Persons resident outside Stanley who expect to receive C. O. D. parcels are advised accordingly to authorize an agent in Stanley to effect such payments on their account and where possible to accept delivery of the parcels.

Where it is not possible for delivery to be accepted in Stanley C. O. D. parcels will be sent out from the Post Office to the camp on payment of the amounts payable and at the risk of the addressee. It must be understood that the Post Office disclaims expressly all responsibility or liability for the safe delivery of a C. O. **Notice respecting claims by British Nationals under Clause 4 of the Annex to Section IV of Part X of the Treaty of Saint Germain-en-Laye.**

By a Notice published in the London Gazette on the 31st January 1930, the Arbitrator appointed under Clause 4 of the Annex to Section IV of Part X of the Treaty of Saint Germain-en-Laye to assess the amount of claims by British Nationals growing out of acts committed by the former Austro-Hungarian Government, or by any Austrian Authorities, since 28th July 1914, and before the 12th August 1914, has prescribed that in the case of claimants resident in any British Colony or Protectorate, all such claims must be lodged with him at 2, Cavendish Square, London, W.1, before the expiration of six months from the date of the publication of this notice.

After the expiration of the period prescribed by this notice the Arbitrator will not accept any claim for consideration unless the claimant has, prior to the date of publication of this notice, notified the claim to the Controller Local Clearing Office in this Colony and is satisfied that the failure to lodge the claim within the prescribed period arose from circumstances for which the claimant cannot justly be held responsible.

All Claimants who have claims of this nature should submit their claims to the undersigned in triplicate. The claims should be lodged by the Claimants themselves, or by their duly authorised Agents, acting for them on their behalf.

## Report on Education in the Colony for the year 1929.

—:0:—

### General.

The educational facilities available in the Falkland Islands fall, in view of the peculiar local conditions, into three groups :

- (1) Those at Stanley, the only township in the Colony.
- (2) Those at Darwin, the Falkland Islands Company's main settlement.
- (3) Those in the outside country districts with their very scattered farm settlements.

**STANLEY :** A Government School is maintained from public funds, which, while being elementary in character, also makes provision for attendance at a Continuation Class for a two-years' course of further education. A scheme instituted in 1924 has further provided for children from the 'Camps' or country districts whose parents were willing to send them to Stanley to be educated. These Camp children were either boarded and lodged in a Government Hostel and taught in the School at an inclusive charge of 10/- a month during residence, or, if boarded in private houses, the Government contributed two-thirds of the cost not exceeding £2 a month. Early in 1929, however, it was decided that the Hostel had not received enough support to justify the cost of maintaining it, and the institution was finally closed down in August. It is a matter of great regret that this attempt to induce Camp parents to give their children the advantage of attending the Government School, at a total charge of under 4d. a day for board, lodging, laundry, doctor, school fees and books should have had to be abandoned. The maintenance grants for Camp children privately boarded still remain.

There is also a Convent School managed by Roman Catholic Sisters: this School, however, is not subject to Government control, and receives no subsidy.

**DARWIN :** Here for many years past the Falkland Islands Company has maintained, in the interests of its employees, a small school with a resident master.

**CAMP DISTRICTS :** Four itinerant teachers are provided by the Government — one for the East and three for the West Falkland. These teachers travel from settlement to settlement devoting a certain amount of time to each. The Falkland Islands Company also maintains two Camp teachers for the children of its employees in outlying districts.

### Government School.

2. The authorised teaching establishment of the Government School is :

One Headmaster	}	Certificated.
One Assistant Master		
Two Assistant Mistresses		
Two Assistant Teachers	}	Locally Trained.
Two Supplementary Teachers		

During 1929 the establishment was at its full strength except that the two locally trained Assistant Teachers were away from the Colony on leave from the end of April to the middle of October.

3. The following table shows the number of pupils on the roll, examined, and in average attendance :

		Boys.	Girls.	Total.
Number on roll on 31st December	...	86	62	148.
Average number on roll during 1929	...	96.4	66.1	162.5
Number examined in December	...	84	61	145.
Average attendance during 1929	...	84	59	143.

4. The percentage of attendance was good throughout the year, averaging just under 90 per cent. The standard of work was consistently maintained at a satisfactory level, and

visitors to the school, of whom there were more than usual, were impressed with the atmosphere of happiness and goodwill.

5. The Continuation Class was taught as a separate class by one or other of the certificated teachers throughout the year. The average number of pupils was ten. The maintenance of this class necessitates the employment of one more certificated teacher from England than would otherwise be required, and it is important that parents should make an effort to let their children take the two years' course, as the pupils are of an age to benefit greatly from the tuition provided.

6. The school received frequent visits from the medical and dental staff, and every child in the school was medically and dentally examined during the year. The health of the children was good, as is shown by the average attendance and by the fact that the school was not closed on account of illness. This is undoubtedly due in part to the excellent way in which the school is cleaned and warmed, and to the improvement in ventilation which has been effected in the past two years.

7. The teaching of woodwork, to which reference was made in last year's Report, was continued. Lessons in shorthand were given to the Continuation Class in the latter half of the year and it is hoped that this will remain a regular feature of the curriculum.

8. Early in the year the school yard was cemented. In the past the yard has been a mass of mud for six or eight months of the year, and the cementing has caused a notable improvement in cleanliness, comfort and appearance.

9. The boys have played football and the girls hockey, under two members of the staff who are specially qualified to organise these games, throughout the year, and in spite of the weather there have been very few weeks when games have not been possible.

10. Two boys left the school to join the Royal Navy and from reports received they are well up to the standard of work required. Several other pupils left to go to school in England; all of them have been able to take their places amongst pupils of similar age at home.

### Finance.

11. The expenditure under Head XI "Education" of the annual estimate of the expenditure was £3,165 in 1929 as compared with £2,973 in 1928. The revenue collected in 1929 amounted to £170 : 9 : 11 as against £170 : 15 : 3 in 1928. Details of the expenditure and revenue for 1929 are appended :

<i>Expenditure :</i>				£	s.	d.
1.	Personal Emoluments	...	...	2,151	1	8.
2.	Other Charges	...	...	1,014	4	2.
Total				£3,165	5	10.
<i>Revenue :</i>				£	s.	d.
1.	School Fees	...	...	113	9	9.
2.	Hostel Fees	...	...	28	0	0.
3.	Sale of Materials	...	...	29	0	2.
Total				£ 170	9	11.

The nett cost of the Education services during 1929 was thus £2,994 : 15 : 11.

### Travelling Teachers.

12. The Government Travelling Teacher on the East Falkland left the Colony in November and he had not been replaced by the end of the year. There were two Government Travelling Teachers at work all the year on the north and middle beats of the West Falkland, and a temporary teacher was at work most of the year on the south beat. This last district includes the Port Stephens Camp and three islands, and it has suffered for some

time for lack of a teacher. It is hoped that one will be continuously employed there for the future. The following are the numbers of Camp children taught by Government Travelling Teachers during 1929 :

Boys.	Girls.	Total.
47	42	89

### Saint Mary's Convent School.

13. The number of pupils attending the Convent School during 1929 was as follows :

	Boys.	Girls.	Total.
Number on Roll on 31st December ...	18	45	63
Number in Average Attendance ...	16	42	58
Number Examined ...	16	40	56

### Falkland Islands Company's School and Camp Teachers.

14. The number of pupils under instruction was as follows :

	Boys	Girls	Total.
Darwin School ...	10	8	18
Camp Teachers ...	21	18	39

## LEGISLATIVE COUNCIL.

### Minutes of meeting held on the 30th May, 1930.

1. The minutes of the meeting held on the 29th of April, 1930, were confirmed.

2. The Honourable the Colonial Secretary, by Command, laid on the table the following papers :

Regulations dated the 14th of April, 1930, amending Sections 7 and 11 of the Consolidated Leave and Passage Regulations of the 23rd of September, 1929. The Hospital and Medical Fees Regulations made by the Governor in Executive Council on the 27th of May, 1930.

3. The Honourable the Treasurer, by Command, laid on the table the following papers :

The Treasurer's Report and financial statements for the year ended the 31st of December, 1929.

4. On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Treasurer the Bill "to legalize certain payments made in the year 1929 in excess of the Expenditure sanctioned by Ordinance No. 13 of 1928" was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 and 2 and the Schedule were agreed to.

The title and preamble were agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

5. In moving the introduction and first reading of the Bill "to Regulate the registration of Firearms" the Honourable the Colonial Secretary said that hitherto in the Colony there had been no registration of firearms and no knowledge or check had existed as to the numbers of firearms in use or imported. Such registration was necessary in order to safeguard the realm and it was a matter for wonder that the necessary powers had not been provided earlier. The Bill was introduced primarily for administrative purposes and secondarily only for financial reasons. While it was not intended that the revenue should be increased it was necessary to simplify and ensure its collection. In the past, particularly in the Camp, the Treasurer had no means of checking the number of persons taking out licences. As a result of the measure the collection of the revenue would become automatic.

Since the publication of the Bill it had been represented that the annual fee of 7/6 for the registration of each firearm would fall heavily on certain persons possessing more than one gun or rifle, particularly shepherds in the Camp. It was accordingly proposed to substitute a fee of 5/- in Clause 6 when the bill was being considered in Committee. In such case the many persons who possessed only one gun would benefit by the reduction by one-half of the fee which they were required to pay under the existing Ordinance.

The Honourable the Colonial Secretary also stated that in the Committee stage an amendment would be moved to Clause 11 to include in the exemptions from the provisions of the Ordinance firearms which were the property of members of the Defence Force Rifle Association and firearms kept for purposes of *bona fide* sale.

The Honourable the Treasurer seconded and the Bill was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 5 were agreed to.

On the reading of Clause 6 the Honourable the Colonial Secretary moved that the sum of five shillings be inserted as the annual fee for registration in the case of each gun or rifle in place of the sum of seven shillings and sixpence.

The Honourable G. J. Felton asked that a fee covering the registration of several firearms in the possession of one individual should be considered. He represented that it was the practice of station managers to keep a number of guns or rifles for use in connection with the work on their farms and that as the object of the measure was primarily registration and not revenue its purpose would be served if an inclusive fee were imposed in such cases.

The Honourable the Colonial Secretary stated that it was with the object of relieving the possessors of more than one gun or rifle, on similar representations being made by the Honourable L. W. H. Young, that the amendment had been brought forward.

On being put to the vote the amendment was carried, the Honourable G. J. Felton and the Honourable L. W. H. Young dissenting.

Clause 6 as amended was read as follows :

"On and after the first day of January, 1931, every person who has in his custody or possession any gun or rifle shall pay to the Colonial Treasurer in respect of every such gun or rifle the sum of five shillings for every calendar year or part thereof."

Clauses 7 to 10 were agreed to.

Clause 11 was amended to read as follows :

"Nothing in this Ordinance shall apply to or affect any person serving as a member of His Majesty's Regular or Volunteer forces or in the police force in respect of any firearm entrusted to or used by such person in such capacity, or shall apply to or affect any firearm which is the property of the Government, or is the property of any member of the Falkland Islands Defence Force Rifle Association and is certified by the Officer Commanding the Falkland Islands Defence Force as being used by such member for the sole purpose of target shooting or which is exposed for sale or is kept or imported for the purpose of sale by any person who is in the opinion of the Colonial Treasurer a *bona fide* dealer in firearms, provided that every firearm imported for sale shall be declared on importation."

Clause 12 was agreed to.

The following new clause was proposed and read a *first* time :

"This Ordinance shall apply also to the Dependencies provided that throughout this Ordinance wheresoever such application to the Dependencies is intended the words "Magistrate", South Georgia, or Magistrate South Shetlands" shall be substituted for the words "Colonial Treasurer".

On question put the clause was read a *second* time and added to the bill as clause 13.

The schedule was agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

6. On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Treasurer the Bill "to provide for the better control of Dogs in the Colony" was read a *first* time.

The Honourable the Colonial Secretary stated that the Bill had been brought forward as the result of representations made by the Honourable G. J. Felton and that it had the support of the Honourable W. H. Luxton. The measure was intended to protect ewes during the breeding season from attacks by dogs crossing the paddocks where the ewes were kept.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 3 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

7. On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Treasurer the Bill "to amend the Post Office Ordinance, 1898" was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 4 were agreed to.

The following new clause was read a *first* time.

"This Ordinance shall apply also to the Dependencies".

On question put the clause was read a *second* time and added to the Bill as Clause 5.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

	Net increase	...	<u>£30,768 : 19 : 11</u>

29. The principal increases were under item 5, Export duty on Whale and Seal Oil, item 6, Export duty on Guano and item 9, Whaling licences, which exceeded the original Estimate by £27,151 : 6 : 7, £1,617 : 3 : 1 and £1,600 respectively.

30. The Export duty received during the year on Whale and Seal Oil amounted to £107,151 : 6 : 7. It was £74,044 : 5 : 5 less than the amount received in the preceding year. This decrease was due to the reduction of the Export duty on Whale Oil from five shillings to two shillings per barrel.

31. The total Expenditure for the year excluding 'Charges on Dependencies Revenue' and disbursements made from the Research and Development Fund, amounted to £39,385 : 6 : 8. It was under that expended in 1928 by a sum of £82,717 : 10 : 3, but exceeded the original Estimate for 1929 by a sum of £14,771 : 6 : 8.

32. Excess Expenditure over the Estimate for 1929 was incurred under—

Head 2. "Other charges" ... ..	£15,645 : 11 : 8
--------------------------------	------------------

On the other hand savings amounting to £874 : 5 : 0 were effected under the following Heads, viz:—

3. Extraordinary ... ..	325 : 4 : 8	
	<hr/>	874 : 5 : 0
Net excess ... ..		<hr/> £14,771 : 6 : 8 <hr/>

33. Refunds of Export duty on Whale Oil made to Whaling Companies during the year amounted to £22,467 : 18 : 8, or £17,467 : 18 : 8 more than the amount originally estimated. This excess was due to the fact that certain refunds were made during the year in respect of Revenue received in 1928.

34. The total Expenditure in connection with the Dependencies for the year, exclusive of Refunds of Export duty, amounted to £16,917 : 8 : 0.

#### Dependencies Research and Development Fund.

**II. PUBLIC HEALTH.****(A) General Remarks.****(1) GENERAL DISEASES.**

During the year the general health of the people was good. The southern portion of the East Island in the spring-time was afflicted with a mild epidemic of measles. Apart from the usual colds, muscular rheumatism and appendicitis there is nothing extraordinary of note.

*Appendicitis.* 21 cases of appendicitis occurred during the year, and were all, except one treated medically, operated on with success. Two cases were gangrenous with abscess formation, one appendix contained threadworm, and others showed marked evidence of chronic, old standing inflammation.

The *Dental condition* of the population is improving markedly due to the activities of the Dental Surgeon in treating all the school children, and the camp populace as well as the people of the town of Stanley. The Dental Report is attached (Appendix I).

*Government Officials.* One invaliding, and no deaths occurred among the officials in residence during the year. Generally their health was good though there were some cases of minor illness. The severe climate, and the feeling of absolute confinement to Port Stanley, owing to the lack of facilities for leaving the town, even for a short period, give rise to neurasthenia, if it may be so described, among officials resident in Stanley. This is rarely experienced by those who live in the Camps. The leave and passage regulations, and the shortening of the tour cannot fail to alleviate this condition, and provide a more efficient service.

## (2) COMMUNICABLE DISEASES.

*Tuberculosis.* 12 cases came under treatment during the year. 3 were pulmonary in type and two terminated fatally. The localisation of the disease in other cases was in bone, joints, glands and peritoneum. The incidence in Stanley is undoubtedly very high as compared with the camps. The high proportion of bone, joint, glandular, and peritoneal lesions suggests bovine tubercle as playing no small or unimportant part in the origin of these cases.

*Bronchial Catarrh, Bronchitis and Broncho-pneumonia.* As in the past, in the dark wet winter months, a succession of colds swept over the inhabitants leaving their usual trail of bronchitis and broncho-pneumonia.

*Grave Epidemic Diseases.* No cases of grave epidemic disease occurred during the year. Small-pox would not now present a so serious menace, as numbers of the community in Stanley have been recently vaccinated. The Camp Medical Officers have rendered valuable aid in vaccination of people in the districts under their charge.

*Influenza.* No cases of influenza occurred in the Colony in 1929.

*Malaria.* Malaria and other insect-born diseases are unknown in the Colony.

*Scarlatina, Measles, Diphtheria, Whooping Cough, Chicken Pox, etc.* On two occasions cases of whooping cough landed in the Islands, but were promptly segregated and no further cases occurred.

*Measles.* In October, 1929, a case incubating measles landed in Stanley, and proceeded to south of East Island with the result that a mild epidemic of measles occurred there. There were no deaths. Quarantine measures were instituted all over the Islands immediately the outbreak was notified with the result that the rest of the Islands were not affected, with the exception of a few cases on two stations on the West Island and three cases in Port Stanley.

*Diphtheria.* It is considered that diphtheria might easily be imported, and the results to the community are as much to be dreaded as would those of small-pox. It is difficult to keep in stock a large quantity of fresh antitoxin, and it is not as yet practicable to immunise the community against diphtheria. This very grave problem is having serious attention.

*Venereal Disease.* Apart from cases from ships calling at the Islands no case of this disease has occurred. In fact venereal disease does not exist among the Islanders.

## (B) Vital Statistics.

(1) *General Population.* Practically all the Islanders as well as the Government Officials are Europeans or are of European descent.

The estimated population of the Colony exclusive of the Dependencies, on the 31st of December, 1929, was 2375.

During the year 57 births and 14 deaths are recorded, giving the following rates:-

Population	...	...	...	2375.
Birth Rate per 1000	...	...	...	24.00.
Death Rate per 1000	...	...	...	5.89.
Infantile Mortality Rate per 1000 births	...	...	...	17.5.

Registration of Births, Deaths, and Marriages is compulsory under Ordinance No. 12 of 1853.

(2) *Health of Government Officials.* The general health of the Government Officials was good throughout the year and there was no case of serious illness. One Official, a female was invalided to the United Kingdom soon after her arrival here as a case of boarder-line melancholia in no way attributable to her service in the Colony. There were no deaths.

### III. HYGIENE AND SANITATION.

#### (1) PREVENTIVE MEASURES.

(a) *Insect borne diseases* are absent. The only insect pest is the bluebottle, and hanging sheds of slaughter houses are screened against its attack and those of other flies. *Alysia Manducator* are being cultivated in the hope of destroying eventually the bluebottle.

(b) *Epidemic diseases*. From time to time people incubating infectious diseases have landed in the Colony, and this, in spite of all precautions with regard to the inspection of persons landing, ships' books, etc., is liable to happen. About 20 years ago diphtheria broke out in the East Island, fortunately, in an isolated camp house and though those affected died, the disease was limited to one household. It can easily be conceived, that, in spite of great vigilance, diphtheria may be introduced again, and in view of the fact that there are no premises for isolation purposes and but a scant supply of antitoxin in the Colony the results would be very serious indeed. Enquiries have been made with regard to immunisation of the populace with toxin-antitoxin, but it is not practicable, as yet, to ship toxin-antitoxin to the Falkland Islands.

During the past six years there have been epidemics of whooping cough, 1924, measles 1925, scarlet fever, influenza and mumps, glandular fever, 1926, and measles again in 1929. When these diseases arrive in the Colony, many persons are affected as there are often long intervals between epidemics. Whooping Cough had not been in the camps for 40 years prior to 1924, and measles, mumps, etc., had not affected the camp districts for a period of upwards of 15 years. Glandular fever prior to 1926 was unknown in the Colony.

*Small-pox and Vaccination*. Vaccination is compulsory under the Vaccination Ordinance, 1868, and during the year a large proportion of the community both in Stanley and in the camps were vaccinated or re-vaccinated.

(c) *Water borne diseases*. There are none in the Colony.

(d) *Tuberculosis*. Great efforts are being made to prevent the dissemination of this disease. Under a Government Housing Scheme private individuals are rapidly building suitable houses, and bad housing as a contributory factor will soon cease to exist.

The problem of tuberculous cattle is under consideration, and will be dealt with as rapidly as possible.

Health propaganda in the form of broadcast talks, and articles in the local newspaper "Penguin" on tuberculosis and how to keep healthy and fit, has been undertaken for some time, and by this means it is hoped to achieve much.

Provision has been made this year for increased recreational facilities in the form of a new gymnasium, and baths. The benefit of this measure to the populace is thought to be inestimable.

All manner of outdoor and indoor recreations are encouraged, and those responsible persons in authority set a splendid example by themselves taking a strenuous part in the exercises prescribed for the people. Golf, football, hockey, badminton, etc., are indulged in by many persons as well as local traditional sports such as riding, boating, and shooting. All these things cannot fail to improve the physical and mental condition of the people.

(e) *Helminthic Diseases*. With the exception of *Oxyuris* intestinal parasites do not occur. *Oxyuris* is common in children, and has not infrequently been found in the appendix giving rise to the classical symptoms of chronic appendicitis.

(f) *Venereal Disease*. This disease does not occur among the Islanders and measures for the segregation of any case which might occur would be promptly taken.

#### (2) GENERAL SANITATION.

(a) *Sewage Disposal*. The new houses are all being built with properly constructed drains to take sewage water, but many have to install earth closets as W.C's are still impracticable. Night soil is removed by special carts under control of the Public Works Department. This is not an entirely satisfactory service, and it is hoped with the contemplated extension of the water system, that gradually the E.C's will become replaced by W.C's. The present system is run as efficiently as possible under the circumstances.

(b) *Scavenging.* Ashes and household refuse are stored in ash-bins all of which are not, unfortunately, covered, nor are they emptied with sufficient frequency. The contents accumulate, and finally, when the bins are overflowing, are blown about by the constant winds. It would be of great public benefit if a standard type of metal ash-bin were introduced, and instead of haphazard emptying of ash-bins by the individual some controlled system were introduced.

