, or during such shorter period or periods, either continuous or discontinuous, as the Secretary of State or Governor in Council shall think fit, to pay all or any part of the moneys to which such pensioner would have been entitled by way of pension had he not become a bankrupt to, or apply the same for the maintenance and personal support or benefit of, all or any, exclusive of the other or others, of the following persons, namely, such pensioner and any wife, child or children of his, in such proportions and manner as the Secretary of State or Governor in Council thinks proper.

Pensions to cease on
bankruptcy.

14. This Ordinance shall come into operation on the 1st day of January, 1907.

Date of operation.

Passed the Legislative Council this 28th day of November, 1906.

Assented to by the Governor and given under the Public Seal of the Colony this 30th day of November, 1906.

(Signed) M. CRAIGIE-HALKETT,
Clerk of the Council.

SCHEDULE.

Regulations for the granting of Pensions, Gratuities, and other Allowances, to persons who have been in the Service of the Falkland Islands.

1. In these Regulations the term "pensionable office" means an office which has been declared by the Governor, with the sanction of the Secretary of State, by publication in the *Official Gazette*, to be pensionable; provided that any office declared to be pensionable under this section may be declared at any time by the Governor, with the sanction of the Secretary of State, by publication in manner aforesaid to be no longer pensionable, due regard being had to existing rights.

Definitions.

The term "salary" includes personal allowance, house allowance or the estimated value of free quarters, and fuel allowance or the estimated value of free fuel; provided that the amount to be allowed for house rent or the estimated value of free quarters, together with the amount to be allowed for fuel or the estimated value of free fuel, shall not exceed one-sixth of the actual salary of the office.

The term "other Public Service" includes service in a British Colony or Protectorate or under the Imperial Government or the Government of India and such other service as the Secretary of State may determine to be "other Public Service" within the meaning of these Regulations.

2. Subject to the provisions of "The Pensions Ordinance, 1906," and of these Regulations, every public officer holding a pensionable office in the Colony who has been in the service of the Colony for ten years or upwards may be granted on his retirement a pension at the rate of ten-sixtieths of his salary with an addition of one-sixtieth in respect of each complete year of such service in excess of ten until forty years' service is reached, when a pension of two-thirds of such salary may be granted.

Pensions to whom and at
what rates to be granted

Gratuities.

3. Every officer, otherwise qualified for a pension, who has not completed the minimum period of service qualifying for a pension, may be granted a gratuity, which will be at the rate of half a month's salary for each complete six months of service.

Abolition of office.

4. If any person holding a pensionable office retire or be removed from the public service in consequence of the abolition of his office, or for the purpose of facilitating improvements in the organization of the department to which he belongs, by which greater efficiency and economy can be effected, he may be granted a temporary pension, subject to the condition that he shall hold himself ready to be recalled to service, provided that if such person is not qualified for other employment, or if there is no reason, in the opinion of the Governor, to expect that he can be shortly re-employed, a pension may be granted to him free from the above mentioned condition.

Rates of pension when offices are abolished.

5. In the case of an officer whose office is abolished, his pension may be increased by the addition of a certain number of fortieths of his salary in the case of a Judge, and of sixtieths in the case of a holder of another pensionable office, that is to say :

- (a) In the case of an officer who has served twenty years 7
- (b) In the case of an officer who has served less than twenty years, but not less than fifteen years... 5
- (c) In the case of an officer who has served less than fifteen years, but not less than ten years ... 3

No addition shall be made under this section so as to entitle an officer to a higher pension than the maximum of two-thirds, or to a higher pension than that to which he would have been entitled by length of service on reaching the age of sixty years.

Rate of gratuity on abolition when service less than ten years.

6. In the case of an officer whose office is abolished and whose length of service is not such as to entitle him to a pension, a special gratuity not exceeding one and a half month's salary for every year of service may be granted.

Officers retiring on account of injuries.

7. Where a public officer whether holding a pensionable or a non-pensionable office has been permanently injured :

- (a) In the actual discharge of his duty, and
- (b) Without his own default, and
- (c) By some injury specifically attributable to the nature of his duty,

and his retirement is thereby necessitated or materially accelerated, he may receive in addition to the pension, if any, granted to him under these Regulations, an annual allowance in proportion to the extent of his injury, as follows:—

| | | | | |
|--|-----|-----|-----|--------------------|
| When his capacity to contribute to his support is— | | | | |
| Slightly impaired | ... | ... | ... | Five-sixtieths. |
| Impaired | ... | ... | ... | Ten-sixtieths. |
| Materially impaired | ... | ... | ... | Fifteen-sixtieths. |
| Totally destroyed | ... | ... | ... | Twenty-sixtieths. |

Provided that in the case of a pensionable officer no such allowance shall, together with the pension, exceed fifty-sixtieths of his salary at the date of the injury. The allowance shall be less than the above mentioned maximum by such amount as the Governor in Council shall think reasonable in the following cases :

- (a) Where the injured man has continued to serve for not less than one year after the injury in respect of which he retires ;

(b) Where the injured man is fifty years of age and upwards at the date of the injury;

(c) Where the injury is not the sole cause of retirement, *i.e.*, the retirement is caused partly by age or infirmity.

8. When the public officer so injured is a pensionable officer but has less than ten years' service, and he is not entitled to an ordinary pension, he may receive in lieu of a gratuity an annual allowance of so many sixtieths as the years he has actually served, in addition to the number of sixtieths that may be awarded to him under Section 7.

9. For the purpose of computing pensions and gratuities, the salary of the permanent office held by the officer at the date of retirement will be taken if he has held such office, or an office with the same salary, for a period of three years immediately preceding such date; otherwise the average amount of the salary of the permanent offices held by the officer during the three years immediately preceding his retirement will be taken.

How salary to be computed for pension purposes.

10. The service in respect of which pensions or gratuities will be granted must be unbroken except in cases where the service has been interrupted by abolition of office or other temporary suspension of employment not arising from misconduct or voluntary resignation.

Service to be unbroken.

11. No service other than service in a pensionable office, on full or half salary, will be taken into account in computing pensions or gratuities, except that where the service in a pensionable office has been immediately preceded by an unbroken period of service in an appointment other than a pensionable office, or of service paid for out of an open vote, or of both such services, such period, or any part of such period, may be taken into account.

Non-pensionable service followed by pensionable service.

Provided always that of the period of service paid for out of an open vote, only two-thirds shall be counted for the purposes of these Regulations (whether appointed before or after the passing of "The Pensions Ordinance, 1906.")

12. The periods during which an officer shall hereafter be absent on leave with half salary shall, for the purpose of computing the amount of his pension, be counted at the rate of one month for every two months of such absence, but the period during which an officer has been absent on leave with full salary shall, under all circumstances, be counted at the full rate.

Leave of absence with half salary.

13. Any periods during which an officer has been absent on leave without salary shall not be counted as service, unless such leave has been granted on grounds of public policy, in which case a period not exceeding one year may be counted, for the purpose of these Regulations, as service on full salary.

Leave of absence without salary.

14. Subject to the provisions of Section 5 of "The Pensions Ordinance, 1906," service will be deemed to commence, for pension purposes, at the date on which officers commence to draw salary or half salary.

Commencement of pensionable service.

15. Acting service in a pensionable office will, when continuous with permanent employment, be allowed to reckon as service for pension, provided that the period of such acting service has not been taken into account as part of the service of the previous holder of the office or as part of the officer's other public service.

Acting service.

16. Every officer who has been appointed provisionally, and subject to probation to a pensionable office, and whose appointment shall be afterwards confirmed, shall be entitled to have counted as service for the purpose of computing his pension the period during which he served provisionally and subject to probation.

Service on probation.

Professional officers who are allowed private practice not entitled.

17. Except in cases where a claim to pension is sanctioned by the Secretary of State, officers whose whole time is not given to the public service, and professional officers who are allowed the private practice of their professions shall not be entitled to pensions under these Regulations.

Pensions to abate on pensioner obtaining other public employment.

18. If any pensioner under these Regulations is appointed to another office in the public service of the Colony or in any other public service, then during his tenure of such office so much only (if any) of his pension shall be paid to him as together with any pension received by him from any other Government, and with the salary of such office, makes up an amount equal to the salary of the office which he held at the date of the grant of his pension.

Rights of officers transferred from the Falkland Islands to any public service.

19. Every public officer who, having held a pensionable office in the Colony for a period of at least twelve calendar months leaves the service of the Colony for any other public service, and whose aggregate service would have entitled him, had it been wholly in the Colony, to a pension under these Regulations, shall, on his ultimate retirement from service, be entitled to a pension at the rate of one seven hundred and twentieth ($\frac{1}{720}$) of the amount of his annual salary at the date of his leaving the service of the Colony as aforesaid, for each calendar month of his service in the Colony; provided that his total pension shall in no case be greater than the maximum of two-thirds of the highest salary drawn by him at any time in the course of his service.

Rights of officers transferred to the Falkland Islands from any other public service.

20. Every public officer who, having been in any other public service, is transferred from such service to a pensionable office in the Colony, and whose aggregate service would have entitled him, had it been wholly in the Colony, to a pension under these Regulations, shall, on his retirement from service, and if he has served for a period of at least twelve months in the Colony, be entitled to a pension at the rate of one seven hundred and twentieth of the amount of his annual salary at the date of such retirement for each calendar month of his service in the Colony, and in every such case there may be added at the discretion of the Governor in computing the period of the retiring officer's service in the Colony, a number of months not exceeding (a) one-third of the aggregate of his service elsewhere than in the Colony, nor (b) two-thirds of his service in the Colony, nor (c) in any case sixty months.

Good conduct required.

21. (i) Pensions, gratuities, and allowances, computed at the rates before mentioned, shall only be granted in cases of decidedly faithful and meritorious service.

(ii) Where the fidelity and diligence of the officer fall short of the first degree of merit, the computation may be made at lower rates.

(iii) Where the officer has been guilty of gross negligence, irregularity, or misconduct, the grant of pension, gratuity or other allowance, may be altogether withheld.

Regulations as to ill health.

22. Every pension granted under these Regulations on the ground of ill health shall be subject to the condition that, should the officer's health be re-established, he will be bound to accept, in lieu of his pension, any office, not inferior in value to that from which he retired, which the Secretary of State may think proper to confer on him, due regard being had to circumstances of climate, and if a pensioner so called upon declines to accept the office for which he may have been selected, the payment of his pension may be suspended until he has attained the age of sixty years.

FALKLAND ISLANDS.

CURRENTS.

Mariners are warned that during and after long continued South-Easterly gales, when a heavy sea is rolling in on the South and South East coasts of the Falkland Islands, there is stated to be a strong set to the North-Westward, to which set has been attributed the loss of several vessels in the neighbourhood of Bull Point. Vessels from Cape Horn, therefore, intending to sight Beauchêne Island, should make due allowance against a possible set of 20 to 30 miles a day to the North-Westward.

BURDWOOD BANK.

On the 21st December, 1905, when about 150 miles Eastward of Cape St. John, Staten Island, the German vessel "Preussen" passed several large icebergs on the Burdwood bank in approximately 54° 25' S., 59° 25' W., to the Southward of the Falkland Islands. It would appear not improbable that the periodic collection of icebergs East, and North East, of the Falkland Islands is in progress; and Mariners are warned to keep a good look-out when navigating in this area. They are also requested to send notice of any bergs they may encounter direct to the Hydrographic department, Admiralty. (April.)

ICEBERGS.

Mariners are warned that several reports have recently been received of the existence during February, 1906, of a large number of icebergs in the vicinity of the line marked by square symbols on the diagram attached to this Notice.* The plain line on the diagram indicates the Northern limit of the area within which many ice islands and icebergs were reported during the years 1892-1894. The periodical collection of icebergs in this vicinity is evidently in progress. (June.)

An Ordinance to make provision for preventing the spread of lice in sheep.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands, with the advice and consent of the Legislative Council thereof, as follows:—

Interpretation.

Ordinance No. 6 of 1901.

1. In this Ordinance—

“Principal Ordinance” means the Live Stock Ordinance, 1901.

“Owner,” with reference to the ownership of sheep, includes the manager, overseer or person in charge of such sheep.

“To dip” or “dipped,” with reference to lice in sheep, means to immerse or immersed in some lice-destroying preparation.

“Notice” means a notice in writing, or in print, or partly in writing and partly in print, delivered to the person to be affected thereby, or left at or affixed to the usual or last-known place of abode of such person.

Construction.

2. This Ordinance shall be construed as one with the Principal Ordinance.

Annual dipping compulsory

3. Every owner shall, between the first day of March and the thirtieth day of June in every year, dip or cause to be dipped all sheep running on land whereof he is the occupier: Provided that, on the application of any owner, an inspector may grant an extension of the time in which such owner shall dip his sheep, but so that such extension shall not exceed sixty days prior to the thirty-first day of December. For every sheep not so dipped, such owner shall be liable to a fine not exceeding two shillings.

4. (1.) If any Inspector is satisfied that any sheep are affected with lice, he may give the owner thereof notice requiring him to dip such sheep to the satisfaction of the said Inspector or any other Inspector, within a period to be specified in such notice.

Notice to dip sheep affected with lice.

(2.) Every such owner who refuses, neglects, or fails to comply with such notice shall be liable, on conviction, to a penalty not exceeding fifty pounds: Provided that if, in the opinion of any Inspector, the said sheep are fit for slaughter, either for consumption as the food of man or for boiling down, and shall be slaughtered before the expiration of the period specified in the said notice within which the said owner was required to dip such sheep, no penalty shall be incurred under this section.

Penalty for neglect to dip after notice.

(3.) If after the expiration of one month from the date of a conviction under this section, the sheep in respect of which such conviction has been obtained shall not have been dipped to the satisfaction of an Inspector, the owner of such sheep shall, upon conviction, be liable to a further penalty of fifty pounds, and so on for every succeeding period of one week: Provided that if, in the opinion of any Inspector, the said sheep are fit for slaughter, either for consumption as the food of man or for boiling down, and shall be slaughtered within the period of one month from the date of a conviction under this section, no further penalty shall be incurred under this subsection.

5. Every person who by himself, his agent or servant, drives, without the permission of an Inspector, or depastures or suffers to stray, any sheep affected with lice, shall be liable, on conviction, for every day during which such sheep shall be so driven, depastured or suffered to stray, to a penalty not exceeding five pounds and not less than one pound.

Penalty for driving sheep affected with lice.

6. (1.) If any sheep affected with lice shall be found in any pound, or in any yard, or on any land or other place at which sheep are offered for sale, the owner of such sheep shall be liable to a penalty not exceeding ten pounds.

Penalty on owner of sheep affected with lice found in any pound, &c.

(2.) Any Inspector may order the withdrawal from sale of any sheep affected with lice until such sheep have been dipped to the satisfaction of the said Inspector or any other Inspector, and every owner of such sheep who refuses, neglects, or fails to comply with such order shall be liable to a further penalty not exceeding twenty pounds.

7. Notwithstanding anything contained in this Ordinance, or any notice given thereunder, it shall not be necessary to dip any ewe affected with lice during such time previous to or after her lambing as an Inspector may appoint; and for such purpose any Inspector may, in respect of ewes, extend any notice to dip for such time as he shall think fit.

Ewes not to be dipped during lambing time.

8. This Ordinance may be cited as the Live Stock Ordinance, 1907, and may be cited with the Live Stock Ordinance 1901-1905 as the Live Stock Ordinances, 1901 to 1907.

CIRCULAR⁽²⁾

The Secretary of State to the Governor.

DOWNING STREET,
23rd November, 1906.

SIR,

I have the honour to transmit to you a summary, prepared by the General Post Office, London, of the principal results of the deliberations of the Congress of the Universal Postal Union held at Rome in April last.*

It will be seen that, while the initial postage rate for letters remains 25 centimes or 2½d., the rate for each successive unit or fraction thereof is to be 15 centimes or 1½d., and that the unit of weight itself has been raised from 15 to 20 grammes, one ounce being regarded as the avoirdupois equivalent of 20 grammes. His Majesty's Government are prepared to raise the unit of weight for out-going letters from ½ ounce to 1 ounce on the 1st of October, 1907, when the new Postal Union Convention and the changes introduced by it are to come into operation.

I have agreed to the adoption of this increased minimum weight both for Foreign and Imperial letter postage on behalf of the following Colonies:—

Ashanti,
Ceylon,
Falkland Islands,
The Gambia,
Gibraltar,
Gold Coast,
Hong Kong,
Labuan,
Leeward Islands,
Fiji,

Malta,
St. Helena,
Seychelles,
Sierra Leone,
Southern Nigeria,
Straits Settlements,
Trinidad and Tobago,
Turks Islands,
Windward Islands,

and on behalf of the following Protectorates:—

British Central Africa,
East Africa Protectorate,
Gambia Protectorate,
Northern Nigeria,
Northern Territories of the Gold Coast,

Sierra Leone Protectorate,
Somaliland,
Southern Nigeria Protectorate,
Uganda.

I have also agreed on behalf of the Federated Malay States and Cyprus.

Copies of the new Postal Union Convention, with an English translation, which is in course of preparation by the Postmaster General, will be transmitted to you at an early date.

I have, &c.,

Annual Report of the Chief Inspector of Stock for the Year 1906.

THE CHIEF INSPECTOR OF STOCK to the COLONIAL SECRETARY.

STANLEY,

9th March, 1907.

SIR,

I have the honour to submit herewith my Annual Report for the year ended the 31st December, 1906.

The season, though variable, has, on the whole, been very favourable for stock and grass.

Sheep.—The total number of sheep in the Colony at the end of May, 1906, was 702,696. This shows an increase of 1,802, as compared with the number for the year ended on the 31st May, 1905.

Wool.—The clip was good, and realized advanced prices.

Lambing.—The results were satisfactory, averaging about 75%.

Dipping.—A fair amount of attention was bestowed on the flocks in this respect, and sheep, generally, are very free from parasites. If Farmers only took the trouble to consider the financial gain to be derived by keeping their sheep clean, they would probably be more careful in their mode of dipping. In some cases, mustering is evidently not so close as is necessary to secure the best results.

The Live Stock imported during the year were as follows:—

22 Romney Marsh Rams, from England.

10 " " " " New Zealand.

2 Devon Bulls, from England.

2 Devon Heifers, from England.

154 Horses from Patagonia.

Unfortunately, the best Romney Marsh Ram died while being driven to its destination.

Live Stock exported:—

250 Rams to Patagonia.

Geese.—A decrease is noticeable in some parts, while in others very little diminution is apparent. The number of geese to be purchased for the year for the East and West Falklands, respectively, were:—

East Falklands, 50,000.

West Falklands, 50,000.

The number purchased on the East Falklands was 23,260, West Falklands 21,700.

Grass Seed.—During 1906 several Farmers experimented with various grass seeds, but not to any great extent. I am convinced, from personal observation, that cocksfoot grass seed, if sown in the early spring in sheltered places, such as valleys, and in soil other than peat, would grow well, and my experience is that it is one of the best artificial grasses to suit all purposes. If Farmers followed up this sowing systematically, the carrying capacity of their land would be greatly increased and they would be amply repaid.

Owing to a dry summer and high winds, sand has been breaking out in several places, especially in the dry camp, and where there is a tendency to overstock—also in localities where there has been burning at the wrong time of the year. His Excellency the Governor has kindly distributed sand binding grass seeds to check this breaking away.

I am pleased to report that a few of the Farmers on the West Falklands are draining all their swamps and cutting out all their ditches. This will certainly improve the land, and result in a large saving in the death rate among the sheep.

I have, &c.,

J. ROBERTSON,

Chief Stock Inspector.

The Colonial Secretary,

Medical and Sanitary Report on the Falkland Islands for the Year 1906.

THE COLONIAL SURGEON to the COLONIAL SECRETARY.

SIR,

I have the honour to submit for the information of His Excellency the Governor the Medical Report on the health and sanitary condition of the Colony for the year 1906, together with returns appended thereto.

The returns deal with Port Stanley and the West Falkland Islands only, no returns being this year available for Darwin and the North Camp of the East Falklands.

I have, &c.,

E. T. BORN,

Colonial Surgeon.

The Honourable
The Colonial Secretary,
Port Stanley.

VITAL STATISTICS.

1. Population.

The estimated population of the Colony for 1906 was 2,065.

There were 56 births.

The birth-rate was 27.11 per 1,000 as against 29.30 per 1,000 in 1905.

The total number of deaths from all causes amounted to 17, as against 11 in 1905, or at the rate of 8.23 per 1,000, being 6 in excess of the number in the preceding year and included 4 of persons aged 60 years and upwards, 2 deaths due to accidental drowning and 2 deaths occurring on board ship. The death rate continues low.

2. Public Health.

There was a slight improvement in the health of the general population during the year 1906. The chief causes of sickness were, as usual, affections of the respiratory system. They were the cause of over 25 per cent of the total sickness during the year. Bronchitis was very prevalent. The outbreak of Measles which occurred during the latter end of the year 1905 terminated in February of the year under review. With the above exception, the Colony remained free from cases of infectious disease. Measles accounted for one death.

The total number of cases treated during the year was as follows:—

| | |
|---|-------|
| Port Stanley | 1,072 |
| Darwin and North Camp (No returns) | |
| West Falklands | 229 |
| Total | 1,301 |

An increase of 86 as compared with the previous year.

3,221 Medicines were dispensed, and 1,627 visits paid in the town of Stanley alone, a decrease of 666 and 611 respectively.

The attendances at the Surgery (Port Stanley) numbered 2,040, an increase of 738.

The District Nurse, Miss Ellen Barnes, rendered most valuable services, attending 57 cases and paying 1,159 visits. Miss Barnes's services were also frequently requisitioned at the Surgery. The need of a properly trained Nurse and Midwife for the town has been amply demonstrated.

Vaccination.

Vaccination is steadily being advanced.

The number of successful cases may be gathered from the following table :—

| District. | | | | | | Number. |
|-----------------------|-----|--------------|-----|-----|-----|---------|
| Stanley | ... | ... | ... | ... | ... | 72 |
| West Falklands | ... | ... | ... | ... | ... | 13 |
| Darwin and North Camp | ... | (No returns) | ... | ... | ... | — |
| Total | | | | | | 85 |

59 vessels were boarded during the year under review. Of this number, it was necessary to quarantine 3 vessels, owing to cases of infectious disease having occurred on ship board. It demonstrates the necessity of quarantine supervision.

I alluded in my last year's Annual Report to the absence of hospital accommodation for cases of dangerous infectious disease. The district is now equipped with proper provision for dealing with contagious diseases and is provided with a Quarantine Depot and Isolation Ward; most important steps in the direction of safe-guarding the health of the community.

Meteorology.

The total rainfall registered at Port Stanley during the year was 25·660 inches. The number of rainy days was 217. The mean temperature was 42° F. with a maximum of 69° F. and a minimum of 19° F.

Stanley is situated, Latitude 51° 41" South, Longitude 57° 15" West.

Sanitation.

With regard to Sanitation, owing to lack of funds, no important work was undertaken for the improvement of the sanitation of the Town, but there can be no doubt that the efforts put forward during the year under review in the way of the sanitary inspection of premises and the cleansing of the open drains have been far more general and more complete than heretofore, as evinced by the greatly improved surface cleanliness.

In view of the neglect shown by a section of the population in regard to all matters connected with the dry system of sewage disposal, the Sanitary Inspector was supplied with a printed leaflet setting forth the dangers that insanitary closets may bring in their train and recommending the use of peat coom as a deodorant and absorbent.

The sewerage of the Town is a matter of grave urgency. The system as at present constituted, is a potential centre of disease.

The sooner drainage works are undertaken the better it will be from every point of view, sanitary or financial. The Town of Stanley requires a system of public scavenging and an improved pail system, and, in general, needs strict Sanitary administration.

No. 44.

1907.

Legislative Council.
FALKLAND ISLANDS.

SUPPLEMENTARY ESTIMATES, 1906.

(MESSAGE INTRODUCING.)

Read in Council, 22nd March, 1907.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you herewith the Supplementary Estimates for the year 1906.

2. The revenue for the year, exclusive of Land Sales and amounts received under the Live Stock Ordinance, produced £15,821 15s. 11d., being £1,093 15s. 11d. in excess of the estimate. The increase was derived principally from probate duty, and an unforeseen amount under the head of interest caused by the purchase by lessees of their leaseholds.

3. The Expenditure amounted to £15,692 0s. 9d., being £1,168 1s. 1d. over the estimate. The actual excess of revenue over expenditure on the year's operations was therefore £129 15s. 2d.

4. There were only two items on which the revenue fell short of the estimate *i.e.* Division 1, Customs Duties, (£217), and Division VII, Rents (£30). In the former the falling off was under the sub-heads of wine, malt, and spirits, while in the case of the latter the application by certain lessees to purchase their leases under the Land Ordinance, 1903, led to the anomaly which I explained in my Message of August last.

5. The comparative statements (A) and (B) attached shew the estimated and actual revenue and expenditure under the various heads.

6. The expenditure in excess of the amount already sanctioned by Council under the Appropriation Ordinance No. V of 1905, and for which you will be asked to pass a Supplementary Appropriation Bill, is £1,675 0s. 5d. The details of the principal items are as follows:—

Division IV.—**Treasury and Customs £107 6s.** Of this amount £76 is on account of the new appointment of Customs Officer, while the balance, which is for temporary Customs Officers, is recoverable.

Division VII.—**Legal £17 3s. 6d.** The case of—

REX v SAUREZ and others

occasioned this expenditure.

Division IX.—**Prisons £52 7s. 4d.** The presence of two long sentence prisoners in the gaol was responsible for this over-expenditure.

Division XI.—**Education £114 4s. 1d.** The visit of Mr. H. M. Richards, one of His Majesty's Inspectors of Schools, caused the Education vote to be exceeded by this amount.

Division XIII.—**Transport £118 2s. 7d.** Passages from England had to be provided for Major and Mrs Campbell and family in accordance with agreement.

Division XVII.—**Public Works Recurrent £146 19s. 9d.** The vote for repairs of buildings and furniture was reluctantly reduced by Council from £500 to £400 when the 1906 Estimates were prepared owing to the somewhat discouraging revenue outlook. The overexpenditure includes the purchase of material for a much needed addition to the Public Offices of two commodious rooms one of which will be occupied by the Colonial Secretary and the other by his Clerks; also a hot water boiler and several hundred feet of piping for the old portion of Government House.

Public Works Extraordinary £717 9s. 8d. The Cottage in the Government House paddock was purchased, with the approval of the Secretary of State, from the Lords of the Admiralty at a cost of £325, and the balance, plus an unexpended amount under item 2 (Telephone, Stanley to Darwin) went to complete the new Government School.

Division XIX.—**Currency Note Fund £29 0s. 8d.** The fact appears to have been overlooked in the past that under the Order in Council providing for the issue of Government paper currency the income derived from the securities shall be applied, inter alia, in the payment of a sum equal to one per cent of the cost price of the securities to a Depreciation Fund.

Division XX.—**Drawbacks and Refunds £338 8s. 7d.** In certain cases before negotiations were concluded with lessees for the purchase of their leases rents fell due and were paid, and these were subsequently refunded.

7. As it is possible that Members of the Council and Colonists generally would be glad to have some additional details supplied to them with regard to one or two other matters in which they are directly interested, I avail myself of this opportunity to submit the following for their information.

PUBLIC WORKS.

8. The *pièce de resistance* was the new school. The carpenters, including our own small staff, worked at it till the end of August, and the fencing and laying out of the grounds engaged the out-door staff in one way or another for several months. The new building offers many educational facilities which were lacking in the old one. A cottage in the Dockyard has been added to, and put in thoroughly good order and is now occupied by the Chief Constable. The cottage in the Government paddock which was purchased from the Admiralty was overhauled, repainted, and placed in a proper state of repair, as also the surrounding fences. The bare damp stone passages at Government House were lined and papered, and several rooms done up. I have referred elsewhere to the new office of the Colonial Secretary. A number of the Government buildings were painted, and small defects attended to. Several peat sheds were erected. As a whole Government property is in better order at present than has been the case for some years past. Small sections of the seawall were repaired and rebuilt but much remains to be done. New fencing was put up for about three quarters of a mile on the west side of the Common, while on the east side new wires were supplied to the fence stretching from the south coast to Stanley Harbour. The metalling of Hebe Street was completed, and the drains throughout the town were regularly cleaned and attended to.

EDUCATION.

9. The visit of Mr. H. M. Richards, one of H.M. Inspectors of Schools, in order to inspect the schools in Stanley was an event of more than ordinary importance. In accordance with his recommendations the curriculum in the Government schools has been somewhat modernized and brought more into line with Board School methods.

COMMUNICATIONS.

10. I regret to say that there was no improvement in interinsular communication during the year, and the unfortunate loss of the 'Fortuna' for a time left only one schooner available to do the whole of the interinsular work. The Manager of the

Falkland Islands Company did his best to relieve the strain and more than once sent out the Company's steam tug 'Samson' with the mails to Fox Bay, but notwithstanding this the fact remains that three times the monthly mail from the West Falkland and adjacent Islands missed the homeward mail, and on several occasions the schooner which took out the inward English mail to Fox Bay did not return direct to headquarters, thus preventing part of the mail and would-be passengers from making the homeward connection without incurring a month's delay in Stanley. An auxiliary schooner is shortly expected from England by the Falkland Islands Company for the interinsular trade, and negotiations are already proceeding between the Government and the Company for the regular carriage of mails and passengers between Stanley and Fox Bay.

TELEPHONES.

11. The erection of the Stanley-Darwin telephone has been proceeded with rapidly and two thirds of the total distance has been completed. The principal difficulty met with has been the frequent breaking of the wire by upland geese. These birds fly against it with great force and so far no satisfactory means have been devised to successfully combat this nuisance. In September a small telephone exchange was established in Stanley, and the following stations connected with one another; *i.e.* Government House, the Colonial Secretary's office, the Gaol, the office of the Falkland Islands Company, and the Lighthouse at Cape Pembroke.

WHALING AND SEALING.

12. The steam whaler "Admiralen" with her two tenders the 'Hauken' and the 'Ornen' had a successful season's catch around the Colony, and managed to obtain some 125 whales, mostly of the Sei variety. Under the Whaling Ordinance of 1906 whaling licenses are granted on terms and conditions approved by the Governor. As the result of the reduction of the duty from 10/s. to 1/s. on each seal skin imported for transshipment or exportation a certain number of the Nova Scotian sealers have revisited Stanley.

PASTORAL.

13. The prices realized during the year by pastoralists for wool, sheep-skins, and tallow have been very high. Patagonia appears to be one of the few countries where the number of sheep is increasing, though Australia is rapidly recovering from the great drought. Statistics seem to indicate that with few exceptions sheep throughout the world are becoming less in number, while the production of wool as a necessary consequence is likewise decreasing. On the other hand with an ever increasing population the demand for wool is likely to be maintained, and the prospects of sheep farmers, as far as I am in a position to judge, are therefore distinctly hopeful.

FISCAL.

14. On the eve of my return to England on short leave in order to consult a specialist about my eyes, it may not perhaps be amiss for me to review the Colony's financial position since I assumed the administration of the Government rather more than two and a half years ago. The assets and liabilities during the years 1904-05-06 were as follows:—

| | 1904. | | 1905. | | 1906. |
|------------------|---------------|-----|---------------|-----|---------------|
| | £ | | £ | | £ |
| Assets ... | 85,326 | ... | 98,661 | ... | 110,185 |
| Liabilities ... | 56,550 | ... | 56,935 | ... | 58,709 |
| Excess of Assets | <u>28,776</u> | ... | <u>41,726</u> | ... | <u>51,476</u> |

During the same period although the revenue has remained more or less stationery with a yearly average of £15,576 the expenditure has been kept under the revenue, and the aggregate savings in this respect have been £1964. The Colony carries no debt, and its financial position may be regarded as a sound and satisfactory one, while a possible extension of the whaling and sealing industries, and the establishment of a peat briquetting factory, to work the Government peat reserves, may be expected to bring in a slightly increased revenue in the course of a few years. Ways and means should however in my opinion be found with as little further delay as possible for the betterment of the sanitation of Stanley, the improvement of the inter-colonial mail and passenger service, and the repair and extension of the public stone jetty which is in a dangerous condition.

It is hereby notified, for general information, that, His Excellency W. L. ALLARDYCE, C.M.G., Governor and Commander-in-Chief, having this day left the Colony, on leave of absence, I, HENRY EUGENE WALTER GRANT, as Senior Member of the Executive Council, have taken the prescribed oaths and assumed the administration of the Government in and over the Colony of the Falkland Islands, in pursuance of Her late Majesty's Letters Patent dated 25th February, 1892.

Address by the Administrator on assuming the administration of the Government.

The Administrator directs the publication, for general information, of the following address delivered by him at Government House, on the occasion of his assuming the administration of the Government.

By Command,

I. WATT,
for Colonial Secretary.

24th April, 1907.

Address.

LADIES AND GENTLEMEN,

Owing to the departure from the Colony of His Excellency the Governor, on leave of absence, the temporary administration of the Government devolves on me.

His Excellency, as you have already learnt from his Message to the Legislative Council, on the subject of the Supplementary Appropriation Ordinance, goes to Europe for the purpose of consulting an oculist. While regretting the cause which necessitates his taking this extended journey, we can only hope that he will be amply compensated by the benefits to be derived from his visit. Both to His Excellency and Mrs. Allardyce, I am sure, we wish a prosperous voyage and a safe return to us in the best of health and strength.

The public affairs of this Colony have been under the guiding hand of His Excellency for just a little more than two and a half years. I question whether it is going beyond the mark to say that at no previous era in the history of the Falklands has there been greater administrative activity than during that time. The Government establishments have been placed on a more satisfactory footing than heretofore; public works have been prosecuted with vigour; steps have been taken to turn to account our great asset, the Crown reserves of peat; difficulties connected with the land law have been settled; and our out-lying Dependencies of South Georgia and South Shetlands—hitherto unpromising fields—have, as whaling centres, been brought within the circle of productive territories. For all that has been done in developing the resources of the Colony and promoting the welfare of the people, we should be, and no doubt are, grateful.

In assuming the administration of the Government, and continuing to advance, in so far as may be in my power, the true interests of the Colony, I rely on the support of the Members of the Executive and Legislative Councils, and the loyal co-operation of all public officers.

I thank you, cordially, for your presence here to-day. In the knowledge that should I at any time be in need of your help, it will be readily forthcoming, I assume with confidence the responsible duties that devolve on me.

Education Report for the Year 1906.

In Stanley the ordinary routine of school work was carried on during the year.

Mr. H. M. Richards, one of His Majesty's Inspectors of schools, visited Stanley and examined the schools in the month of August.

In the Camps the Education of part of the West Falkland Islands was in abeyance for some months through an unexpected vacancy in the teaching staff, which, however, was filled by the arrival of Mr. John W. Brown in November.

The Falkland Islands Company, after a delay of some months, filled up the two vacancies in their teaching staff.

With one or two exceptions the teaching has been kept up to its usual level by earnestness and attention on the part of the Teachers and diligence and care on the part of the children and parents.

| of which Notes have been reissued of the face value of | ... | ... | ... | ... | ... | ... | £50 |
| Notes have been destroyed of the face value of | ... | ... | ... | ... | ... | ... | £700 |
| which leaves a balance of Notes on hand to be destroyed, reissued, or otherwise dealt with of the face value of | ... | ... | ... | ... | ... | ... | £1,177 |
| | | | | | | | £1,927 |

5. The Profit and Loss account shows a net profit for the year of £45 5s. 5d., but besides this there is a balance carried forward from last year of £80 14s. 11d. If the net profits are carried to General Revenue yearly, this amount should not appear as a balance in the books which the Commissioners of Currency have to account for.

6. The amount of Interest received on account of the Depreciation Fund is £3 19s. 11d., as against £4 3s. 4d. for 1905, showing a decrease of 3/5 on the transactions for the year.

7. A sum of £3,300 is invested in various Stocks and a further sum of £3,300 in Gold deposited in the Government Vault, in addition to which there is a sum of £140 ls. to the credit of the Depreciation Fund to cover the amount of £6,600, being the value of Notes in circulation on the 31st day of December, 1906; thus there is a surplus asset of £140 ls., which is invested in Transvaal Stock. If, however, the market value of the Stocks on 31st December, 1906, be taken as the value of the investments, the Note Guarantee Fund only amounts to £3,134 6s. 10d., showing a Depreciation of £165 13s. 2d.; this amount is partly covered by the Depreciation Fund Investment, which amounts to £140 7s. 7d. in market value, and which still leaves a liability of £25 5s. 7d.

8. I have compared the various Investments with the Crown Agents accounts and find that the amounts are correctly entered in the books.

I have, &c.,

VERE PACKE,
Auditor.

The Honourable
The Colonial Secretary.

13. All guard boats shall by day fly a similar yellow Flag; by night they shall fly a red light at bow and stern.

14. No person except those authorised by the Health Officer shall communicate with any ship in quarantine, and the persons on board shall not communicate with the shore except with the permission of the Health Officer.

15. Any person found on board any ship which has not been granted pratique without the permission of the Health Officer shall be detained in such manner and for such time as the Health Officer may direct, and shall be liable to a penalty for a breach of these Regulations.

16. Infected ships shall be dealt with as follows:—

- (a) Every person who is suffering from an infectious or contagious disease shall, as soon as possible, if the condition of such person admit of it, be removed from the ship and isolated in some hospital or other suitable building or place appointed by the Governor in Council for the isolation of persons so suffering; and no person so removed shall leave such hospital, building, or place, until the Health Officer shall have certified that such person is free from an infectious or contagious disease.
- (b) If the condition of any person who is suffering from an infectious or contagious disease does not admit of such person being removed from the ship, the ship shall not be admitted to free pratique, and such person shall not be removed from or leave the ship except with the consent in writing of the Health Officer.
- (c) All persons on board other than those suffering from an infectious or contagious disease shall be permitted to land and be kept under observation for periods not to exceed the following:—
 - (i.) Plague, five days.
 - (ii.) Cholera, five days.
 - (iii.) Yellow fever, six days.
 - (iv.) Small-pox, twelve days.
 - (v.) Any disease declared by the Governor in Council to be an infectious or contagious disease, such number of days as may be fixed by the Governor in Council.

In applying these measures the date of the last case and the condition of the ship shall be taken into account.

- (d) Clothing and articles belonging to the passengers or crew which in the opinion of the Health Officer are infected shall be disinfected or destroyed.
- (e) Those parts of the ship that have been occupied by any person suffering from an infectious or contagious disease shall be disinfected, and also such other parts of the ship which, subject to the necessities of the case of a sick person who cannot be removed from the ship, the Health Officer may regard as infected.

- (f) In the case of plague measures shall be taken either before or after discharge of cargo to secure the destruction of rats on board. This operation shall be commenced as soon as possible and its duration shall not in any case exceed forty-eight hours.
- (g) In the case of yellow fever measures shall be taken to secure the destruction of mosquitos and their larvæ on board.
- (h) In the case of cholera the bilge water after preliminary disinfection shall be pumped out and the drinking water on board may be replaced by a fresh supply of wholesome water.

When such measures as the Health Officer may have deemed necessary in accordance with the provisions of this Regulation have been carried out, the Health Officer may, at his discretion, if not prevented by the provisions of paragraph (b) of this Regulation, admit such ships to free pratique.

17. Passengers arriving by an infected ship shall be entitled to a certificate from the Health Officer indicating the date of their arrival and the measures to which they and their baggage have been subjected.

18. Suspected ships shall be dealt with as follows:—

- (a) The passengers and crew may be subjected to observation on board for periods not to exceed the following:—
 - (i.) Plague, five days.
 - (ii.) Cholera, five days.
 - (iii.) Yellow fever, six days.
 - (iv.) Small-pox, twelve days.
 - (v.) Any disease declared by the Governor in Council to be an infectious or contagious disease such number of days as may be fixed by the Governor in Council.

The period of observation shall date from the arrival of the ship.

- (b) Paragraphs (d), (e) and (h) of Regulation 16 shall apply to suspected ships, and paragraphs (f) and (g) thereof may be applied. When such measures as the Health Officer may have deemed necessary in accordance with the provisions of this Regulation have been carried out the Health Officer may at his discretion admit such ships to free pratique.

19. Healthy ships may be admitted to free pratique immediately on arrival irrespective of the nature of their bill of health. They may, however, at the discretion of the Health Officer be subjected to the measures specified in paragraphs (d), (f), (g) and (h) of Regulation 16 and the passengers and crew may be subjected to observation which shall not exceed the following periods:—

- (i.) Plague, five days.
- (ii.) Cholera, five days.
- (iii.) Yellow fever, six days.
- (iv.) Small-pox, twelve days.
- (v.) Any disease declared by the Governor in Council to be an infectious or contagious disease such number of days as may be fixed by the Governor in Council.

The period of observation shall date from the departure of the ship from the infected place. The application of the measures specified in paragraph (d) or (f) of Regulation 16 shall only be resorted to when, in the opinion of the Health Officer, special reasons exist which require them. Where the provisions of paragraph (f) are applied the operation shall not in any case exceed twenty-four hours and shall not interfere with the free circulation of passengers and crew between ship and shore.

20. (1) If in a healthy ship the rats on board are found to be suffering from plague the Health Officer shall visit the ship and measures shall be taken as in paragraphs (d) and (f) of Regulation 16. The parts of the ship that the Health Officer may consider infected shall be disinfected and the passengers and crew may be subjected to observation which shall not exceed a period of five days after arrival unless in exceptional cases when such period may be extended to ten days. If unusual mortality has been observed among the rats on a healthy ship the Health Officer shall visit the ship and a bacteriological examination of the rats shall, when practicable, be made as quickly as possible. If it is thought necessary to resort to measures of rat destruction these shall be carried out as specified in paragraph (f) of Regulation 16.

(2) Until all suspicion of plague is removed the passengers and crew may be subjected to observation during the time specified in this Regulation in respect of ships on board of which rats are found to be suffering from plague.

21. Whenever means for the destruction of rats have been taken and the Master, the Shipowner, or the Shipowner's Agents shall so demand, the Health Officer of the Port shall furnish him with a certificate that such measures have been applied and specifying the reasons why.

22. If in the opinion of the Health Officer of the Port of arrival ships from an infected place have been disinfected effectively they shall not again be subjected to sanitary measures unless a fresh case of infectious or contagious disease has occurred on board since disinfection or unless they have again called at an infected place.

23. A ship shall not be regarded as having called at a place if it has merely disembarked passengers and their baggage or mails without having been in communication with the shore.

24. Where a ship has passengers on board who are in a filthy or otherwise unwholesome condition or is overcrowded with passengers, emigrants, or otherwise, the Health Officer may if in his opinion it is desirable with a view of preventing the introduction of any infectious or contagious disease subject persons on board to observation for such period as he may direct not exceeding the following:—

- (a) Plague, five days; if the person is under observation the period may be extended to ten days.
- (b) Cholera, five days.
- (c) Yellow fever, six days.
- (d) Small-pox, twelve days.
- (e) Any disease declared by the Governor in Council to be an infectious or contagious disease, such number of days as may be fixed by the Governor in Council.

Where measures of observation are prescribed the Health Officer may exempt from their application any person who, in his opinion, is immune from the infectious or contagious disease on account of which these measures are applied.

25. The Health Officer may, at his discretion, permit any person in a suspected or healthy ship to proceed to any place, and such permission if granted shall be upon the following conditions:—

Before such person is granted such permission—

- (a) He shall satisfy the Health Officer as to his name and intended place of residence.
- (b) He shall agree to present himself for medical supervision during periods not to exceed the following:—
 - (i.) Plague, five days.
 - (ii.) Cholera, five days.
 - (iii.) Yellow fever, six days.
 - (iv.) Small-pox, twelve days.
 - (v.) Any disease declared by the Governor in Council to be an infectious or contagious disease, such number of days as may be fixed by the Governor in Council.
- (c) He shall, if required by the Health Officer, deposit a sum not exceeding two pounds which may be forfeited if he fail to present himself for medical supervision.

The Agreement shall be in accordance with Form I of these Regulations.

- (d) The place of residence must, in the opinion of the Health Officer, be conveniently situated for the medical supervision.

If the Health Officer is not satisfied as herein required or if the person fails to comply with paragraphs (a), (b) and (c) hereof, the Health Officer may detain him under observation or direct him to proceed to a specified place and there remain under medical supervision during the prescribed period. In the latter case the provisions of paragraphs (b) and (c) hereof may, at the discretion of the Health Officer, be applied to such person.

- (e) In the case of small-pox a person may be required to produce to the Health Officer satisfactory evidence of having been successfully vaccinated or re-vaccinated within ten years immediately preceding or of his being otherwise immune from the disease and that such person may in the absence of such evidence be detained under observation for the prescribed period. But when the ship is a healthy ship this measure shall not apply to passengers who have not embarked or gone ashore at the infected place and it shall not be applied to those passengers who embarked or went ashore at the infected place if the circumstances of their stay there afford reasonable evidence of non-infection.

Any person acting in contravention of any of the provisions of this Regulation shall be liable to a penalty not exceeding the sum of ten pounds.

26. (1) Merchandise shall be disinfected only when in the opinion of the Health Officer it is infected, except in the case of yellow fever when it shall under no circumstances be liable to disinfection or prohibition. — Number of days on which rain fell 21.

* Amount measured each day at 8 a.m., and entered to the preceding day.A. LINNEY,
Observer.

The increase of £188 under Division III. is to be attributed mainly to the development of the whaling industry, especially in the waters of our Dependency of South Shetlands.

The decrease under Division VII. Rents, Item 1, Crown Lands, £1,108, arises from the operation of the Land Ordinance, 1903, under which lessees who have arranged for the purchase of their leaseholds cease to pay an annual rent. This decrease is partially adjusted by the increase of £693 under Division V. Interest, Item 1, Land Sales Investment Fund.