(c) *Roads and Drainage.* The roads in the town are gradually improving, and in the lower reaches are very good, but on the higher levels, where the new houses are being built, roads do not exist, but are mere mud tracks, often more than knee deep in the winter. Also the drainage of the lower level of the town is of the highest order, but again, where the new houses are on the higher level, the house drains discharge on to the roads, or in to open ditches where all manner of filth remains stagnant. A further extension of roads would be a great benefit to the community, especially when it is considered that the district, where no proper roads or drains exist, is that in which most of the new houses are being erected.

(d) *Water Supply.* The present water supply is wholesome and satisfactory. It is pipe-borne and was introduced in 1927. This also fails to supply the upper levels of the town, and it would be a great boon to the new housing area if this water could be led to it.

(e) *Slaughterhouses and Meat Inspection.* Under the Slaughterhouse and Meat Inspection Regulations, 1929, slaughterhouses are licensed, and these are under the supervision of the Government Veterinary Officer and the Sanitary Inspector. As the present two slaughterhouses are not very satisfactory their owners are contemplating the erection of model slaughterhouses.

(f) *Dairies.* The milk supply of Stanley is extremely unsatisfactory. In truth, nowhere is milk produced in such filthy environment as the Stanley cow-sheds. It is considered that these milk supplies play no small part in local epidemics of sore throat, accompanied by vomiting, diarrhoea and skin rash, and also in the production of tuberculous lesions of bone glandular and peritoneal type. An endeavour is being made to provide the necessary laboratory facilities for the examination of milk samples under the Stanley Milk Supply Protection By-laws, 1929. It is evident, however, until milk retailers are obliged to construct proper dairies, and milk stores, this evil will continue to the detriment of the public health.

### (3) SCHOOL HYGIENE.

There are two schools in Stanley, the Government School with 148 children on the books, and St. Mary's School with 63 children. St. Mary's School is run by the Catholic Church but both schools are undenominational. Systematic, and frequent inspections of the schools, and school children are made by the Medical Officers, and the Colonial Dentist. Careful records of each child are kept on a special form. Appendix II.

The result of these inspections is satisfactory, and on no occasion in 1929 were any serious defects found. It must be kept in mind that the Medical Officers are also the regular Medical attendants of the Stanley families, and so it is very seldom that any serious or even slight childish ailment is not attended to without the necessity of school examination.

The Dental condition of the children is improving, and the Dental Surgeon sets one morning a week apart entirely for children's service. At all inspections the schools were found to be in a clean, well kept, ventilated and satisfactory condition. At the Government School the playground has been covered with cement to the great benefit of the pupils, and an alteration is to be made in the infants department so as to provide more satisfactory cloak-room accommodation.

### (4) HOUSING.

The people of Stanley fully realize the need for improved housing with the result that altogether within the last two years 32 houses have been erected. Most of the building has been done by private individuals with the assistance of Government loans on easy terms. It remains to make provision for the housing of indigent, and unfortunate persons who are not able to assist themselves on a model, hygienic, but plain scale.

It may be said with assurance that the housing problem is reaching rapidly a satisfactory solution. It only remains that satisfactory roads, drains and water supply be

provided in the areas where these houses are being erected. All houses erected are under the strict supervision of the Board of Health and consequently are well constructed and of a satisfactory type.

#### (5) DIET IN HEALTH AND DISEASE.

The diet of the people in Stanley is necessarily strictly limited in variety. Mutton is cheap and plentiful, and bread is always obtainable, thus distress for lack of food is rarely in evidence. There the matter ends, however, for variety, unless procurable in tins, there is none. During the past two summers, owing to the constant cold and wet, vegetable crops have been a complete failure. The soil is not suitable for the cultivation of vegetables unless heavily limed, and the plots sheltered from the incessant summer winds which destroy all vegetation. Fish, butter, poultry and vegetables are on the whole scarce, and very difficult to obtain in Stanley though of course, in the camps conditions are better. There are no satisfactory means of varying the diet of children, and also the lime deficiency in the soil is a matter which seriously hinders the proper growth and development of the children.

#### (6) ANTI-RAT CAMPAIGN.

A continuous warfare against rats in the various town dumps is waged by the Sanitary Inspector. Also systematic rat weeks have been organised and the public have been invited to co-operate. The number of rats has been considerably reduced. Owners and occupiers of premises are obliged under the Extermination of Rats and Mice Bye-laws, 1929, to take measures to exterminate these pests. The broadcast system, and the daily newspaper "Penguin" have been utilised for propaganda purposes, and organisation of rat weeks. Bi-annual rat weeks are proposed in the future.

#### (7) RECOMMENDATIONS FOR FUTURE WORK.

- (i) Improved drainage, roads and water supply to the new housing areas.
- (ii) Close supervision of dairies and slaughterhouses, and enforcement of the bye-laws.
- (iii) Continuance of the bi-annual rat week.
- (iv) Continuance of close dental supervision of the school children.
- (v) Continuance of health propaganda by means of broadcasting, and publications in the newspaper "Penguin."
- (vi) An improved system of scavenging.

### IV. PORT HEALTH WORK AND ADMINISTRATION.

46 vessels with registered tonnage of 76,791 and with crews totalling 2,119 were given pratique during the year. No quarantinable diseases were reported. Again the ease with which any person incubating an infectious disease may land in the Colony is emphasised.

### V. MATERNITY AND CHILD WELFARE.

14 maternity cases were treated in the hospital and nine in the district during the year. All cases were brought to successful issue. One case of abortion was also treated in the hospital. The charge for maternity cases in the hospital is two pounds. This cheap rate is a great boon to the working classes, and maternity patients readily apply for admission to hospital. The outpatient clinic provides all the necessary anti and post natal services of a modern maternity and child welfare clinic.

### VI. HOSPITAL.

The King Edward Memorial Hospital, first opened in 1914 to receive the wounded from the battle of the Falkland Islands, has two general, one maternity, and two private wards comprising 12 beds, outpatient department and dispensary, operating theatre, office and stores, and quarters for two nurses.

Two outside buildings provide (1) Rock Cottage, accommodation for the Dental Surgeon's Clinic and necessary offices and accommodation for three pensioners. (2) The drug store, and the former clerk's office is in process of being converted into a laboratory. The Clerk is now accommodated in the hospital office.

107 inpatients were treated during the year. Of these 94 were cured, 7 relieved and 6 were not improved. There were no deaths. 40 operations, exclusive of dental and out-patient operations, were performed, and 35 of these were major operations, and in all cases the results were satisfactory. The people are good surgical subjects, and the cold climate lends itself to the healing of wounds without sepsis of any important degree. The number of dental inpatient operations under general anaesthesia was 24. The efficient administration of anaesthetics was carried out by the Medical Officer Dr. W. B. R. Jones with the exception of a few cases where the anaesthetic was administered by the Colonial Dental Surgeon, Mr. J. M. Coutts, M.M., L.D.S.

During the year the Hospital was reconditioned and its equipment brought up-to-date. During the reconditioning period the staff contrived to keep one or two wards open all the time. All walls, ceilings and passages were lined and painted a pleasing, restful shade of green, and the hospital generally presents a very smart appearance. Also the roof and outside walls were repainted.

The new improvements are:-

- (i) Installation of electric lighting throughout the hospital.
- (ii) Rearrangement of wards and dispensary which permits of more efficient working.
- (iii) Reorganisation of office methods and equipment.
- (iv) Conversion of Clerk's office into a laboratory.

The new equipment procured for the hospital in 1929 comprises a new operating table, trolley for patients, X-Ray apparatus, artificial sunlight lamp, new electric batteries for the theatre main light, and a rectifier for charging them off the main, thus providing the theatre with a light independent of the main supply, and other sundry instruments. For the laboratory an incubator, centrifuge and sundry glassware articles were obtained. A few instruments and additional articles for the laboratory remain to be provided. To sum up, the hospital is now as a modern hospital, where all manner of medical, surgical, maternity and health work is undertaken, should be.

The provision of quarters for the sisters apart from the main hospital building would be a great advantage and would also release more ward space for patients.

*Outpatient Department* The recorded number of patients treated in the out-patient department was 1173, and the total number of attendances 2347. The increased number of outpatients is due in part to the large proportion of the population vaccinated at the hospital, and to the popularity of the treatment of varicose veins by the injection method.

## VII. PRISONS AND ASYLUMS.

The prisons was regularly inspected, and found always in a satisfactory condition.

There is accommodation for 15 prisoners, but at no time during the year have more than two persons been incarcerated at once. One prisoner serving a two years' sentence developed congestion of the lungs and was removed to hospital where he recovered, but otherwise the health of the prisoners was good.

There are no asylums in the Colony and no lunatics were under supervision during the year.

## VIII. METEOROLOGY.

The Falkland Islands lie in the South Atlantic 300 miles East of the Straits of Magellan in Latitude 51°43 s. and Longitude 57°51 w. (Stanley.)

The climate of the Falkland Islands has often been likened to that of Scotland, but actually there is little resemblance. The winter of 1929 was comparatively mild, but the summer one of the worst known. The constant cold winds blowing with a mean force of 4.1 renders life in these Islands very trying. Wide ranges of temperature and wind force are met with during the course of every day, and the meteorological records do not give a true

index of the climate.

The meteorological returns are appended. (Table II.) The mean temperature at Stanley was  $41.5^{\circ}$  in 1929, and  $48.8^{\circ}$  in 1928, the maximum was  $65^{\circ}$  (January and February) in 1929, and  $66^{\circ}$  in 1928, and the minimum  $17^{\circ}$  (July) in 1929, and  $17^{\circ}$  in 1928. The total rainfall was 33.84 inches in 1929, and 21.92 inches in 1928, 222 days being wet, and a clear sky recorded on 34 days. The mean force of the wind was 4.1 and 8 calm days were recorded. The prevailing winds were W. to N.W.

### IX. SCIENTIFIC.

The new Phillips Metalix portable X-Ray has proved a great success, and many excellent results have been obtained, and this apparatus renders invaluable assistance in the diagnosis of tuberculous lesions of bone. Gradually a laboratory on a small scale is being established, and it is hoped that the laboratory will be of a great assistance in the control of milk supplies and also routine clinical pathological examinations will be carried out there.

The chemical analysis of Stanley water is shown in Appendix III.

### B. DEPENDENCIES.

The Dependencies include South Georgia, South Shetlands and South Orkney Islands. On these Islands the great whaling fleet has its bases. The population is a floating one of chiefly Norwegian nationality, and is composed of whalers and factory workers. The population of South Georgia during the fishing season is estimated at 1,000. There are also in residence a Magistrate and a few other permanent British Officials. The whaling fleet provides its own Medical Officers and maintains its own drugs and equipment. There is no Medical staff or dispensary under the control of the Government.

The climate is rigorous, but health conditions are good.

There are no detailed Medical or Sanitary reports for that area.

This is a very pure sample of water, the solid matter in solution being very low. The undesirable feature is the quantity of ammonia which indicates contamination by organic matter. It is impossible to indicate the derivation of this organic matter without knowing something of the conditions under which it had been collected and stored.

---

NOTE. The sample of water referred to was sent to England before the gathering ground was fenced off and before any filtering medium was used. The organic contamination indicated by the high Ammonia content was found to be due to carcasses of dead sheep, an accident which has been precluded from repetition through fencing. Since then a sample has been analysed in Capetown through the courtesy of the scientists of the R.R.S. "Discovery" and the water was reported to be of a very pure quality.

## LEGISLATIVE COUNCIL.

### Minutes of meeting held on the 7th October, 1930.

1. The Council on assembly passed, standing in solemn silence, the following resolution relating to the wreck in France on the 4th of the October, 1930, of His Majesty's Airship R. 101 on her maiden voyage to India.

"This Council desires to place on record its deep sympathy with the victims and their relatives, and also with the Imperial Government on the irreparable loss of such tried and valued servants."

2. The minutes of the meeting held on the 30th of May, 1930, were confirmed.

3. The Honourable the Colonial Secretary, by command laid on the table the following papers :

Regulations, entitled "The Rifles Regulations, 1930" made under the Defence Force Ordinance, 1920, at a meeting of the Executive Council held on the 27th of May, 1930.

Order of His Excellency the Governor in Council fixing the rates of postage in force in the Colony, made at a meeting of the Executive Council held on the 3rd of October, 1930.

Regulations passed at a meeting of the Executive Council held on the 3rd of October, 1930, amending Section 5 of the Pensions Regulations, 1928.

Copies of despatches received from the Secretary of State for the Colonies, intimating the non-disallowance by His Majesty of Ordinances Nos. 1, 2, 3, 6 and 7 of 1930.

4. The Honourable the Treasurer, by command, laid on the table the following papers :

Comparative Statements of the Revenue and Expenditure of the Colony and the Dependencies for the periods 1st January to 31st March, 1930 and 1st January to 30th June, 1930.

Schedule of unforeseen expenditure incurred during the quarters ended the 31st of March, 1930 and the 30th of June, 1930.

Estimate of the sum required from the Falkland Islands Dependencies' Research and Development Fund for the Service of the "Discovery" Expedition for the year 1930.

5. The Honourable the Colonial Secretary moved, and the Honourable the Treasurer seconded, the adoption of the following resolution :

"Be it resolved that under the provisions of the Stanley Rating Ordinance, 1928, this Council hereby sanctions the following rate to be charged for the year 1931 on house property in the Town of Stanley, namely, One Shilling and Nine Pence for every Twenty Shillings of the annual value of such house property."

The resolution was adopted.

6. The Honourable the Colonial Secretary moved, and the Honourable the Treasurer seconded, the adoption of the following resolution :

"Whereas further provision is required for the service of the Colony and its Dependencies for the year ending the 31st of December, 1930."

"Be it resolved -

"This Council hereby sanctions the expenditure from public funds of the sum of Five thousand, Seven hundred and Sixty-nine Pounds, Thirteen shillings and Eight pence (£5,769. 13s. 8d.) to meet the several charges itemized in the accompanying schedule."

The resolution was adopted.

7. The Honourable L. W. H. Young moved the adoption of the following resolution :

"This Council resolves that a vote of warm congratulation and appreciation be conveyed to the Captain and the members of the Colony's Team on the occasion of their notable achievement in winning the Junior Kolapore Cup Competition at Bisley, 1930."

Mr. Young said that he thought it a great thing for the Colony that the Cup had been won and he wished also most heartily to congratulate His Excellency to whose efforts alone the Colony's participation in this Competition had been due and who had seen the object he had worked for reach fruition sooner than most of them saw their ambitions accomplished. He suggested that arrangements should be made to give the team, who would shortly return to the Colony, the exceptional welcome they so warmly deserved.

In seconding the resolution the Honourable the Colonial Secretary expressed the wish to add his personal congratulations to His Excellency.

His Excellency said he felt deeply grateful to the Honourable L. W. H. Young and the Honourable J. M. Ellis for their touching remarks. It was a unique occasion in the history of the Colony and arrangements would be made to mark it by giving the team a fitting welcome.

The Resolution was carried unanimously.

8. In moving the introduction and first reading of the Bill "To provide for the service of the year 1931," the Honourable the Colonial Secretary said that he would confine his remarks to general observations on the Colony's financial position, leaving details for consideration when the Council was in Committee. It was anticipated that at the end of the current year the balance of the Colony's General Account would amount to £23,500 in addition to the Reserve Fund of £10,000, opened during the year, making in all a surplus of £33,500, as against £31,113 at the beginning of the year. In other words, notwithstanding the relatively heavy expenditure which on revision it was estimated would amount to over £44,000 chargeable to revenue, they would have paid their way, carried out a very large programme of public works of a capital nature at the cost of nearly £14,000, and added over £2,000 to their accumulated funds. Turning to the Estimates for 1931, Honourable Members would see that the revenue from ordinary sources was estimated at £60,000 as against an expenditure on recurrent services of £38,000 and on extraordinary public works of £11,000 leaving a surplus of £11,000 to be carried to the Colony's General Account. In the matter of the details of the expenditure the steady decrease that was being effected from year to year would be noted with satisfaction. In 1929 actual payments under recurrent or maintenance heads amounted to £46,000, as compared with the revised estimate for 1930 of just under £41,000. In 1931 the estimate was put at £37,951 and it was anticipated that as the result of the economy being practised a still further decrease would be effected in 1932, when the cost of the recurrent services should stand at £37,000 approximately.

Commenting on the Honourable the Colonial Secretary's speech, His Excellency said that he was sure Honourable Members would agree that the policy the Government was adopting was in the very best interests of the Colony. By the strict control that was being kept over the finances they were eliminating all unnecessary expenditure and at the same time spending money on works and services that were essential. He pointed out in spite of the fact that the salaries of Civil Servants had been considerably increased, that very generous leave conditions had been introduced with free passages for a Civil Servant, his wife and two children that electric lighting and broadcasting had been instituted, that the housing problem had been solved both for officials and the public, and that new public baths and a gymnasium had been built, etc., the recurrent expenditure of the Colony was £18,000 less than three years ago.

In concluding His Excellency said he wished to record his gratitude to Heads of Departments and other Officials for the very loyal way they had helped in the scheme of re-organisation.

The Honourable L. W. H. Young said that he had listened to His Excellency's remarks with great interest. He had examined the figures of revenue and expenditure over a number of years and he felt he must publicly express his appreciation of what he had found. In 1927 there was a surplus of £2,400: the next year £3,700 and again in the following year (1929) £14,000, due partly to the exceptional revenue derived from the new

issue of postage stamps. During the current year it was estimated there would be a surplus of £9,000, while next year the estimate provided for £18,000. It was a position of which the Chairman of any company might be proud. The estimate of assets at the end of the year was placed at £265,000. The expenditure was coming down and the bank deposits were going up. He did not think there was anywhere else in the world where a balance sheet could be shown like the one before them and he took the opportunity of expressing his appreciation of this state of affairs.

The Honourable the Treasurer seconded and the Bill was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

On motion made the consideration of Clause 2 was postponed until after consideration of the Schedule.

Commenting on the expenditure under Head XII 'Medical' the Honourable the Colonial Secretary said that despite the additional services rendered by the Medical Department and despite the new charges that had been added, it had been found possible by the exercise of extreme economy and efficiency to reduce the expenditure by £119 and he was glad to take the opportunity of paying a warm tribute to the Principal Medical Officer and to the Matron of the Hospital for their devoted and capable work. His Excellency observed that notwithstanding the provision for the grant of £200 to the West Falkland Farmers' Medical Association, inserted under this Head for the first time, the total expenditure under the Head had been reduced.

Referring to Heads XIX. 'Public Works' and XX. 'Public Works Recurrent' the Honourable the Colonial Secretary drew attention to the fact that the expenditure was placed at £4,097 and £5,355 as against £4,720 and £5,655 in the Estimates for 1930. He said that this might be taken as an outstanding example of the satisfactory budgeting to which Mr. Young had referred. His Excellency emphasized the importance of this Department as affecting the health and general welfare of the people and stated that in a Colony like this where it was extremely difficult to carry out works of any magnitude, Mr. Roberts by his economical management had saved his salary again and again.

The schedule was agreed to.

Clause 2 was recommitted and agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

His Excellency stated that he was sure it was the wish of Honourable Members that their appreciation of the work of the Honourable J. M. Ellis and the Honourable M. C. Craigie-Halkett in connection with the Estimates should be recorded. The Honourable L. W. H. Young stated that he should like to express his personal appreciation.

9. On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Treasurer the "Bill to amend the Tariff Ordinance, 1930, as amended by the Tariff (Export Duties) Amendment Ordinances, 1923 and 1924" was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1, 2 and 3 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

10. The Honourable the Colonial Secretary moved the introduction and *first* reading of the "Bill to amend the Merchant Shipping Ordinance, 1909, as amended by the Merchant Shipping (Amendment) Ordinance, 1927." He stated that, as Honourable Members would see, the object of the Bill was to extend the limits within which vessels might trade as 'home-trade' vessels to include ports on the River Plate. The Honourable L. W. H. Young in seconding the motion stated that an important effect of the measure would be to enable local seamen to take responsible positions on board vessels engaged in local trade.

On further motion made and seconded the standing orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 and 2 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

11. In moving the introduction and first reading of the Bill "To make provision with respect to the Currency Notes of the Colony of the Falkland Islands, and to place the issue of such Currency Notes upon a permanent basis, "the Honourable the Colonial Secretary stated that the Bill would bring the present system as regards the issue of Currency Notes into line with that in force in other Colonies, for example in Cyprus. One of the principal advantages of the new system was that it would no longer be necessary to maintain a coin reserve and the sum of £8,000 at present kept in the Colony for that purpose would be released for investment.

The Honourable the Treasurer seconded and the Bill was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 15 inclusive were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

12. The Honourable the Colonial Secretary announced that Mr. John Hamilton of Weddell Island had generously given the Government the sum of £1,000 to be expended on some public purpose. Mr. Hamilton had asked that part of the money should be expended on the erection of a beacon light on the south-west or westerly corner of West Falkland Island and the practicability of such a light was being explored. Mr. Hamilton's offer was gratefully accepted by the Council.

13. In referring to the Honourable L. W. H. Young's proposed visit to the United Kingdom, His Excellency said that on behalf of Honourable Members he should like to take the opportunity of placing on record their high appreciation of Mr. Young's services on the Council and of wishing him a pleasant sojourn and a safe return. Mr Young suitably responded.

Government Notice.

No. 78.

Colonial Secretary's Office,  
Stanley, Falkland Islands.  
12th December, 1930.