EXPENDITURE.

3. The Ordinary Expenditure for 1906 (i.e. exclusive of Public Works Extraordinary, £1,417, and payments under the Live Stock Ordinance, £566) amounted to £14,275, or £1,547 less than the Ordinary Revenue. The Ordinary Expenditure for 1908 is estimated at £14,265. A schedule of additions and reductions is given in Appendix 2.

4. Division I.—**Pensions.**—Item 8.—After a long and honourable career of service in the Colony, extending over a period of thirty years, the Very Rev. Lowthier E. Brandon, M.A., Dean and Colonial Chaplain, retired on pension on the 25th August, 1907. The annual expenditure under this Division therefore will be increased by £159 2s. 6d., i.e. £184 19s. 2d., the amount of the pension granted to Dean Brandon less £25 16s. 8d., the amount of that drawn by the late Mr. R. M. Routledge in respect of his services in this Colony as Magistrate. This sum, however, is more than met by the saving of £200 a year which has been effected under Division XII., Ecclesiastical, owing to the abolition of the office of Colonial Chaplain.

5. Division II.—**The Governor.**—Item 4.—Owing to the difficulty of obtaining the services of a person suitable for the post of Assistant Gardener and Labourer at the present rate of pay, this item has been increased by £6.

6. Division III.—**Colonial Secretary.**—Item 4.—Mr. J. B. McConomy's agreement as Printer expired on the 11th May last, but was extended for a period of six months at an increased rate of salary of 10/- a month, which has been voted by the Council. The Crown Agents have been instructed to engage the services of a Printer to succeed Mr. McConomy on practically the same terms on which he was originally engaged. Hence the reduction in the amount of this Item.

7. Division X.—**Medical.**—Item 8.—Honourable Members were informed in the Message laying the Estimates for 1907 that efforts would be made to obtain the use of the stone building on the north side of the Naval Depot for the purpose of a Quarantine Station and Isolation Ward. It is satisfactory to be able to state that the Lords Commissioners of the Admiralty have consented to the proposal and have granted the building to the Colonial Government, for so long as it is required for quarantine purposes, at a rental of £30 per annum. It is permitted to fence in the area round the building (about 1 acre) and to erect on such area the mortuary, laundry, and lavatories for which provision has been made in the Estimates for the current year. The premises are to be kept in repair by this Government. The rent for 1908 is included in Item 8, Quarantine, &c., £80.

Item 9.—The work of converting the building formerly used as the Senior School into a Cottage Home for the relief of the indigent poor, referred to in the Message of 1907, is approaching completion, and the Home will probably be ready for the reception of inmates about the beginning of 1908. The sum of £150 appearing in the Estimates as Cottage Home Expenses includes Charitable Allowances. No vote under the latter head therefore is invited, as was done in the Estimates for 1907 (Division XIV., Miscellaneous, Item 15).

8. Division XI.—**Education.**—Item 8.—The annual grant of £110 in aid of the Roman Catholic Schools has been relinquished.

9. Division XII.—**Ecclesiastical.**—Items 1 and 3.—Effect has been given to an intimation conveyed by the Marquess of Ripon in March 1894, and the office of

Colonial Chaplain has been abolished. It is recognised, however, that it will be difficult for the Trustees of Christ Church immediately to secure adequate support for two clergymen if the whole of the Government grant of £400 a year were suddenly withdrawn. An annual grant of £200 therefore has been approved by the Secretary of State, on the distinct understanding that the amount of the grant may be revised hereafter. The grant is to be paid over to the Trustees of the Church for the purpose of augmenting the salary of one or two clergymen as they may decide at their discretion to appoint, subject to the condition that the Incumbent or his Assistant will, without additional remuneration from the Government, continue to perform such educational work as the Government may desire, and as they may be able to undertake without interfering with their clerical duties.

10. Division XVI.—Colonial Engineer.—Item 6.—Blacksmith's Apprentice.—This is a new office in respect of which a vote has already been passed by the Council and submitted for the approval of the Secretary of State.

Item 7.—Owing to the difficulty of always being able to secure the services of a local mason when required, the Crown Agents were instructed to engage a mason under an agreement for five years, on the understanding that he would also perform the duties of a labourer, and Mr. L. Raynor was selected for the post. He arrived in the Colony on the 8th May. His salary, particulars of which are given in Note 10, will be a charge against this item.

11. Division XX.—Charges on account of the Public Debt.—This is a new Division, the necessity for which is explained later in this Message,

12. Division XXII.—Public Works Extraordinary.—Items 10 and 11.—In the Message which accompanied the Supplementary Estimates 1906, I stated, *inter alia*, that ways and means should in my opinion be found with as little further delay as possible for (a) the betterment of the Sanitation of Stanley, (b) the repair and extension of the Public Stone Jetty.

Sanitation as existent in Stanley at present is, to say the least, extremely primitive. The soil has been reported by the Colonial Surgeon to be sewage sick, and premonitory signs are not wanting to indicate that this is so, and that the town is on the verge of serious trouble owing to a disregard of modern hygienic requirements.

The Colonial Surgeon in his Medical Report for 1904, wrote as follows:— "It is no exaggeration to say that, under the existing sanitary conditions, we are but paving the way for outbreaks of such essentially filth diseases as diphtheria, typhoid, smallpox, &c.," while again in his admirable Report for 1905 he remarked, "the town of Stanley requires proper scavenging and an improved pail system * * ." I may add that these views are likewise held by the local administration, and that the Secretary of State for the Colonies is of opinion, "that some improvement of the sanitation of the town is urgently called for." Indeed so much importance is attached to this question by His Majesty's Government that during my late visit to England I was asked to discuss this matter with Mr. Tyndale, Sanitary Engineer to the War Office. I explained the local conditions to him in their various bearings, and the following is an extract from his report to the Colonial Office:—

"The present condition of affairs seems to be as follows: Every house is provided with a pail closet the contents of which are dug into the soil of the garden with which practically all the houses are provided. This system hitherto has served fairly well as the soil is absorptive. The slops also are thrown out over the garden. But the time has come when the gardens can no longer deal healthily with the sewage required to be disposed of and a considerable risk to health is being run of rendering the Township unhealthy and of causing any disease which might break out to become epidemic.

"In view of these conditions it seems not only reasonable that they should be ameliorated, but that it is imperative that something should be done quickly to avert disaster."

As to what that something should be I have no hesitation in saying that the night soil should be removed and should be taken out to sea. To carry such a scheme into

operation a jetty with tipping funnel, two punts, two sanitary carts and horses, &c., would be required, as also a steam launch to tow the punts to Port William, the cost of which has been estimated at £2,000, exclusive of maintenance. The services of a launch are likewise urgently required for Quarantine, in fact without one the necessary regulations and restrictions cannot be properly enforced, while the work in the Harbour, Police and Customs Departments, &c., would thereby be very much facilitated and expedited. While I avail myself of this opportunity to acknowledge the courtesy of the Falkland Islands Company in so frequently granting to Government the use of their steamers 'Samson' and 'Plym,' often I fear at considerable inconvenience to themselves, I am satisfied that this Government should have a launch of their own and be independent in this respect as in other Colonies.

The annual cost of efficiently carrying out the above scheme for the removal of the night soil, and at the same time providing for the general maintenance of launch and punts, is estimated to be somewhat as follows:—

| | £ |
|--|-------------|
| Carter and Scavenger | 120 |
| Forage | 25 |
| Master of Launch and Government Pilot | 120 |
| Engineer of Launch | 108 |
| Deck Hand | 78 |
| Coal and Oil, &c. | 100 |
| Insurance | 50 |
| Interest | 60 |
| Total | <u>£661</u> |

On the other hand it is anticipated that the launch by charter and otherwise would earn £140 per annum, and that the additional revenue obtained from pilotage would make good the salary of the Master, i.e. £120. To the above has to be added a further sum of about £50, being a saving under Port and Marine, items 1 and 2.

This then would leave a sum of £350 per annum to be provided from some other source. In view of the great benefit to be derived by the residents of Stanley from the introduction of a regular and systematic removal of the night soil, the present property rate of 9d. in the £, imposed under Ordinance IV of 1905, should be increased to one shilling and three pence, the maximum permitted under the Ordinance. This would bring in an additional £120.

The balance amounting to a little over £200 I propose to obtain by the following imposts:—

- (a) a tax on patent medicines of 20% ad valorem.
- (b) a gun license—including pistol—of 10/- per annum.

The former is much needed in the best interests of the community, while the latter would put a restraint on the use of firearms which is very badly wanted.

The Colony will, in my opinion, be extremely fortunate, if it can procure for its capital a much needed and efficient scheme for the removal of the night soil, thereby materially improving its existing sanitary conditions, and at the same time provide itself with a capable launch, thus obtaining increased administrative efficiency, at a total cost of £350 per annum.

With regard to the repair and extension of the Public Stone Jetty, this is a question which has engaged the attention of successive Administrations for many years past, and as far as I am aware the need for such a jetty, with a depth of about 12 feet of water at low tide, has been generally recognized. At a Meeting of the Executive Council in 1900 the Council unanimously decided "that a stone pier with 14 feet of water at low water should be constructed."

The causes which have prevented the needful wharf accommodation from being undertaken have been two, i.e. (1) certain more urgent considerations, some of which were alluded to under the Head of Public Works in the Message to Council already referred to (2) lack of funds. At present there are but three jetties in Stanley, i.e. the

East and West Jetties which are owned respectively by a private firm possessing certain sole and exclusive rights thereto, and the Dockyard Jetty. The latter, situated as it is at the extreme west of the township, is not convenient for business purposes.

If the trade of this Colony and its Dependencies is to be developed, and facilities offered for individual enterprise, many of which are lacking at present, the extension of the present Public Jetty some 200 feet by means of a wooden addition seems to me to be a Public Work which must strongly commend itself to those who have the best interests of the Colony at heart.

In order to permit of these two schemes being carried through, it is proposed to borrow a sum of £4,000 @ 3% from our accumulated assets, which now amount to over £50,000, and to establish a Sinking Fund for the repayment of the principal in ten years time.*

Item 12.—There is a pressing necessity for extending the enclosed area of Stanley Cemetery, and the Cemetery generally needs putting into good order. The funds at the disposal of the Burial Board are quite inadequate for these purposes, and provision therefore has been made for carrying out the work.

Item 13.—The present Printing Office is practically beyond satisfactory repair, and a new office is imperatively necessary. It is proposed to erect the new building conveniently near the Government Offices, on the southern side.

Item 14.—The purchase of a Kitson Street Lamp (Oil, 1,000 candle-power) is in the nature of an experiment. If this style of lamp should prove to be suitable to local conditions, it is hoped that, by gradually substituting it for the street lamp at present in use, the lighting of Stanley will be greatly improved, and at an annual cost not in excess of that now incurred.

* In deference to the wishes of the Unofficial Members of the Council, the Government have decided to let the question of the extension of the Public Stone Jetty stand over for the present, and to put in order and improve the existing structure as far as the sum of £250 voted for the purpose will allow.

His Excellency the Governor directs it to be notified for general information that Professor Wyndham Dunstan, Director of the Imperial Institute, London, reports that the results of an examination of a sample of peat taken from West Point Island show that the sample is of greater value as a fuel than the samples of Falklands' peat previously submitted, on account of the smaller percentage of water present. It is, however, generally similar in composition to No. 3 of the earlier specimens after that sample has been dried in the air until about the same amount of water is present in the the two cases.

Sir,

I have the honour to enclose a report on six specimens of minerals from the Falkland Islands which were left by you at the Imperial Institute for examination in August, 1907.

I have, etc.,

WYNDHAM R. DUNSTAN.

His Excellency the Governor,
FALKLAND ISLANDS.

IMPERIAL INSTITUTE.

(South Kensington, London, S.W.)

Report on Minerals from the Falkland Islands.

by PROFESSOR WYNDHAM R. DUNSTAN, M.A., F.R.S., Director.

The six specimens of Minerals from the Falkland Islands which are the subject of this report were left at the Imperial Institute for examination in August last by Mr. W. L. Allardyce, C.M.G., the Governor of the Colony.

The specimens were as follows:—

1. "Chrome or Ochre from West Point Island". Weight 79 grams. This is a ferruginous clay containing a considerable amount of sandy material. It is of no value as an ochre.

2. "Whiting, West Point Island". Weight 15 grams. This is a specimen of impure kaolin. It is rough to the touch and contains a considerable amount of gritty material (quartz, etc.). If large quantities of this kaolin are obtainable it might be worth while to have a sample levigated and submitted to technical trials. For this purpose a sample weighing about 10 lb. should be forwarded to the Imperial Institute.

3. "Remains of a submerged forest or washed-up trees from the South American Continent; found on West Point Island". This is a specimen of wood ash containing lumps of charcoal and some siliceous matter. If a large quantity of this material is available a larger sample should be forwarded to the Imperial Institute for examination in order to determine its value as a manure.

4. "In paper, which it is eating through; from West Point Island". Weight 500 grams.

5. "Formed by the action of fresh water on buried trees". Weight 70 grams.

These two specimens consist of decomposing marcasite (rhombic iron sulphide). This material undergoes ready oxidation with the formation of iron sulphates. The oxidised mixture is acid and corrosive, and causes the rotting of the paper in which the sample is enclosed.

Marcasite is a very unstable mineral and undergoes oxidation much more readily than common pyrite. It is not likely that there can be much of this material available, but if there be, it might be well to consider its utility as a source of iron sulphate, which is used in various ways for commercial purposes.

6. "Fossil stone from East Falklands". Weight about 350 grams. This specimen included two different materials ; (1) several fragments of micaceous sandstone containing casts of brachiopod shells, and (2) several pieces of massive siderite (spathic iron ore) which have a brownish weathered exterior, but which look quite black on freshly fractured surfaces. A sample of the siderite was submitted to chemical examination with the following results:

This ore would be of considerable value for the manufacture of iron if it were within easy distance of transport.

Carbonate ores such as this are generally calcined before smelting, and, after such treatment, ore equal to the sample would contain 61.5 per cent of iron. The amount of phosphorous present is rather high for the manufacture of steel.

In the condition in which it was received the ore would be worth from 12s. to 13s. per ton, or after calcination 16s. to 17s. per ton.

Annual Report of the Chief Inspector of Stock for the year 1907.

Stanley,
10th March, 1908.

SIR,

I have the honour to submit herewith my Annual Report for the year ended the 31st December, 1907.

Seasons.—The Summer and Autumn were exceptionally dry, and, in consequence of the excessive dryness, the hard camp and small Islands suffered greatly. The Winter was open, and there was but little snow. The Spring has been the wettest that has been experienced for some years past.

Sheep.—The total number of sheep in the Colony at the end of May 1907, was 695,747. This shows a decrease of 6,949, as compared with the previous year. This decrease is mainly due to the exportation of culled ewes to Patagonia. The total number exported was 12,203, all from Port Salvador. An experiment was tried by a Hamburg firm for the exportation of salt mutton to Europe, which has not proved a success.

Wool.—The clip was somewhat light, but sound, and realised a good price.

Lambing.—The result in this respect was about 75%.

Dipping.—This important work has been more carefully attended to than in previous years, and I am pleased to say sheep were never more free from parasites. An Ordinance to make provision for preventing the spread of lice in sheep was passed in January, but was not enforced during 1907, in order that Farmers might have ample time to take steps to comply with the requirement of compulsory dipping. To protect careful flock-owners from their negligent neighbours, every effort is made, but several of the Farmers do not seem to realise the advantage to be gained by compulsory dipping, and have petitioned against this Ordinance.

The Live Stock imported during the year were as follows:—

| |
|---|
| 16 Romney Marsh Rams from England. |
| 5 Lincoln " " " |
| 268 Horses from Patagonia. |

The Rams were quarantined for 28 days. With the exception of a few cases of foot-rot they were all perfectly healthy. The Quarantine Shed has been thoroughly renovated and there is every convenience now for placing imported stud sheep under temporary supervision.

Geese—The Ordinance for effecting a diminution in the number of geese has been extended until the 31st December, 1912. It was found necessary to increase the number of beaks authorised to be purchased in the East Falklands from 37,500 to 50,000. There is a marked reduction in the number of geese in some parts, while in others very little attention is being paid to the arrest of their increase. The number of beaks authorised to be purchased for the year for the East and West Falklands respectively were:—

| | |
|-----------------|---------|
| East Falklands, | 50,000. |
| West Falklands, | 37,500. |

The number purchased were:—

| | |
|-----------------|---------|
| East Falklands, | 46,840. |
| West Falklands, | 28,185. |

Grass seed sowing.—There has been very little done in this respect during the year. Those, however, who have sown seed are quite satisfied with the result and are convinced that it will grow in suitable places, consequently they are sending away large orders for 1908.

Ditching & Draining.—Several of the Farmers are paying more attention than hitherto to this important matter, and they are being amply repaid by the results.

I have, etc.,

J. ROBERTSON.

Chief Inspector of Stock.

The Honourable

The Colonial Secretary.

Auditor's Report on the transactions of the Commissioners of Currency for the Year 1907.

SULLIVAN HOUSE,
Stanley, 17th March, 1908.

Sir,

I have the honour to report that I have examined the Books of the Commissioners of Currency for the year ending 31st December, 1907, and I find that the transactions for the year consist of;—

1. The issue of six £1 notes to replace notes lost in the wreck of the 'Fair Rosamond'.
2. Various amounts of interest received by the Crown Agents on monies invested, which have been paid to General Revenue or re-invested.
3. Fees for Management and Audit which have been paid for the current year.
4. The total amount of Notes received by the Commissioners of Currency is therefore the same as last year. £11,500, which is made up as follows:—

| | |
|--|-----------------|
| In circulation on 31st December, 1907 | £6,600. |
| Unissued Notes | £3,017. |
| Cancelled or Withdrawn 31st December, 1907 | £1,883. |
| | <u>£11,500.</u> |

5. The number of Notes in circulation and their face value is as under:—

7. The number of Notes cancelled or withdrawn on the 31st December, 1907, is made up as follows:—

| | |
|--|----------------|
| Destroyed | £ 700. |
| Cancelled as lost in the "Fair Rosamond" | £ 6. |
| Withdrawn and awaiting treatment | £1,177. |
| | <u>£1,883.</u> |

8. Profit and Loss account for the year shows a net profit of £62 10s. 11d. which has been carried to the General Revenue of the Colony.

9. Interest received from the investments on account of the Depreciation Fund amounts to £5 0s. 2d. as against £3 19s. 11d. for 1906, showing an increase of £1 0s. 3d. on the transactions for the year.

10. The sum invested in various Stocks, £3,300, and that deposited in Gold in the Government Vault, £3,300, remain the same as the previous year. The market value, however, on the 31st Dec., 1907, amounts to £3,235 17s. 8d., showing a rise in value of £101 10s. 10d. during the year.

11. The Depreciation Fund now amounts to £178 1s. 2d. which is invested in Transvaal Stock.

12. I have compared the various investments with the Crown Agents accounts and find that the amounts are correctly entered in the Books.

I have, etc..

SUPPLEMENTARY ESTIMATES, 1907.

(MESSAGE INTRODUCING.)

Read in Council, 3rd April 1908.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you herewith the Supplementary Estimates for the year 1907.

2. The Revenue for the year, exclusive of Land Sales and amounts received under the Stock Ordinance, produced £17,430 1s. 5d., being £1,926 1s. 5d. in excess of the estimate. This is the highest revenue so far obtained in this Colony, exceeding that of 1903 by £37. The 1903 revenue of £17,393 was made up in part of a refund of £832, the balance of a sum of £2000 deposited in the Treasury and especially earmarked for harbour works, vide Blue Book Report 1903. The increase was derived principally from Probate duty, Interest, Whaling Licenses, &c., Rent (South Georgia) and Port and Harbour dues. The receipts exceeded the estimates under every Head except that of Customs which shewed a decrease of £216.

3. The Expenditure amounted to £16,053 17s. 10d., being £724 8s. 2d. over the estimate. The actual excess of Revenue over Expenditure on the year's operations was therefore £1,376 3s. 7d.

4. The comparative statements (A) and (B) attached shew the estimated and actual Revenue and Expenditure under the various Heads.

5. The expenditure in excess of the amount already sanctioned by Council under the Appropriation Ordinance No. 4 of 1906, and for which you will be asked to pass a Supplementary Appropriation Bill, is £1,315 19s. 5d. The details of the principal items are as follows:—

6. Division I.—**Pensions, £44 5s. 6d.** The Very Reverend Dean Brandon retired in September and became entitled to pension.

7. Division II. — **The Governor, £25 4s. 5d.** The estimate for coal for Government House was somewhat exceeded. The heating of the old portion of the building with hot water pipes accounted in part for the additional consumption of fuel.

8 Division IV.—**Treasury and Customs, £138 11s. 3d.** An over expenditure of £138 2s. 6d. was made on account of temporary Customs Officers, and was recovered later.

9. Division VI.—**Port and Marine, £3 3s. 7d.** The sum provided under Pilots was exceeded, but as in the case of the previous item this amount was likewise recovered.

10. Division X.—**Medical, £169 12s 5d.** On several occasions passengers by the mail-steamers were placed in quarantine and maintained at Government expense. Owing to an outbreak of diphtheria at South San Carlos a considerable quantity of anti-toxin was imported from South America, and after the epidemic was over the clothes and bedding, &c., of the patients, which had been destroyed by order of the Board of Health, were paid for.

11. Division XIII.—**Transport, £62 17s. 6d.** The estimate of £230 was found insufficient to meet the cost of passages and landing stores.

12. Division XVI.—**Colonial Engineer, £76 0s 3d.** The item 'forage' is mainly accountable for the over-expenditure. A large supply of Canadian hay has to be laid in at the end of each year in order to meet the winter's requirements, and a considerable portion of the last consignment was in stock in January. It was found necessary also to strengthen the Works Department by the purchase of an additional horse, and a proportionate quantity of hay and grain had to be bought on this account.

13. Division XVII.—**Public Works Recurrent (Roads, drains, &c ; Repairs of buildings; Furniture, Government House), £166 13s. 9d.** An order for earthenware channels, for the improvement of the drainage of Stanley, caused the item for roads, &c., to be exceeded. When in England I arranged, with the approval of the Secretary of State, for pictures of their Majesties the King and Queen to be supplied to this Colony, as Government House did not possess a picture of either. The over-expenditure under Repair of Buildings amounted to £129 14s. 8d. Of this sum £60 10s. 3d. is a matter of account, being the cost of timber and iron which was purchased for the Stock Quarantine Shed and afterwards refunded from the Stock Fund.

14. Division XVII.—**Public Works Extraordinary, £105 13s. 6d.** An item of £34 for freight on timber from South America for the new School erected last year was not presented till the beginning of 1907. The sum voted for the erection of the mortuary, laundry, &c., at the Quarantine Station, was found to be insufficient and was exceeded by £50; while the furniture for the Cottage Home cost somewhat more than the original estimate.

15. Division XVIII.—**Savings Bank, £55 14s. 1d.** This was occasioned by a considerable increase in deposits, which again necessitated a larger sum being disbursed as interest.

16. Division XX.—**Drawbacks and Refunds, £460 19s. 5d.** This item is a matter of account, and is caused by certain refunds of rent to leaseholders who have purchased their leases under the Land Ordinance, 1903. The purchase money is invested in approved securities and the Government receives interest instead of rent.

PUBLIC WORKS.

17. During the year the old Senior School was converted into a Cottage Home. This necessitated considerable structural alterations, and a new addition at the north end. The building has accommodation for eight inmates, in addition to separate sitting room and bedrooms for two Trained Nurses, and is complete with wash-house, laundry, &c. At the Quarantine Station on the north side of the harbour a mortuary, laundry, and lavatory were erected. The public reservoir in the Government House paddock, which has a capacity of about 100,000 gallons, was thoroughly overhauled and repaired, and a new settling reservoir was built to take the place of the old one that leaked. The two rooms at the back of the Post Office, formerly occupied by the caretaker of the Government Offices, were turned into a Parcel Post room, the steadily increasing number of parcels rendering additional accommodation necessary. A considerable stone reclamation was built on the shore at the east end of the Settlement as a rubbish heap, and the

sanitation of Stanley improved by the carting there of all refuse. In addition to the ordinary maintenance of roads and drains may be mentioned the laying down of drains—mostly open earthenware channels, brick and tile, stone and cement—in Dean Street, Philomel Street, John Street, Drury Street, and Villiers Street. Amongst minor useful works were, the laying on of a hot water system at the Gaol, which has materially added to the hygienic improvement of that establishment; the rebuilding of a considerable length of sea-wall at the west end of the township; the overhauling and repainting of the Government Station at Fox Bay; and the reclamation of a portion of the foreshore to the west of the Cottage Home.

COMMUNICATIONS.

18. Interinsular communications still remain in a very unsatisfactory condition. Under ordinary circumstances, a reply to a letter written in Stanley would be received much more rapidly from the north of Scotland, 8,000 miles distant, than from some of the outlying Islands of the West Falkland not 140 miles off as the crow flies. It is surprising that station owners and lessees remain satisfied with the necessarily slow and erratic movements of small schooners in a tempestuous latitude. There are signs which indicate that it is possible that the enterprise which is lacking locally in this respect may be supplied from outside the Colony. The negotiations between the Government and the Falkland Islands Company referred to in my Message to Council of 27th March, 1907, for the regular carriage by schooner of the mails and passengers between Stanley and Fox Bay fell through as the Company did not see its way to enter into a contract.

TELEPHONE.

19. The erection of the Stanley-Darwin telephone, which is jointly owned by the Government and the Falkland Islands Company Ltd, was completed, and the first message was sent over the intervening fifty odd miles early in November. Mr A. L. Allan, the Falkland Islands Company's Manager at Darwin, and those associated with him, deserve great credit for the manner in which they successfully carried through this important undertaking. The conditions under which the Public will be allowed to transmit messages will shortly be published.

WHALING.

20. Whaling continued to be found remunerative around the Falklands, and at South Georgia and South Shetlands. The substantial increase to this year's revenue already mentioned was mainly due to the development of this industry.

PASTORAL.

21. The prices realised by pastoralists for wool, &c., continued to be highly remunerative. As to future prospects, it is satisfactory from the Colony's and the Sheep-farmer's point of view to know that the better prices ruling for wheat encourage an extension of agricultural pursuits in Australia, New Zealand, and South Africa, all of which are sheep rearing countries; while in Argentina the Minister for Agriculture stated a few months ago when opening the Palermo Show that the area under grain in 1907 in that Republic was 494,200 acres in excess of what it was in 1906. In view of the above and seeing that the world's consumption of wool is at a greater ratio than that of production, all interested in the staple industry of this Colony have I think reason to congratulate themselves. The advantageous terms offered by Government to lessees under the Land Ordinance 1903 for the purchase of their lands at 3s. per acre, on the computed acreage (10% down, and balance in 30 or less years @ 3%) have resulted in applications to purchase from leaseholders occupying more than half of the total leased land.

FISCAL.

22. As already shewn the financial condition of the Colony continues to remain satisfactory. The accumulated assets on the 31st December were £57,516. During my absence in Europe on leave, April to September, the Honble H. E. W. Grant acted as my locum tenens, in addition to performing the duties of Colonial Secretary. To his tactful and efficient administration, and the manner in which he carefully restricted expenditure, is in great measure due the satisfactory result of the year's operations.

Education Report for 1907.

1. The newly erected Government School was occupied for the first time on January 14th. This building will bear comparison with any Provided or Non-provided School building, of a similar size, in England.

2. Very considerable change, of an obviously advantageous character, has been made in the school syllabus. The recommendations made by His Majesty's Inspector of Schools, Mr. Richards, have largely been adopted.

3. I am glad to report that increased attention has been paid to physical exercise and that these exercises, when the weather permits, take place in the play ground.

4. The average attendance of scholars has not been satisfactory. An epidemic of whooping cough in the winter accounted for many absences from school.

5. The efforts made, during the last three years, to improve the condition of the schools has been appreciated by the parents of scholars.

6. The Itinerant Schoolmasters continue to carry on their most difficult work in a satisfactory manner. In every case where parents have co-operated with the Schoolmaster, by seeing allotted tasks are performed between each visit of the Schoolmaster, the results have been satisfactory.

7. In Lafonia, the Falkland Islands Company continue to employ a resident Schoolmaster at Darwin and two Itinerant Schoolmasters in the camp.

8. Every child in the Colony, between the ages of five and thirteen, not mentally or physically incapacitated, is under instruction.

Medical and Sanitary Report on the Falkland Islands for the Year 1907.

The Colonial Surgeon to the Colonial Secretary.

Port Stanley,
2nd March, 1908.

Sir,

I have the honour to submit, for the information of His Excellency the Governor, the Medical Report on the health and sanitary condition of the Colony for the year 1907, together with returns appended thereto.

The returns deal with Port Stanley and the West Falkland Island only, no returns being available from Darwin and the North Camp of the East Falklands.

I have, etc.,

E. T. Born,
Colonial Surgeon.

97/-
The Honourable
The Colonial Secretary,
Port Stanley.

VITAL STATISTICS.

1. Population.

The estimated population of the Colony for 1907 was 2,266.

There were 53 births.

The birth rate was 23.38 per 1,000 as against 27.11 per 1,000 in 1906.

The annual rate of mortality, which has been equal to 8.23 per 1,000 and 5.40 per 1,000 in the two preceding years, rose to 9.26 per 1,000 in the year under notice.

The 21 deaths registered during the year under review show an increase of 4 over the number in the preceding year. Of these, 5 resulted from Whooping Cough, 2 from Diphtheria, and one from accidental drowning. The exceptional prevalence of sickness in the town of Stanley accounted for the higher death rate.

2. Public Health.

The health of the Township, where the local sanitary conditions are unsatisfactory, was not what could be desired. With this exception, however, the general health of the Colony was good.

The total number of cases treated during the year under review shows an increase over that of 1906, the figures being 1,653 and 1,301 respectively.

An epidemic of Dysenteric diarrhoea followed by one of Whooping Cough enhanced the number of cases treated. The number of cases treated may be gathered from the following table:—

| | Port Stanley. | Darwin and North Camp. | West Falklands. | Total. |
|-----|---------------|------------------------|-----------------|--------|
| No. | 1,367 | (No Returns) | 286 | 1,653 |

An increase of 648 as compared with the previous year.

The number of attendances at the Surgery (Port Stanley) continues to increase, there having been no less than 2,541 attendances as against a total of 2,040 in 1906 and 1,302 in 1905. A small consulting room in connection with the dispensary and waiting room is somewhat badly needed.

4,136 Medicines were dispensed and 1,830 visits paid to persons in their own houses in the Town of Stanley, an increase of 915 and 203 respectively.

The District Nurse, Miss Ellen Barnes, continued to render most valuable service, attending 62 cases and paying 1,650 visits.

Mention should be made of the indefatigable energy displayed by Nurse Barnes during a period of exceptional prevalence of disease.

PREVALENCE OF SICKNESS DURING THE YEAR AND GENERAL CHARACTER
AS TO MILDNESS OR SEVERITY OF THE DISEASES PREVAILING.

Whooping Cough.

During the year under review, Stanley was visited by an epidemic of Whooping Cough, which proved to be of moderate severity, the attack lasting on an average 12 weeks. The number of children known to be affected was 279, but there were in addition mild cases, to which no medical aid was summoned.

The disease claimed 5 deaths of children under 2 years of age.

Diphtheria.

A small outbreak of Diphtheria, which might have assumed serious proportions, occurred at Third Corral, North Camp, East Falkland, during the year. The outbreak however, was soon checked, thanks to the prompt and vigorous action taken by the Medical Officer (Dr. Foley) to the Falkland Islands Company, Ltd.

Every effort was made to trace the origin of the disease, the primary cause of which appeared to be connected with a box of clothing which had been imported into the Colony from a district in England, where at the time diphtheria was prevalent.

Instructions as to the necessity of absolute isolation were issued and the inhabitants of the North Camp willingly responded to the appeal from the authorities.

The disease was limited to one family, five members of which were affected.

As regards the medical aspect, the disease generally ran a severe course. Two cases terminated fatally. Anti-diphtheritic serum was applied.

Beri-beri.

Five cases of Beri-beri were under treatment. The patients were Canadian Sealers, who had been ill two or three weeks prior to their arrival at Port.

The disease made its appearance on board two schooners forming part of a fishing fleet of four vessels. One case terminated fatally at sea. All the cases exhibited similar symptoms—namely, those of a peripheral neuritis, with oedema and numbness over the front of the shins and ankles. The symptoms included paresis in the legs, loss of knee jerks, tenderness in the muscles of the calf and wasting of these muscles. They all complained of palpitation, shortness of breath and gastric disturbances. All the patients recovered with rest, appropriate diet and treatment.

In view of the probability that the disease is due to the absorption of a toxine derived from food stuffs, an investigation was made into the food supplies provided for all the vessels. It was found that some rice and saltfish supplied to the two sealing schooners on which the disease had broken out, was damaged.

Inquiry elicited no information as to the presence of bugs on ship-board.

Respiratory Diseases.

There was a considerable prevalence of Bronchitis. The weather conditions during the winter months were particularly unfavourable for persons predisposed to pulmonary affections.

Ring Worm.

During the year 1907 there were 6 cases of Ring Worm among the school children. The children affected were excluded from school and all the school children were medically examined. No further cases were found. One case recovered after continuous treatment extending over a period of 6 weeks. The remaining cases have also recovered.

Dysenteric Diarrhœa.

During the year under review, the price of sanitary neglect was paid in a somewhat severe outbreak of Dysenteric Diarrhœa among the inhabitants of Port Stanley. The number of cases treated were 145, a very considerable number when regard is had to the

fact that the estimated population of the Township is only 800. A number of these cases were typical of Dysentery proper, the stools at the height of the disease containing no natural faecal matter, but consisting entirely of mucus, serum and blood. In a number of cases pure blood was passed. Gripping abdominal pain and painful straining were somewhat constant symptoms. There was moderate fever, the temperature ranging from 100 to 101° F. There were no complications and the disease subsided in from 7 to 10 days in each individual case. Ipecacuanha in the form of Pulv. Ipecac. co. was exhibited with marked beneficial results, the symptoms rapidly improving. The usual astringents were found inefficacious.

Vaccinations.

During the year under notice the number of vaccinations performed in the Colony was 57. The Vaccination Ordinance has been strictly enforced during the past year and the results have been satisfactory.

The number of successful cases may be gathered from the following table:—

| | Stanley. | Darwin and North Camp. | West Falklands. | Total. |
|-----|----------|------------------------|-----------------|--------|
| No. | 22 | 25 | 10 | 57 |

Quarantine.

Fifty-nine vessels were boarded during the year 1907. Of this number 4 vessels were placed in quarantine owing to cases of infectious disease having occurred on ship board.

A number of improvements in connection with the Quarantine Station are being executed, which will materially increase both the comfort and efficiency of the Station.

The improvements being carried out are, the erection of a mortuary and disinfecting room, laundry, and lavatories.

In its present condition the Quarantine Station proper provides accommodation for 6 or 7 persons, including the caretaker.

If any case of illness occurs among the passengers performing Quarantine, they are removed and treated in an adjoining building, which is a two storeyed semi-detached stone building, with one room, kitchen, and pantry, on the ground floor, and three rooms on the upper floor, or 6 rooms in all. It would provide accommodation for 3 or 4 patients, in addition to the Nurse's room. The site is admirably fitted for the purpose, the station being separated from the town by a wide stretch of harbour. For the purpose of communication between the town and Quarantine Station, the authorities will shortly be provided with a small steam launch, which will also be available for carrying out the requirements of the service in the port.

It is gratifying to be able to record the fact that the Colony is now safe-guarded from the introduction of dangerous infectious diseases.

A more modern Quarantine Ordinance is to be introduced during the year 1908.

Buildings and Sanitation.

The town of Stanley is built on the side of a hill upon a soil composed of a stratum of peat covering a sloping bed of impervious clay. The latter interferes to some extent with the permeability of the soil.

As there is no system of subsoil drainage, the rainfall from the ground above sinks to and flows along the surface of this impervious slope with the result that excrement sodden filth (owing to the system of night-soil disposal which obtains locally) is liable to be washed down under the foundation of the dwelling houses, the majority of which are not provided with air-proof basements, so that as the air of the house becomes heated, an upward current is established, which has the effect of drawing ground air, more or less impregnated with moisture and organic matter, into the dwellings.

In many cases, no system of ventilation is left between the flooring and the basement. The back yards of many of the dwellings in the town are unpaved and in wet weather remain in a sloppy condition.

The liability to Rheumatism and diseases affecting the respiratory organs is greatly increased by the dampness of the soil upon which the houses are built and by the complete absence of subsoil drainage and of precautions to prevent the ground air rising into the houses.

The habits of many of the inhabitants in neither covering in their water tanks or in providing covered receptacles for ashes and refuse, afford numerous opportunities for contamination both of the air and drinking water to occur. The health of the township

would be materially improved by the framing and enforcing of building bye-laws. This is a matter which has been somewhat neglected in the past and is now receiving the attention of the authorities concerned. The general cleanliness of the open drains has been greatly improved during the year under review.

The necessity for taking steps to provide for the betterment of the sanitation in Stanley has for some time been engaging the attention of the Government. A scheme has been formulated for the removal of night soil by sanitary carts and for sending it out in punts and discharging it into the sea.

These measures are to be carried out in 1908, the necessary funds having been provided.

An arrangement of this kind is probably the most satisfactory one that can be suggested where the question of outlay is a serious consideration, and as the improvements which are being initiated begin to tell, the health standard of the town ought to be greatly raised.

The removal of the night soil does not however supersede the necessity for an efficient system of drainage for carrying away slops, rain water, and soil water. But in view of the demands for expenditure in other directions, some time may elapse before this work can be undertaken.

It is proposed shortly to make a new departure in the way of affording poor law relief by the opening of a small Cottage Home, which will be a great boon to the aged and infirm poor.

Meteorological.

December has been the wettest month, rain falling on 20 days to the amount of 3·600 inches.

The total rainfall registered at Port Stanley during the year was 20·745 inches.

The number of rainy days was 204.

Stanley is situated Latitude 51° 41' South, Longitude 57° 15' West.

The following data are taken from the records kept at Government House, Port Stanley.

DOWNING STREET,

25th March, 1908.

Sir,

I have the honour to acknowledge the receipt of your despatch No. 7 of the 18th of January last in which you forwarded a copy of a memorial from certain Farmers resident in the Falkland Islands protesting against the provisions of Ordinance No. 1 of 1907, relating to the compulsory dipping of sheep.

2. I concur in the view that the Ordinance should be given a fair trial—a trial for two or three years would in my opinion be sufficient—and that the opinion of the Farmers should then be taken with regard to it.

I have, &c.,

ELGIN.

Enteric Fever.

His Excellency the Governor directs the publication for general information of the following memorandum by the Colonial Surgeon on the subject of the dissemination of Enteric Fever through the agency of a "Human Carrier".

By Command,

H. E. W. GRANT,

Colonial Secretary.

21st May, 1908.

M.P. 193/1908.

Memorandum.

A circular which is dated March 10th, 1908, has been issued by the Colonial Office calling attention to a copy of a paper which has been presented to Parliament containing a report on an outbreak of enteric fever at Brentry Certified Inebriate Reformatory.

For several months medical authorities had been puzzled by outbreaks of enteric fever in the above institution.

The circumstances were inquired into by the medical officer of health for Bristol, Dr. D. S. Davies, who suspected that the cause of the infection must be an unknown "Human Carrier", capable of conveying infection to others, though not suffering from the disease.

Investigations revealed the fact that the case of the repeated outbreaks at Brentry was due to a woman in the institution who had not recently suffered from enteric fever, but who harboured the typhoid bacillus, and who, intermittently and unknowingly, infected the food.

The discovery that a certain proportion of those who have suffered from enteric fever may continue to harbour bacilli and to discharge them intermittently from the body months or even years after the actual convalescence is one of great importance in regard to the spread of the disease.

The necessity therefore, of dealing effectively with all the discharges from patients who may be suffering, or who may have at some previous time suffered, from this and many other bacterial diseases cannot be exaggerated.

It shows the advisability of removing night soil from the neighbourhood of the dwellings.

The typhoid bacillus is, moreover, very resistant to cold, and can live in ice for months.

E. T. BORN,

Colonial Surgeon.

The "Spanish Swindle".

His Excellency the Governor directs it to be notified for general information that a despatch has been received from the Right Honourable the Secretary of State for the Colonies intimating that the perpetrators of a fraud commonly known as the "Spanish Swindle" are turning their attention to residents in the British Colonies.

This fraud, which is practised by a gang of Spanish thieves, is almost invariably carried out on the following lines: an individual purporting to act as the executor of some person who has recently died in a Spanish prison, writes to the intended victim stating that the deceased prisoner has left a sum of money to his relative—the intended victim—on the condition that the latter will adopt and care for his orphan child. But, before the money and child can be sent, it is necessary that the executor should receive a sum of money—generally between Fifty pounds and One hundred pounds—in order to defray the legal expenses connected with the prisoner's will. Needless to say, once the money has been sent, nothing more is heard of the alleged legacy.

By Command,
H. E. W. GRANT,
Colonial Secretary.

Notes on the medical aspect of the West Falklands.

1. The country is devoted solely to sheep farming. The owners and the managers of the farms are English : the employees (who work as shepherds, navvies or domestic servants) are about equally divided between English and Scotch nationality. The general physique is good. There is no poverty, no underfeeding, and very little overcrowding. Zymotic diseases are rare visitants. Acute Rheumatism has not occurred during the last $3\frac{1}{2}$ years, nor have I seen any sequelae of it.

The climate and mode of life are eminently suited to robust British people. Rapid changes of temperature and humidity render the place unsuitable for persons of Lymphatic diathesis, and for those suffering from Adenoids or Phthisis. The excessive winds are hurtful only to people of Asthmatical tendency.

2. FOOD and WATER :— The water at most of the houses is good. At several places, however, the water causes Diarrhœa (usually lasting 1—3 weeks : in a very few cases permanent). The saline constituents of such water do not account for its laxative action, which is due to minute quantities of an organic body of unknown composition.

Excessive tea-drinking is not uncommon, causing Dyspepsia, Constipation, &c. Tobacco-chewing is responsible for much flatulent Dyspepsia. Patent medicines are taken to excess by many.

The men who live in Cookhouses eat very little vegetables and Acne and Furnuculosis are consequently unduly frequent amongst them.

Many mothers do not understand the feeding of children. The commonest fault with regard to young infants is the use of solid foods too early. It is not realised that no healthy baby below 5 months of age should have any food whatever except milk, preferably maternal. Teething powders and purgatives are often given to excess. With regard to older children, the commonest fault is irregularity of feeds.

3. SANITATION and HYGIENE :— One or two houses have no closet of any kind. In a few using the pail system the vessel is not emptied & cleaned with sufficient regularity.

Ventilation is neglected by some : the rooms being kept too hot, and the windows too often closed. The best preventive of catarrhs is an abundant circulation of fresh cool air. The advantage of sunlight and fresh air to very young infants is not realised.

Persons liable to joint troubles and those suffering from Asthma should not sleep on the ground floor.

Many men wear too much clothing : others lose much comfort by wearing the same amount in hot as in cold weather.

Riding on a sheepskin makes Haemorrhoids worse, and is sometimes the cause of them. If a sheepskin is used the wool side should be put downward. A good leather seat is more comfortable and less tiring.

The care and cleanliness necessary when using white lead are not generally known.

Carelessness about changing the clothes after getting wet is a prolific cause of Rheumatism. Sleeping on unwashed or imperfectly washed sheepskins acts in the same way.

4. The points above mentioned are all commonplace : but on this Island, where minor ailments are excessively common, while serious illness is, happily, of rare occurrence, they form the only items worthy of note.

NEW HOUSES.

Recommendations to Builders.

In view of the fact that the majority of the houses are not provided with air proof basements, it follows that as the air of the house becomes heated, an upward current is established, which has the effect of drawing ground air, more or less impregnated with moisture and organic matter, into the dwelling.

It is manifest that the escape of impure air into the dwelling must be injurious.

Much of the dampness in houses is due to the absence of a damp proof course (or moisture interceptor.)

As water can rise in house walls by capillary attraction to a height of 32 ft, it is essential that moisture interceptors be placed in them.

The Board of Health, therefore, invite the attention of builders to the following recommendations:—

(1) That the whole internal area of the site of every new building should be covered with a layer of rubble and cement 6 inches deep.

(2) The walls of every new building to be used as a dwelling house should have a damp proof course of durable material, impervious to moisture; the damp proof course should be beneath the level of the lowest joists, and not less than 6 in. above ground level.

Note. A damp proof course (or moisture interceptor) may consist of sheet lead, asphalt $\frac{3}{4}$ inch thick, cement, glazed stone ware perforated longitudinally, and slates embedded in cement.

A convenient form is a layer of canvas impregnated with asphalt.

LEAFLETS FOR FARMERS, No. 58.

BLOOD-POISONING (MALIGNANT ŒDEMA) IN SHEEP AFTER SHEARING AND LAMBS AFTER DOCKING.

By J. A. GILRUTH, M.R.C.V.S., Chief Veterinarian.

This disease, which occurs during the operations of shearing sheep and of castrating and docking lambs, is the cause of considerable loss annually to sheep-breeders in several districts of the Colony. In 1893 a leaflet was issued dealing with the disease and preventive measures to be adopted. Where my recommendations have been followed there has been little or no trouble, but it is apparent that many owners have not availed themselves of the services of the department by advising us in time, and losses have been considerable in consequence.