His Excellency the Governor directs the publication, for general information, of the following Reports, issued by the National Rifle Association, of the Junior Kolapore and the Junior Mackinnon (The "Barnett") Matches fired at Bisley during the Imperial Meeting in July, 1930.

*By Command,*  
J. M. ELLIS,  
*Colonial Secretary.*

## THE NATIONAL RIFLE ASSOCIATION'S 67TH ANNUAL PRIZE MEETING.

**Reports on the Junior Kolapore and the Junior Mackinnon  
(The "Barnett") Matches.**

The Junior Kolapore Match instituted by the National Rifle Association in 1926 with the approval of the Secretary of State for the Colonies, and the very kind assistance of the Colonial Office, enabled the smaller countries of the Empire which find it impossible to send teams of eight to compete in "The Raja of Kolapore's Challenge Cup" to be represented at the Imperial Meeting at Bisley.

The Match was open to one officially accredited team of four past or present members of His Majesty's Forces or the Forces of any British Protected State, resident in, and qualified to represent any part of the British Empire or any territory under a condominium shared by Great Britain or any group of such parts other than Great Britain and Northern Ireland, the Indian Empire, the Dominion and Provinces of Canada, the Commonwealth and States of Australia, the Dominion of New Zealand, the Union of South Africa and its Provinces, the Irish Free State, and any dependencies of those Dominions or territories administered by them under mandate.

The Directors of the London *Morning Post* most generously presented a handsome Silver Challenge Trophy to be held for the year by such person representing the winning country as the Bisley Committee may direct, and also give embroidered badges to the members of the competing teams. Special Commemorative Souvenirs were presented by the N.R.A. to each member of the winning team.

A Challenge Trophy has also been presented by Commander Sir Lionel Fletcher, C.B.E., R.N.R., for a competition at 300 and 600 yards open only to competitors who are qualified to shoot in the Junior Kolapore Match in the current year, the Trophy to become the property of the competitor who wins it on any three occasions.

The Match was fired at Bisley on 14th July under the same conditions as those of the "Raja of Kolapore's Imperial Challenge Trophy," viz.:—

Distance	...	...	...	...	300, 500 and 600 yards (aggregate).	
Targets	...	...	...	...	Bisley, 1929.	
Rifles	...	...	...	...	S.M.L.E. (S.R. a. b.).	
No. of Shots	...	...	...	...	Ten and one sighting	} At each distance.
					shot per man.	
Time Limit	...	...	...	...	One hour	

The following countries took part in the Match :—

Falkland Islands	Straits Settlements
Federated Malay States	Sudan
Gold Coast	Trinidad
Nigeria	

as against three in 1926, six in 1927, ten in 1928, and eleven in 1929.

The absence of teams from Ceylon, Kenya, Nyasaland, Tanganyika, and Uganda is regretted.

The National Rifle Association is greatly indebted to the Secretary of State for the Colonies for the interest taken in the Match and the assistance so kindly afforded by the Colonial Office. It is hoped that as the competition becomes more widely known it may be the means of further stimulating marksmanship throughout His Majesty's Colonies and Protectorates and lead to a wider representation at the Imperial Rifle Meeting, also that, should the number of entries continue to increase, opportunity will be taken to enter teams to represent groups of Colonies, Protectorates, and Dependencies sanctioned by the Council of the National Rifle Association to compete in the "Kolapore" and the "Mackinnon" Matches, viz., the "Far East," "East Africa," "West Africa," and the West Indies.

The Challenge Trophy was won by the Falkland Islands with the aggregate score of 516 out of a highest possible score of 600; the Nigerian Team taking second place with a score of 514 marks.

### Junior Mackinnon Match.

The Junior Mackinnon (the "Barnett") Imperial Challenge Cup Match, a long-range competition instituted in 1929, open to teams of four past and present members of His Majesty's Forces or the Forces of any British Protected State qualified to compete in the "Junior Kolapore Match," was shot at Bisley on the 17th July, 1930, under the following conditions :—

Distance	...	...	...	900 and 1,000 yards (aggregate).	
Rifles	...	...	...	S.M.L.E. (S.R. a. b.).	
No. of Shots	...	...	...	Ten and one sighting	} At each distance.
				shot per man.	
Time limit	...	...	...	1½ hours.	

Major Sir Richard Barnett has very kindly presented a Challenge Trophy to be held for one year by the Representative of the winning country, and special Commemorative Souvenirs are given by the National Rifle Association to each member of the winning team. The "Barnett" Challenge Trophy was won by Trinidad with the aggregate score of 346 out of a possible 400 marks. In 1929 the trophy was won by Nyasaland with the score of 330.

The scores in detail of the competing teams in the two Matches are appended hereto.

## II. PUBLIC HEALTH.

### (A) General Remarks.

#### (1) GENERAL DISEASES.

The general health of the populace, during 1930, was good. Apart from the usual outbreaks of "colds" there is nothing to note. There were no epidemics during the year.

*Government Officials.* No deaths occurred during the year. The health of the officials generally has been good, though some show evidence of nervous strain occasionally, and one was sent on leave a short time before his leave was due in order to obviate a complete breakdown.

*Appendicitis.* 10 cases came to operation during the year. One case showed rupture of the appendix with generalized peritonitis, and one rupture with localised peritonitis. Two cases operated on were associated with pregnancy of 3, and 4 months duration, respectively. In neither case did any complication such as abortion supervene.

The *Dental condition* of the population, owing to the assiduous care of the Dental Surgeon, continues to improve. The care of the teeth of all Stanley school children, and most of those who live in the camps, is supervised by the Dental Surgeon. The Dental Report is attached (Appendix I).

#### (2) COMMUNICABLE DISEASES.

*Tuberculosis.* Four new cases were notified during the year. The localisation of the disease in these cases was as follows, two pulmonary, and two abdominal.

*Bronchitis, Broncho-pneumonia and Bronchial Catarrh.* The usual "colds" were prevalent during the winter months, but owing to the fact that there was more frost, and less rain bronchial complications were not so common as during the previous winter.

*Grave Epidemic Disease.* No cases of grave epidemic disease occurred. The majority of the population are now vaccinated against smallpox.

*Malaria.* Malaria, and other insect borne diseases are unknown in the Colony.

*Influenza, measles, diphtheria, scarletina, whooping cough.* No cases occurred during the year.

*Chicken-pox.* Seven cases occurred over a period from July to December, 1930.

*Venereal Disease.* No venereal disease exists among the Islanders. All proper precautions are taken against venereal disease being landed in the Colony.

### (B) Vital Statistics.

(1) *General Population.* Practically all the Islanders, as well as the Government Officials, are of European descent, or are Europeans.

The estimated population of the Colony, exclusive of the Dependencies on the 31st December, 1930, was 2396.

During the year 54 births, and 20 deaths are recorded, giving the following rates:—

Population	...	...	...	...	2396.
Birth Rate per 1000	...	...	...	...	22.73.
Death Rate per 1000	...	...	...	...	8.42.
Infantile Mortality Rate per 1000 births	...	...	...	...	18.5.

Registration of Births, Deaths, and Marriages is compulsory under Ordinance No. 12 of 1853.

(2) *Health of Government Officials.* The general health of the officials has been good. There were no deaths.

### III. HYGIENE AND SANITATION.

#### (1) PREVENTIVE MEASURES.

(a) *Insect borne diseases* are absent. It has been noted that owing to two consecutive bad summers, followed by a severe winter, the blue bottle pest has diminished markedly.

(b) *Epidemic disease*. There were no epidemics during the year. A few isolated cases of chicken pox occurred over a period of five months.

*Small-pox and Vaccination*. Vaccination is compulsory under the Vaccination Ordinance 1868. Most of the children have been vaccinated within the last two years, and the necessity for vaccination is emphasised during the school medical inspections, where defaulters are discovered, and vaccinated.

(c) *Water borne diseases*. None.

(d) *Tuberculosis*. Four new cases were notified during the year. Two pulmonary, and two abdominal. It does not appear that the case incidence of this disease is increasing, or, at least, not rapidly. It is hoped that with modern housing, and sanitary conditions much may be done to arrest the progress of tuberculosis among the Islanders. Modern hygiene may do much, but it is difficult to see how the factors of heredity, and inter-marriage are to be combated. In the Falklands the heredity factor can be demonstrated in nearly every case of tuberculosis which arises, and can be traced in some families through three or four generations.

(e) *Helminthic Diseases*. Oxyuris is common among children in Stanley, and occasional cases occur in the Camps, but apart from this, intestinal parasites are unknown.

(f) *Venereal Disease*. Venereal disease is non-existent among the Islanders.

#### (2) GENERAL SANITATION.

(a) *Sewage Disposal*. Part of the town has a water carriage system of sewage disposal. The night-soil from E.C.'s. is removed by special carts under the control of the Public Works Department. The sewers in the town are gradually being extended, and in course of time, in all probability, the major portion of the town of Stanley will have a proper water carriage system of sewage disposal.

(b) *Scavenging*. Ashes and household refuse are stored in ashbins. Under the bye-laws these ashbins have to be emptied once a month. Often, in winter, it is impossible to comply with the bye-laws in this respect, and householders have to wait until the roads are passable in Spring to empty their ashbins.

(c) *Roads and Drainage*. The roads are being improved, and during the year a road was constructed, and a sewer laid down, through part of the new housing area. This is a great boon to the inhabitants of that area.

(d) *Water Supply*. The water supply is wholesome, and satisfactory except in its extent. An extension to the upper regions of the town is being planned.

(e) *Slaughterhouse and Meat Inspection*. A new slaughterhouse has been built to the east of the town to the requirements of the Board of Health. One of the two existing slaughterhouses has been improved, and improvements to the other are contemplated.

(f) *Dairies*. During the year milk samples were frequently seized, and analysed. This caused a distinct improvement in the milk retailed as regards gross filth. In one or two instances only have attempts been made to improve cow-sheds, etc., but this is a beginning, and an example which may be followed.

#### (3) SCHOOL HYGIENE.

The Medical Officers, and the Colonial Dentist inspected the Government School, and St. Mary's School attached to the Catholic Church, regularly. Inspection of each child is recorded on a special form (Appendix II).

It is gratifying to note a continuous improvement in these children especially in the matter of caring for their teeth. Instruction in physical exercises is given regularly, and great benefit is expected to accrue to the children, when they have the use of the new gymnasium, for physical culture. The hygienic condition of the schools was always found to be satisfactory.

#### (4) HOUSING.

The housing of the people in Stanley is most satisfactory. With the aid of a government grant nearly everyone who wished to do so has built himself a new house. In order to provide for those unable to build, the Government has nearly completed two blocks of four, four-room houses which will adequately provide for those whose housing conditions are not satisfactory.

The official quarters are now adequate in quality, and quantity.

All houses are erected under the supervision of the Board of Health, and it is considered that the housing problem, unless there is a great influx of population, is settled in a satisfactory manner.

#### (5) DIET IN HEALTH AND DISEASE.

It remains only to repeat that the food problem is never one of quantity, and the quality of what is available is excellent, but nevertheless the diet is ill balanced. This is, no doubt, the reason for the high proportion of dental disease and appendicitis. Over a number of years it has not been the experience to find a single case of chronic appendicitis with good teeth.

Gardens are cultivated, but not sufficient attention is devoted to the cultivation, and eating of green vegetables. The necessity for adding lime to the soil must be reiterated. Fruit is not grown in the Islands, and the supply is irregular, and inadequate, and the loss on importation inflates the retail price.

#### (6) ANTI-RAT CAMPAIGN.

Frequent attacks have been made on rats in the town rubbish dumps on the foreshore chiefly by means of poison baits. Rat weeks are bi-annual. The public is invited to co-operate, but though this movement is chiefly in the public interest little enthusiasm has been displayed in the matter of helping to reduce these pests. Owners, and occupiers of premises are obliged under the Extermination of Rats and Mice Bye-Laws, 1929, to take measures to exterminate rats and mice.

#### (7) RECOMMENDATIONS FOR FUTURE WORK.

- (i) Continuance of improvements of roads, drainage, and water supply.
- (ii) Close supervision of slaughterhouses, and dairies.
- (iii) Continuance of bi-annual rat week.
- (iv) Continuance of dental supervision of school children.

### IV. PORT HEALTH WORK AND ADMINISTRATION.

36 vessels, with a registered tonnage of 76,808, and with crews totaling 2,012 were given pratique during the year. It was not found necessary to quarantine any vessel calling at the port.

### V. MATERNITY AND CHILD WELFARE.

20 labours were conducted in the hospital, and 5 in the district. There were no serious complications among the cases attended by the hospital staff.

In addition one case of mild puereral fever was successfully treated. In one case abortion was induced, and in another case, associated with pernicious vomiting, labour was induced. Ante-natal, and child welfare services are provided, and the increasing number of patients indicate that these services are appreciated.

## VI. HOSPITAL.

The King Edward VII. Memorial Hospital comprises 12 beds, outpatient department, operating theatre, office, stores, and quarters for nurses.

Two outside buildings provide (a) Dental Surgeon's Office, and workshop, quarters for 2 pensioners, junior nurses, and maids, (b) drug store, and laboratory.

143 inpatients were treated during the year. Of these 119 were cured, 21 were relieved, one not improved, and three died. 27 surgical operations were performed with good results, and no deaths.

The deaths were due to, one phthisis, one shock and haemorrhage from amputation of arm at shoulder joint by machinery, and one to carcinoma of the rectum with metastasis.

No alterations were made in the hospital during the year.

It would be a considerable advantage to all concerned if arrangements could be made to provide a labour ward separate from the lying-in ward. At present all labours have to be conducted in the ward which is not to the advantage of the staff nor of those patients who await, or have just undergone the ordeal. Such an arrangement would necessitate quarters for the nurses outside the hospital, and thus also would be of great benefit both to patients, and staff.

*Outpatient Department.* The number of patients treated in the outpatient department was recorded as 862, the total number of attendances being 1,743.

Minor operations, and the injection of varicose veins, etc., are performed in the outpatient department.

## VII. PRISONS AND ASYLUMS.

There are no asylums in the Colony, and no lunatics were under supervision during the year.

The prison, which has accommodation for 15, was regularly inspected, and found always to be in a clean, and satisfactory state. The health of two prisoners who were incarcerated in the first half of the year was uniformly good.

## VIII. METEOROLOGY.

The Falkland Islands occupy a position 300 miles East of the South American Mainland in Latitude 51°43 s. and Longitude 57°51 w.

These latitudes are known as the "furious fifties" in seafaring circles, and it may be taken that the Falklands are a place of warring elements. The climate is cold and rigorous, and the Islands are beset constantly, by strong winds which blow from all quarters of the compass. The early portion of 1930 was very wet, and was followed by a winter of snow, and continuous frost. The later part of 1930 produced, for the Falklands, fine weather. The meteorological returns are appended. (Table II).

## IX. SCIENTIFIC.

The Phillips Metalix portable X-Ray apparatus continues to give good results.

The laboratory is well equipped, and is used both by the Veterinary Officer, and the Medical Department.

The chemical analysis of Stanley water is shown in Appendix III.

## B. DEPENDENCIES.

No health reports are available from the Dependencies - South Georgia, South Shetlands, South Orkneys, and Graham's Land.

The whaling factories in these regions maintain their own medical organization, and this is, as far as is known, a satisfactory arrangement. Health conditions in the Dependencies are good. The population in the summer is estimated to be approximately 1,000.

APPENDIX I.

Colonial Dental Surgery,  
Stanley.  
25th March, 1931.

Dental Report for 1930.

Sir,

During January and February, I visited Port Howard, Port Stephens, Fox Bay, and Chartres, but had not time for a tour of the East Island.

From March to October I was absent from the Colony on vacation and study leave.

The Dental health of the Colony has never been better especially that of the children.

The importation of fruit to the Colony has made a great difference to the quality of the teeth. As I have stated in previous reports the people of the Falklands live on an ill-balanced diet.

The following is the work done :—

<u>CHILDREN.</u>	Attendances.	Extractions.	Fillings.	Dentures.	Other Work.
Stanley ...	186	75	140	—	41
Camp ...	65	69	58	—	22
	251	144	198	—	63
<u>GOVERNMENT SERVANTS.</u>	243	192	234	11	86

I have lately been experimenting with Lime Foods on children and I find an improvement especially in the density and hardness of the enamel. These foods which are administered in tabloid form contain the Lactate of Calcium and Sodium.

As the results promise to be good, I shall increase the number of children, and shall also recommend it to Expectant Mothers.

Cod Liver Oil was tried some time ago with negative results.

During the year there were 41 Dental Operations, the anaesthetics being administered by the Principal Medical Officer.

*Dental Surgeon.*

This is a very pure sample of water, the solid matter in solution being very low. The undesirable feature is the quantity of ammonia which indicates contamination by organic matter. It is impossible to indicate the derivation of this organic matter without knowing something of the conditions under which it had been collected and stored.

---

NOTE. The sample of water referred to was sent to England before the gathering ground was fenced off and before any filtering medium was used. The organic contamination indicated by the high Ammonia content was found to be due to carcasses of dead sheep, an accident which has been precluded from repetition through fencing. Since then a sample has been analysed in Capetown through the courtesy of the scientists of the R.R.S. "Discovery" and the water was reported to be of a very pure quality.

5. The Surplus Balances of the Falkland Islands on the 31st December 1927 amounted to £238,155 : 15 : 6, and on the 31st December 1930 to £269,239 : 4 : 10, as shewn below, or an increase in the three years of £31,083 : 9 : 4.

### Revenue.

6. The Ordinary Revenue for the year, including the Dependencies share of the cost of Central Administration (£9,000) amounted to £62,094 : 12 : 1. It was £4555 : 7 : 7 less than that collected in 1929, but exceeded the original Estimate for 1930 by a sum of £5,951 : 12 : 1.

7. The total Revenue for the year, including Land Sales and Reserve Fund, amounted to £82,812 : 3 : 10.

8. The following Heads of Ordinary Revenue exceeded the original Estimate by a sum of £12,440 : 8 : 9, viz :

4. Fees, Fines	...	£ 640 : 4 : 9.	
5. Interest	...	353 : 13 : 5.	
6. Post Office	...	52 : 17 : 8.	
7. Telegraphs &c.	...	3,937 : 9 : 5.	
9. Miscellaneous	...	7,456 : 3 : 6.	
			£12,440 : 8 : 9.

On the other hand the undermentioned Heads failed to realize the amount originally Estimated by a sum of £6,488 : 16 : 8, viz :

1. Customs Duties	...	£5,490 : 0 : 1.	
2. Port Dues	...	423 : 13 : 10.	
3. Internal Revenue	...	357 : 10 : 11.	
8. Rents.	...	217 : 11 : 10.	
			£ 6,488 : 16 : 8.

Net increase	...	£ 5,951 : 12 : 1.
--------------	-----	-------------------

9. HEAD I, CUSTOMS DUTIES. The decrease under this Head was mainly due to the comparatively small imports during the year of Spirits and Tobacco, and also to a falling off of Exports of Wool. There were no receipts during the year under item "Whale Oil" which was originally estimated at £1,500.

10. HEAD II, PORT DUES. This Head failed to realize the original Estimate by a sum of £423 : 13 : 10. The decrease was due to fewer Whaling vessels entering Port Stanley during the year.

11. HEAD III, INTERNAL REVENUE. Decrease under this Head was due to the fact that item "Sealing" failed to realize the original Estimate by a sum of £166 : 13 : 4. No Whaling licences were issued for the Falkland Islands during the year, and in consequence there were no receipts under this item, which was originally Estimated at £300.

12. HEAD VIII, RENTS, Item 3 "Houses" failed to realize the original Estimate by a sum of £94 : 4 : 8, due to the sale of houses during the year. Item 4 "Hire of Town Hall" would appear to have been over-estimated. There were no receipts under item "Public Baths" as the Institution was not opened during the year.

13. The original Estimate for Land Sales (£6553) was exceeded by a sum of £173 : 19 : 9.

### Expenditure.

14. The ordinary Expenditure for the year amounted to £39,128 : 13 : 5. It was less than that expended in 1929 by £6,871 : 9 : 5, and was under the original Estimate for 1930 by £1,956 : 6 : 7.

15. The total Expenditure for the year including "Extraordinary" payments, amounted to £69,979 : 12 : 8. It was more than that expended in 1929 by £10,938 : 3 : 3, and exceeded the original Estimate for 1930 by £25,064 : 12 : 8.

This excess was partly due to the transfer of a sum of £13,990 : 12 : 0 to the newly formed Falkland Islands Reserve Fund, and partly to the cost of the "Public Baths and Gymnasium", "Stanley Improvement Works" and "Colonial Secretary's Residence", for which no provision was made in the Estimates for the year.

16. Excess Expenditure over the original Estimate for the year was incurred under the following Heads, viz :

I. Pensions ...	£	669	:	8	:	5.

## Report on Education in the Colony for the Year 1930.

—:O:—

### General.

The educational facilities available in the Falkland Islands fall, in view of the peculiar local conditions, into three groups:

- (1) Those at Stanley, the only township in the Colony.
- (2) Those at Darwin, the Falkland Islands Company's main settlement.
- (3) Those in the outside country districts with their very scattered farm settlements.

**STANLEY:** A Government School is maintained from public funds, which, while being elementary in character, also makes provision for attendance at a Continuation Class for a two-years' course of further education. A scheme instituted in 1924 has further provided for children from the "Camps" or country districts whose parents were willing to send them to Stanley to be educated. These Camp children were either boarded and lodged in a Government Hostel and taught in the School at an inclusive charge of 10/- a month during residence, or, if boarded in private houses, the Government contributed two-thirds of the cost not exceeding £2 a month. In 1929, however, it was decided that the Hostel had not received enough support to justify the cost of maintaining it, and it was closed down. The maintenance grants for Camp children privately boarded still remain.