Generally the first thing that draws the owner's attention seriously to the condition of his flock is the discovery, in from thirty-six to forty-eight hours after docking or shearing, of a few dead sheep lying in various parts of the paddocks. Next morning he finds a few more dead, and so on for three or four days, when, as a rule the mortality ceases.

Symptoms.—On account of the gregarious habits of the sheep, an ailing animal, unless exhibiting violent symptoms, is easily overlooked. In the early stages of this disease the animal seems listless, disinclined to move about, and, if the sun is shining strongly, prefers to lie in the shade. If forced to move, the hind legs are drawn forward with a peculiar stiff, dragging motion, as if there were no joints. There are slight muscular tremors all over the body, which become spasmodic as the disease progresses. If the flock be driven about much, the diseased animal soon shows signs of great fatigue, ultimately dropping to the ground thoroughly exhausted. The breathing is fast and painful, being maintained more by a series of spasmodic jerks than by any regular act. The pulse is quick and weak; the temperature is very high, registering 106° to 108° Fahr., showing acute fever; the eyes close, and the whole face is expressive of great pain. Gradually the spasms cease, and coma sets in, resulting in death. The scrotum (bag) and surrounding skin right along the floor of the abdomen and between the hind legs become swollen and black. This gangrenous tissue, when present before death, can be peeled off without pain to the animal.

On *post-mortem* examination various conditions are met with. The animals are generally found to be amongst the best of the flock, and in fairly good condition. The scrotal and perineal regions in lambs (between the hind legs and below tail) are always, or almost always, gangrenous, this condition extending along to the floor of the chest, and

sometimes implicating the tail. Many of the muscles, generally those of the shoulders, haunches, and loins, are dark in colour and infiltrated with a black watery fluid. The intestines are generally healthy, though sometimes the peritonæum is inflamed. The spleen and liver are in the usual condition after death due to febrile disturbance. In the chest, either the pleuræ (coverings of the lungs) or pericardium (covering of the heart) are often inflamed, with occasionally a fibrinous exudation, causing the surfaces to adhere.

The following description, by Mr. Reakes, Government Veterinarian, of an outbreak in sheep after shearing, is fairly typical :—

“At the end of December I received instructions to visit a station in the Mackenzie country, where serious mortality was occurring among sheep immediately after shearing. On arrival I found that, owing to the large number of deaths, shearing had been entirely suspended. About four thousand sheep had been shorn, of whom some three hundred had died. I was informed that the affected animals exhibited the first symptoms in from twenty-four to forty-eight hours after being shorn, and usually lingered two or three days before dying. The first noticeable symptom was an œdematous, rapidly spreading swelling, always in conjunction with and in proximity to a wound from the shears. It was noticed that if this occurred on the lower portion of a limb the animal frequently recovered, whereas if high up on the limb or on the under part of the body death was an invariable result. When these œdematous swellings were incised during life a clear serous fluid exuded, but after death this fluid was blood-stained. The swellings occasionally ruptured during life, discharging a portion, if not all, of the contained fluid, this being often followed by recovery. The sheep appeared dull, off feed, and semi-comatose. The same trouble had occurred at shearing-time for at least five years past, and in the preceding three years the mortality had been as heavy as was the case this year. Before commencing shearing the whole of the shed had been thoroughly washed out with a strong solution of Jeyes's fluid, the characteristic odour of which was obtrusively apparent on entering the building.

“Previous to shearing the whole of the sheep had been remarkably healthy, the total loss during the past year being only two per cent., these dying from shortage of feed and exposure during the winter. Everything pointed to contamination of either the shed or yards (probably the latter) being responsible for the trouble. On this assumption I obtained four unshorn wethers, and inoculated each in the thigh with five c.c. of water, in which earth from the surface of the yards had been stirred. The bulk of the solid matter was allowed to precipitate, and the muddy coloured fluid injected. Next day all four were showing various degrees of lameness, with heat and swelling at the seat of inoculation. Some three days after one of these died, showing similar symptoms to the sheep infected after shearing. The remainder, after being sick some days, recovered. As a result of the investigation, I strongly advised the owner to build an entirely new shed and yards at a distance from those then in use, a course which he expressed himself determined to follow. The remainder of his sheep were shorn at a neighbour's shed, no further trouble occurring.”

Cause.—In my annual report for 1900 I have demonstrated the cause of this blood-poisoning to be a microbe known as the malignant œdema bacillus (*Vibrion Septique* of Pasteur). This organism, which is found in many dirty yards, swampy soils, &c., on gaining entrance to the system of almost any animal by means of a wound, rapidly increases in numbers, producing gangrene or death of the part affected first, and ultimately the death of the animal.

Curative Treatment.—This is practically useless, being even in the human patient, where every care can be taken, and expense is of no moment, rarely successful. Preventive measures can be adopted, however, and here much that is beneficial may be accomplished with the exercise of a little care and trouble.

Preventive Measures.—Being organisms capable of producing spores (seeds), the bacilli have great resisting-power, and in all probability may remain for years in the soil. The practice of leaving carcases of animals dead of this disease lying on the paddocks to rot and be torn to pieces by hawks is very pernicious. As a result fresh centres of infection are formed through the absorption of the bacilli by the earth, and probably the disease is spread to considerable distances by the carrion-hawks, directly, through dropping portions of the flesh, and, indirectly, possibly, through the bacilli passing out of the intestinal canal of the hawk, uninjured, among the fæces. One means of prevention strongly indicated, therefore, is the destruction of the carcases of animals which have succumbed to this disease, by efficient burial or by fire. It would appear that in most instances the contagion is present in the yards or surroundings of the woolshed,

and is consequently extremely difficult to get rid of. In order to do so it would be necessary to employ some means such as the following : Remove the surface-soil of the yards and surroundings to a depth of about 6 in., and place in a heap, where it should be thoroughly mixed with quick-lime. Then saturate the fresh surface exposed with a strong solution of crude carbolic acid or of some *non-poisonous* disinfectant sheep-dip, that which remains after the usual sheep-dipping operations, where such a dip is employed, being admirably suited for such a purpose. It would be advisable, also, to thoroughly clean the floors and walls of the sheds, and apply strong hot lime-wash, with which should be mixed some powerful disinfectant, such as crude carbolic acid, in the proportion of one in fifty. Along with the above precautionary measures it is absolutely necessary to adopt some means of preventing the germs from gaining entrance into the flesh-cuts made by the shears, or the docking- and castrating-knife. In the shearing shed it should be imperative that the shearer on making a cut, especially in the region of the breast, belly, or legs, should immediately apply some tar or other antiseptic to the wound. This practice is in force in several sheds with distinct advantage, but in many no precautions whatever are taken. For lambs at docking- and castrating-time I recommended, seven years ago, the application of carbolised oil (1-12) to the wounds on the scrotum and tail before releasing the animal after the operation, and where this has been acted upon the benefits have been marked. Docking- and tailing-knives should for preference be boiled before use.

In several instances this disease has been prevented from occurring in lambs through castrating in temporary yards made of movable hurdles situated in a fresh paddock, but I have known cases where this was not followed by the success anticipated. The reason was to be found in the adjacent swamps, where probably in former years animals had died of the same disease, and the carcasses being left to rot, the water had gradually disseminated the germs throughout the swampy area. The lambs, feeling weak from loss of blood, had taken to the shelter of the long tussocky grass growing in these swampy areas, and the wounds coming in contact with the infected ground had become contaminated. This demonstrates the necessity for using antiseptic applications even when temporary yards are employed, and for keeping sheep and lambs after the operation in a paddock free from swampy patches.

Penguins' Eggs.

Sir,

In reply to your letter No. 29015/1908 of the 9th instant transmitting copy of the despatch from the Governor of the Falkland Islands enquiring whether there is any demand in this country for penguins' eggs as an article of food, I have the honour to inform you that some months ago two small consignments of these eggs were forwarded to this Department for sale in London.

As they were a curiosity and much attention was drawn to them in the papers, they were disposed of advantageously. Further and larger consignments were subsequently received here, but it was found impossible to sell them, and at the present time there is no demand whatever for them, several hundred cases of eggs being now on the market which cannot be sold at any price at all.

I am, &c.,

T. S. NIGHTINGALE,

Acting Agent General.

ESTIMATES, 1909.

(MESSAGE INTRODUCING.)

Read in Council, 3rd September, 1908.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you the Estimates for the year 1909.

REVENUE.

2. The Ordinary Revenue for 1909 has been estimated at £16,477, or £953 less than that received in 1907. The anticipated increases and decreases under the several Divisions are shown below :—

| <i>Increases.</i> | | | | | | | | £ |
|---|-----|-----|-----|-----|-----|-----|-----|--------------|
| Division III.—Licenses and Internal Revenue | ... | ... | ... | ... | ... | ... | ... | 299 |
| " V.—Interest | ... | ... | ... | ... | ... | ... | ... | 469 |
| " VI.—Post Office | ... | ... | ... | ... | ... | ... | ... | 23 |
| Total | | | | | | | | <u>£791</u> |
| <i>Decreases.</i> | | | | | | | | £ |
| Division I.—Customs | ... | ... | ... | ... | ... | ... | ... | 129 |
| " II.—Port and Tonnage Dues | ... | ... | ... | ... | ... | ... | ... | 61 |
| " IV.—Fees of Court and Offices | ... | ... | ... | ... | ... | ... | ... | 470 |
| " VII.—Rents | ... | ... | ... | ... | ... | ... | ... | 1042 |
| " VIII.—Miscellaneous | ... | ... | ... | ... | ... | ... | ... | 42 |
| Total | | | | | | | | <u>£1744</u> |

The increase under Interest and the decrease under Rents are in great measure the outcome of the operation of the Land Ordinance, 1903.

EXPENDITURE.

3. The Ordinary Expenditure for 1907 (exclusive of Public Works Extraordinary, £806, and payments under the Live Stock Ordinance, £1080) amounted to £15,248, or £2,182 less than the Ordinary Revenue. The Ordinary Expenditure for 1909 is estimated at £15,619. A schedule of additions and reductions is given in Appendix 2.

4. Division I.—**Pensions**.—Items 8 and 9 amounting to £132 11s. 7d. are the pensions granted to Mr. and Mrs. Durose, late Schoolmaster and Schoolmistress.

5. Division II.—**The Governor**.—Item 2 is a new office which has been created with the approval of the Secretary of State.

6. Division III.—**Colonial Secretary**.—Item 4.—The salary of the Printer has been increased by £6 per annum. His present wage of £7 per mensem is considerably lower than what is paid to skilled labour in this Colony.

7. Division VI.—**Port and Marine**.—The total of the vote remains the same as last year, but there has been a slight readjustment of the several items.

8. Division VIII.—**Police**.—Item 2.—The post of Senior Constable has been abolished, and provision made for four Constables at £72 each.

9. Division X.—**Medical**.—Item 7.—In my Message to Council introducing the 1907 Estimates I dealt with the question of poor and pauper relief, and explained that when the Cottage Home was completed the appointment of a Nurse-Matron would be necessary. The Home was formally opened on 11th May, and a reference to the address I gave on that occasion, as well as to the foot-notes to the Estimates, will shew that Nurse Davies' services are available both as a Trained Nurse for day or night work in Stanley, including midwifery cases, or for duty at the Quarantine Station.

Item 11.—The sum provided for the Cottage Home expenses includes board and charitable allowances and must necessarily fluctuate according to the demands made on the vote.

10. Division XI.—**Education**.—Items 2 and 4.—It was decided on the retirement of Mr. and Mrs. Durose to do away with the system of payment of fees to the Schoolmaster and Schoolmistress, and the Teachers selected to take their places have therefore been appointed at a somewhat higher salary, in order that they should not be losers on this account.

Item 7.—Provision has been made for an addition to the teaching staff of an Assistant Teacher, as recommended by Mr. Richards, one of His Majesty's Inspectors of Schools. This will permit the Headmaster to pay more personal supervision than heretofore to the different classes.

11. Division XIV.—**Miscellaneous**.—Item 13.—The small increase under this item will allow of some slight remuneration being made to the person who, since its inception two years ago, has kindly given her services gratis to the small but extremely useful Stanley Telephone Exchange referred to in my Message to Council of 22nd March, 1907.

12. Division XV.—**Post Office**.—Item 8.—I have from time to time in the past alluded in my Messages to Council to the very unsatisfactory nature of existing inter-isular communications. It is hoped that by increasing the present subsidy from £390 to £600, and calling for tenders for the carriage of the mails between Stanley and the West Falklands, a much needed improvement may be effected. As those likely to derive the maximum benefit from the establishment of a regular service are the Farmers on the West Falklands, it is not too much to expect that the Farmers Association there will take up the question at an early date and submit an offer to Government to supplement the above amount on terms to be arranged hereafter.

13. Division XVI.—**Colonial Engineer**.—Items 10, 11, 12, and 15.—In my Message which accompanied the Estimates for 1908 I explained in detail the scheme for the betterment of the Sanitation of Stanley, and that in order to give effect to it a steam

launch would be necessary, as also two sanitary punts. The purchase of a steam launch at a cost, including freight, of £1785, has been authorised by the Secretary of State, and delivery in Stanley is expected towards the end of the year. It has been necessary, therefore, to make provision for the salaries of the Master of the Launch, who is also Government Pilot, the Engineer, and the Deck Hand.

14. Division XXI.—Public Works Recurrent.—Item 2.—Experience shews that a sum of £500 is required annually in order to maintain the buildings in a proper state of repair.

15. Division XXII.—Public Works Extraordinary.—Item 10.—The question of the extension of the Government Jetty, i. e., the Public Stone Jetty, was brought up when the 1908 Estimates were under consideration, but, in deference to the wishes of the Unofficial Members, was allowed to stand over till the following year.

What is required is a wooden extension to the present stone structure (which is now under repair) carrying a depth of about 12 feet of water at low tide. I have but little to add to the remarks I made when submitting the proposal last year. All who are conversant with local conditions will, I think, agree with me that such an eminently useful work as a Public Wharf is much needed if individual enterprise is to be encouraged.

Item 11.—Although considerable improvements have been effected at the Cemetery much still remains to be done. I gladly avail myself of this opportunity to acknowledge the generosity of Mrs. G. M. Dean, who has undertaken to erect a house for the Caretaker of the Cemetery, and to provide a sum of £30 annually towards his wages, subject to certain conditions.

Item 13.—The experimental Kitson lamp of 1000 candle power has proved so satisfactory that it is proposed to place four more along Ross Road at its junction with Villiers Street, Dean Street, Philomel Street, and Hebe Street respectively. As one Kitson lamp gives considerably more light than half a dozen of the existing small kerosene lamps, and consumes about the same quantity of kerosene, it follows that the cost of lighting will remain much the same as at present. The Hon. Vere Packe has kindly presented the Government with a 2000 candle power Kitson lamp on the condition that it is to be erected at 'Italy' (the west end of Ross Road) and maintained by Government. The lamp is expected to arrive shortly.

Items 14 and 15.—The erection of some cottages for Government workmen is a matter which the Administration has had under consideration for some time past. The rent charged for small unfurnished cottages is high, varying from 30s. to 45s. per mensem, while the accommodation in many instances is poor. But even under these conditions the demand for cottages is generally in excess of the supply. The current cost of board and lodging for a workman in Stanley is £1 per week, while the wage paid to the ordinary labourer varies from £6 to £7 per mensem according to the time of year. In the country the wage is somewhat smaller but the cost of living is very much lower. Government has frequently lost desirable workmen owing to the high charge made for rent, the general discomfort, and the inability to obtain security of tenancy. It is proposed by degrees to erect two or three labourers cottages and thereby improve the position of Government employees.

Item 19.—The fire-engine is at present located in a large iron shed at the east end of the Settlement which is used for storing lumber, etc., and for breaking metal in bad weather. It would be much more quickly available for use if housed in a shed in the Dockyard opposite the telephone exchange which is in a central position.

16. Division XXIII.—Live Stock Ordinance.—Item 8.—At the request of a majority of the Farmers provision has been made for the diminution of turkey buzzards and other birds which are becoming a pest to sheep in certain localities.

FIRST SCHEDULE.

The Quarantine Regulations, 1908.

1. These Regulations may be cited as the Quarantine Regulations, 1908.

2. In these Regulations—

“Health Officer” means the Colonial Surgeon, or the Assistant Colonial Surgeon, and includes any person appointed by the Governor to act for or assist those officers in the execution of these Regulations.

“Ship” includes vessel, lighter, boat, or other floating craft.

“Master” means the master, officer, or other person for the time being in charge of any ship.

“Infectious or contagious disease” means cholera, plague, yellow fever, and small-pox, and shall not include typhus fever, enteric fever, cerebro-spinal fever, scarlet fever, diphtheria, measles, whooping cough, chicken-pox, or dengue.

“Place” means any clearly defined portion of territory such as an island, a port, a district, a parish, a town, or a village.

“Infected place” subject to the provision of Regulation 3 means a place where any infectious or contagious disease exists.

“Infected ship” means a ship on board of which a case or cases of infectious or contagious disease is or are present or has or have occurred

- (1) in the case of plague and cholera within a period of seven days previous to the date of the arrival of the ship;
- (2) in the case of small-pox within a period of twelve days previous to such arrival ; and
- (3) in the case of yellow fever within a period of eighteen days previous to such arrival.

“Suspected ship” means a ship on board of which a case or cases of infectious or contagious disease has or have occurred during the voyage, or during the stay of such ship in the port of departure, but on board of which no fresh case has occurred

- (1) in the case of plague and cholera within a period of seven days previous to the date of the arrival of the ship;
- (2) in the case of small-pox within a period of twelve days previous to such arrival ; and
- (3) in the case of yellow fever within a period of eighteen days previous to such arrival.

“Healthy ship” means a ship which although having come from an infected place has had on board no death from, nor any case of, infectious or contagious disease, either before leaving the port of departure or during the voyage or on arrival.

“Observation” means isolation of passengers either in a proper station provided for that purpose or on board ship prior to their obtaining free pratique. In the case of yellow fever the sick or those under observation who develop a temperature exceeding 99·2° Fahrenheit must be effectively screened from mosquitos.

“Surveillance” means that passengers are not isolated. They receive free pratique at once and are allowed to proceed to their place of destination (the proper authority of which must be informed of their arrival) there to undergo medical supervision.

“Medical supervision” means that all persons under surveillance shall present themselves at such places and at such times for examination as the Health Officer may direct.

3. A place shall not be regarded as infected because of the existence thereof of imported cases of any infectious or contagious disease or because of the occurrence of a single non-imported case.

In determining whether a place is infected or not under the definition of “infected place” the second non-imported case necessary to render a place infected must occur within the respective periods mentioned in Regulation 4.

4. A place shall cease to be regarded as infected if the Health Officer is satisfied that;

(a) There has been no fresh case of plague or cholera within five days, of yellow fever within eighteen days, of small-pox within twelve days, of the isolation or of the death or recovery of the last case;

(b) Infected things have been disinfected or destroyed, and that in the case of plague measures have been taken with a view to the destruction of rats in the infected locality, and in the case of yellow fever of mosquitos on and near the infected premises.

The words “infected premises” in this Regulation mean—

(i) Any premises in which the patient was residing during any of the six days preceding the date on which he was taken ill;

(ii) The premises on which he was taken ill; and

(iii) Any premises occupied by him from the time he was taken ill until effective screening from mosquitos took place.

5. With a view to restricting the range of application of these Regulations the measures therein specified shall be applied to arrivals not from all ports of clearance of a country, but only to arrivals from such ports of clearance, if any, as, having regard to the nature and progress of the disease and to the extent and means of communication with the infected place, are likely in the opinion of the Health Officer to transmit the infectious or contagious disease with which such place is infected.

This limitation shall apply only if the Health Officer is satisfied that the country in which the infected place is situate takes the measures necessary to prevent the export of rags, clothing and bedding referred to in Regulation 26 from that place unless they shall have been previously disinfected and also takes measures necessary to check the spread of the disease.

6. The Health Officer may board any ship arriving in the waters of this Colony and inspect every person in the ship.

7. Every infected, suspected or healthy ship shall be inspected as soon as possible after arrival by the Health Officer.

8. The Health Officer may if he think proper call for inspection of the ship's books and papers and he shall use every lawful means which may seem to him expedient for ascertaining the health of the persons on board and the sanitary condition of the ship.

9. The Master of any ship, or any other person, shall answer truly and if required in writing all such questions put to him by and give all such information to the Health Officer or Harbour Master as may be necessary for any purpose of these Regulations. Any Master or other person who refuses or neglects to answer or answers evasively or falsely any such questions or who conceals from the Harbour Master or Health Officer the true state of the health of the crew or passengers or other persons on board of any ship or who refuses or fails to produce such books and papers as the Health Officer may demand shall be liable to a fine not exceeding twenty pounds.

10. Every "Infected," "Suspected," and "Healthy" ship arriving in the waters of this Colony shall fly the usual Quarantine or yellow Flag.

11. If he be ordered to do so by the Harbour Master or Health Officer, it shall be the duty of the Master or person in charge of any infected or suspected ship to cause such ship to be taken at once to such place as may be pointed out to him as the Quarantine Ground, there to remain until released under the provisions of these Regulations.

12. All ships in Quarantine shall fly by day the usual Quarantine or yellow Flag at the foremast head; by night at the foremast a red light over a green light.

13. All guard boats shall by day fly a similar yellow Flag; by night they shall fly a red light at bow and stern.

14. No person except those authorised by the Health Officer shall communicate with any ship in quarantine; and the persons on board shall not communicate with the shore except with the permission of the Health Officer.

15. Any person found on board any ship which has not been granted pratique without the permission of the Health Officer shall be detained in such manner and for such time as the Health Officer may direct, and shall be liable to a penalty for a breach of these Regulations.

16. *Infected ships* shall be dealt with as follows:—

(a) The sick shall, as soon as possible, be removed from the ship and isolated.

(b) The other persons on board shall be permitted to land and be kept under observation or subjected to surveillance for periods not to exceed the following:—

(i.) Plague, five days; if the person is under surveillance the period may be extended to ten days.

- (ii.) Cholera, five days.
- (iii.) Yellow fever, six days.
- (iv.) Small-pox, twelve days.

In applying these measures the date of the last case and the condition of the ship shall be taken into account.

- (c) Clothing and articles belonging to the passengers or crew which in the opinion of the Health Officer are infected shall be disinfected or destroyed.
- (d) Those parts of the ship that have been occupied by the sick shall be disinfected, and also such other parts of the ship as the Health Officer may regard as infected.
- (e) In the case of plague measures shall be taken either before or after discharge of cargo to secure the destruction of rats on board. This operation shall be commenced as soon as possible and its duration shall not in any case exceed forty-eight hours.
- (f) In the case of yellow fever measures shall be taken to secure the destruction of mosquitos and their larvæ on board.
- (g) In the case of cholera the bilge water after preliminary disinfection shall be pumped out and the drinking water on board may be replaced by a fresh supply of wholesome water.

When such measures as the Health Officer may have deemed necessary in accordance with the provisions of this Regulation have been carried out, such ships shall immediately thereupon be admitted to free pratique.

17. Passengers arriving by an infected ship shall be entitled to a certificate from the Health Officer indicating the date of their arrival and the measures to which they and their baggage have been subjected.

18. *Suspected ships* shall be dealt with as follows:—

- (a) The passengers and crew may be subjected to surveillance for periods not to exceed the following:—
 - (i.) Plague, five days.
 - (ii.) Cholera, five days.
 - (iii.) Yellow fever, six days.
 - (iv.) Small-pox, twelve days.

The period of surveillance shall date from the arrival of the ship.

- (b) Paragraphs (c), (d) and (g) of Regulation 16 shall apply to suspected ships, and paragraphs (e) and (f) thereof may be applied. When such measures as the Health Officer may have deemed necessary in accordance with the provisions of this Regulation have been carried out such ships shall immediately thereupon be admitted to free pratique.

19. *Healthy ships* shall be admitted to free pratique immediately on arrival irrespective of the nature of their bill of health. They may, however, at the discretion of the Health Officer be subjected to the measures specified in paragraphs (c), (e), (f) and (g) of Regulation 16 and the passengers and crew may be subjected

to surveillance which shall not exceed the following periods:—

- (i.) Plague, five days.
- (ii.) Cholera, five days.
- (iii.) Yellow fever, six days.
- (iv.) Small-pox, twelve days.

The period of surveillance shall date from the departure of the ship from the infected place. The application of the measures specified in paragraph (c) or (e) of Regulation 16 shall only be resorted to when, in the opinion of the Health Officer, special reasons exist which require them. Where the provisions of paragraph (e) are applied the operation shall not in any case exceed twenty-four hours and shall not interfere with the free circulation of passengers and crew between ship and shore.

20. If in a healthy ship the rats on board are found to be suffering from plague the Health Officer shall visit the ship and measures shall be taken as in paragraphs (c) and (e) of Regulation 16. The parts of the ship that the Health Officer may consider infected shall be disinfected and the passengers and crew may be subjected to surveillance which shall not exceed a period of five days after arrival unless in exceptional cases when such period may be extended to ten days. If unusual mortality has been observed among the rats on a healthy ship the Health Officer shall visit the ship and a bacteriological examination of the rats shall, when practicable, be made as quickly as possible. If it is thought necessary to resort to measures of rat destruction these shall be carried out as specified in paragraph (e) of Regulation 16. Until all suspicion of plague is removed the passengers and crew may be subjected to surveillance during the time specified in this Regulation in respect of ships on board of which rats are found to be suffering from plague.

21. Whenever means for the destruction of rats have been taken and the Master, the Shipowner, or the Shipowner's Agent shall so demand, the Health Officer of the Port shall furnish him with a certificate that such measures have been applied and specifying the reasons why.

22. If in the opinion of the Health Officer of the Port of arrival ships from an infected place have been disinfected effectively they shall not again be subjected to sanitary measures unless a fresh case of infectious or contagious disease has occurred on board since disinfection or unless they have again called at an infected place.

23. A ship shall not be regarded as having called at a place if it has merely disembarked passengers and their baggage or mails without having been in communication with the shore.

24. Where a ship has passengers on board who are in a filthy or otherwise unwholesome condition or is overcrowded with passengers, emigrants, or otherwise, the Health Officer may if in his opinion it is desirable with a view of preventing the introduction of any infectious or contagious disease subject persons on board to observation or surveillance for such period as he may direct not exceeding the following:—

- (a) Plague, five days; if the person is under surveillance the period may be extended to ten days.
- (b) Cholera, five days.

- (c) Yellow fever, six days.
- (d) Small-pox, twelve days.

Where measures of observation or surveillance are prescribed the Health Officer may exempt from their application any person who, in his opinion, is immune from the infectious or contagious disease on account of which these measures are applied.

25. Where these Regulations provide that a person may be permitted to proceed to his place of destination subject to surveillance the Health Officer before granting such permission must be satisfied that it is reasonably probable that the person to whom it is granted will duly comply with the conditions of surveillance and permission if granted shall be upon the following conditions:—

(a) He shall satisfy the Health Officer as to his name, intended place of destination, and his place of residence thereat.

(b) He shall agree to present himself and shall present himself for medical supervision during the prescribed period and he may be required by the Health Officer to deposit a sum not exceeding two pounds which may be forfeited if he fail to so present himself.

The Agreement shall be in accordance with Form I. of these Regulations.

(c) The place must, in the opinion of the Health Officer, be conveniently situated for the medical supervision.

If the Health Officer is not satisfied as herein required or if the person fails to comply with paragraphs (a) and (b) hereof, the Health Officer may detain him under observation or direct him to proceed to a specified place and there remain under medical supervision during the prescribed period. In the latter case the provisions of paragraph (b) hereof may, at the discretion of the Health Officer, be applied to such person.

(d) In the case of small-pox a person may be required to produce to the Health Officer satisfactory evidence of having been successfully vaccinated or re-vaccinated within the ten years immediately preceding or of his being otherwise immune from the disease and that such person may in the absence of such evidence be detained under observation for the prescribed period. But when the ship is a healthy ship this measure shall not apply to passengers who have not embarked or gone ashore at the infected place and it shall not be applied to those passengers who embarked or went ashore at the infected place if the circumstances of their stay there afford reasonable evidence of non-infection.

Any person acting in contravention of any of the provisions of this Regulation shall be liable to a penalty not exceeding the sum of ten pounds.

26. (1) Merchandise shall be disinfected only when in the opinion of the Health Officer it is infected, except in the case of yellow fever when it shall under no circumstances be liable to disinfection or prohibition. In the case of plague, cholera, and small-pox, clothing and bedding which have been used, and rags, may, when imported from an infected place as merchandise, be subjected to disinfection even in the absence of evidence that they are infected,

or their introduction into the Colony may be prohibited, except that in the case of cholera, rags compressed in bales, if in the opinion of the Health Officer they are free from infection, shall not be subjected to the provisions of this Regulation.

(2) The measures specified in this Regulation are the only measures that can be applied in respect of merchandise.

27. The entry of live stock into the Colony shall not be prohibited because of the existence of an infectious or contagious disease in the place from whence they have come or on board the ship in which they were conveyed.

28. When merchandise has been subjected to disinfection in pursuance of provisions in these Regulations, the owner or his agent shall be entitled to a certificate from the Health Officer indicating the measures that have been taken.

29. Nothing in these Regulations shall render liable to detention, disinfection or destruction, any article forming part of any mail (other than a parcel mail) conveyed under the authority of the postal administration of any Government, or shall prejudicially affect the delivery in due course of any such mail (other than a parcel mail) to the Post Office.

30. The only measures which parcel mails may be subjected to shall be disinfection or destruction of articles which are, in the opinion of the Health Officer, infected.

31. When any Port within the Colony is an infected place:—

(1) Every person taking passage on a ship leaving such Port shall be examined by the Health Officer immediately before departure of the ship; such examination implies the use of the clinical thermometer, and shall, as far as practicable, be made by day and on shore, and no person suffering from any infectious or contagious disease shall be permitted to embark.

(2) Measures shall be taken:—

(a) To prevent the exportation of merchandise or articles which the Health Officer may consider infected, unless such merchandise or articles shall in the first instance have been disinfected on shore under his supervision.

(b) In the case of plague to prevent rats from gaining access to ships.

(c) In the case of yellow fever to prevent mosquitos from gaining access to the ships, but when this is impossible then measures should be taken immediately before the departure of the ship to destroy those on board.

(d) In the case of cholera, the Health Officer shall see that the drinking water taken on board is wholesome.

(3) The Health Officer shall give to the Master of the ship a certificate stating in detail the measures taken.

The Master, Owner or Agent of any ship conveying from an infected port a passenger not previously examined or merchandise

or articles liable to disinfection not previously disinfected shall be liable to a fine not exceeding twenty pounds; and any passenger in the opinion of the Health Officer suffering from any infectious or contagious disease who embarks on board of a vessel shall be liable to a fine not exceeding five pounds.

32. When in the case of a healthy ship from a Port which is an infected place, the Health Officer of the Port of arrival is satisfied that the measures specified in Regulation 31 have been efficiently carried out at such infected place, such ship shall be exempted from the measures specified in Regulation 19: Provided always that if the period specified in that Regulation and dating from the departure of the ship from the infected place shall not have been completed, the passengers and crew may be subjected to surveillance for such duration as may be necessary to complete the period.

33. (1) No measures shall be taken against any ship arriving in the waters of this Colony, because it has come from or called at any place where any of the following diseases exists:—

Typhus fever;
Enteric fever;
Cerebro-spinal fever;
Scarlet fever;
Diphtheria;
Measles;
Whooping Cough;
Chicken-Pox;
Dengue.

(2) If a case or cases of any of the above diseases has or have occurred on board either before leaving the Port of departure, during the voyage, or on arrival, the following measures may be applied at the discretion of the Health Officer:—

- (a) Isolation of the sick.
- (b) Disinfection of the infected clothing, bedding, and effects, and of the compartment of the ship occupied by the sick.
- (c) Surveillance of those who have been in contact with the sick.

34. If any ship in the waters of this Colony is known to have any case of infectious or contagious disease on board the Health Officer may order such ship to be placed in quarantine until she has been dealt with as an infected ship.

35. In the case of a death from any infectious or contagious disease on board any ship the body shall be disposed of in such a manner as the Health Officer may direct and at the expense of the ship.

36. If any person conveys or attempts to convey any article to or from any ship in contravention of these Regulations such article shall be forfeited.

37. (1) The Master or Surgeon when there is one of any ship shall if the facts warrant his so doing on arriving in the waters

of this Colony sign and deliver to the Harbour Master the certificate in accordance with Form II. appended to these Regulations.

(2) In the event of any Master or Surgeon not signing and delivering the certificates marked (a) and (b) the Harbour Master shall place such ship in quarantine pending the visit of the Health Officer who shall decide whether such ship shall be granted pratique or treated as an infected, suspected or healthy ship.

(3) In the event of any Master or Surgeon not signing and delivering the certificates marked (c) and (d), the Harbour Master shall grant pratique but the passengers and crew shall not be permitted to land until they have been seen and dealt with in accordance with these Regulations by the Health Officer.

(4) The Surgeon or Master of any ship who shall sign any such certificate as aforesaid containing any false statement shall be deemed guilty of a breach of these Regulations and may be proceeded against and punished accordingly.

38. The Owner, Master or Agents of the ship shall pay the Government on demand any costs and expenses incurred in the removal of any person from the ship to any observation station or connected with the cleansing and disinfection of any ship or of the cargo or merchandise of any ship or any part of such ship, cargo or merchandise, or of the destruction of rats or mosquitos on board including the hire of any necessary labour, ships, premises on shore and disinfecting appliances or of removing from any ship any article or thing and disinfecting the same.

39. (1) All costs and expenses charged or incurred by the Government for the maintenance of any person under observation or isolation and for the disinfection and cleansing of passengers' baggage shall be paid on demand to the Government by the person concerned, except in the case of the Master, Officers, or crew of any ship when such expenses shall be paid by the Owner, Master or Agent of the ship.

(2) The Government shall have a lien on all baggage and other property belonging to a person placed in an Observation or Isolation station to secure payment of any sums due to the Government for the maintenance of such person or that of other persons for whom he may be or may have rendered himself liable.

(3) Such property may be kept and detained at the Custom House, and, in default of payment, within eight days from the termination of the Quarantine, of any sums due to the Government by the owner of such property, in respect of maintenance, the Collector of Customs may cause such property to be sold by auction.

(4) Provided that after deduction from the sale price of such property of the claim of the Government and costs, the balance, if any, shall be paid to the owner of the property.

40. No ship shall be permitted to clear outwards from any port of this Colony until all fees and expenses payable by the Owner, Master, or Agents thereof in respect of such ship under the Quarantine Ordinance, 1908, or of these Regulations may have been first duly paid.

41. No person under surveillance shall be required to pay a fee to any Health Officer for the services of medical supervision: Provided always that this provision shall not apply to any such

person who receives at his or her request medical attendance.

42. Where any breach of the above Regulations is committed, all persons assisting in any way in the commission of such breach, and the Master or other person having the control of any ship on board of which such breach has been committed or who has been in any way concerned in the commission of such breach, shall be severally answerable for such breach and shall be deemed guilty of the same.

Report on Mineral Specimens from the Falkland Islands,

by PROFESSOR WYNDHAM R. DUNSTAN, M.A., F.R.S., Director.

These mineral specimens were forwarded for examination to the Imperial Institute from the Falkland Islands, and are referred to in a letter from the Colonial Office, No. 32912/1908 dated the 15th September, 1908, which enclosed a copy of a despatch (No. 71 of the 11th August, 1908) from the Governor of the Falkland Islands on the subject.

No. 1 was a small specimen of dull-black, solid bitumen, weighing three-quarters of an ounce. It was very tough and compact and had a specific gravity about 1; some portions of the specimen just sank in water, whilst others floated.

The bitumen took fire when a lighted match was applied to it and burned away quietly leaving a black carbonaceous residue.

A sample of about 7 lb. of this bitumen should be sent to the Imperial Institute for analysis and commercial valuation.

No 2, which weighed $2\frac{1}{4}$ lb., consisted of yellowish-white, siliceous clay, containing a considerable amount of free silica in the form of quartz grains. It was practically free from iron-bearing minerals.

An examination of the sandy residue obtained by washing off the clayey portion of the specimen showed that, with the exception of occasional grains of felspar and rutile, it was composed entirely of quartz.

No 3. This specimen weighed $1\frac{1}{4}$ lb. and consisted of grey siliceous clay. Like No. 2 it contained a considerable amount of quartz sand, and also numerous particles of slate, to which constituent the grey colour of the clay appeared to be due. In addition to quartz, occasional grains of felspar, zircon and biotite were observed in the washed residual sand, but no other minerals were present.

Samples No. 2 and 3 were similar in texture and also in their general physical properties apart from colour.

It would probably not pay to export these clays from the Falkland Islands, but they might be used locally for brick-making, the manufacture of pottery, etc. If it is proposed to utilise them for such purposes, large samples of 14 lb. of each should be sent to the Imperial Institute for further investigation and technical trial.

No. 138.

Disease amongst Sheep.

His Excellency the Governor directs it to be notified that the Board of Agriculture and Fisheries, London, have caused a bacteriological examination to be made by their Veterinary Officers of blood taken from sheep in an outlying part of the Colony suffering from a disease which made its appearance after dipping, and that the examination has failed to reveal any evidence of anthrax.

The Board are advised that, although such an examination in the circumstances—the blood being very old and putrid—is insufficient to justify an opinion that anthrax was not the cause of death of the animals from which the blood was taken, the history of the case goes to show that it is unlikely that the animals were suffering from that disease. It appears probable, moreover, that if the dip which was used for the sheep was an arsenical preparation, the mortality was due to arsenical poisoning, and the Board would suggest, for consideration, that in order to obviate any risk of this nature for the future a tobacco dip might with advantage be employed.

The Board have transmitted some microscopical slides to the Government, with the instructions noted below as to the preparation of blood films, and have requested that, in the event of the recurrence of any unexplained deaths amongst sheep, the slides should be prepared in accordance with the directions and returned, through the Colonial Office, to the Board, with a view to their Veterinary Officers deciding definitely whether anthrax is present.

No charge would be made by the Board for such an examination.

Slides may be obtained on application to the Colonial Secretary.

By Command,

H. E. W. GRANT.

Colonial Secretary.

25th November, 1908.

M.P. 426/1908.

Instructions for making blood smears.

Take a very small drop of blood from an animal newly-dead of the disease suspected to be anthrax and with the end of another slide spread the blood out in the finest film possible and dry rapidly in the air. In this condition the slide may be sent home for examination but care should be taken to destroy by heat the slide used for spreading the film as it might contain the germs of anthrax.

Annual Report of the Chief Inspector of Stock for the Year, 1908.

Stanley,
8th February, 1909.

Sir,

I have the honour to submit herewith my Annual Report for the year ended the 31st December, 1908.

Seasons.—The summer and autumn were very showery. The winter was, within the memory of the oldest inhabitant, the best that has been experienced. It was mild and there was very little snow. The latter part of the spring was cold and showery.

Sheep.—The total number of sheep in the Colony returned at the end of May, 1908, was 688,705 which consisted of 11,534 rams, 275,188 wethers, and 401,983 ewes. This shows a decrease of 7,042 as compared with the previous year. With the exception of 300 Rams exported to Patagonia this decrease is mainly due to boiling down.

Judging from the returns, the Islands appear to be fully stocked. Several of the Farmers have found out the advantage of quality over quantity. Many flocks, however, could be improved by introducing into them flock rams from the stock of the Falkland Islands Company. They can be obtained at a very moderate figure, provided that orders are booked early. During the year under review, the ewes of this flock averaged 9 lbs. of clean wool and reared 90% of lambs.

Wool.—The clip was far heavier, cleaner, and in better condition than usual. Unfortunately the wool market fell and the prices realized were much below those obtained previously.

Lambing.—About 77%, a good average season.

Dipping.—Owing to the Ordinance passed in 1907 for preventing the spread of lice in sheep, the important work of dipping has generally been carried out most satisfactorily, and sheep are very free from parasites. A disease bearing a strong resemblance to (if not actually) blood-poisoning or malignant oedema made its appearance among the sheep in one locality after dipping time, and a copy of a Leaflet relating to that disease, issued by the New Zealand Department of Agriculture, was distributed to all the Farmers. Two bottles of blood taken from sheep suffering from the disease were forwarded to the Board of Agriculture and Fisheries, London, who caused a bacteriological examination of it to be made by their Veterinary Officers. The examination failed to reveal any evidence of anthrax. The Board were advised that, although such an examination in the circumstances—the blood being very old and putrid—was insufficient to justify the opinion that anthrax was not the cause of death of the animals from which the blood was taken, the history of the case went to show that it was unlikely that the animals were suffering from that disease. It appeared probable, moreover, that if the dip which was used for the sheep was an arsenical preparation, the mortality was due to arsenical poisoning, and it was suggested for consideration that, in order to obviate any risk of that nature for the future, a tobacco dip might with advantage be employed.

The Live Stock imported during the year were as follows:—

| | | |
|-----|--------------------|-------------------|
| 24 | Romney Marsh Rams, | from New Zealand. |
| 9 | „ „ „ „ „ | England. |
| 109 | Horses | from Patagonia. |

The rams were quarantined for 28 days. With the exception of a few cases of foot-rot, they were perfectly healthy.

Geese.—The diminution in this respect is very noticeable in most parts of the Colony, but there are still a few districts in which the advantage to be gained in reducing the number of geese is not realised. The number of beaks authorised to be purchased for the year for the East and West Falklands, respectively, were:—

East Falklands, 37,500

West Falklands, 37,500

The number of beaks purchased were:—

East Falklands, 37,525.

West Falklands, 14,455.

Grass seed sowing.—The value of this experiment is distinctly apparent, especially where seed has been sown in quantity; and those who have experimented are thoroughly satisfied with the results. The best time for sowing is the latter part of the autumn or in the winter.

Ditching and Draining.—This important work is now undertaken annually by most of the Farmers on the West Falklands; and several on the East are paying attention to it. By carrying on the work systematically, pasturage is improved and the death rate of stock is lowered.

I have etc.,

Chief Inspector of Stock.

Medical and Sanitary Report on the Falkland Islands for the year 1908.

The Colonial Surgeon to the Colonial Secretary.

Stanley,
10th March, 1909.

Sir,

I have the honour to submit for the information of His Excellency the Governor the Medical Report on the health and sanitary condition of the Colony for the year 1908, together with returns appended thereto.

I have, etc.,
E. T. BORN,
Colonial Surgeon.

The Honourable
The Colonial Secretary,
Port Stanley.

VITAL STATISTICS.

1. Population.

The estimated population of the Colony for 1908 was 2,289.

There were 58 births and 12 deaths registered during the year.

The birthrate was 25·33 per 1,000 as against 23·38 per 1,000 in 1907.

The annual rate of mortality which had been equal to 9·26 per 1,000 in the preceding year fell to 5·24 per 1,000 in the year under review.

The 12 deaths from all causes included 3 among children under one year of age and five among persons aged upwards of 60 years. There was one inquest case.

The general death rate as compared with an English or Scottish City is very favourable.

2. Public Health.

The health of the Colony has been good throughout the year. This may in part be attributed to the mildness of last winter, which was in favourable contrast to the winter of the year preceding.

As in former years, the most prevalent diseases were those of the respiratory organs, especially Bronchitis and Asthma.

With the exception of 2 cases of Scarlet Fever, 1 case of Erysipelas, and a few cases of Influenza and Chicken Pox of a mild type, the Colony enjoyed immunity from other cases of infectious disease.

The history of the Scarlet Fever cases pointed strongly to the infection having been imported into the Colony from Punta Arenas (Chile) where at the time the disease was prevalent.

The ordinary expedients of isolation and disinfection were adopted for the suppression of the disease.

One lunatic was under treatment during the year.

The total number of cases treated during the year was as follows :—

| DISTRICT. | NO. OF CASES. |
|--------------------------|---------------|
| Stanley | 706 |
| Lafonia & North Camp ... | 295 |
| West Falklands | 172 |
| Total | 1,173 |

The District Nurse continued her excellent work, paying during the past year 1,939 visits and attending 65 cases, an increase of 289 and 3 respectively.

Vaccination.

The total vaccinations numbered 50, a decrease of 7 in the number of operations performed as compared with those of the previous year.

The number of successful cases may be gathered from the following table :—

| DISTRICT. | NO. OF CASES. |
|--------------------------|---------------|
| Stanley | 32 |
| Lafonia & North Camp ... | 18 |
| West Falklands | none |
| Total | 50 |

The supply of vaccine received from Buenos Aires by the monthly mails is of good quality and gives excellent results.

Quarantining.

The number of vessels arriving from foreign and home ports during the year under review was 63, all of which were boarded on arrival and inquiries made as to the health of the crew and passengers.

No demands were made on the quarantine station during the year.

A new Quarantine Ordinance has been introduced embodying the provisions of the Paris Convention of 1903.

Sanitation.

Considerable activity has been shown by the Board of Health during the year in the direction of causing the frequent sanitary inspection of premises and of enforcing general sanitary measures making for cleanliness.

Many of the houses were found in a most unsatisfactory condition and without drainage arrangements.

The situation of Stanley, built as it is on the side of a hill with a slope seaward, is favourable to a good system of drainage.

New building bye-laws for the Town of Stanley were adopted by the Government during the year under review. The scope of these bye-laws only insists upon quite rudimentary health principles such as proper construction of earth closets, reasonable distance of such earth closets from dwellings, the advisability of damp proof courses and concrete over sites of houses.

All plans relative to new buildings are submitted to the Board of Health in order that the Board may be able to prevent the construction of insanitary houses, and the fresh creation of conditions which ought now by general consent to be condemned.