There is also a Convent School taught by Roman Catholic Sisters: this school is not subject to Government control and receives no subsidy.

**DARWIN:** Here for many years past the Falkland Islands Company has maintained, in the interests of its employees, a small school with a resident master.

**CAMP DISTRICTS:** Four itinerant teachers are provided by the Government, one for the East and three for the West Falkland. The teachers travel from settlement to settlement devoting a certain amount of time to each. The Falkland Islands Company also maintains two Camp teachers for the children of its employees in outlying districts.

### Government School.

2. The authorised teaching establishment of the Government School in 1930 was:

One Headmaster	}	Certificated.
One Assistant Master		
Two Assistant Mistresses		
Two Assistant Teachers	}	Locally Trained.
Two Supplementary Teachers		

From the 1st May to the end of the year the Superintendent of Education and Headmaster of the Government School was away on leave, and the duties of the office during that period were performed by Mr. W. J. Davies, Assistant Master, who deserves credit for the efficient manner in which he carried on the work, in which he was conscientiously assisted by the rest of the staff.

3. The following table shows the number of pupils on the roll at the end of 1930 and the number in average attendance during the year:

		Boys	Girls.	Total.
Number on Roll on 31st December 1930	...	100	64	164
Average number on Roll during 1930	...	101.6	60.7	162.3
Average Attendance during 1930	... ..	90.8	55.5	146.3

4. The attendance was good, averaging 90 per cent for the whole year. This figure does not truly reflect the general average of attendance, being made lower than it should be by two main causes. The first is the growing custom of parents allowing their children to go to the Camp for their summer holidays – which is a good thing – and not seeing to their return in time for the reopening of the school in February. The summer holidays are seven weeks long, and parents should arrange for their children to be back in Stanley by the end of them. There were cases in 1930 of children being away for two months after the school had reopened. Another cause of lower average attendance is that there are a few parents who make no effort to send their children to school regularly. As the law stands it is practically impossible to enforce regular attendance in these cases, and more stringent regulations may have to be recommended in order to ensure that such negligent parents (who are only a small minority) shall see that their children have the chance of reaping what benefit they can from the schooling which the Government is at considerable expense to provide.

5. The general health of the pupils was good, and for the fifth consecutive year there were no extraordinary closures of the school for sickness. All the children were medically examined in the course of the year, and in addition there were regular medical and dental visits for general inspection.

6. The teaching of woodwork to the senior boys and shorthand to the Continuation Class was continued. Physical training, including football, hockey and gymnastics in addition to the formal Swedish drill, formed part of the curriculum. The school took part in a handwriting competition organised by Messrs. Harrods for schools in England and two of the entries obtained certificates of merit; considering the comparative smallness of the school this is considered satisfactory.

### Finance.

7. The expenditure under Head XI "Education" of the annual estimate of the expenditure was £2,608 : 1 : 10 in 1930 as compared with £3,165 : 5 : 10 in 1929. The revenue collected in 1930 amounted to £200 : 17 : 1 as against £170 : 9 : 11 in 1929. Details of the expenditure and revenue in 1930 are appended :

Expenditure :		£	s.	d.
1.	Personal Emoluments ...	2,121	15	5.
2.	Other Charges ...	486	6	5.
Total ...		£2,608	1	10.
Revenue :		£	s.	d.
1.	School Fees ...	140	4	0.
2.	Sale of Stationery etc. ...	34	0	7.
3.	Shorthand Class Fees ...	26	12	6.
Total ...		£200	17	1.

### Travelling Teachers.

8. The East Falkland beat was without a teacher for the first part of the year, but later a new appointment was made and a teacher was placed on that beat. There were three teachers at work on the West Falkland throughout the year with the exception of a short period when the one working the middle beat was on temporary duty in Stanley. It is to be hoped that it will be possible to maintain three teachers continuously on the West Falkland, as experience seems to show that this is the only practicable means of getting the rudiments of education taught to the children living there. The following are the numbers of Camp children taught by Government Travelling Teachers during 1930 :

Boys	51	Girls	38	Total	89.
------	----	-------	----	-------	-----

**Saint Mary's Convent School.**

9. The number of pupils attending the Convent School during 1930 was as follows:

		Boys.	Girls.	Total.
Number on Roll on 31st December 1930	...	20	48	68.
Number in average attendance 1930	... ..	17	39	56.

**Falkland Islands Company's School & Camp Teachers.**

10. The number of pupils under instruction was as follows:

		Boys.	Girls.	Total.
Darwin School	...	11	8	19.
Camp Teachers	...	22	19	41.
Total	...	<u>33</u>	<u>27</u>	<u>60.</u>

17. (i) THE steamship shall make such voyages from Stanley to Montevideo and return as the Government may require not exceeding five voyages each way in any one year and shall call at Fox Bay on the West Falkland on any voyage if so required by the Government. The dates of these voyages shall be fixed by the Government after consultation with the Company, except that between the Fifteenth of December and the Fifteenth of March in every year such dates shall not be fixed without the consent of the Company and shall not at any time be fixed so as to interfere with the inter-insular voyages for the collection of the wool clip.

(ii) The steamship shall make not less than twelve calls in every year at a principal port on the main West Falkland Island in the course of separate voyages and in addition to the calls at Fox Bay provided for in the preceding sub-clause. The term principal port shall be taken to mean any one of the following places, videlicet, Fox Bay, Port Howard, Chartres and Hill Cove.

(iii) Additional voyages to Montevideo or voyages to other places on the South American continent or to the Dependencies shall be the subject of special arrangement between the Government and the Company but the Company shall be at liberty to make such voyages on its own account and at its own expense.

18. (i) THE Company shall arrange the transhipment at Montevideo of all cement, coal, timber, petrol, kerosene, gas-oil, fuel-oil and lubricating-oil, which is to be carried by the steamship to the Colony on Government account, and shall charge for this service only the actual cost incurred by the Company. This provision shall apply also to general Government cargo as far as practicable.

(ii) The Company shall also give the Government free of charge the benefit of its experience in purchasing supplies in South American markets.

19. THE Company shall if required by the Government carry a Government mail officer on both the outward and return voyages between Port Stanley and Montevideo free of charge.

20. SO long as this Agreement is in force the Government shall pay to the Company in Stanley the sum of Two thousand five hundred pounds per annum in equal quarterly payments of Six hundred and twenty five pounds subject however to the following provisions namely :-

(a) where this Agreement has been in force for a portion only of the preceding quarter the sum paid shall be a corresponding proportion of Six hundred and twenty five pounds, and (b) an abatement at the rate of Five hundred pounds per return voyage or of Two hundred and fifty pounds per single voyage shall be made in respect of any of the five return voyages specified in clause 17 (i) hereof which the Company may be unable from any cause to perform or on which it may be unable from any cause to carry mails, passengers and cargo in accordance with the provisions of this Agreement.

21. THE Government shall have a prior claim to passenger accommodation or cargo space in the Steamship when engaged in any voyage under this Agreement whether such passenger accommodation or cargo space is provided on payment or free of charge in accordance with the terms of this Agreement.

22. IN the event of any breach of this Agreement by the Company or failure on the part of the Company fully to carry out the terms stipulations or provisions hereof (unless the Company shall prove to the satisfaction of the Governor that such breach or failure arose solely from a cause or causes beyond the control of the Company and the servants of the Company) the Company shall be liable by way of penalty and not as liquidated damages for any such breach or failure to pay to the Government such a sum not exceeding £5. 0. 0 (Five pounds sterling) as the Governor shall determine and if such breach or failure shall continue to a further penalty of £5. 0. 0 (Five pounds sterling) for every day during which such breach or failure may continue and should there be any repetition of such breaches or failures or any breach or failure on the part of the Company as in the opinion of the Governor to render such a course desirable the Government may by giving to the Company notice in writing forthwith determine this Agreement but without prejudice to the rights or remedies of the Government in respect of any antecedent breach of this Agreement by the Company and nothing herein contained shall prevent the Government in the event of such breach or failure from making such other arrangements as shall seem to the Government fit for the despatch and carriage of the aforesaid mails and passengers by some other vessel or vessels and from bringing an action for damages against the Company instead of recovering a penalty under this Clause.

23. NOTHING in this Agreement shall be deemed to or shall impose any personal liability on the Governor or the Crown Agents or on any of them or on any member or officer of the Government.

24. THE Government shall not be liable for any loss or damage whatever which may be sustained by the Company in consequence of the employment of the Steamship on any of the services contracted to be performed under this Agreement.

25. THIS Agreement shall continue in force for a period of five years from the date mentioned in Clause 16 hereof and shall continue thereafter on the same terms until either party gives to the other six months written notice at any time to determine the same.

### A Bill

To give effect to a certain Convention on the execution of Arbitral Awards and to a certain Protocol on Arbitration Clauses.

WHEREAS a Convention, set out in the First Schedule to this Ordinance, on the Execution of Arbitral Awards was on the twenty-sixth day of September, nineteen hundred and twenty-seven signed at Geneva on behalf of His Majesty : and WHEREAS a Protocol on Arbitration Clauses, set out in the Second Schedule to this Ordinance, was on the twenty-fourth day of September, nineteen hundred and twenty-three signed at a meeting of the Assembly of the League of Nations on behalf of His Majesty.

AND WHEREAS it is expedient that such provisions should be enacted as will enable the said Convention and Protocol to become operative in the Colony of the Falkland Islands and its Dependencies.

NOW, THEREFORE, BE IT ENACTED by the Governor of the Colony of the Falkland Islands with the advice and consent of the Legislative Council, thereof as follows.

1. This Ordinance may be cited as "The Arbitration (Foreign Awards) Ordinance, 1931". Short Title.

2. The provisions of this Ordinance apply to any award made after the twenty-eighth day of July, nineteen hundred and twenty-four - Application.

(a) In pursuance of an agreement for arbitration to which the protocol set out in the Second Schedule to this Ordinance applies; and

- (b) between persons of whom one is subject to the jurisdiction of some one of such Powers as His Majesty, being satisfied that reciprocal provisions have been made, may by Order in Council declare to be parties to the Convention set out in the first Schedule to this Ordinance and of whom the other is subject to the jurisdiction of some other of the Powers aforesaid; and
- (c) in one of such territories as His Majesty, being satisfied that reciprocal provisions have been made, may by Order in Council declare to be territories to which the said Convention applies,

and an award to which the provisions of this Ordinance apply is in this Ordinance referred to as a "foreign award".

Effect of foreign award.

3. (1) A foreign award shall, subject to the provisions of this Ordinance, be enforceable either by action or under the provisions of this Ordinance.

(2) Any foreign award which would be enforceable under this Ordinance shall be treated as binding for all purposes on the persons as between whom it was made, and may accordingly be relied on by any of those persons by way of defence, set off or otherwise in any legal proceedings, and any references in this Ordinance to enforcing a foreign award shall be construed as including references to relying on an award.

Conditions for enforcement of foreign awards.

4. (1) In order that a foreign award may be enforceable under this Ordinance, it must have -

- (a) been made in pursuance of an agreement for arbitration which was valid under the law by which it was governed;
- (b) been made by the tribunal provided for in the agreement or constituted in manner agreed upon by the parties;
- (c) been made in conformity with the law governing the arbitration procedure;
- (d) become final in the country in which it was made;
- (e) been in respect of a matter which may lawfully be referred to arbitration under the law of the Colony.

and the enforcement thereof must not be contrary to the public policy or the law of the Colony.

(2) Subject to the provisions of this sub-section, a foreign award shall not be enforceable under this Ordinance if the Supreme Court is satisfied that -

- (a) the award has been annulled in the country in which it was made; or
- (b) the party against whom it is sought to enforce the award was not given notice of the arbitration proceedings in sufficient time to enable him to present his case, or was under some legal incapacity, and was not properly represented; or
- (c) the award does not deal with all the questions referred or contains decisions on matters beyond the scope of the agreement for arbitration :

Provided that, if the award does not deal with all the questions referred, the court may if it thinks fit, either postpone the enforcement of the award or order its enforcement subject to the giving of such security by the person seeking to enforce it as the Court may think fit.

(3) If a party seeking to resist the enforcement of a foreign award proves that there is any ground other than the non-existence of the conditions specified in paragraphs (a), (b), and (c) of sub-section (1) of this section, or the existence of the conditions specified in paragraphs (b) and (c) of sub-section (2) of this section, entitling him to contest the validity of the award the court may, if it thinks fit, either refuse to enforce the award or adjourn the hearing until after the expiration of such period as appears to the court to be reasonably sufficient to enable that party to take the necessary steps to have the award annulled by the competent tribunal.

5. (1) The party seeking to enforce a foreign award must produce - Evidence.

- (a) the original award or a copy thereof duly authenticated in manner required by the law of the country in which it was made; and
- (b) evidence proving that the award has become final; and
- (c) such evidence as may be necessary to prove that the award is a foreign award, and that the conditions mentioned in paragraphs (a), (b) and (c) of sub-section (1) of the last foregoing section are satisfied.

(2) In any case where any document required to be produced under sub-section (1) of this section is in a foreign language, it shall be the duty of the party seeking to enforce the award to produce a translation certified as correct by a diplomatic or consular agent of the country to which that party belongs, or certified as correct in such other manner as may be sufficient according to the law of the Colony.

(3) Subject to the provisions of this section, rules of court may be made under section 33 of the Administration of Justice Ordinance, 1901, with respect to the evidence which must be furnished by a party seeking to enforce an award under this Ordinance.

6. For the purposes of this Ordinance, an award shall not be deemed final if any proceedings for the purpose of contesting the validity of the award are pending in the country in which it was made. Meaning of "final award".

7. Nothing in this Ordinance shall - Saving.

- (a) prejudice any rights which any person would have had of enforcing in the Colony any award, or of availing himself in the Colony of any award if this Ordinance had not been enacted; or
- (b) apply to any award made on an arbitration agreement governed by the law of the Colony.

8. If any party to a submission made in pursuance of an agreement to which the Protocol set out in the Second Schedule to this Ordinance applies, or any person claiming through or under him, commences any legal proceedings in any court against any other party to the submission, or any person claiming through or under him, in respect of any matter agreed to be referred, any party to such legal proceedings may at any time after appearance, and before delivering any pleadings or taking other steps in the proceedings, apply to that court to stay the proceedings, and that court or a judge thereof, unless satisfied that the agreement or arbitration has become Staying of Court Proceedings in respect of matters to be referred to arbitration under commercial agreements.

- (b) That the party against whom it is sought to use the award was not given notice of the arbitration proceedings in sufficient time to enable him to present his case; or that, being under a legal incapacity, he was not properly represented;
- (c) That the award does not deal with the differences contemplated by or falling within the terms of the submission to arbitration or that it contains decisions on matters beyond the scope of the submission to arbitration.

If the award has not covered all the questions submitted to the arbitral tribunal, the competent authority of the country where recognition or enforcement of the award is sought can, if it think fit, postpone such recognition or enforcement or grant it subject to such guarantee as that authority may decide.

#### ARTICLE 3.

If the party against whom the award has been made proves that, under the law governing the arbitration procedure, there is a ground, other than the grounds referred to in Article 1 (*a*) and (*c*), and Article 2 (*b*) and (*c*), entitling him to contest the validity of the award in a Court of Law, the Court may, if it thinks fit, either refuse recognition or enforcement of the award or adjourn the consideration thereof, giving such party a reasonable time within which to have the award annulled by the competent tribunal.

#### ARTICLE 4.

The party relying upon an award or claiming its enforcement must supply, in particular:—

- (1) The original award or a copy thereof duly authenticated, according to the requirements of the law of the country in which it was made;
- (2) Documentary or other evidence to prove that the award has become final, in the sense defined in Article 1 (*d*), in the country in which it was made;
- (3) When necessary, documentary or other evidence to prove that the conditions laid down in Article 1, paragraph 1 and paragraph 2 (*a*) and (*c*), have been fulfilled.

A translation of the award and of the other documents mentioned in this Article into the official language of the country where the award is sought to be relied upon may be demanded. Such translation must be certified correct by a diplomatic or consular agent of the country to which the party who seeks to rely upon the award belongs or by a sworn translator of the country where the award is sought to be relied upon.

#### ARTICLE 5.

The provisions of the above Articles shall not deprive any interested party of the right of availing himself of an arbitral award in the manner and to the extent allowed by the law or the treaties of the country where such award is sought to be relied upon.

#### ARTICLE 6.

The present Convention applies only to arbitral awards made after the coming-into-force of the Protocol on Arbitration Clauses, opened at Geneva on September 24th, 1923.

#### ARTICLE 7.

The present Convention, which will remain open to the signature of all the signatories of the Protocol of 1923 on Arbitration Clauses, shall be ratified.

It may be ratified only on behalf of those Members of the League of Nations and non-Member States on whose behalf the Protocol of 1923 shall have been ratified.

Ratifications shall be deposited as soon as possible with the Secretary-General of the League of Nations, who will notify such deposit to all the signatories.

## ARTICLE 8.

The present Convention shall come into force three months after it shall have been ratified on behalf of two High Contracting Parties. Thereafter, it shall take effect, in the case of each High Contracting Party, three months after the deposit of the ratification on its behalf with the Secretary-General of the League of Nations.

## ARTICLE 9.

The present Convention may be denounced on behalf of any Member of the League or non-Member State. Denunciation shall be notified in writing to the Secretary-General of the League of Nations, who will immediately send a copy thereof, certified to be in conformity with the notification, to all the other Contracting Parties, at the same time informing them of the date on which he received it.

The denunciation shall come into force only in respect of the High Contracting Party which shall have notified it and one year after such notification shall have reached the Secretary-General of the League of Nations.

The denunciation of the Protocol on Arbitration Clauses shall entail, ipso facto, the denunciation of the present Convention.

## ARTICLE 10.

The present Convention does not apply to the Colonies, Protectorates or territories under suzerainty or mandate of any High Contracting Party unless they are specially mentioned.

The application of this Convention to one or more of such Colonies, Protectorates or territories to which the Protocol on Arbitration Clauses, opened at Geneva on September 24th, 1923, applies, can be effected at any time by means of a declaration addressed to the Secretary-General of the League of Nations by one of the High Contracting Parties.

Such declaration shall take effect three months after the deposit thereof.

The High Contracting Parties can at any time denounce the Convention for all or any of the Colonies, Protectorates or territories referred to above. Article 9 hereof applies to such denunciation.

## ARTICLE 11.

A certified copy of the present Convention shall be transmitted by the Secretary-General of the League of Nations to every Member of the League of Nations to every non-Member State which signs the same.

**SECOND SCHEDULE.****PROTOCOL ON ARBITRATION CLAUSES.**

The undersigned, being duly authorised, declare that they accept, on behalf of the countries which they represent, the following provisions:—

1. Each of the Contracting States recognises the validity of an agreement whether relating to existing or future differences between parties, subject respectively to the jurisdiction of different Contracting States by which the parties to a contract agree to submit to arbitration all or any differences that may arise in connection with such contract relating to commercial matters or to any other matter capable of settlement by arbitration, whether or not the arbitration is to take place in a country to whose jurisdiction none of the parties is subject.

Each contracting State reserves the right to limit the obligation mentioned above to contracts which are considered as commercial under its national law. Any Contracting State which avails itself of this right will notify the Secretary-General of the League of Nations, in order that the other Contracting States may be so informed.

2. The arbitral procedure, including the constitution of the arbitral tribunal, shall be governed by the will of the parties and by the law of the country in whose territory the arbitration takes place.

The Contracting States agree to facilitate all steps in the procedure which require to be taken in their own territories, in accordance with the provisions of their law governing arbitral procedure applicable to existing differences.

3. Each Contracting State undertakes to ensure the execution by its authorities and in accordance with the provisions of its national laws of arbitral awards made in its own territory under the preceding articles.

4. The tribunals of the Contracting Parties, on being seized of a dispute regarding a contract made between persons to whom Article 1 applies and including an arbitration agreement whether referring to present or future differences which is valid in virtue of the said article and capable of being carried into effect, shall refer the parties on the application of either of them to the decision of the arbitrators.

Such reference shall not prejudice the competence of the judicial tribunals in case the agreement or the arbitration cannot proceed or become inoperative.

5. The present Protocol, which shall remain open for signature by all States, shall be ratified. The ratifications shall be deposited as soon as possible with the Secretary-General of the League of Nations, who shall notify such deposit to all the signatory States.

6. The present Protocol shall come into force as soon as two ratifications have been deposited. Thereafter it will take effect, in the case of each Contracting State, one month after the notification by the Secretary-General of the deposit of its ratification.

7. The present Protocol may be denounced by any Contracting State on giving one year's notice. Denunciation shall be effected by a notification addressed to the Secretary-General of the League, who will immediately transmit copies of such notification to all the other signatory States and inform them of the date of which it was received. The denunciation shall take effect one year after the date on which it was notified to the Secretary-General, and shall operate only in respect of the notifying State.

8. The Contracting States may declare that their acceptance of the present Protocol does not include any or all of the undermentioned territories: that is to say, their colonies, overseas possessions or territories, protectorates or the territories over which they exercise a mandate.

The said States may subsequently adhere separately on behalf of any territory thus excluded. The Secretary-General of the League of Nations shall be informed as soon as possible of such adhesions. He shall notify such adhesions to all signatory States. They will take effect one month after the notification by the Secretary-General to all signatory States.

The Contracting States may also denounce the Protocol separately on behalf of any of the territories referred to above. Article 7 applies to such denunciation.

The Government offices and works will be closed throughout the day and the children attending the Government School will be given a half holiday.

Divine Service will be held in the Cathedral at 10.20 a.m. at which His Excellency will attend officially and will be supported by the Honourable Members of Councils. The Falkland Islands Defence Force and the Stanley Boy Scouts and Girl Guides will parade and will take part in the Service and subsequent Ceremony.