The scheme formulated last year by the Government for the disposal at sea of the Stanley night-soil and the introduction of an uniform system of earth closets is in process of preparation.

The majority of houses are served by earth closets with soil disposal, the sanitary conditions and structural details of these conveniences leave much to be desired.

Cases of diarrhoeal diseases although too prevalent, were not so numerous as in 1907. These small outbreaks of diarrhoea which follow a period of comparatively dry weather and consequently occur more particularly during the Summer and Autumn

months, may in part be attributed to the water supply, which is derived mainly from the collection of rain water from the roofs and is consequently liable to contamination from the first washings of the collecting area.

Again the defective system of dealing with excremental material in the Township, combined with the general lack of ash-pits and the infrequent removal of refuse from the vicinity of dwellings, afford numerous opportunities for the conveyance of infective dust particles into the air, food and water supply.

The building in connection with the Victoria Cottage Home for aged and infirm poor was formally opened in May last by His Excellency the Governor. This marks a new epoch in the history of affording poor law relief in the Colony.

Accommodation is provided for 4 separate bedrooms fitted up on the cubicle system and one large bedroom affording accommodation for two women.

Each cubicle or miniature bedroom is lighted by a separate window. A bed with wire woven mattress, a chair, a chest of drawers and a wash hand stand and mirror and some clothes pegs, constitute the furniture of each cubicle.

A bathroom is also provided for the inmates. The common sittingroom is an attractive well ventilated apartment, which forms a comfortable retreat.

The Nurse-Matron and District Nurse reside permanently on the premises and for their accommodation a neat sittingroom and two bedrooms have been provided.

Two persons were afforded indoor relief and one person received outdoor relief during the year.

The total expenditure incurred during the year 1908 in poor law relief was £169 19s. 7d., of which £30 17s. 5d. were expended on outdoor relief and £139 2s. 2d. on indoor relief, including £68 15s. 3d. in respect of the combined salaries of the Nurse-Matron and general servant at the Cottage Home.

The sum of £31 6s. 4d. was refunded by the Hon. Treasurer of the Nurse Fund for the board and lodging of the District Nurse.

Education Report for 1908.

The past year in the Government School at Stanley has been a period of marked progress.

Improved apparatus and the addition of varied text books, etc., are proving already their value. The lessons are made interesting to the Scholars, and everything is being done to bring the School up to a high educational level.

The infants are being carefully and systematically taught, and appear to be interested and happy in their lessons.

The various Standards seem quite up to the average.

In the "Camps" the Itinerant Schoolmasters carry on their work in a satisfactory manner. Where the Parents co-operate with the Teachers, good results are attained. This work is full of difficulty, and deserves every encouragement.

Legislative Council.

FALKLAND ISLANDS.

SUPPLEMENTARY ESTIMATES, 1908.

(MESSAGE INTRODUCING.)

Read in Council, 5th April, 1909.

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you herewith the Supplementary Estimates for the year 1908.

REVENUE.

2. The Ordinary Revenue for the year was £17,775 5s. 10d., being £2,090 4s. 3d. in excess of the Ordinary Expenditure. This is the highest revenue so far obtained in this Colony, exceeding that of the previous year by £345. The receipts exceeded the estimate under every Head except Division IV (Fees, Fines, &c.), but the principal increases were under Customs (£413), Post Office (£450), Internal Revenue (£676), and Rents (£1127). The two last items were the immediate outcome of the development of the whaling industry around the Falklands and its Dependencies.

EXPENDITURE.

3. The Ordinary Expenditure amounted to £15,685 1s. 7d. being £1515 9s. 5d. over the estimate.

4. The comparative statements (A) and (B) attached shew the estimated and actual Revenue and Expenditure under the various Heads.

5. The expenditure in excess of the amount already sanctioned by Council under the Appropriation Ordinance No. 1 of 1908, and for which you will be asked to pass a Supplementary Bill, is £3014 16s. 9d. The details of the principal items are as follows:—

6. Division I.—**Pensions, £84 6s. 1d.** Mr. and Mrs. Durose, late Schoolmaster and Schoolmistress, retired in April last and became entitled to pension.

7. Division II.—**The Governor, £39 15s. 1d.** A sum of £26 was paid to Mr. T. L. Keen for acting for a few months as Private Secretary. There was a small over-expenditure under the Head of Marriage Fees which was recovered.

8. Division IV.—**Treasury, £106 5s. 7d.** This was occasioned by the purchase of a new typewriter (£22), and by an expenditure of £87 upon temporary Customs Officers. The latter amount was recovered.

9. Division X.—**Medical, £127 7s 10d.** The vote for drugs was exceeded, and new linen and other requisites procured for the Quarantine Station, around the grounds of which a sheep-proof fence was erected. There was an over-expenditure of £52 on the Cottage Home, part of which was recovered.

10. Division XIII.—**Transport, £562 os. 4d.** This was occasioned by passages from and to England paid under agreement, and included a sum of £67 on account of landing stores.

11. Division XIV.—**Miscellaneous, £32 4s. 11d.** The stationery and telegram votes were both somewhat exceeded.

12. Division XVI.—**Colonial Engineer, £116 6s. 6d.** Although there was a saving under items Blacksmith and Forage amounting to £55, the insurance of the launch and the wages of the Engineer for three months caused the vote to be exceeded.

13. Division XVII.—**Savings Bank, £224 15s. 4d.** The large increase of deposits occasioned the above excess in interest.

14. Division XIX.—**Drawbacks and Refunds, £146 7s. 1d.** This over-expenditure was mainly caused by a refund of rent occasioned by the purchase by the lessee of his leasehold.

15. Division XXI.—**Public Works Recurrent, £276 12s. 5d.** The large Government Store was supplied with a new iron roof, and this with other much needed repairs to buildings were effected at a cost of £167; there was an over-expenditure of £29 on roads, &c.; and £62 on furniture for Government House, &c.

16. Division XXII.—**Public Works Extraordinary, £1262 3s. 0d.** The above over-expenditure included £232, being part cost of construction of the telephone line from Stanley to Darwin, and was payable to the Falkland Islands Company, Ltd. under agreement; £103 for new furniture for the Government School (amount of £100 voted in 1907 not spent); £670 the excess in cost of steam launch, sanitary punts, sanitary carts, &c., over the estimate; £101 for new Printing Office; and £51 for boat for public works.

17. I avail myself of this opportunity to make a few remarks on the subjects of Extraordinary Revenue and Extraordinary Expenditure.

The Extraordinary Revenue was estimated at £8500 made up as follows:—

| | | |
|-----|------------|-------|
| (1) | Land Sales | 5200 |
| (2) | Loan | 2500 |
| (3) | Live Stock | 800 |
| | | <hr/> |
| | | £8500 |
| | | <hr/> |

The amounts estimated under Land Sales and Live Stock were slightly exceeded, but in the case of the Loan (£2500), the Crown Agents, acting under a misapprehension, omitted to earmark the amount, and the Extraordinary Revenue was therefore reduced proportionately and realized £6099.

18. The Extraordinary Expenditure was estimated at £3549, and amounted to £4684, thus leaving, notwithstanding the oversight above referred to, a surplus of Extraordinary Revenue over Extraordinary Expenditure of £1415. Or, to put it in another way, last year's surplus of ordinary revenue over ordinary expenditure (£2090) in conjunction with previous surplus funds (i. e., savings effected from 1902 to 1907, *not Land Sales*) has permitted of our meeting all extraordinary expenditure to the end of 1908,

and left us a balance of £5600. Under these satisfactory financial conditions I am prepared to recommend to the Secretary of State that the arrangements in connection with the Loan of £2500, which he was pleased to permit of our borrowing last year from our accumulated assets at 3% repayable in ten years, be allowed to lapse.

PUBLIC WORKS.

19. During the year the repair and extension of the stone work of the public stone jetty was completed. The structure was both broadened and lengthened, and the piles of the first section of the wooden portion were driven and placed in position. A wooden jetty in connection with the scheme for the removal of the night-soil was erected to the east of the township, and suitable accommodation provided at the shore end for horses, sanitary carts, &c. The whole was surrounded with an unclimable iron fence. Extensive improvements were effected at the Stanley Cemetery which had previously been very much neglected. Paths were laid out, metalled, and shingled, and supplied with substantial wooden bordering. A numbered wooden peg was driven in at the foot of each grave, and careful investigations led to a large proportion of graves which had previously remained practically unknown being identified and registered. The general appearance of the Cemetery was improved by planting the borders of the paths with flowers. A metalled extension of Ross Road was made for a distance of about half a mile from the Cemetery to the eastward. A commodious printing office was erected close to the secretariat in lieu of the old building in the dockyard which was quite unsuitable. The Government steam launch 'Penguin', also two sanitary punts, arrived towards the end of the year in connection with the sanitation scheme. The launch has already proved herself extremely useful in many directions, and has materially added to the efficiency of several departments.

COMMUNICATIONS.

20. Interinsular communications remain unchanged, but the prediction I made last year when submitting the Supplementary Estimates for 1907 that enterprise from outside the Colony might possibly effect what local enterprise had failed to achieve seems likely to be fulfilled.

WHALING.

21. It is with much satisfaction that I am able to report that the negotiations between this Government and Messrs. Salvesen & Co. of Leith have resulted in the decision of this well known and wealthy firm to permanently establish a whaling station in this Colony, and erect a factory at New Island. This factory is being equipped with the most modern machinery, and will utilise the whole carcass of the whale, thus avoiding the extreme waste which has hitherto unfortunately been associated with whaling in these waters. In our Dependencies of South Georgia and South Shetlands the whaling industry continues to be highly remunerative. In the former, leases have been granted to seven different whaling companies, while in the latter, four companies operated there during the short season with distinctly satisfactory results. As already stated it is the development of the whaling industry which has materially increased our revenue.

PASTORAL.

22. Pastoralists have had no reason to complain of the past year. An open winter was succeeded by an exceptionally good grass season, a good clip, and a distinctly upward tendency in the price of wool. The advantageous terms offered by Government to lessees for the purchase of their lands under the Land Ordinance, 1903, at 3/s per acre on the computed acreage, (10% down and balance in 30 or less years @ 3%) have now resulted in all the large Farmers on the East and West Falklands, with three exceptions, having applied to purchase their leaseholds.

PROSPECTS.

23. As far as I am in a position to judge the outlook of the Colony at the present

juncture may be regarded as a distinctly hopeful one ; much however remains to be done. The fur sealing industry for instance is on a far from satisfactory basis. The rookeries are regularly poached from outside the Colony, generally during the close season, and the natural increase is consequently seriously handicapped and prevented, if not, in too many cases, entirely interfered with. It would be better from the standpoint of all legitimately concerned that the rookeries (there are at present only four or five small ones with an approximate annual increase of about a thousand seals) should be leased for a term of years to a firm willing and able to protect them. Standing as they now do unprotected and exposed they merely offer a premium to illicit raiders. I have no hesitation in saying that if worked on different lines this industry would, in the course of a few years, become a source of handsome profit to both lessees and licensees, and to Government as well.

24. It was hoped that the negotiations which were started some two years ago with an English syndicate in Buenos Aires for utilizing the large Government deposits of peat would have been successful and have resulted in a peat briquetting industry, but the concession then offered has since lapsed. Enquiries, however, are now being made from England with regard to the extensive peat deposits on the East and West Falklands, and the facilities for working them, and it is hoped that this large and valuable natural asset, may, as in other countries, such for instance as Sweden, become hereafter a source of profit to the Colony.

25. At the late Stanley Flower Show and Industrial Exhibition an excellent bale of locally made hay was exhibited, which indicates that much more could be done in this direction seeing that we import fodder and grain annually to the value of about £2000. Then, too, the butter consumed locally is nearly all imported notwithstanding the remarkably good samples which were on view at the Exhibition referred to above. This could surely be remedied if cows were stalled and fed in the winter as in Scotland, Denmark, and elsewhere. In other words, I see no reason why the small farmers in the vicinity of Stanley should not advantageously turn their attention to dairy farming, possibly combined with market gardening. Minor industries have done much for other Colonies, and there is no reason, in my opinion, why the Falklands should prove the exception.

DEPENDENCIES.

26. No review of this Colony for the year 1908 would be complete without a reference to the Letters Patent which were passed under the Great Seal of the United Kingdom in July last appointing the Governor of the Falkland Islands to be Governor of South Georgia, the South Orkneys, the South Shetlands, the Sandwich Islands, and Graham's Land, and providing for the Government thereof as Dependencies of the Colony. I need hardly remind you that our previous responsibilities are thereby increased, and it remains with us to shew by our energetic development, to the best of our ability, of these remote and somewhat inaccessible southern outposts of our great Empire, that we are not unworthy of the trust which His Majesty has been pleased to repose in us.

### A BILL

#### ENTITLED

### An Ordinance

To regulate the practice and procedure in  
the Falkland Islands in Appeals to  
His Majesty in Council.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands, with the advice and consent of the Legislative Council thereof, as follows:—

1. In this Ordinance, unless the context otherwise requires:— Definitions.

“Appeal” means Appeal to His Majesty in Council;

“His Majesty” includes His Majesty’s heirs and successors;

“Judgment” includes decree, order, sentence, rule, or decision;

“Court” means the Supreme Court of the Falkland Islands;

“Record” means the aggregate of papers relating to an Appeal (including the pleadings, proceedings, evidence and judgments) proper to be laid before His Majesty in Council on the hearing of the Appeal;

“Registrar” means the Registrar or other proper officer having the custody of the Records in the Supreme Court of the Falkland Islands ;

“Month” means calendar month ;

Words in the singular include the plural, and words in the plural include the singular.

Cases in which an Appeal lies.

2. Subject to the provisions of this Ordinance, an Appeal shall lie—

- (a) as of right, from any final judgment of the Court, where the matter in dispute on the Appeal amounts to or is of the value of five hundred pounds sterling or upwards, or where the Appeal involves, directly or indirectly, some claim or question to or respecting property or some civil right amounting to or of the value of five hundred pounds sterling or upwards ; and
- (b) at the discretion of the Court, from any other judgment of the Court, whether final or interlocutory, if, in the opinion of the Court, the question involved in the Appeal is one which, by reason of its great general or public importance or otherwise, ought to be submitted to His Majesty in Council for decision.

Cases in which final judgment may be entered *pro forma* for purposes of appeal.

3. Where in any action or other proceeding no final judgment can be duly given in consequence of a difference of opinion between the judges, the final judgment may be entered *pro forma* on the application of any party to such action or other proceeding according to the opinion of the Chief Justice or, in his absence, of the senior puisne Judge of the Court, but such judgment shall only be deemed final for purposes of an appeal therefrom, and not for any other purpose.

Procedure on applications for leave to appeal.

4. Applications to the Court for leave to appeal shall be made by motion or petition within twenty-one days from the date of the judgment to be appealed from, and the Applicant shall give the opposite party notice of his intended application.

Conditions upon which leave to appeal shall be granted.

5. Leave to appeal under Section 2 shall only be granted by the Court in the first instance—

- (a) upon condition of the Appellant, within a period to be fixed by the Court but not exceeding three months from the date of the hearing of the application for leave to appeal, entering into good and sufficient security, to the satisfaction of the Court, in a sum not exceeding five hundred pounds, for the due prosecution of the Appeal, and the payment of all such costs as may become payable to the Respondent in the event of the Appellant's not obtaining an order granting him final leave to appeal, or of the Appeal being dismissed for non-prosecution, or of His Majesty in Council ordering the Appellant to pay the Respondent's costs of the Appeal (as the case may be) ; and
- (b) upon such other conditions (if any) as to the time or times within which the Appellant shall take the necessary steps for the purpose of procuring the preparation of the Record and the dispatch thereof to England as the Court, having regard to all the circumstances of the case, may think it reasonable to impose.

6. Where the judgment appealed from requires the Appellant to pay money or perform a duty, the Court shall have power, when granting leave to appeal, either to direct that the said judgment shall be carried into execution or that the execution thereof shall be suspended pending the Appeal, as to the Court shall seem just, and in case the Court shall direct the said judgment to be carried into execution, the person in whose favour it was given shall, before the execution thereof, enter into good and sufficient security, to the satisfaction of the Court, for the due performance of such order as His Majesty in Council shall think fit to make thereon.

Power of the Court when granting leave to appeal.

7. The preparation of the Record shall be subject to the supervision of the Court, and the parties may submit any disputed question arising in connection therewith to the decision of the Court, and the Court shall give such directions thereon as the justice of the case may require.

Preparation of the Record.

8. The Registrar, as well as the parties and their legal Agents, shall endeavour to exclude from the Record all documents (more particularly such as are merely formal) that are not relevant to the subject-matter of the Appeal, and, generally, to reduce the bulk of the Record as far as practicable, taking special care to avoid the duplication of documents and the unnecessary repetition of headings and other merely formal parts of documents; but the documents omitted to be copied or printed shall be enumerated in a list to be placed after the index or at the end of the Record.

Irrelevant documents to be excluded from the Record.

9. Where in the course of the preparation of a Record one party objects to the inclusion of a document on the ground that it is unnecessary or irrelevant, and the other party nevertheless insists upon its being included, the Record, as finally printed (whether in the Falkland Islands or in England), shall, with a view to the subsequent adjustments of the costs of and incidental to such document, indicate in the index of papers, or otherwise, the fact that, and the party by whom, the inclusion of the document was objected to.

Cases in which there is a conflict between parties as to the relevancy of a document.

10. The Record shall be printed in accordance with the Rules set forth in the Schedule hereto. It may be so printed either in the Falkland Islands or in England.

The Record to be printed.

11. Where the Record is printed in the Falkland Islands, the Registrar shall, at the expense of the Appellant, transmit to the Registrar of the Privy Council forty copies of such Record, one of which copies he shall certify to be correct by signing his name on, or initialling, every eighth page thereof and by affixing thereto the seal of the Court.

Duty of the Registrar when the Record is printed in the Colony.

12. Where the Record is to be printed in England, the Registrar shall, at the expense of the Appellant, transmit to the Registrar of the Privy Council one certified copy of such Record, together with an index of all the papers and exhibits in the case. No other certified copies of the Record shall be transmitted to the Agents in England by or on behalf of the parties to the Appeal.

Duty of the Registrar when the Record is to be printed in England.

13. Where part of the Record is printed in the Falkland Islands and part is to be printed in England, Sections 11 and 12 of this Ordinance shall, as far as practicable, apply to such parts as are printed in the Falkland Islands and such as are to be printed in England respectively.

Duty of the Registrar when part of the Record is printed in the Colony and part is to be printed in England.

14. The reasons given by the judge, or any of the judges, for or against any judgment pronounced in the course of the proceedings out of which the Appeal arises shall by such judge or judges be

Reasons given by judges for judgments to be transmitted with the Record.

communicated in writing to the Registrar, and shall by him be transmitted to the Registrar of the Privy Council at the same time when the Record is transmitted.

Cases in which the Court may direct Appeals to be consolidated.

15. Where there are two or more applications for leave to appeal arising out of the same matter, and the Court is of opinion that it would be for the convenience of the Lords of the Judicial Committee and all parties concerned that the Appeals should be consolidated, the Court may direct the Appeals to be consolidated and grant leave to appeal by a single Order.

Withdrawal of an Appeal prior to order granting final leave to appeal.

16. An Appellant who has obtained an order granting him conditional leave to appeal may at any time prior to the making of an order granting him final leave to appeal withdraw his Appeal on such terms as to costs and otherwise as the Court may direct.

Cases in which an order granting conditional leave to appeal may be rescinded.

17. Where an Appellant, having obtained an order granting him conditional leave to appeal, and having complied with the conditions imposed on him by such Order, fails thereafter to apply with due diligence to the Court for an order granting him final leave to appeal, the Court may, on an application in that behalf made by the Respondent, rescind the order granting conditional leave to appeal, notwithstanding the Appellant's compliance with the conditions imposed by such Order, and may give such directions as to the costs of the Appeal and the security entered into by the Appellant as the Court shall think fit, or make such further or other order in the premises as, in the opinion of the Court, the justice of the case requires.

Cases in which the Court may defer granting final leave to appeal.

18. On an application for final leave to appeal, the Court may inquire whether notice, or sufficient notice, of the application has been given by the Appellant to all parties concerned, and, if not satisfied as to the notices given, may defer the granting of the final leave to appeal, or may give such other directions in the matter as, in the opinion of the Court, the justice of the case requires.

Prosecution of an Appeal.

19. An Appellant who has obtained final leave to appeal shall prosecute his Appeal in accordance with the Rules for the time being regulating the general practice and procedure in Appeals to His Majesty in Council.

Withdrawal of an Appeal after final leave to appeal has been obtained, and prior to the dispatch of the Record to England.

20. Where an Appellant, having obtained final leave to appeal, desires, prior to the dispatch of the Record to England, to withdraw his Appeal, the Court may, upon an application in that behalf made by the Appellant, grant him a certificate to the effect that the Appeal has been withdrawn, and the Appeal shall thereupon be deemed, as from the date of such certificate, to stand dismissed without express Order of His Majesty in Council, and the costs of the Appeal and the security entered into by the Appellant shall be dealt with in such manner as the Court may think fit to direct.

Cases in which, after final leave to appeal has been obtained, the appeal shall be deemed to stand dismissed for non-prosecution.

21. Where an Appellant, having obtained final leave to appeal, fails to show due diligence in taking all necessary steps for the purpose of procuring the dispatch of the Record to England, the Respondent may, after giving the Appellant due notice of his intended application, apply to the Court for a certificate that the Appeal has not been effectually prosecuted by the Appellant, and if the Court sees fit to grant such a certificate, the Appeal shall be deemed, as from the date of such certificate, to stand dismissed for non-prosecution without express Order of His Majesty in Council, and the costs of the Appeal and the security entered into by the Appellant shall be dealt with in such manner as the Court may think fit to direct.

22. Where at any time between the order granting final leave to appeal and the dispatch of the Record to England the Record becomes defective by reason of the death, or change of status, of a party to the Appeal, the Court may, notwithstanding the order granting final leave to appeal, on an application in that behalf made by any person interested, grant a certificate showing who, in the opinion of the Court, is the proper person to be substituted or entered on the Record in place of, or in addition to, the party who has died or undergone a change of status, and the name of such person shall thereupon be deemed to be so substituted or entered on the Record as aforesaid without express Order of His Majesty in Council.

Substitution, &c., of parties to the Appeal, prior to the dispatch of the Record to England.

23. Where the Record subsequently to its dispatch to England becomes defective by reason of the death, or change of status, of a party to the Appeal, the Court shall, upon an application in that behalf made by any person interested, cause a certificate to be transmitted to the Registrar of the Privy Council showing who, in the opinion of the Court, is the proper person to be substituted, or entered, on the Record, in place of, or in addition to, the party who has died or undergone a change of status.

Substitution, &c., of parties to the Appeal, after the dispatch of the Record to England.