At the end of the service the Governor and the several bodies on parade will proceed to the Cemetery where at 11 a.m. a volley will be fired. The customary two minutes silence will then be observed after which the Last Post will be sounded. His Excellency will lay a wreath at the foot of the Cross of Sacrifice; the Colonial Secretary will also lay a wreath of Poppies sent by the British Legion and the Ceremony will terminate. Wreaths may then be laid by private

individuals at the foot of the Cross of Sacrifice and on the Naval and Military graves. The Cathedral bell will also toll to mark the beginning and the end of the two minutes silence.

It is hoped that as many of the public as possible will be present both at the Service in the Cathedral and at the Ceremony at the Cemetery and the Heads of Departments and Government servants generally will make a special effort to attend.

The children from the Government School will not be present at the Cathedral, but will be assembled and drawn up in readiness for the Ceremony at the Cross of Sacrifice.

*Colonial Secretary.*

—:O:—

The Falkland Islands consisting of the East and West Islands and numerous smaller islands are situated in the South Atlantic between 51 and 53 degrees South latitude and 57 and 62 degrees West longitude. The total area of the group is about 4,618 square miles. The country barren of minerals is low lying, the highest peaks reaching only to a height of 2,000 feet. The soil is peaty the streams are sluggish, and with poor natural drainage, most of the country is marshy. The Colony has often been compared with the north west of Scotland but there are few if any common features.

The climate of the Falkland Islands is rigorous. Temperatures above 60 degrees are rare, and there is little seasonal variation. In January, mid Summer, the average temperature may not exceed that of July, the mean Summer temperature is but 12 degrees above that of Winter which is about 36 degrees. Rainfall is estimated generally at about 30 inches per annum and is evenly distributed throughout the year, excessive falls being uncommon. Frost and snow are to be expected in every month except December, January and February. The strong winds which prevail throughout the year are more frequent in Summer.

In 1900 the islands supported 800,000 sheep in 1931 600,000. Such figures indicate that the carrying capacity of the islands has been reduced or that a change in general management has taken place. This may appear to be a serious fall, but it must be recorded that the weight of wool produced per head has increased considerably; in 1890 the average weight per fleece was 5.1 pounds; in 1930 7.1 pounds. Both stock and pasture suffered from overstocking, but this has been remedied to some extent by the erection of fencing.

The question which beset the pioneers of the industry — whether to raise sheep suited to the environment or breed to produce that wool for which there is a good demand — no longer exists. The Romney strain which predominates in every flock in the islands fulfils both requirements.

It has been stated that the quality of the island stock has decreased rapidly during the last score of years but it is difficult to reconcile such statement with wool prices of late years, as the relative positions of the Falkland Islands and Patagonian crop in the wool markets have changed. The average price of Falkland Islands wool is higher than that of Patagonia. Several reasons have been advanced to account for this change.

- (1) Better classing of Falkland Islands wool.
- (2) The lamb trade in South America carries off the early maturing animal and second grade animals are taken into the ewe flocks.
- (3) The more systematic methods of breeding which have been adopted in the Falkland Islands.

In past years the introduction of fresh blood was essential to improve the quality of wool and maintain the vitality of the stock, but now that the Romney strain has been acclimatised over a long period, careful selection of stud sheep from island stock should maintain the vitality and pass on the characteristics which years of careful breeding have developed. Expensive importations will bring about in a few seasons, changes in characteristics that would take years to establish by systematic breeding but it is doubtful if the results would be of a permanent nature. Importations may increase the vitality, and lambing percentages, may follow the popular demand in the wool markets, but they certainly tend to destroy, and eliminate from the markets Falkland Islands Wool.

It was after the better grazing areas had been eaten out by gross overstocking that the managers began to realise the benefits which would accrue from subdivision fencing. The finer grasses would be allowed to seed and stock could be herded in relation to age and sex, and the chances of inbreeding abolished. As the finer grasses and tussac points disappeared, the coarse grasses and diddle-dee increased. The coarse grass may serve in severe winter weather as bulky fibrous fodder but diddle-dee is a menace.

Although it has been established that most English grasses will grow in the Falkland Islands the problem of repasturisation is difficult. The surface soil is either too wet or too dry for simple broadcasting, and in spite of treading by stock in dry weather the strong winds carry off the seed. The seed must be well covered before germination can take place. An exception to these conditions can be seen on the Peninsular lands on the South side of Port William. Sand carried by the prevailing North West winds across this neck of land completely destroyed all vegetation. The Government put down Sand grass along the northern slopes of the peninsula in lines directed East and West. The seed germinated and grew well, and the winds which carried sand across the peninsula also carried and deposited seed in the same areas. Good winter feed will soon be available on an area which was a few years ago nothing but sandy waste.

A striking feature to be seen throughout the Falkland Islands is the number of small well defined areas of good pasture. On investigation it would appear that at one time these areas were the sites of lamb marking pens and that the condition of the grass is due to the consolidation of the surface soil by the crowding and close herding of sheep on these areas, with its resultant heavy dressing of animal manure. An area which is noticeable in Port Stanley is situated on the north side of the harbour. Across the promontary which terminates in Navy Point there is a green belt with brown diddle-dee colouring on both sides. It is in this small area that the Falkland Islands Company hold sheep for slaughter in Stanley, and this paddock compared with the adjoining land is often overstocked. Examination of pasture in such areas reveals the fact that

1. The coarser grasses are reduced.
2. The indigenous grasses and unsown species are increased.
3. The moss content is reduced.
4. In Spring a more uniform and vigorous growth takes place.

To regrass large areas in the Falkland Islands by breaking up the surface soil, or attempt to improve pasture by close herding, would entail enormous expense. Burning carefully undertaken, keeps coarse pasture in check, and a succulent growth often follows from this practice, but much damage can be done by haphazard burning. Subdivision fencing must be erected and rotational grazing practised before any improvement in pasture, and an increase in carrying capacity, can be effected.

Within recent years a considerable amount of experimental work in Animal Nutrition has been done at the Rowett Institute in Aberdeen. Analyses of soils and pasture from almost every colony have been conducted, and important information has been gleaned. Analysis of pasture from the Falkland Islands has established the fact, which has long been recognised in the islands, that there is a deficiency of lime. Observations on the stock in the Falkland Islands have failed to reveal any marked symptoms of nutritional disorders which might be attributed to mineral deficiencies. The chief problem with regard to nutrition of stock is the serious lack of fodder in the Spring months.

Tests with mineral cake supplied by the Rowett Institute have been conducted but the results have not been encouraging. The stock in the islands are not accustomed to artificial foods and it was with considerable difficulty that they were forced to partake of the mineral ration. After acquiring the taste they exhibited no craving for the supplementary ration. Lambing percentages from ewes receiving mineral cake were lower and the death rate was higher than from animals receiving natural pasture only.

Before any top-dressing is applied, the nature of the soil with regard to its special requirements must be considered. A further and perhaps more important consideration is that of local conditions and requirements. The soil of the Falkland Islands is peaty, very acid, and deficient in lime. Except for a few shell deposits which might be useful to replace the deficiency were they more accessible, there is no lime deposit in the colony. The cost of importing lime or any other artificial manure to produce a good growth in the early Spring is prohibitive. With a view to testing local resources and comparing the results with lime as a dressing, a few simple tests were carried out with peat mould which is used to some extent in this connection throughout the islands.

Peat mould, finely sifted was liberally applied to a plot of land in government paddocks, a second plot received a dressing of lime, a third lime and peat mould mixed and applied as one dressing. The plot which received the mould showed the most vigorous growth, the lime plot the poorest growth. The lime however had an effect on the moss content, which was markedly reduced in the plots which received lime as a dressing. Peat mould appears to afford protection for the first growth, and it could be used to advantage in and around Stanley to promote an early and vigorous growth of grass in small paddocks.

## FALKLAND ISLANDS.

## Ordinance No. 8 of 1931.

I ASSENT,

JAMES O'GRADY,

*Governor.*

26th October, 1931.

## An Ordinance

To give effect to a certain Convention on the execution of Arbitral Awards and to a certain Protocol on Arbitration Clauses.

WHEREAS a Convention, set out in the First Schedule to this Ordinance, on the Execution of Arbitral Awards was on the twenty-sixth day of September, nineteen hundred and twenty-seven signed at Geneva on behalf of His Majesty : and WHEREAS a Protocol on Arbitration Clauses, set out in the Second Schedule to this Ordinance, was on the twenty-fourth day of September, nineteen hundred and twenty-three signed at a meeting of the Assembly of the League of Nations on behalf of His Majesty.

AND WHEREAS it is expedient that such provisions should be enacted as will enable the said Convention and Protocol to become operative in the Colony of the Falkland Islands and its Dependencies.

NOW, THEREFORE, BE IT ENACTED by the Governor of the Colony of the Falkland Islands with the advice and consent of the Legislative Council, thereof as follows.

## Short Title.

1. This Ordinance may be cited as "The Arbitration (Foreign Awards) Ordinance, 1931".

## Application.

2. The provisions of this Ordinance apply to any award made after the twenty-eighth day of July, nineteen hundred and twenty-four -

(a) In pursuance of an agreement for arbitration to which the protocol set out in the Second Schedule to this Ordinance applies; and

- (b) between persons of whom one is subject to the jurisdiction of some one of such Powers as His Majesty, being satisfied that reciprocal provisions have been made, may by Order in Council declare to be parties to the Convention set out in the first Schedule to this Ordinance and of whom the other is subject to the jurisdiction of some other of the Powers aforesaid; and
- (c) in one of such territories as His Majesty, being satisfied that reciprocal provisions have been made, may by Order in Council declare to be territories to which the said Convention applies,

and an award to which the provisions of this Ordinance apply is in this Ordinance referred to as a "foreign award".

3. (1) A foreign award shall, subject to the provisions of this Ordinance, be enforceable either by action or under the provisions of this Ordinance.

Effect of foreign award.

(2) Any foreign award which would be enforceable under this Ordinance shall be treated as binding for all purposes on the persons as between whom it was made, and may accordingly be relied on by any of those persons by way of defence, set off or otherwise in any legal proceedings, and any references in this Ordinance to enforcing a foreign award shall be construed as including references to relying on an award.

4. (1) In order that a foreign award may be enforceable under this Ordinance, it must have -

Conditions for enforcement of foreign awards.

- (a) been made in pursuance of an agreement for arbitration which was valid under the law by which it was governed;
- (b) been made by the tribunal provided for in the agreement or constituted in manner agreed upon by the parties;
- (c) been made in conformity with the law governing the arbitration procedure;
- (d) become final in the country in which it was made;
- (e) been in respect of a matter which may lawfully be referred to arbitration under the law of the Colony.

and the enforcement thereof must not be contrary to the public policy or the law of the Colony.

(2) Subject to the provisions of this sub-section, a foreign award shall not be enforceable under this Ordinance if the Supreme Court is satisfied that -

- (a) the award has been annulled in the country in which it was made; or
- (b) the party against whom it is sought to enforce the award was not given notice of the arbitration proceedings in sufficient time to enable him to present his case, or was under some legal incapacity, and was not properly represented; or
- (c) the award does not deal with all the questions referred or contains decisions on matters beyond the scope of the agreement for arbitration :

Provided that, if the award does not deal with all the questions referred, the court may if it thinks fit, either postpone the enforcement of the award or order its enforcement subject to the giving of such security by the person seeking to enforce it as the Court may think fit.

(3) If a party seeking to resist the enforcement of a foreign award proves that there is any ground other than the non-existence of the conditions specified in paragraphs (a), (b), and (c) of sub-section (1) of this section, or the existence of the conditions specified in paragraphs (b) and (c) of sub-section (2) of this section, entitling him to contest the validity of the award the court may, if it thinks fit, either refuse to enforce the award or adjourn the hearing until after the expiration of such period as appears to the court to be reasonably sufficient to enable that party to take the necessary steps to have the award annulled by the competent tribunal.

Evidence.

5. (1) The party seeking to enforce a foreign award must produce -

- (a) the original award or a copy thereof duly authenticated in manner required by the law of the country in which it was made; and
- (b) evidence proving that the award has become final; and
- (c) such evidence as may be necessary to prove that the award is a foreign award, and that the conditions mentioned in paragraphs (a), (b) and (c) of sub-section (1) of the last foregoing section are satisfied.

(2) In any case where any document required to be produced under sub-section (1) of this section is in a foreign language, it shall be the duty of the party seeking to enforce the award to produce a translation certified as correct by a diplomatic or consular agent of the country to which that party belongs, or certified as correct in such other manner as may be sufficient according to the law of the Colony.

(3) Subject to the provisions of this section, rules of court may be made under section 33 of the Administration of Justice Ordinance, 1901, with respect to the evidence which must be furnished by a party seeking to enforce an award under this Ordinance.

Meaning of  
"final award".

6. For the purposes of this Ordinance, an award shall not be deemed final if any proceedings for the purpose of contesting the validity of the award are pending in the country in which it was made.

Saving.

7. Nothing in this Ordinance shall -

- (a) prejudice any rights which any person would have had of enforcing in the Colony any award, or of availing himself in the Colony of any award if this Ordinance had not been enacted; or
- (b) apply to any award made on an arbitration agreement governed by the law of the Colony.

Staying of Court Proceedings in respect of matters to be referred to arbitration under commercial agreements.

8. If any party to a submission made in pursuance of an agreement to which the Protocol set out in the Second Schedule to this Ordinance applies, or any person claiming through or under him, commences any legal proceedings in any court against any other party to the submission, or any person claiming through or under him, in respect of any matter agreed to be referred, any party to such legal proceedings may at any time after appearance, and before delivering any pleadings or taking other steps in the proceedings, apply to that court to stay the proceedings, and that court or a judge thereof, unless satisfied that the agreement or arbitration has become

inoperative or cannot proceed or that there is not in fact any dispute between the parties with regard to the matter agreed to be referred, shall make an order staying the proceedings.

9. This Ordinance shall apply also to the Dependencies.

Application to the  
Dependencies.

Passed by the Legislative Council this 20th day of  
October, 1931.

### CONVENTION ON THE EXECUTION OF FOREIGN ARBITRAL AWARDS.

#### ARTICLE I.

In the territories of any High Contracting Party to which the present Convention applies, an arbitral award made in pursuance of an agreement, whether relating to existing or future differences (hereinafter called "a submission to arbitration") covered by the Protocol on Arbitration Clauses, opened at Geneva on September 24th, 1923, shall be recognised as binding and shall be enforced in accordance with the rules of the procedure of the territory where the award is relied upon, provided that the said award has been made in a territory of one of the High Contracting Parties to which the present Convention applies and between persons who are subject to the jurisdiction of one of the High Contracting Parties.

To obtain such recognition or enforcement, it shall, further, be necessary:-

- (a) That the award has been made in pursuance of a submission to arbitration which is valid under the law applicable thereto;
- (b) That the subject-matter of the award is capable of settlement by arbitration under the law of the country in which the award is sought to be relied upon;
- (c) That the award has been made by the Arbitral Tribunal provided for in the submission to arbitration or constituted in the manner agreed upon by the parties and in conformity with the law governing the arbitration procedure;
- (d) That the award has become final in the country in which it has been made, in the sense that it will not be considered as such if it is open to *opposition*, *appel* or *pourvoi en cassation* (in the countries where such forms of procedure exist) or if it is proved that any proceedings for the purpose of contesting the validity of the award are pending;
- (e) That the recognition or enforcement of the award is not contrary to the public policy or to the principles of the law of the country in which it is sought to be relied upon.

#### ARTICLE 2.

Even if the conditions laid down in Article 1 hereof are fulfilled, recognition and enforcement of the award shall be refused if the Court is satisfied:—

- (a) That the award has been annulled in the country in which it was made;

- (b) That the party against whom it is sought to use the award was not given notice of the arbitration proceedings in sufficient time to enable him to present his case; or that, being under a legal incapacity, he was not properly represented;
- (c) That the award does not deal with the differences contemplated by or falling within the terms of the submission to arbitration or that it contains decisions on matters beyond the scope of the submission to arbitration.

If the award has not covered all the questions submitted to the arbitral tribunal, the competent authority of the country where recognition or enforcement of the award is sought can, if it think fit, postpone such recognition or enforcement or grant it subject to such guarantee as that authority may decide.

#### ARTICLE 3.

If the party against whom the award has been made proves that, under the law governing the arbitration procedure, there is a ground, other than the grounds referred to in Article 1 (*a*) and (*c*), and Article 2 (*b*) and (*c*), entitling him to contest the validity of the award in a Court of Law, the Court may, if it thinks fit, either refuse recognition or enforcement of the award or adjourn the consideration thereof, giving such party a reasonable time within which to have the award annulled by the competent tribunal.

#### ARTICLE 4.

The party relying upon an award or claiming its enforcement must supply, in particular:—

- (1) The original award or a copy thereof duly authenticated, according to the requirements of the law of the country in which it was made;
- (2) Documentary or other evidence to prove that the award has become final, in the sense defined in Article 1 (*d*), in the country in which it was made;
- (3) When necessary, documentary or other evidence to prove that the conditions laid down in Article 1, paragraph 1 and paragraph 2 (*a*) and (*c*), have been fulfilled.

A translation of the award and of the other documents mentioned in this Article into the official language of the country where the award is sought to be relied upon may be demanded. Such translation must be certified correct by a diplomatic or consular agent of the country to which the party who seeks to rely upon the award belongs or by a sworn translator of the country where the award is sought to be relied upon.

#### ARTICLE 5.

The provisions of the above Articles shall not deprive any interested party of the right of availing himself of an arbitral award in the manner and to the extent allowed by the law or the treaties of the country where such award is sought to be relied upon.

#### ARTICLE 6.

The present Convention applies only to arbitral awards made after the coming-into-force of the Protocol on Arbitration Clauses, opened at Geneva on September 24th, 1923.

#### ARTICLE 7.

The present Convention, which will remain open to the signature of all the signatories of the Protocol of 1923 on Arbitration Clauses, shall be ratified.

It may be ratified only on behalf of those Members of the League of Nations and non-Member States on whose behalf the Protocol of 1923 shall have been ratified.

Ratifications shall be deposited as soon as possible with the Secretary-General of the League of Nations, who will notify such deposit to all the signatories.

## ARTICLE 8.

The present Convention shall come into force three months after it shall have been ratified on behalf of two High Contracting Parties. Thereafter, it shall take effect, in the case of each High Contracting Party, three months after the deposit of the ratification on its behalf with the Secretary-General of the League of Nations.

## ARTICLE 9.

The present Convention may be denounced on behalf of any Member of the League or non-Member State. Denunciation shall be notified in writing to the Secretary-General of the League of Nations, who will immediately send a copy thereof, certified to be in conformity with the notification, to all the other Contracting Parties, at the same time informing them of the date on which he received it.

The denunciation shall come into force only in respect of the High Contracting Party which shall have notified it and one year after such notification shall have reached the Secretary-General of the League of Nations.

The denunciation of the Protocol on Arbitration Clauses shall entail, ipso facto, the denunciation of the present Convention.

## ARTICLE 10.

The present Convention does not apply to the Colonies, Protectorates or territories under suzerainty or mandate of any High Contracting Party unless they are specially mentioned.

The application of this Convention to one or more of such Colonies, Protectorates or territories to which the Protocol on Arbitration Clauses, opened at Geneva on September 24th, 1923, applies, can be effected at any time by means of a declaration addressed to the Secretary-General of the League of Nations by one of the High Contracting Parties.

Such declaration shall take effect three months after the deposit thereof.

The High Contracting Parties can at any time denounce the Convention for all or any of the Colonies, Protectorates or territories referred to above. Article 9 hereof applies to such denunciation.

## ARTICLE 11.

A certified copy of the present Convention shall be transmitted by the Secretary-General of the League of Nations to every Member of the League of Nations to every non-Member State which signs the same.

**SECOND SCHEDULE.****PROTOCOL ON ARBITRATION CLAUSES.**

The undersigned, being duly authorised, declare that they accept, on behalf of the countries which they represent, the following provisions:—

1. Each of the Contracting States recognises the validity of an agreement whether relating to existing or future differences between parties, subject respectively to the jurisdiction of different Contracting States by which the parties to a contract agree to submit to arbitration all or any differences that may arise in connection with such contract relating to commercial matters or to any other matter capable of settlement by arbitration, whether or not the arbitration is to take place in a country to whose jurisdiction none of the parties is subject.

Each contracting State reserves the right to limit the obligation mentioned above to contracts which are considered as commercial under its national law. Any Contracting State which avails itself of this right will notify the Secretary-General of the League of Nations, in order that the other Contracting States may be so informed.

2. The arbitral procedure, including the constitution of the arbitral tribunal, shall be governed by the will of the parties and by the law of the country in whose territory the arbitration takes place.

The Contracting States agree to facilitate all steps in the procedure which require to be taken in their own territories, in accordance with the provisions of their law governing arbitral procedure applicable to existing differences.

3. Each Contracting State undertakes to ensure the execution by its authorities and in accordance with the provisions of its national laws of arbitral awards made in its own territory under the preceding articles.

4. The tribunals of the Contracting Parties, on being seized of a dispute regarding a contract made between persons to whom Article 1 applies and including an arbitration agreement whether referring to present or future differences which is valid in virtue of the said article and capable of being carried into effect, shall refer the parties on the application of either of them to the decision of the arbitrators.

Such reference shall not prejudice the competence of the judicial tribunals in case the agreement or the arbitration cannot proceed or become inoperative.

5. The present Protocol, which shall remain open for signature by all States, shall be ratified. The ratifications shall be deposited as soon as possible with the Secretary-General of the League of Nations, who shall notify such deposit to all the signatory States.

6. The present Protocol shall come into force as soon as two ratifications have been deposited. Thereafter it will take effect, in the case of each Contracting State, one month after the notification by the Secretary-General of the deposit of its ratification.

7. The present Protocol may be denounced by any Contracting State on giving one year's notice. Denunciation shall be effected by a notification addressed to the Secretary-General of the League, who will immediately transmit copies of such notification to all the other signatory States and inform them of the date of which it was received. The denunciation shall take effect one year after the date on which it was notified to the Secretary-General, and shall operate only in respect of the notifying State.

8. The Contracting States may declare that their acceptance of the present Protocol does not include any or all of the undermentioned territories: that is to say, their colonies, overseas possessions or territories, protectorates or the territories over which they exercise a mandate.

The said States may subsequently adhere separately on behalf of any territory thus excluded. The Secretary-General of the League of Nations shall be informed as soon as possible of such adhesions. He shall notify such adhesions to all signatory States. They will take effect one month after the notification by the Secretary-General to all signatory States.

The Contracting States may also denounce the Protocol separately on behalf of any of the territories referred to above. Article 7 applies to such denunciation.

Public Works Extraordinary, £13,522. This gave a total expenditure chargeable to the revenue during the year of £52,843 in addition to the allocation made to the Reserve Fund of £20,009. In consequence of this expenditure it was further estimated that at the beginning of the year 1932 the position would be: General Account £1,009, Reserve Fund £34,000. This margin of £1,009 was on the short side for easy working and for practical purposes. That it was so short was due to the large allocation made during the year to the Reserve Fund. Taking into account all the circumstances of the world-wide depression it was

gratifying to be able to state that the finances of the Colony continued to rest on an essentially sound basis. The Government proposed to introduce no fresh taxation and the existing taxation was light and, in comparison with many countries of the world, hardly to be felt. There was no Public Debt; on the contrary, in addition to the Reserve Fund the Colony had the Land Sales Fund in the accumulated capital amount of nearly a quarter of a million pounds, and the interest derived from this sum enabled them to carry on without imposing fresh taxation.

The Honourable the Colonial Secretary in commenting on the revenue for the year 1931, attributed the falling off mainly to the Customs receipts being down, to a decrease of £2,000 in the Interest and to decreases of £1,000 each under Post Office and Telegraphs and Telephones due in the former case to a falling off in the sale of stamps principally to philatelists, and in the latter case as a result of a decline in the wireless traffic passed on behalf of the Whaling Industry.

In preparing the estimates of the revenue for the year 1932 the Honourable the Colonial Secretary said that it had been necessary to proceed with extreme caution in view of the uncertainty as to the future. The figure inserted for the Ordinary Revenue for 1932 was £53,138 as compared with £60,732 in 1931. Included in this expenditure, under Head XXI. Public Works Extraordinary, was the provision, considered necessary and, it was hoped, adequate, to enable the administration to deal with the unemployment problem in Stanley. One item allowed for the completion of the road to the North Camp, £742, and another for the construction of a road to the eastern end of Stanley Harbour, £2,000.

The Honourable the Colonial Secretary before passing on to consider the finances of the Dependencies placed special emphasis on the vital issue of unemployment. He said that the time had unfortunately come when the Colony in its turn, had to face the problem of unemployment - that world-wide problem by which, perhaps, it was one of the last countries in the world to be seriously affected. Generally speaking the causes of this unemployment locally might be said to be three : Firstly, they had, in common with most countries in the civilised world the natural over-increase of the population. Secondly, trade depression, and thirdly, immigration, for the greater part by way of imported farm labour.

It was difficult to assess which of these causes was predominant, perhaps they were all equally contributory. At the present time there were in Stanley - Stanley being the sole repository of the Colony's surplus labour - a number of men out of work. He supposed at least a round score. But this number would at once amount to a hundred were it not for the public works which were being carried on by the administration. Until such time as the position improved and it was possible for example, for the Sealing Company to re-start operations, and for farms to maintain full gangs, there appeared to be no other way out but for the administration to undertake works of public utility in or near Stanley, in order to provide employment. Honourable Members were asked, therefore, to vote the two items specially inserted with this object.

For so long and to such an extent as possible the administration would do its utmost to absorb labour and to employ men on economical works, and it would endeavour to do so without imposing extra taxation. But if it was to be successful in this object the co-operation of all employers of labour was essential. He would like to take the opportunity of making a public appeal to all employers of labour to keep on or take on as many hands as they could, and wherever possible, to follow the lead of the administration in employing local men, and above all not to import unskilled labour from the United Kingdom or elsewhere. It was hoped that matters of this description could be dealt with by mutual co-operation and it was not desired that the administration should interfere actively, for example by legislation, except in the last resort.

Continuing the Honourable the Colonial Secretary said that the Revenue from the Dependencies was derived almost exclusively from the receipts collected by way of duty on the export of the whale and seal oil. During the current season which ran from September 1931 to March 1932, it appeared likely that only two companies would operate under licences from the Falkland Islands Government and so be liable to pay duty - they were Messrs Salvesen of Leith and the Compania Argentina de Pesca in South Georgia. It was hoped, however, that whaling would re-open on a more or less normal basis in the following season. The revenue had, therefore, been calculated on the actual receipts expected to be collected from the two companies named this season and on the average expectation for the last quarter of the year.

The Honourable L. W. H. Young said that he would like to congratulate the Honourable the Colonial Secretary on his very comprehensive speech. He thought it was a model of what it should be. There were one or two questions which he would like to ask in the Committee stage but before coming to that there were one or two small points he would like to mention.

In the matter of Baths. Two years ago he had criticised the new proposition and said that if it was a success he would admit it publicly. He was very pleased now to admit that it was a success, and he hoped circumstances would permit in the future of the provision of a swimming bath. It might sound a luxury but he did not think it was. Practically all of the people lived on the water or near the water and, therefore, he hoped that when times were better the Government might see their way clear to provide them with what he thought was a necessity.

Concerning the importation of labour, the Honourable Member said that in fairness to the farms who have imported labour it was only right to say that they had only imported labour under compulsion. All the farms he knew could not get local labour. So far as the Falkland Islands Company's farms were concerned he did not think that they would import as long as they could get labour locally. He was very pleased to see that the Government had seen their way clear to reduce the taxation on spirits. To farm labourers it might even be the means of saving a man's life, for a man cannot drink beer with the thermometer well below zero. In another year he hoped also that the Government might be able to see their way clear to abolish the tax on matches. It would be greatly appreciated. The Honourable L. W. H. Young stated further that when the Council met again, he supposed in another six months' time, he hoped that the world conditions would be very much better and that the outlook for farmers would be much happier.

On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Treasurer the Bill was read a *first* time.

The first reading of the Bill was agreed to.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

On motion made consideration of Clause 2 was postponed until after consideration of the Schedule.

The Honourable the Colonial Secretary moved the adoption of the Schedule item by item.

The following points were raised during the detailed discussion of the Schedule. Under Head VIII. the Honourable L. W. H. Young gave notice of his intention to put in a written question for reply at the next meeting of the Council in regard to the relative expenditure incurred and the revenue derived from the Stanley Electric Lighting Scheme.

Under Head XVII. the Honourable G. J. Felton raised the matter of the expediency of continuing provision for the planting of trees and grasses. The Honourable the Colonial Secretary pointed out that the provision under this subhead had been reduced from £100 in 1929 to £75 in 1930, and to £50 in 1932. His Excellency added that the provision had been inserted as a Token Vote, and not to meet the cost of any special work proposed. After discussion it was agreed that the item should stand but that no expenditure should be incurred against it except on the express authority of the Governor.

Under Head XXI. Public Works Extraordinary, the Honourable G. J. Felton said that he would like to have seen the amounts provided under sub-head 2. Improvement of Tracks to the Camp - £400, and sub-head 7. Road to Surf Bay - £2,000 transposed. After discussion and on the motion of the Honourable G. J. Felton seconded by the Honourable G. Roberts, it was unanimously resolved to amend the provisions as originally inserted so as to read :

"Item No. 2 - Improvement of Tracks to the Camp £900".

"Item No. 7 - Road to Surf Bay £1,500".

The Schedule was then agreed to.

Clause 2 was recommitted and agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

9. On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Treasurer the Bill "to amend the Tariff Ordinance, 1900, as amended by the Tariff (Import Duties) Amendment Ordinance, 1929", was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 3 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

10. The Honourable the Colonial Secretary moved the *first* reading of a Bill entitled, "A Bill to prevent the introduction of Venereal Disease into the Colony".

The Honourable the Treasurer seconded.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 4 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

## II. PUBLIC HEALTH.

### (A) General Remarks.

#### (1) GENERAL DISEASES.

There has been no serious outbreak of illness during the year. In the autumn a mild epidemic of acute nasal catarrh was experienced. The health of the people as a whole is good. Regular bi-annual tours of the northern portion of the camps are made by the Medical Officer, and the general health is reported as good. In the spring the Principal Medical Officer made a short excursion into the southern part of the East Island, and found generally, that the health standard is good. In future, also, the Dental Surgeon will make regular annual visits to the camps on East and West Island for the purpose of improving the dental condition of the populace.

*Appendicitis.* 27 cases were operated on. These cases were monotonous in their clinical similarity. All complained of more or less constant discomfort, or pain, in the right iliac fossa, associated with occasional attacks of malaise. On examination, tenderness of a varying degree was found over the appendicular region. At operation one appendix was found to contain oxyuris vermicularis, and all others exhibited evidence of chronic inflammation, associated with adhesions.

The Dental condition of the population is improving, but a great deal of work remains to be done. The constant Association of chronic appendicitis, and carious teeth has been noted. (Appendix 1).

*Government Officials.* The health of Government officials has been uniformly good. There were no deaths, and there were few cases of sickness of a severe nature. One female official was invalided to the United Kingdom on account of a recrudescence of ill-health, contracted during previous service abroad. It is considered that the leave and passage regulations, whereby the tour of service is shortened, contribute much to the satisfactory general state of health.

## (2) COMMUNICABLE DISEASES.

*Tuberculosis.* Three fresh cases were notified. One tuberculous laryngitis (male), one *tabes mesenterica* (female) and one pulmonary tuberculosis (female).

Four persons, three males and one female died of tuberculosis.

*Bronchial Catarrh, Bronchitis, Broncho-pneumonia.* As the winter was exceptionally fine there were fewer cases of bronchitis, etc., than is usual in the winter months.

*Grave Epidemic Disease.* There were no cases of grave epidemic disease.

*Malaria.* Malaria, and other insect-borne diseases are unknown in the Colony.

*Scarlatina, measles, diphtheria, whooping cough, chicken pox, and influenza.* No cases occurred.

*Venereal Disease.* In all four cases of gonorrhoea from ships were treated. Venereal disease among the Islanders does not exist. Legislation aiming at the prevention of its introduction has been enacted. Ordinance No. 11 of 1931.

## (B) Vital Statistics.

(1) The Islanders as a whole, as well as Government Officials, are European, or of European descent.

A census taken during the year of the population of the Colony, exclusive of the Dependencies, showed the number of inhabitants to be 2,392. The population is distributed mainly as follows :—

East Falklands (exclusive of Stanley) ...	...	702.
Stanley ...	...	1,213.
West Falklands ...	...	426.

The rate of increase of the population is the same for both sexes, and is 14.2%.

During the year 55 births and 20 deaths were recorded, giving the following rates :—

Population ...	...	2,392.
Birth Rate per 1000 ...	...	22.77
Death Rate per 1000 ...	...	8.28
Infantile Mortality Rate per 1000 births ...	...	36.36

Registration of Births, Deaths, and Marriages is compulsory under Ordinance No. 12 of 1853.

(2) Health of Government Officials. The general health of the officials has been good. There were no deaths.

## III. HYGIENE AND SANITATION.

## (1) PREVENTIVE MEASURES.

(a) *Insect-borne diseases.* These are unknown in the Colony.

(b) *Epidemic disease.* There were no epidemics.

*Small-pox and Vaccination.* Vaccination is compulsory under the Vaccination Ordinance, 1868.

(c) *Water-borne diseases.* None.

(d) *Tuberculosis.* Three fresh cases were notified. There were four deaths from tuberculosis, and as far as is known, there remain only one case of open tuberculosis (pulmonary), and one case of bone tuberculosis. The situation cannot be described as alarming.

(e) *Helminthic Diseases.* Apart from oxyuris, intestinal parasites are unknown.

(f) *Venereal Disease.* Legislation was enacted aiming at the prevention of the introduction of venereal disease among the Islanders. Ordinance No. 11 of 1931.

(g) *Recreation.* A good deal of attention is paid to outdoor and indoor recreation. A keen interest is taken in golf, hockey, badminton, riding and shooting. Football has assumed a prominent place among the outdoor recreations of Stanley. The new Public Baths and Gymnasium are well attended and provide a great source of pleasure and comfort in the lives of the inhabitants of Stanley. Visitors from the camp also are not slow to avail themselves of the comfort of the public baths.

## (2) GENERAL SANITATION.

(a) *Sewage Disposal.* Sewage is disposed of partly by water-carriage system, and partly by E.C. method. During the year the sewers in the town have been greatly extended, and it remains for the inhabitants to take greater advantage of the facilities supplied, as the major portion of the town has a water-carriage system. The night-soil from the E.C's. is removed by special carts under the control of the Public Works Department.

(b) *Scavenging.* Ashes and household refuse are stored in ashbins. The Sanitary Inspector enforced the bye-law, whereby these must be emptied once a month, whenever it seemed necessary to do so.

(c) *Roads and Drainage.* A great advance has been made in improving the roads generally and in constructing new roads and the necessary attendant drains and sewers.

(d) *Water Supply.* The water supply is wholesome and satisfactory. At an early date an extension of the water supply to the upper region of the town will be undertaken.

(e) *Slaughterhouses and Meat Inspection.* The three slaughterhouses now comply with the requirements of the Board of Health with regard to construction, drainage, and water supply.

Meat for human consumption was inspected at intervals by the Veterinary Officer, and Sanitary Inspector.

(f) *Dairies.* From time to time samples of milk were obtained and tested. The improvement in milk samples noted last year continues. The regulations regarding the selling of milk have again been made more stringent. Stanley Milk Supply Protection (Amendment) Bye-laws, 1931.

## (3) SCHOOL HYGIENE.

The Medical Officers and Colonial Dentist regularly inspected the Government School and St. Mary's School attached to the Catholic Church.

Inspection of each child is recorded on a special form. (Appendix II).

The hygienic condition of the schools was found to be, at all times, satisfactory. There is no doubt but that the care given by the school staffs to the physical culture and well-being of the school children contributes much to the good of the Public Health.

## (4) HOUSING.

The rate of building is adequate to immediate needs and there is nothing to add to what has been noted in previous reports. This problem, for the present, may be considered as settled.

Legislation was enacted giving powers to deal with houses unfit for human habitation. Ordinance No. 6 of 1931.

## (5) DIET IN HEALTH AND DISEASE.

The food problem, as stated in previous reports, in the Falkland Islands, is never one

of quantity and quality, but of balance and variety. Residents from Europe find difficulty, as a rule, in varying their diet sufficiently.

The need for the cultivation and eating of green vegetables, grown in a soil to which lime has been added, must be again emphasised.

#### (6) ANTI-RAT CAMPAIGN.

The Government bi-annual rat weeks have achieved great success in clearing the rubbish dump etc., of rats. The public, generally, has done little to help in this matter.

Owners and occupiers of premises under the Extermination of Rats and Mice Bye-Laws, 1928, are obliged to take steps to exterminate rats and mice.

#### (7) RECOMMENDATIONS FOR FUTURE WORK.

- (i) Completion of roads, drainage and water supply.
- (ii) Continuance of supervision of slaughterhouses and meat inspection.
- (iii) Close supervision of milk supply.
- (iv) Continuance of bi-annual rat week.
- (v) Continuance of dental supervision of school children.

### IV. PORT HEALTH WORK AND ADMINISTRATION.

17 vessels, with a registered tonnage of 41,841, and with crews totalling 807 were given pratique during the year. It was not found necessary to quarantine any vessel calling at the port. It is the invariable practice of the inspecting M.O. to see all the passengers landing at the port.

### V. MATERNITY AND CHILD WELFARE.

Twenty three maternity cases were treated in hospital. The out-patient department provides the necessary ante-natal and post natal services and this clinic is well attended.

### VI. HOSPITAL.

The King Edward VII Memorial Hospital comprises 12 beds, out-patient department, operating theatre, office, stores, and quarters for nurses.

Two outside buildings provide (a) Dental Surgeon's Office and workshop and quarters for Junior Nurses and maids, (b) drug store and laboratory.

6 patients remained in hospital from 1930, 173 were admitted in 1931. Of these 155 were cured, 19 relieved, 3 died, and 2 remained at the end of the year.

43 surgical operations were performed with good results.

72 dental operations were performed under general anaesthetic.

Anaesthetics were efficiently administered by J. M. Coutts, M.M., L.D.S., in the absence of the M.O. and by H. G. Edmunds, L.M.S.S.A., after appointment.

The deaths in hospital were due to, one tuberculous laryngitis, one valvular disease of the heart, and one pyonephritis.

In 1930 John Hamilton, Esq., of Weddell Island magnanimously gifted £200 to the hospital. This money was expended in the purchase of five hospital beds of a modern type, two invalid chairs, an instrument cabinet, dressing trolley, anaesthetist's stool, clock, medical reference books, and a diagnostic case. This exceedingly generous gift has been much appreciated by the patients and staff.

No structural alterations were made in the hospital.

*Out-patient Department.* The number of persons treated in the out-patient department was recorded as 1,061, and the total number of attendances as 2,096.

Minor operations are performed in the out-patient department.

## VII. PRISONS AND ASYLUMS.

There are no asylums in the Colony and no lunatics were under supervision.

The prison was regularly inspected and found to be in a clean and satisfactory condition. The health of the one prisoner was good during his brief sojourn in gaol.

## VIII. METEOROLOGY.

The Falkland Islands are situated about 300 miles east of South America in latitude 51°43 s. and longitude 57°51 w. (Stanley).

The climatic conditions during 1931 were exceptionally good. The autumn was fine and dry. The winter was exceptionally mild, and many days of brilliant sunshine were experienced, and also the last part of the year was good. The climate of the Falklands is rigorous, and the almost continuous high winds and lack of sunshine render it trying to people from Europe.

The meteorological returns are appended (Table II).

## IX. SCIENTIFIC.

The Phillips Metalix Portable X-Ray apparatus continues to render efficient service.

The actual photographic work, developing of films, printing etc., in connection with the X-Ray apparatus, is executed by the Hon. G. Roberts, Director of Public Works, to whom a special tribute is due for his valuable help.

The laboratory has all the necessary equipment and is used by both the Veterinary Officer and the Medical Staff.

## B. DEPENDENCIES.

No health reports from the Dependencies are available.

The whaling companies operating in the Falklands' Sector maintain their own medical organisations and these are, apparently, satisfactory.

The weather conditions during 1931 have been uniformly bad, but health conditions are relatively good, except that constant bad weather and lack of sunshine produce a state of mental depression, bordering on melancholia, in a number of cases.

The population, in summer, as shown by the census return 1931, is 1,337.

## Dental Report.

Mr. James M. Coutts, L.D.S., left the Colony on transfer in July, 1931, and Mr. S. W. Harding, L.D.S., arrived in the Colony on 21st December, 1931. Therefore Mr. Harding is not in a position to submit a report on the Dental condition of the Colony. Altogether, 72 dental operations were performed under general anaesthesia during the year by the Dental Surgeon and Principal Medical Officer. After the departure of Mr. Coutts, under the supervision of the Principal Medical Officer and Medical Officer, the dental Mechanic carried out such temporary repairs etc., as were of immediate necessity.

Mr. Coutts was unable to visit the Camps in 1931, because of the absence of a Medical Officer, as he, Mr. Coutts, was required to give anaesthetics for operations in the King Edward VII Memorial Hospital. Mr. Coutts performed this additional duty with great efficiency.

In future the Dental Surgeon will visit the Camps at least twice a year, if possible.

## ANALYSIS OF STANLEY WATER.

*From :- Messrs. Riley Harbord & Lane.**To :- The Crown Agents for the Colonies.**Date :- 12th January, 1925.*

## PORT STANLEY, FALKLAND ISLANDS.

This is a very pure sample of water, the solid matter in solution being very low. The undesirable feature is the quantity of ammonia which indicates contamination by organic matter. It is impossible to indicate the derivation of this organic matter without knowing something of the conditions under which it had been collected and stored.

---

NOTE. The sample of water referred to was sent to England before the gathering ground was fenced off and before any filtering medium was used. The organic contamination indicated by the high Ammonia content was found to be due to carcasses of dead sheep, an accident which has been precluded from repetition through fencing. Since then a sample has been analysed in Capetown through the courtesy of the scientists of the R.R.S. "Discovery" and the water was reported to be of a very pure quality.

## Report on Education in the Colony for 1931.

—:0:—

### General.

The educational facilities in the Falkland Islands fall, in view of the peculiar local conditions, into three groups :

- (1) Those at Stanley, the only township in the Colony.
- (2) Those at Darwin, the Falkland Islands Company's main settlement.
- (3) Those in the outside country districts with their very scattered farm settlements.

(1) **STANLEY :** A Government School is maintained from public funds, which, while being elementary in character, also makes provision for attendance at a full-time Continuation Class for a two-years course of further education. A scheme was instituted in 1924 to assist parents in the "Camps" or country districts to send their children to Stanley for schooling. These Camp children were boarded and lodged in a Government Hostel and taught in the school at an inclusive charge of ten shillings a month during residence : or, if boarded and lodged in private houses, the Government contributed two-thirds of the cost not exceeding two pounds a month. In 1929, however, it was decided that the Hostel had not received enough support to justify the cost of maintaining it, and it was closed down. The maintenance grants for Camp children privately boarded still remain, but at a reduced maximum allowance of £1 : 6 : 8 a month.