24. The Case of each party to the Appeal may be printed either in the Falkland Islands or in England and shall, in either event, be printed in accordance with the Rules set forth in the Schedule hereto, every tenth line thereof being numbered in the margin, and shall be signed by at least one of the Counsel who attends at the hearing of the Appeal, or by the party himself if he conducts his Appeal in person.

Case of each party to the Appeal to be printed in accordance with the rules set forth in the Schedule.

25. The Case shall consist of paragraphs numbered consecutively and shall state, as concisely as possible, the circumstances out of which the Appeal arises, the contentions to be urged by the party lodging the same, and the reasons of appeal. References by page and line to the relevant portions of the Record as printed shall, as far as practicable, be printed in the margin, and care shall be taken to avoid, as far as possible, the reprinting in the Case of long extracts from the Record. The taxing officer, in taxing the costs of the Appeal, shall, either of his own motion, or at the instance of the opposite party, inquire into any unnecessary prolixity in the Case, and shall disallow the costs occasioned thereby.

Preparation of the Case.

26. Where the Judicial Committee directs a party to bear the costs of an Appeal incurred in the Falkland Islands, such costs shall be taxed by the proper officer of the Court in accordance with the rules for the time being regulating taxation in the Court.

Taxation of costs.

27. The Court shall conform with, and execute, any order which His Majesty in Council may think fit to make on an Appeal from a judgment of the Court in like manner as any original judgment of the Court should or might have been executed.

Execution by the Court of an order of His Majesty in Council on an Appeal.

28. Nothing in this Ordinance contained shall be deemed to interfere with the right of His Majesty upon the humble Petition of any person aggrieved by any judgment of the Court, to admit his Appeal therefrom upon such conditions as His Majesty in Council shall think fit to impose.

Right of His Majesty to admit an Appeal from any judgment reserved.

29. Section 25 of the Administration of Justice Ordinance, 1901, is hereby repealed.

Repeal.

## An Ordinance

To regulate the practice and procedure in  
the Falkland Islands in Appeals to  
His Majesty in Council.

BE IT ENACTED by the Governor of the Colony of the  
Falkland Islands, with the advice and consent of the Legislative  
Council thereof, as follows:—

1. In this Ordinance, unless the context otherwise requires:— Definitions.

“Appeal” means Appeal to His Majesty in Council;

“His Majesty” includes His Majesty’s heirs and successors;

“Judgment” includes decree, order, sentence, rule, or decision;

“Court” means the Supreme Court of the Falkland Islands;

“Record” means the aggregate of papers relating to an Appeal  
(including the pleadings, proceedings, evidence and judgments)  
proper to be laid before His Majesty in Council on  
the hearing of the Appeal;

“Registrar” means the Registrar or other proper officer having the custody of the Records in the Supreme Court of the Falkland Islands ;

“Month ” means calendar month ;

Words in the singular include the plural, and words in the plural include the singular.

Cases in which an Appeal lies.

2. Subject to the provisions of this Ordinance, an Appeal shall lie—

- (a) as of right, from any final judgment of the Court, where the matter in dispute on the Appeal amounts to or is of the value of five hundred pounds sterling or upwards, or where the Appeal involves, directly or indirectly, some claim or question to or respecting property or some civil right amounting to or of the value of five hundred pounds sterling or upwards ; and
- (b) at the discretion of the Court, from any other judgment of the Court, whether final or interlocutory, if, in the opinion of the Court, the question involved in the Appeal is one which, by reason of its great general or public importance or otherwise, ought to be submitted to His Majesty in Council for decision.

Cases in which final judgment may be entered *pro forma* for purposes of appeal.

3. Where in any action or other proceeding no final judgment can be duly given in consequence of a difference of opinion between the judges, the final judgment may be entered *pro forma* on the application of any party to such action or other proceeding according to the opinion of the Chief Justice or, in his absence, of the senior puisne Judge of the Court, but such judgment shall only be deemed final for purposes of an appeal therefrom, and not for any other purpose.

Procedure on applications for leave to appeal.

4. Applications to the Court for leave to appeal shall be made by motion or petition within twenty-one days from the date of the judgment to be appealed from, and the Applicant shall give the opposite party notice of his intended application.

Conditions upon which leave to appeal shall be granted.

5. Leave to appeal under Section 2 shall only be granted by the Court in the first instance—

- (a) upon condition of the Appellant, within a period to be fixed by the Court but not exceeding three months from the date of the hearing of the application for leave to appeal, entering into good and sufficient security, to the satisfaction of the Court, in a sum not exceeding five hundred pounds, for the due prosecution of the Appeal, and the payment of all such costs as may become payable to the Respondent in the event of the Appellant's not obtaining an order granting him final leave to appeal, or of the Appeal being dismissed for non-prosecution, or of His Majesty in Council ordering the Appellant to pay the Respondent's costs of the Appeal (as the case may be) ; and
- (b) upon such other conditions (if any) as to the time or times within which the Appellant shall take the necessary steps for the purpose of procuring the preparation of the Record and the dispatch thereof to England as the Court, having regard to all the circumstances of the case, may think it reasonable to impose.

6. Where the judgment appealed from requires the Appellant to pay money or perform a duty, the Court shall have power, when granting leave to appeal, either to direct that the said judgment shall be carried into execution or that the execution thereof shall be suspended pending the Appeal, as to the Court shall seem just, and in case the Court shall direct the said judgment to be carried into execution, the person in whose favour it was given shall, before the execution thereof, enter into good and sufficient security, to the satisfaction of the Court, for the due performance of such order as His Majesty in Council shall think fit to make thereon.
- Power of the Court when granting leave to appeal.
7. The preparation of the Record shall be subject to the supervision of the Court, and the parties may submit any disputed question arising in connection therewith to the decision of the Court, and the Court shall give such directions thereon as the justice of the case may require.
- Preparation of the Record.
8. The Registrar, as well as the parties and their legal Agents, shall endeavour to exclude from the Record all documents (more particularly such as are merely formal) that are not relevant to the subject-matter of the Appeal, and, generally, to reduce the bulk of the Record as far as practicable, taking special care to avoid the duplication of documents and the unnecessary repetition of headings and other merely formal parts of documents; but the documents omitted to be copied or printed shall be enumerated in a list to be placed after the index or at the end of the Record.
- Irrelevant documents to be excluded from the Record.
9. Where in the course of the preparation of a Record one party objects to the inclusion of a document on the ground that it is unnecessary or irrelevant, and the other party nevertheless insists upon its being included, the Record, as finally printed (whether in the Falkland Islands or in England), shall, with a view to the subsequent adjustments of the costs of and incidental to such document, indicate in the index of papers, or otherwise, the fact that, and the party by whom, the inclusion of the document was objected to.
- Cases in which there is a conflict between parties as to the relevancy of a document.
10. The Record shall be printed in accordance with the Rules set forth in the Schedule hereto. It may be so printed either in the Falkland Islands or in England.
- The Record to be printed.
11. Where the Record is printed in the Falkland Islands, the Registrar shall, at the expense of the Appellant, transmit to the Registrar of the Privy Council forty copies of such Record, one of which copies he shall certify to be correct by signing his name on, or initialling, every eighth page thereof and by affixing thereto the seal of the Court.
- Duty of the Registrar when the Record is printed in the Colony.
12. Where the Record is to be printed in England, the Registrar shall, at the expense of the Appellant, transmit to the Registrar of the Privy Council one certified copy of such Record, together with an index of all the papers and exhibits in the case. No other certified copies of the Record shall be transmitted to the Agents in England by or on behalf of the parties to the Appeal.
- Duty of the Registrar when the Record is to be printed in England.
13. Where part of the Record is printed in the Falkland Islands and part is to be printed in England, Sections 11 and 12 of this Ordinance shall, as far as practicable, apply to such parts as are printed in the Falkland Islands and such as are to be printed in England respectively.
- Duty of the Registrar when part of the Record is printed in the Colony and part is to be printed in England.
14. The reasons given by the judge, or any of the judges, for or against any judgment pronounced in the course of the proceedings out of which the Appeal arises shall by such judge or judges be
- Reasons given by judges for judgments to be transmitted with the Record.

communicated in writing to the Registrar, and shall by him be transmitted to the Registrar of the Privy Council at the same time when the Record is transmitted.

Cases in which the Court may direct Appeals to be consolidated.

15. Where there are two or more applications for leave to appeal arising out of the same matter, and the Court is of opinion that it would be for the convenience of the Lords of the Judicial Committee and all parties concerned that the Appeals should be consolidated, the Court may direct the Appeals to be consolidated and grant leave to appeal by a single Order.

Withdrawal of an Appeal prior to order granting final leave to appeal.

16. An Appellant who has obtained an order granting him conditional leave to appeal may at any time prior to the making of an order granting him final leave to appeal withdraw his Appeal on such terms as to costs and otherwise as the Court may direct.

Cases in which an order granting conditional leave to appeal may be rescinded.

17. Where an Appellant, having obtained an order granting him conditional leave to appeal, and having complied with the conditions imposed on him by such Order, fails thereafter to apply with due diligence to the Court for an order granting him final leave to appeal, the Court may, on an application in that behalf made by the Respondent, rescind the order granting conditional leave to appeal, notwithstanding the Appellant's compliance with the conditions imposed by such Order, and may give such directions as to the costs of the Appeal and the security entered into by the Appellant as the Court shall think fit, or make such further or other order in the premises as, in the opinion of the Court, the justice of the case requires.

Cases in which the Court may defer granting final leave to appeal.

18. On an application for final leave to appeal, the Court may inquire whether notice, or sufficient notice, of the application has been given by the Appellant to all parties concerned, and, if not satisfied as to the notices given, may defer the granting of the final leave to appeal, or may give such other directions in the matter as, in the opinion of the Court, the justice of the case requires.

Prosecution of an Appeal.

19. An Appellant who has obtained final leave to appeal shall prosecute his Appeal in accordance with the Rules for the time being regulating the general practice and procedure in Appeals to His Majesty in Council.

Withdrawal of an Appeal after final leave to appeal has been obtained, and prior to the dispatch of the Record to England.

20. Where an Appellant, having obtained final leave to appeal, desires, prior to the dispatch of the Record to England, to withdraw his Appeal, the Court may, upon an application in that behalf made by the Appellant, grant him a certificate to the effect that the Appeal has been withdrawn, and the Appeal shall thereupon be deemed, as from the date of such certificate, to stand dismissed without express Order of His Majesty in Council, and the costs of the Appeal and the security entered into by the Appellant shall be dealt with in such manner as the Court may think fit to direct.

Cases in which, after final leave to appeal has been obtained, the appeal shall be deemed to stand dismissed for non-prosecution.

21. Where an Appellant, having obtained final leave to appeal, fails to show due diligence in taking all necessary steps for the purpose of procuring the dispatch of the Record to England, the Respondent may, after giving the Appellant due notice of his intended application, apply to the Court for a certificate that the Appeal has not been effectually prosecuted by the Appellant, and if the Court sees fit to grant such a certificate, the Appeal shall be deemed, as from the date of such certificate, to stand dismissed for non-prosecution without express Order of His Majesty in Council, and the costs of the Appeal and the security entered into by the Appellant shall be dealt with in such manner as the Court may think fit to direct.

22. Where at any time between the order granting final leave to appeal and the dispatch of the Record to England the Record becomes defective by reason of the death, or change of status, of a party to the Appeal, the Court may, notwithstanding the order granting final leave to appeal, on an application in that behalf made by any person interested, grant a certificate showing who, in the opinion of the Court, is the proper person to be substituted or entered on the Record in place of, or in addition to, the party who has died or undergone a change of status, and the name of such person shall thereupon be deemed to be so substituted or entered on the Record as aforesaid without express Order of His Majesty in Council.

Substitution, &c., of parties to the Appeal, prior to the dispatch of the Record to England.

23. Where the Record subsequently to its dispatch to England becomes defective by reason of the death, or change of status, of a party to the Appeal, the Court shall, upon an application in that behalf made by any person interested, cause a certificate to be transmitted to the Registrar of the Privy Council showing who, in the opinion of the Court, is the proper person to be substituted, or entered, on the Record, in place of, or in addition to, the party who has died or undergone a change of status.

Substitution, &c., of parties to the Appeal, after the dispatch of the Record to England.

24. The Case of each party to the Appeal may be printed either in the Falkland Islands or in England and shall, in either event, be printed in accordance with the Rules set forth in the Schedule hereto, every tenth line thereof being numbered in the margin, and shall be signed by at least one of the Counsel who attends at the hearing of the Appeal, or by the party himself if he conducts his Appeal in person.

Case of each party to the Appeal to be printed in accordance with the rules set forth in the Schedule.

25. The Case shall consist of paragraphs numbered consecutively and shall state, as concisely as possible, the circumstances out of which the Appeal arises, the contentions to be urged by the party lodging the same, and the reasons of appeal. References by page and line to the relevant portions of the Record as printed shall, as far as practicable, be printed in the margin, and care shall be taken to avoid, as far as possible, the reprinting in the Case of long extracts from the Record. The taxing officer, in taxing the costs of the Appeal, shall, either of his own motion, or at the instance of the opposite party, inquire into any unnecessary prolixity in the Case, and shall disallow the costs occasioned thereby.

Preparation of the Case.

26. Where the Judicial Committee directs a party to bear the costs of an Appeal incurred in the Falkland Islands, such costs shall be taxed by the proper officer of the Court in accordance with the rules for the time being regulating taxation in the Court.

Taxation of costs.

27. The Court shall conform with, and execute, any order which His Majesty in Council may think fit to make on an Appeal from a judgment of the Court in like manner as any original judgment of the Court should or might have been executed.

Execution by the Court of an order of His Majesty in Council on an Appeal.

28. Nothing in this Ordinance contained shall be deemed to interfere with the right of His Majesty upon the humble Petition of any person aggrieved by any judgment of the Court, to admit his Appeal therefrom upon such conditions as His Majesty in Council shall think fit to impose.

Right of His Majesty to admit an Appeal from any judgment reserved.

29. Section 25 of the Administration of Justice Ordinance, 1901, is hereby repealed.

Repeal.

Short title.

30. This Ordinance may be cited as the Privy Council Appeals Ordinance, 1909.

Passed the Legislative Council this 23rd day of July, 1909.

## ESTIMATES, 1910.

(MESSAGE INTRODUCING.)

*Read in Council, September, 28th, 1909.*

MESSAGE FROM THE GOVERNOR TO THE LEGISLATIVE COUNCIL.

HONOURABLE GENTLEMEN OF THE LEGISLATIVE COUNCIL,—

I have the honour to lay before you the Estimates for the year 1910.

## REVENUE.

2. The Ordinary Revenue for 1910 has been estimated at £17,042, or £733 less than that received in 1908. The anticipated increases and decreases under the several Divisions are shown below :—

| <i>Increases.</i> |                                    |     |     |     |     |     |     | £    |

| "                 | V.—Interest                        | ... | ... | ... | ... | ... | ... | 213  |
| Total             |                                    |     |     |     |     |     |     | £604 |

|                       |     |     |     |     |     |     | <i>Decreases.</i> | £           |
|-----------------------|-----|-----|-----|-----|-----|-----|-------------------|-------------|
| Division I.—Customs   | ... | ... | ... | ... | ... | ... | 283               |             |
| „ VI.—Post Office     | ... | ... | ... | ... | ... | ... | 215               |             |
| „ VII.—Rents          | ... | ... | ... | ... | ... | ... | 804               |             |
| „ VIII.—Miscellaneous | ... | ... | ... | ... | ... | ... | 35                |             |
| Total                 |     |     |     |     |     |     | ...               | <hr/> £1337 |

3. The decrease under rents is due to the purchase by lessees of their leaseholds and to adjust this there should be a compensating increase under Interest. This, however, is not the case owing mainly to the present interpretation placed on section 14 of the Land Ordinance, 1903. If our financial equilibrium is to be maintained it is in my opinion necessary that the interest on the unpaid balance of the purchase money should go to Ordinary Revenue, and not be credited together with the principal to the Land Sales Fund, as is the case at present. This would still permit of the Land Sales Fund receiving a sum of £900 for every 6000 acres of country land sold, and Ordinary Revenue an annual sum at the rate of 3% as interest on the value of such land, or a somewhat higher rate than would be received were the land leased under section 15 of the Ordinance at 1d. per acre, which is equivalent to an annual sum of £27 per section of 6000 acres. Should the Secretary of State be pleased to approve of my proposal the estimated decrease under Rent will be made good under Interest.

#### EXPENDITURE.

4. The Ordinary Expenditure for 1908 (exclusive of Public Works Extraordinary, £4082, and payments under the Live Stock Ordinance, £602) amounted to £15,760, or £2,015 less than the Ordinary Revenue. The Ordinary Expenditure for 1910 is estimated at £16,276. A schedule of additions and reductions is given in Appendix 2.

5. Division IV.—**Treasury and Customs.**—Item 3.—This is a new appointment and has been caused by the need to station a Deputy Collector of Customs at New Island now that it has been made a Port of Entry.

6. Division VII.—**Legal.**—Item 1.—Provision has been made for the salary (£250) of a Magistrate to be stationed at South Georgia. With seven large whaling companies operating in the waters of the Dependency, and several factories ashore for the utilization of the whole carcass of the whale, it is the duty of the Government to send an official there with as little further delay as possible. It may not be out of place here to mention that the rents to be received from the lease of whaling stations in South Georgia in 1910 will amount to £1850.

7. Division VIII.—**Police.**—Item 3.—It is probable that it will be necessary hereafter to send a Police Constable to South Georgia, and a sum of £84 has been provided accordingly for his salary.

8. Division X.—**Medical.**—Item 7.—Trained Nurse and Midwife. In addition to the Nurse-Matron of the Victoria Cottage Home whose services are available as a trained Nurse for day or night work in Stanley, including midwifery cases, or for duty at the Quarantine Station, it is thought desirable to continue to make provision for a second trained Nurse, more especially as the need for an accident ward in conjunction with the Cottage Home has of late become very apparent. No less than eight serious accidents have occurred in, or been brought to, Stanley within the last twelve months demanding special medical attention as well as trained nursing, and although two of these were admitted to the Cottage Home for want of more suitable accommodation, it is felt that adequate provision for such cases should be made as soon as possible and a small accident ward erected.

9. It should not be overlooked that at the present time about one half of the total population of the Colony and its Dependencies is more or less directly employed either in the somewhat daring industry of catching whales, or in working in large factories manipulating the carcasses, and that the risk of accidents from these and other causes, such as the increased shipping necessary for the industry, demand that greater provision should be made at headquarters than heretofore to deal with cases of emergency when they arise. It is probable that the sums received from contributors to the Nurse Fund will go far to pay the salary of the second trained Nurse.

10. Division XI.—**Education.**—Item 5.—A Certificated Assistant Mistress is being selected by the Board of Education and may shortly be expected. The salary provided is somewhat higher than that previously paid.

11. Division XIV.—**Miscellaneous.**—Items 2, 11, and 17.—It has been necessary to increase the amount for telegrams by £25, and an additional sum of £50 has been

added to item 11 at the request of the Director of the Imperial Institute who is anxious that the Falklands' stall should be renovated, and new exhibits procured. A sum of £12 has been inserted in order to assist the Volunteer Band.

Item 15.—Caretaker Cemetery, £12. There are in the Cemetery a number of graves of servants of the Crown, dating from 1850 onwards, and who, in capacities varying from that of Sergeant of Marines to Administrator of the Government, died while on duty in this Colony. But few of these men had relatives in the Falklands, and it is but seemly, now that the Cemetery has been put in good order, that these graves as also those of Officers and men belonging to the Royal Navy, should be maintained.

Item 16.—Caretaker Museum, £12. The Falklands' Museum is a much needed Institution which now nears completion. The work of collecting specimens was started by Mrs. Allardyce and myself shortly after we came here, and we now have several hundred. We are already in touch with several Museums in different parts of the world, and there will be no difficulty in exchanging specimens. Some of our friends have assisted us with monetary contributions, and the building (the old Infant School) has been altered and fitted up with the necessary cases and drawers. It is proposed in the first instance to open the Museum only on Sunday afternoons and when the Pacific mail steamers call, i.e., once a fortnight.

12. Division XV.—**Post Office.**—Item 3.—The appointment of a Deputy Postmaster at New Island explains the increase of £20.

13. Division XVI.—**Colonial Engineer.**—Item 4.—The increase of £12 is necessitated by the new Kitson lamps.

Items 10 and 11.—The Master of the launch and the Engineer were not procurable at the salaries provided on the 1909 Estimates.

Item 15.—Insurance, coal, and oil, &c., for the launch, has been increased by £100. The Government launch 'Penguin' has since its arrival in November last materially increased administrative efficiency, and been useful in many ways too numerous to mention. The value of such services cannot well be expressed in £. s. d.

Item 18.—In deference to the wishes of the Board of Health a special provision of £78 has been made for scavenging, i. e., keeping the drains in Stanley continuously clear, and removing all sediment and rubbish as soon as collected and carting it away at once. The Board's recommendation is worthy of a twelve months trial. The balance of this item (£18) is for the services of a lad at night to tend the sanitary cart and horse while the nightsoil is being collected by the Sanitary Carter.

14. Division XXII.—**Public Works Extraordinary.**—Item 9.—The sum of £300 is required for the purchase of timber for a landing stage at the public wharf for passengers from launches and small craft, and for rails and trucks.

Item 12.—It is intended to procure four more Kitson Lamps. Those which have been already introduced are a great boon, and by degrees others should be installed throughout the township.

Item 21.—Accident Ward, Cottage Home. I have already referred to the need for this building in the earlier part of my Message, and it only remains for me to explain that it is proposed to have two small wards of three beds each divided by a common sitting room.

Item 22.—Embankment and drain, Murray Heights, £100, (part cost of construction). Portions of the township are periodically flooded during the winter months when the snow melts, and likewise after heavy rains, by the water from the catchment on the Murray Heights. The Board of Health have recommended the construction of an embankment and drain to deflect the water into the drains which run from south to north through the township. To deflect the whole of this catchment is a work of considerable magnitude and some difficulty, and one which has received the consideration of successive administrations. I am willing, however, that a commencement should be made with the proposed embankment and drain.

15. Before concluding I desire to draw your attention to the fact that the ordinary revenue obtained in 1905, the year after I assumed the administration of the Government, was £15,229, and that in 1908 it had risen to £17,775 (notwithstanding the loss of revenue already referred to in paragraph 3) or an increase of over 16%. The above satisfactory result was due to the development of the Dependencies of the Colony and the whaling industry, and was obtained without any additional taxation barring an increased rate of 6d. in the £ on all house property in the town of Stanley which brings in the small sum of £120 per annum, and in return for which an efficient sanitation scheme for the removal of the nightsoil has been provided. I may add that during the four years in question the ordinary expenditure was kept well within the ordinary revenue.

16. As I expect to be proceeding on long leave in the month of December after serving here for five and a quarter years, and cannot hope to be privileged to address another Message to Council for some time to come, I gladly avail myself of this opportunity to thank the Members of the Legislative Council, collectively and individually, for the advice and assistance which they have at all times willingly rendered me.