There is also a Convent school taught by Roman Catholic Sisters : this school is not subject to Government control and receives no subsidy.

(2) **DARWIN :** Here for many years past the Falkland Islands Company has maintained, in the interests of its employees, a small school with a resident master.

(3) **CAMP DISTRICTS :** Four itinerant teachers are provided by the Government, one for the East and three for the West Falkland. The teachers travel from settlement to settlement devoting a certain amount of time to each. The Falkland Islands Company also maintains two Camp teachers for the children of its employees in outlying districts.

### Government School.

2. The authorised teaching establishment of the Government School in 1931 was :

One Headmaster	}	Certificated.
One Assistant Master		
Two Assistant Mistresses		
Two Assistant Teachers	}	Locally Trained.
Two Supplementary Teachers		

The Assistant Master left the Colony in the middle of November and had not been replaced by the end of the year. There was a vacancy for one Assistant Teacher from March onwards caused by the resignation of Mrs. M. A. Osborne (née Short), whose fourteen years' devoted service to the school deserves high commendation.

3. The following table shows the number of pupils on the roll at the end of 1931 and the number in average attendance during the year :

		Boys.	Girls.	Total.
Number on roll on 31st December, 1931	...	120	69	189
Average number on roll during 1931	...	112.7	65.1	177.8
Average attendance during 1931	...	101.9	58.9	160.8

4. The attendance averaged just over 90 per cent for the year. The general health of the pupils was good and there were no school closures on account of sickness. All the children were medically examined in the course of the year, and in addition there were regular medical and dental visits for general inspection.

5. Several small structural alterations were made during the year. Casement

windows were placed in both the boys' and girls' cloakrooms, thus completing the plan for improved ventilation throughout the main building. In the infants' building the cloakroom was enlarged and a window and washbasin added to it. The school office was also improved by a new fireplace and other minor alterations.

6. The physical side of the school's activities was well maintained with the exception of woodwork, which it is hoped will be recommenced on the arrival of a new assistant master. The display of drill, gymnastics, dancing and singing, which was given for Vice Admiral Sir Vernon Haggard and some of his staff, was warmly praised, and the large audience at the annual prizegiving in December showed its usual enthusiastic appreciation of the children's skill in these matters.

### Finance.

7. The expenditure under Head XIII Education of the annual estimates of expenditure was £2,797 : 18 : 8 in 1931 as compared with £2,608 : 1 : 10 in 1930. The revenue collected in 1931 amounted to £179 : 6 : 4 as against £200 : 17 : 1 in 1930. Details of expenditure and revenue in 1931 are as follows :

EXPENDITURE.				£	s.	d.
1.	Personal Emoluments	...	...	2,245	3	0.
2.	Other Charges	...	...	552	15	8.

1.	School Fees	...	...	143	3	0.
2.	Sale of School Material	...	...	36	3	4.

### Travelling Teachers.

8. There was a staff of four Travelling Teachers employed throughout the year, one on the East Falkland and three on the West. Two of the West Falkland teachers were away on leave from July to the end of the year. The following are the numbers of Camp children under tuition by Government Travelling Teachers during 1931 :

Boys 52      Girls 42      Total 94.

### Saint Mary's Convent School.

9. The number of pupils attending the Convent School during 1931 was as follows :

	Boys.	Girls.	Total.
Number on roll on 31st December, 1931	22	52	74.
Number in average attendance 1931	18	50	68.

### Falkland Islands Company's School and Camp Teachers.

10. The number of pupils under instruction was as follows :

	Boys.	Girls.	Total.

Sir,

In conformity with Section 13 (1) of the Falkland Islands Currency Notes Ordinance, 1930, I have the honour to submit the Statement of my transactions for the period from the 19th May, 1931, when the Ordinance came into operation, until the 31st December, 1931.

2. No actual transactions took place, however, until August 1931, when coin to the value of £8,000, formerly held in the Colony, was received and disposed of by the Crown Agents, the proceeds being credited to the Note Security Fund. Investments of a cost price of £17,600, were during the same month transferred by the Crown Agents to the Note Security Fund from the Currency Note Investment Fund and the Currency Note Depreciation Fund.

3. The total value of the Note Currency nominally in circulation at the 31st December, 1931, was £24,000. The following is a description of the face value of the notes in circulation on that date:-

6. Coin of the value of £8,000, which was forwarded to the Crown Agents for sale and transfer of the proceeds to the Note Security Fund realized £7,997 : 0 : 9; against this, charge in connection with the disposal of the coin amounted to £17 : 6 : 0, leaving a net amount of £7,979 : 14 : 9.

7. The market value of the Investments held on account of the Note Security Fund, at the close of the year amounted to £16,832 : 1 : 11, and the liquid balance to £8,096 : 9 : 0, or a total of £24,928 : 10 : 11. This amount was less than 110 per centum of the face value of currency notes in circulation (£24,000) by a sum of £1,471 : 9 : 1. 4. The total Revenue for the year exceeded the total Expenditure by a sum of £5,721 : 1 : 10, thereby increasing the Surplus Balances from £269,239 : 4 : 10 on the 1st January 1931, to £274,935 : 6 : 8, on the 31st December 1931, as detailed below:-

Land Sales Fund	...	...	£235,730 : 0 : 10
Marine Insurance Fund	...	...	2,848 : 0 : 0
Reserve Fund	...	...	34,000 : 0 : 0
Falkland Islands, General Account	...	...	2,357 : 5 : 10
Total	...	...	£274,935 : 6 : 8

### Revenue.

5. The Ordinary Revenue for the Falkland Islands including the Dependencies contribution towards the cost of the Central Administration, amounted to £51,805 : 7 : 1. It was £10,289 : 5 : 0 less than that collected in 1930, and was less than the original Estimate for 1931, by a sum of £8,926 : 12 : 11.

6. The following heads of Ordinary Revenue failed to realize the amount originally Estimated by a sum of £9,832 : 14 : 3, viz:-

1. Customs Duties	...	£4,424 : 13 : 11	
2. Port Dues	...	396 : 15 : 0	
3. Internal Revenue	...	462 : 16 : 4	
5. Interest	...	1,931 : 2 : 9	
6. Post Office	...	1,320 : 13 : 5	
7. Telegraphs	...	1,296 : 12 : 10	
			£9,832 : 14 : 3

4. Fees Fines &c.	...	£ 36 : 0 : 0	
8. Rents	...	25 : 4 : 9	
9. Miscellaneous	...	844 : 16 : 7	
			£ 906 : 1 : 4
Net decrease			£8,926 : 12 : 11

7. HEAD I, CUSTOMS DUTIES. The receipts under this head were more than the receipts in 1930, by £1,400 : 6 : 2 but less than the original Estimate for 1931, by £4,424 : 13 : 11. The decrease under items "Spirits" and "Tobacco" was due to falling-off of imports, reduced purchasing powers of consumers and depression in trade. The decrease under item "Wool" was due to diminished exports. There were no receipts during the year under items "Whale Oil" and "Seal Oil" which were originally Estimated at £1,500 and £600 respectively. There were no exports of Seal Oil owing to the low prices obtaining in Europe. Excesses of importance were "Malt" £77 : 7 : 5 and "Matches" £200 : 6 : 3.

8. HEAD II, PORT DUES. The decrease of £396 : 15 : 0 under this head was mainly due to less shipping brought about by depression in the Whaling Industry.

9. HEAD III, INTERNAL REVENUE. There were no receipts under items "Sealing" and "Whaling", originally Estimated at £200 and £300 respectively. This accounts for the decrease of £462 : 16 : 4 under this head. Item "Stanley Rates" exceeded the Estimate by £20 : 11 : 9.

10. HEAD V, INTEREST. The decrease under this head was £1,931 : 2 : 9, and was partly due to available surplus funds for investment being less than anticipated, and partly to the fact that no interest was received on monies held in the Joint Colonial Fund during the last half of 1931. Item 2 "Note Security Fund" was over estimated. Item 6 "Miscellaneous", there were no receipts under this item due to the fact that an anticipated loan of £10,000 for Sealing in the Dependencies was not made. Excesses of importance were "Land Sales Fund" £511 : 12 : 3 and "Reserve Fund" £169 : 5 : 0.

11. HEAD VI, POST OFFICE. Sale of stamps accounted for a decrease of £1,287 : 10 : 0, and Parcel Post £53 : 19 : 7; on the other hand Commission on Money Orders showed an increase of £19 : 4 : 5. There was a falling-off of sales of stamps in the Dependencies due to the depression in the Whaling Industry.

12. HEAD VII, TELEGRAPHS & TELEPHONES. The decrease of £1,296 : 12 : 10 was mainly due to falling-off of Wireless traffic as a result of depression in trade. Excesses of importance were under items "Telephones" £21 : 8 : 1, "Wireless Licenses" £16 : 7 : 11, and "Electric Light" £89 : 8 : 11.

13. HEAD IX, MISCELLANEOUS. Commission on drafts shows a decrease of £759 : 7 : 3, due to a falling-off of remittances made by Whaling Companies, on the other hand excesses were received under items "Sale of Stores" £238 : 5 : 11, "Savings Bank" £239 : 10 : 8, "Sale of Houses" £577 : 7 : 6 and an unforeseen item "Transfer of Naval Wireless Station" £675.

### Expenditure.

14. The Ordinary Expenditure for the year amounted to £38,977 : 1 : 1. It was less than that expended in 1930, by £151 : 12 : 4, but exceeded the original Estimate for the year 1931, by £1,026 : 1 : 1.

15. The total Expenditure for the year amounted to £72,676 : 13 : 0. It was more than that expended in 1930, by £2,697 : 0 : 4, and exceeded the original Estimate for the year by £23,405 : 13 : 0. This excess was partly due to a transfer of £20,009 : 8 : 0 to the Falkland Islands Reserve Fund, and partly to a net excess under other items of £3,396 : 5 : 0.

16. Excess Expenditure over the original Estimate for the year was incurred under the following heads, viz:-

17. HEAD I, PENSIONS. Increase due to Pensions for 1930, not being paid until 1931, also to the unforeseen retirement of one official.

18. HEAD VII, WIRELESS TELEGRAPHS. Increase was mainly due to payment to Foreign Radio Telegraphic Administrations of claims for previous years.

—:O:—

1. Any Government officer who has made an invention
  - (a) may, at his own expense, and
  - (b) shall, at the expense of the Government if so required by the Governor, lodge an application for provisional protection with the Registrar of Patents, and shall at the same time send a copy of the application to the Governor through the Head of his Department. The Governor shall decide as expeditiously as possible whether the invention shall be regarded as secret, and his decision shall be forthwith communicated to the Head of the officer's Department for the information of the officer.
2. (1) As soon as practicable, the Governor shall decide whether the officer shall or shall not be allowed controlling rights in the patent, and his decision shall be communicated to the Head of the officer's Department for the information of the officer.  
(2) Pending the decision of the Governor as to such controlling rights, all rights in the invention shall be deemed to belong to and to be held in trust for the Government.
3. If the Governor decides that the officer shall be allowed controlling rights in the patent, the following provisions shall apply:-
  - (a) The officer shall, subject to the provisions of Rule 1 of these Rules, be responsible for all expenditure in taking out the patent.
  - (b) The Governor may attach to his decision such conditions as he may think fit and, in particular, may reserve to the Government a right of user of the invention free of royalty, or a right to a share of any commercial proceeds, or both such rights.
  - (c) The officer may, whether any rights are reserved under paragraph (b) of this Rule or not, apply to the Awards Committee as constituted under paragraph 7 of these Rules (hereinafter referred to as "the Committee") through the Head of his Department for an award in respect of his invention.
  - (d) The question whether an award shall be made, the amount thereof, and, if a share of commercial proceeds is reserved to the Government, the amount of such share shall be determined by the Governor after investigation by the Committee.
4. If the Governor decides that the officer shall not be allowed controlling rights in the patent, the following provisions shall apply:-
  - (a) The officer shall assign all his rights in the invention to the Government.
  - (b) The Government shall be responsible for all expenditure in taking out the patent.
  - (c) The Governor shall decide whether the officer shall or shall not be allowed a share of any commercial proceeds.
  - (d) The officer may, whether he is allowed a share in the commercial proceeds or not, apply to the Committee through the Head of his Department for an award in respect of his invention.

(e) The question whether an award shall be made, the amount thereof, and, if the Governor decides that the officer shall be allowed a share in the commercial proceeds, the amount of such share shall be determined by the Governor after investigation by the Committee.

5. In the event of a material change taking place in the circumstances which existed at the time when an award or allocation of commercial proceeds was made, the original decision may be modified by the Governor after further investigation by the Committee: provided that, in any such modification of the original decision, the amount of an award which has been paid shall not be reduced.

6. Where an invention is in all respects alien to the employment of the officer he shall normally be granted the full rights in such an invention.

7. There shall be constituted for the purposes of these Rules an Awards Committee which shall consist of such persons as the Governor may from time to time by notice in the Gazette appoint.

8. An officer shall be entitled at his own expense to appear personally before the Committee or to be represented in such manner as the Committee may approve.

9. All conclusions of the Committee shall be embodied in recommendations which shall be forwarded to the Governor.

10. The Committee may make rules for regulating their proceedings, but no such Rules shall come into force until they shall have been approved by the Governor.

11. In fixing the amount of any award or of the share of any commercial proceeds reserved to the Government under Rule 3 (d) or allowed to the officer under Rule 4 (e) (as the case may be), any reasonable expenses to which an officer may have been put in connexion with his inventions shall be taken into account.

12. Nothing in these Rules shall affect the duties and liabilities of any Government officer under the provisions of the Official Secrets Acts.

8. The Honourable the Colonial Secretary moved the *first* reading of the Bill "to amend the Tariff Ordinance, 1900, as amended by the Tariff (Import Duties) Amendment Ordinances, 1929 and 1931."

The Honourable the Acting Treasurer seconded.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

Clause 2 was agreed to with the following amendment to the second proviso :

In the fourth line between the words "manufactured" and "from" the insertion of the words "in any part of the British Empire including the Dominions, Colonies and Protectorates and Mandated Territories."

Clause 3 was agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

9. In introducing the Bill "to provide for the Service of the year 1933", the Honourable the Colonial Secretary said that before the Council proceeded to the formal business of the enactment of the Ordinance it might be of use to offer some explanatory remarks on the Estimates as a whole.

So far as concerned the Colony proper Honourable Members would see that the Estimates for the coming year had been made to balance. The Ordinary Revenue of £55,957 exceeded the total expenditure of £55,871 by £86. In order to obtain this result no changes of policy and no alterations in taxation were proposed other than the decrease in the customs tariff of 6d. a barrel on the export of whale and seal oil, the total rebate of duty on matches manufactured in and consigned from any part of the British Empire, and the grant of a preferential rate of duty on tobacco produced and manufactured within the British Empire.

The ordinary revenue of £55,957 for 1933 exceeded the approved estimate for 1932 by £2,819. This anticipated increase was entirely due to the extraordinary receipts expected to accrue from the sale of stamps, the estimate under HEAD VI. POST OFFICE, I. Sale of Stamps, having been placed at £5,500 as compared with £1,500 in 1932. A decrease in revenue was provided for under HEAD I. CUSTOMS DUTIES, Imports on Spirits, £1,000 and Tobacco £500, due to smaller importations and the preferential rate. Except for an increase of £800 under HEAD V. INTEREST, by reason of a larger holding of capital in the Land Sales Investment Fund no considerable variations were to be remarked under the remaining heads of revenue.

In anticipation of the approval of the Secretary of State the estimate of £9,000 for the contribution from the Dependencies to the cost of the Central Administration, had been retained.

It would be seen that the estimate of the expenditure for 1933 was £38,316 under the twenty ordinary heads or less by £341 than the approved estimate for 1932, and that under all heads it amounted to £55,871 or more by £4,107 than the approved estimate for 1932. The changes proposed under the ordinary expenditure were few and did not seem to call for special comment but he would be very glad to answer any questions under the several heads in the Committee stage of the Bill. Turning to the extraordinary expenditure the Honourable the Colonial Secretary went on to say that apart from the sum of £2,000 inserted under Appendix I for the Centenary Celebrations, the estimate of expenditure had been drawn up primarily with an eye to the unemployment problem. The unemployment situation had not exceeded expectations but there were, as yet, no indications of any appreciable alleviation. During the past year the Public Works Department had employed up to 120 men as compared with 50 or 60 in normal times. At the present time there were approximately 100 men on the books. This reduction had been made possible as a result of the employment of a number of men in South Georgia and on board the whaling factories. In 1933 it had been considered imperative to be prepared for the employment of an average number of 115 men and to this end provision had been made for various schemes of public utility. Work would also have to be found for skilled and semi-skilled labourers. To meet this demand such works, in addition to the completion of the improvements to the Town of Stanley, as further improvements in the Town, the construction of a Pavilion on the Recreation Ground, and additions and improvements to the Hospital, would be carried out.

Taking the several votes of the Public Works Department as a whole the proportion of money to be spent on wages to money to be spent on materials was as three is to one.

The Dependencies' estimate shewed an anticipated revenue over expenditure of £812. As compared with 1932 the estimate of the revenue shewed a decrease of £16,450.

Continuing the Honourable the Colonial Secretary stated that Honourable Members would observe finally that with the object of effecting economies wherever possible the permanent establishment had been reduced by four offices in the Colony and by one office in the Dependencies. It was not proposed to add any new office to the permanent establishment nor to declare any additional office to be pensionable during 1933.

In conclusion the Honourable Member said that in moving the first reading of the Bill he could say with confidence that the revenue had been carefully calculated and that he was very hopeful that the estimate of expenditure would suffice to meet all demands.

On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Acting Treasurer the Bill was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

On motion made consideration of Clause 2 was postponed until after consideration of the Schedule.

The Honourable the Colonial Secretary moved the adoption of the Schedule item by item.

The following points were raised during the detailed discussion of the Schedule.

Under HEAD XVII. STOCK, the Honourable G. J. Felton asked the question whether the duties of the Veterinary Officer included those of Stock Inspector. His Excellency replied in the affirmative and stated that in future years a note would appear in the estimates to such effect.

Under HEAD XVIII. MISCELLANEOUS, the Honourable Member said that he considered the provision for "Passages" in present conditions was too heavy a burden on the Colony's finances. The Honourable the Colonial Secretary replying pointed out that the

estimates for the year 1933 had been made to balance, but that if in a future year difficulty was experienced in balancing the budget economy in this direction was amongst others which would have to be considered.

The Schedule was then agreed to.

Clause 2 was recommitted and agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed,

10. On the motion of the Honourable the Colonial Secretary, seconded by the Honourable the Acting Treasurer, the Bill "to give effect to the International Labour Convention concerning the creation of Minimum Wage Fixing Machinery," was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 3 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

11. The Honourable the Colonial Secretary moved the *first* reading of the Bill "to amend the law relating to the protection in the Colony of Designs registered in the United Kingdom."

The Honourable the Acting Treasurer seconded.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 and 2 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

12. On the motion of the Honourable the Colonial Secretary seconded by the Honourable the Acting Treasurer, the Bill "to amend the law relating to the registration of Letters Patent granted in the United Kingdom," was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

Clause 2 was agreed to with the following amendment :

In the fourteenth and fifteenth lines the substitution of the words "the date of the patent" for the words "the date of issue of the patent."

In the eighteenth line the substitution of the words "the date of the patent" for the words "the issue of the patent."

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

13. The Honourable the Colonial Secretary moved and the Honourable the Acting Treasurer seconded the *first* reading of the Bill "to amend the Dangerous Drugs Ordinance, 1925, as amended by the Dangerous Drugs (Amendment) Ordinance, 1926."

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 5 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

## Report on Education in the Colony for 1932.

—:O:—

### General.

The educational facilities in the Falkland Islands fall, in view of the peculiar local conditions, into three groups :

- (1) Those at Stanley, the only township in the Colony.
- (2) Those at Darwin, the Falkland Islands Company's main settlement.
- (3) Those in the outside country districts with their very scattered farm settlements.

(1) **STANLEY :** A Government School is maintained from public funds, which, while being elementary in character, also makes provision for attendance at a full time Continuation Class for a two-years course of further education. A scheme was instituted in 1924 to assist parents in the "Camps" or country districts to send their children to Stanley for schooling. These Camp children were boarded and lodged in a Government Hostel and taught in the school at an inclusive charge of ten shillings a month during residence: or, if boarded and lodged in private houses, the Government contributed two-thirds of the cost not exceeding two pounds a month. In 1929, however, it was decided that the Hostel had not received enough support to justify the cost of maintaining it, and it was closed down. The maintenance grants for Camp children privately boarded still remain, at a maximum allowance of £1 : 6 : 8 a month.

There is also a Convent school taught by Roman Catholic Sisters: this school is not subject to Government control and receives no subsidy.

(2) **DARWIN:** Here for many years past the Falkland Islands Company has maintained, in the interests of its employees, a small school with a resident master.

(3) **CAMP DISTRICTS:** Four itinerant teachers are provided by Government, one for the East and three for the West Falkland. The teachers travel from settlement to settlement devoting a certain amount of time to each. The Falkland Islands Company also maintains two Camp teachers for the children of its employees in outlying districts.

### Government School.

2. The authorised teaching establishment of the Government School in 1932 was

A Headmaster	}	Certificated.
One Assistant Master		
Two Assistant Mistresses		
Two Assistant Teachers	}	Locally trained.
Two Supplementary Teachers		

The school was without an Assistant Master from the beginning of the year until the middle of July, and there was a vacancy for one locally trained Assistant Teacher throughout the year.

3. The following table shows the number of pupils on the roll at the end of 1932 and the number in average attendance during the year :

		BOYS.	GIRLS.	TOTAL.
Number on Roll, 31st December, 1932	...	120	64	184
Average number on roll, all 1932	...	124.3	63.1	187.4
Average attendance, all 1932	...	116.0	59.7	175.7

4. The attendance averaged 93.7 per cent for the year. The general health of the children was good and there were no school closures on account of sickness. All the children were medically and dentally examined in the course of the year, and in addition there were regular medical and dental visits for general inspection.

5. The surface of the south-east corner of the school yard was cemented during the year, the whole area being now completed. A start was made with the alteration of the arrangement for opening the tops of the windows, which will further improve the ventilation of the school buildings. Electric light was installed in all the rooms.

6. The teaching of woodwork was restarted in July. A netball ground was constructed in the school yard early in the year and it has proved most useful, as the girls can often get out for a game for a few minutes when there might not be time, or the weather might be too doubtful, for going to the paddock. In the absence of an Assistant Master for the first half of the year the boys' football was taken voluntarily by one of the police constables. All the other manual and physical activities of the school have been maintained.

### Finance.

7. The expenditure under Head XIII Education of the annual estimates of expenditure was £2917 : 9 : 7 in 1932 as compared with £2797 : 18 : 8 in 1931. The revenue collected in 1932 amounted to £183 : 5 : 1 as against £179 : 6 : 4 in 1931. Details of expenditure and revenue in 1932 are as follows :

<i>Expenditure :</i>				£	s.	d.
1.	Personal Emoluments	...	...	2296	12	10.
2.	Other Charges	...	...	620	16	9.
Total				2917	9	7.
<i>Revenue :</i>				£	s.	d.
1.	School Fees	...	...	150	14	6.
2.	Sale of School Material	...	...	32	10	7.
Total				183	5	1.

8. The full staff of four Travelling Teachers was at work all the year, one on the East Falkland and three on the West. The following are the numbers of Camp children under tuition by Government Travelling Teachers during 1932:

Boys	53	Girls	41	Total	94.
------	----	-------	----	-------	-----

### Saint Mary's Convent School.

9. The number of pupils attending the Roman Catholic Convent School during 1932 was as follows :

	BOYS.	GIRLS.	TOTAL.
Number on roll, 31st December, 1932	17	60	77
Number in average attendance 1932	14	54	68.

### Falkland Islands Company's School and Camp Teachers.

10. The number of pupils under instruction was as follows :

	BOYS.	GIRLS.	TOTAL.

## Report on the Centenary Stock Show.

—::O::—

At a meeting of the Centenary Committee it was decided to hold a stock show during Centenary Week. A stock show sub-committee was formed with the Colonial Secretary as chairman. This committee, representative of the East and West Islands and of Stanley, was responsible for the organisation of the show. The difficulties of communication prevented full and frequent meetings of the committee but the final arrangements proved adequate. The committee decided to hold, in conjunction with the show, sheep-dog trials and these were run off on the afternoon of the show day.

The show was held on the 14th of February, 1933, in the Quarantine Station at Stanley. There was a good entry in the sheep and horse classes but in the class for dairy cows the entry was disappointing.

The gates were opened to the public at 9 a.m., when judging commenced. The Judge, Mr. Tom C. Norris of Buenos Aires, proved to be very popular and painstaking and carried out his duties in a most thorough manner. The judging, which was carried out in public, was at once interesting and instructive.

There were two main classes of sheep entries; one for fine woolled, the other for medium woolled sheep. As expected, there were few entries in the fine woolled class, but a representative number of entries was received in the medium woolled class. The competition in the latter class was keen and the awards were well divided amongst the exhibitors. The lamb and mutton sections were also large and here again the competition was keen. Messrs J. L. Waldron, Ltd. of Port Howard, West Falkland, won the championship cups for the best ram and best ewe at the show. Nine first prize awards also went to Port Howard.

The judge commented very favourably on the exhibits. In an interview Mr. Norris made the following remarks:-

"I think the winning sheep extremely good; a very nice type of a commercial class of animal, with a good frame and heavy fleece of high class wool; a very compact sheep, deep, broad and shapely with a masculine appearance about him. The wool is of medium strength, well marked and nice feel. Altogether he is a credit to the establishment where he was bred.

"The champion ewe is a similar type of sheep; also compact and broad, standing squarely, very well covered with a heavy fleece of nice feel.

"In both sheep the charm was the way the wool opened. There was nothing matted or fuzzy and the quality was carried right up to the tips.

"I should consider that Camp which is producing stock of the quality of these exhibits should be quite capable of producing a wool which can successfully compete in the markets of the world with the best wools of most other sheep-breeding countries *i.e.* of course, when the quality which is now evident in these picked animals has been established right through the ordinary breeding flocks, for the value of a wool clip is not governed by the merits of the few selected animals but rather by the general quality of the whole flock.

"I first saw Falkland Islands wool at the London Sales in 1906 and the quality of what I have seen at this local exhibition is evidence of an extraordinary amount of progress having been effected since that time.

"As regards the lambs, they are, of course, too small as yet to be able to make any definite classification as to their real quality and the only system on which I could operate was by selecting those showing the most robust development with the broadest backs and deepest conformation, combined with the feel and marking of the little amount of wool they were carrying.

Altogether I think the Colony should be proud of the fact that the sheep-farmers are producing animals of such good quality as those in the exhibition."

At 11 a.m. His Excellency the Governor arrived at the show ground and took great interest in the exhibits. At 11-30 a.m. the parade of cart and riding horses took place. This parade evoked much interest from the public as some excellent examples of Falkland Islands horse gear were on view and some splendid types of Falkland Islands bred horses paraded. Mr. J. Robertson assisted Mr. Norris at the judging of these classes. Mr. G. Goddard and the Veterinary Officer judged the dairy cows.

It had been decided to hold a sale by auction after the show but as no buyers came forward the auction was cancelled.

The success of the show was largely dependent on the transport facilities. The difficulties of transport in the Colony were surmounted by the excellent arrangements made by the Falkland Islands Company whose vessel, the s.s. Lafonia, made several voyages and called at all the main ports. The s.s. Fleurus also made special voyages.

The course for the sheep-dog trials was laid out in the Government paddocks and was designed to conform, as far as possible, with normal working conditions. The spectators arranged themselves outside the paddock fences on the common where a good view of the course could be obtained. There were sixteen entries. The judges were the Hon. G. J. Felton, Mr. R. C. Pole-Evans, Mr. Tom C. Norris and the Veterinary Officer. Most of the dogs accustomed to working in the vastness of the camp were not seen at their best working in the small paddocks with houses adjacent to the course. Mr. S. Miller won with 'Speed' and Mr. Hall was runner-up. The competitors were agreed that the course was a good test, although no dog completed the course. Several competitors were unlucky with their lot of sheep with the result that the standard of work was below that expected. The judges were of the opinion that the most apparent weaknesses were those of driving and command.

That the show proved a success may be judged from the fact that it was the wish of most of the exhibitors that a similar show might be held every three years.

J. MORTON,

*Veterinary Officer.*

**II. PUBLIC HEALTH.****(A) General Remarks.****(1) GENERAL DISEASES.**

The general health of the Islanders has maintained its usual good standard. There have been no epidemics during the period under review. The Medical Officer made two tours of the North Camp, and has reported the general health to be good in that district. The usual cases of appendicitis, local injuries, chest complaints and rheumatism, came under treatment.

*Appendicitis.* This is by far the commonest abdominal disease in the Falklands. Twenty five cases came to operation. All exhibited signs of chronic inflammation, in conjunction with, as a rule, torsion of the appendix, and adhesions. A large number of people also exhibit an appendicular syndrome, viz; chronic discomfort, or pain and tenderness, intermittent in character, in the right iliac fossa, associated with varying degree of constipation. These symptoms, in course of time, become so insistent that the patient gladly submits to operation.

*Constipation.* Constipation is a very common condition. The case incidence of diarrhoea is very low. The patient assures his medical attendant that he is quite regular in the habit of evacuating his bowles. On careful enquiry, one finds that the patient is not regular, or the evacuation is meagre, or both.

The general prevalence to constipation is due to

- (i) *Diet.* The diet lacks bulk, and is usually a mutton one, accompanied by bread and tea. Not enough raw, or cooked green vegetables, is eaten.
- (ii) *Climatic conditions.* The prevailing low atmospheric temperature induces a habit of laziness in going to stool, combined with the fact that most people have to use outside E.Cs, which are themselves cold, draughty, evil smelling and uninviting.

*Rheumatism.* Muscular rheumatism is relatively common in the Falklands. The disease usually makes its appearance in such parts of the body as are exposed to strain and injury. Crippling bone and joint rheumatism are conspicuously infrequent. Further, rheumatic infections such as rheumatic fever, and chorea are unknown.

*Dental.* The Dental condition of the Islanders, owing to the untiring efforts of the Dental Surgeon, is improving. The regular tours of the East and West Falklands, which are being made by the Dental Surgeon, are of great benefit to the Camp people. Regular inspections of the teeth of the school children are made. The Dental Surgeon's report is appended (Appendix I).

*Eye Diseases.* Diseases of the eye are practically non-existent. It is noted, however, that the incidence of errors of refraction is increasing. Suitable corrective lenses are prescribed for these cases.

*Government Officials.* There were no deaths, and no invaliding among the Government Officials. There were few cases of severe illness. Generally the severe climate, lack of sunshine, limited recreational facilities, and necessarily narrowed mental field all contribute to produce a mild degree of melancholia in officials from the United Kingdom. It is considered that the Leave and Passage Regulations in their present form are most necessary, and contribute a great deal to the improved general health of the Officials, and alleviate greatly the depressing climatic influences.

## (2) COMMUNICABLE DISEASES.

*Tuberculosis.* Four cases - all females - were notified in 1932. The localisation of the disease was three pulmonary, and one pulmonary and abdominal. One female died of pulmonary tuberculosis.

*Bronchial Catarrh, Bronchitis, & Broncho-pneumonia.* There was no unusual incidence of these diseases, possibly owing to the fact that the winter was not unduly severe.

*Pneumonia.* While occasional cases of broncho-pneumonia are encountered, a case of true lobar pneumonia has yet to be recorded.

*Malaria.* Malaria and insect-borne diseases are unknown in the Colony.

*Scarlatina, measles, whooping cough, chicken pox and influenza.* No cases.

*Venereal Disease.* With the exception of those from ships, there were no cases of venereal disease.

*Ringworm.* An indefinite number of cases was reported on the East Falklands during the year. These were contact infections with cattle ringworm. The necessary curative, and preventative measures were taken, and are still being continued.

## (B) Vital Statistics.

1. General Population. The Islanders, as well as Government Officials, are European, or of European descent.

The estimated population of the Colony apart from the Dependencies on the 31st December, 1932, was 2,428.

In 1932, 51 births and 12 deaths, including one infant under twelve months, were recorded, giving the following rates:-

Population	...	...	...	...	2,428
Birth Rate per 1,000	...	...	...	...	21.11
Death rate per 1,000	...	...	...	...	4.55
Infantile Mortality rate per 1,000 births	...	...	...	...	19.6

2. The population of the Dependencies was estimated to be 475 on the 31st December, 1932, and the number of deaths registered for the year was two, and the number of births nil.

### III. HYGIENE AND SANITATION.

#### (1) PREVENTIVE MEASURES.

(a) *Insect-borne diseases.* These are unknown in the Colony.

(b) *Epidemic disease.* There were no epidemics. Small pox and vaccination. Vaccination is compulsory under the Vaccination Ordinance 1868. The Ordinance is enforced as far as possible.

(c) *Water-borne diseases.* None.

(d) *Tuberculosis.* Four cases were noted during the year. Three were pulmonary, and the disease in these cases is at present arrested. The fourth case is pulmonary and abdominal. This case has not improved under treatment. One case of pulmonary tuberculosis died during the year.

Every effort has been made to improve the sanitary and housing conditions in Port Stanley, and thus arrest any possible extension of this disease.

(e) *Helminthic Diseases.* Apart from oxyuris, intestinal parasites are unknown.

(f) *Venereal Diseases.* There are no venereal diseases in the Islands. Occasionally cases from ships are treated at the hospital. There is the necessary legislation to suppress these diseases if necessary. Ordinance No. 11 of 1931.

#### (2) GENERAL SANITATION.

(a) *Sewage Disposal.* Sewage is disposed of partly by water carriage system, and partly by E.C. method. The number of inhabitants taking advantage of the water carriage system is gradually increasing. The night soil from the E.C.s is removed by tumbler carts under supervision of the Public Works Department.

(b) *Scavenging.* Ashes and household refuse are stored in ashbins. These must, under a Public Health Bye Law, be emptied once a month. A more regular scavenging system would be an advantage, but the extra cost would be hard to justify, as, so far, no definite detriment to the public health has been attributed to the present method, even, although, householders, in a few instances, have been rather lax in emptying their ashpits as regularly as they might have done.

(c) *Roads and Drainage.* The roads, and necessary attendant drains and sewers throughout the town have been practically completed. At present a road from the east of the town to a near and pleasant sand beach is being constructed. This, when completed, will have both a great utility and recreational value.

(d) *Water supply.* The water supply is wholesome, and satisfactory. During the year a high pressure tank was erected behind the town, and now the upper reaches of the town have a water supply.

(e) *Slaughterhouse and Meat Inspection.* The three licensed Slaughterhouses now comply with the requirements of the Board of Health as regards construction, drainage and water supply. Meat for human consumption is inspected at intervals by the Veterinary Officer and Sanitary Inspector.

(f) *Dairies.* It is certain that there is some improvement in samples of milk examined. Nevertheless, the milk supply cannot be regarded as wholly satisfactory. Something in the nature of a compulsory milk-pool, and Pasteurisation of all supplies for the town of Stanley would be required to ensure a reasonably pure milk supply. The economics of this question would require much consideration before such a scheme could be entertained.

#### (3) SCHOOL HYGIENE.

The Medical Officers, and Dental Surgeon, regularly inspected the Government School, and St. Mary's School attached to the Catholic Church. Inspection of each child is recorded

on a special form (Appendix II). The hygienic condition of the schools was found to be, at all times, satisfactory.

The Medical Department is grateful to the School Staffs for the great contribution they make to the public wellbeing, by the efficient manner in which the hygienic condition of the schools, and the health of the pupils is maintained at a very high standard.

#### (4) HOUSING.

There is no housing problem in Stanley. The houses are as a whole in very good condition, and numerically are adequate to present needs. The Government Officials are suitably and adequately housed.

#### (5) DIET IN HEALTH AND DISEASE.

Mutton is the staple diet in the Falklands. The quality and quantity of the diet are of a high standard. The diet defects are lack of balance and variety. The people must realise that they should cultivate and eat more green vegetables, either raw or cooked, if they wish a decrease in the incidence of dental troubles, constipation, and their sequel chronic appendicitis.

#### (6) ANTI-RAT CAMPAIGN.

The bi-annual rat weeks are being persevered in, and the rats are poisoned in, and about the rubbish dumps etc. These rat weeks help to keep the rat population in satisfactory check.

#### (7) RECOMMENDATIONS FOR FUTURE WORK.

- (i) Continuance of supervision of slaughterhouses, and meat inspection.
- (ii) Continuance of supervision of milk supply.
- (iii) Continuance of bi-annual rat week.
- (iv) Continuance of medical inspection, and free dental treatment of school children.
- (v) Continuance of such road and drainage work as are necessary to complete the Stanley Scheme.

### IV. PORT HEALTH WORK AND ADMINISTRATION.

17 vessels with a registered tonnage of 44,637, and with crews totalling 828 were given pratique during the year. It was not found necessary to quarantine any vessel calling at the Port. It is the invariable practice of the inspecting Medical Officer to see all passengers landing at the Port.

### V. MATERNITY AND CHILD WELFARE.

During the year nineteen maternity cases were treated in the hospital. There were no unusual complications. All confinements, except Camp case, as a rule, are treated in the hospital. The out-patient department of the hospital provides the requisite ante-natal and post-natal services.

### VI. HOSPITAL.

The King Edward VII Memorial Hospital comprises 12 beds, operating theatre, quarters for Nursers, stores, and out-patient department.

Two outside buildings provide (a) Dental Surgeon's Office and workshop, and quarters for maids, (b) drugs store, and laboratory.

A separate report on a scheme whereby a labour ward additional ward space, and out-patient department could be arranged in the hospital, as well as the provision of detached quarters for the nursing staff, has been submitted for the consideration of the Government.

Special commendation is due to Dr. H. Glyn Edmunds, Medical Officer, for the manner in which he carried on the affairs of the hospital during the absence of the Principal Medical

Officer on leave. Also worthy of special mention in this connection are Mr. S. W. Harding, Dental Surgeon, and Miss M. L. Reeve, Nurse Matron.

188 patients were admitted to the hospital during the year; of these 161 were cured, 21 were relieved, and 2 were not improved, and four died. See Table III.

The average stay of those discharged was 7.5 days. 29 surgical operations were performed with good results.

Anaesthetics were efficiently administered by Dr. H. Glyn Edmunds, Medical Officer, and Mr. S. W. Harding, Dental Surgeon.

The deaths in hospital were due to one pulmonary tuberculosis, one nephritis and cystitis, and two to violence.

No structural alterations were made in the hospital during the year.

*Out-patient Department.* The number of patients treated in the out-patient department was recorded as 1,350, and the total number of attendances as 3,257. Minor operations are performed in the out-patient department. Under the present system of medical service the demands on the space of the out-patient department are steadily increasing. An enlarged out-patient department would be a great boon to both staff and patients.

## VII. PRISONS AND ASYLUMS.

There are no asylums in the Colony. Two lunatics were under observation during the year. As soon as these could be properly certified as lunatics they were shipped to the United Kingdom for care and treatment.

The Prison was regularly inspected and found to be in a clean and satisfactory condition. The health of the one prisoner was good during his brief incarceration.

## VIII. METEOROLOGY.

The Falkland Islands are situated about 300 miles East of South America in latitude 51 degrees 43 minutes South, and longitude 57 degrees 51 minutes west (Stanley).

The climatic conditions during 1932 were unusually good, especially the last three months of the year. The climate, though healthy, is rigorous, and the constant high winds and lack of sunshine render it somewhat trying to people from Europe. The meteorological returns are appended (Table II.)

## IX. SCIENTIFIC.

The Phillips Metalix Portable X-Ray apparatus continues to render efficient service, and has been most helpful in the diagnosis of bone and joint lesions.

The Laboratory is sufficiently equipped. As the building in which it is situated is somewhat damp and cold, it is thought that it would be to the advantage of the staff, if it were placed in the main building. Also this would aid in the preservation of apparatus which is suffering from the effects of damp.

## B. DEPENDENCIES.

No health reports from the Dependencies are available. The whaling factories operating in the Falklands' Sector maintain their own medical organisations, and these are efficient, as far as is known.

The weather conditions in the Dependencies during 1932 have not been good.

The population during the summer, as shown by the Census Return was 475, against 1,337 in 1931, the decrease being due to the fact that less work is being done on the land stations.

## APPENDIX I.

In January I made a short visit to Darwin. During October and November I visited Hill Cove, Chartres, Roy Cove, Port Howard and Fox Bay East and West.

In conjunction with the Medical Officer I visited the Government School, and Saint Mary's Catholic School, and examined each child's mouth. Except for a percentage of irregular teeth, which I understand is decreasing since the abolition of long tube feeding bottles, I was agreeably surprised at their condition otherwise.

I noticed that children who do not eat green vegetables lost their teeth very early. The condition is rare, I am glad to say, and in such cases the parents were to blame.

Saturday morning was set aside as a clinic for children.

There was a very regular attendance, totalling 207. The adult attendance was 710 for actual work done in Stanley; on the West Falkland 61.

There were 94 dental operations under general anaesthesia in Stanley and 16 on the West Falkland.

### The Falkland Islands.

2. The ordinary Revenue for the Falkland Islands amounted to £64,199 : 1 : 10. Included in this amount is a sum of £9,000 transferred from Dependencies funds towards cost of the Central Administration, and a sum of £13,633 : 2 : 6, being appreciation in value of certain investments transferred through the Investments Adjustment Account.   2. The Honourable the Principal Medical Officer, by command, laid on the Table the following papers :
    - Copies of all Regulations, Orders and Bye-laws made or approved by the Governor in Executive Council since the last meeting of the Legislative Council.
    - Copies of despatches received from the Secretary of State for the Colonies, intimating the non-disallowance by His Majesty of Ordinances, Nos. 5, 6, and 9 of 1932 and 1, 2, 3, 4, and 5 of 1933.

  3. The Honourable the Principal Medical Officer moved and the Honourable the Director of Public Works seconded the adoption of the following Resolution :

“and its Dependencies for the year ending the 31st of December, 1933.  
“Be it resolved –  
“This Council hereby sanctions the expenditure from public funds of the  
“sum of FIVE HUNDRED AND FIFTY-THREE POUNDS, THIR-  
“TEEN SHILLINGS AND SIXPENCE, (£553. 13s. 6d.) to meet the  
“several charges itemized in the accompanying schedule.”

The Resolution was adopted.
  4. The Honourable the Principal Medical Officer moved and the Honourable the Director of Public Works seconded the adoption of the following Resolution :

“Be it resolved that under the provisions of the Stanley Rating Ordinance,  
“1928, this Council hereby sanctions the following rate to be charged for the  
“year 1934, on house property in the town of Stanley, namely, One Shilling  
“and Nine Pence for every Twenty Shillings of the annual value of such  
“house property.”

The Resolution was adopted.
  5. On the motion of the Honourable the Principal Medical Officer seconded by the Honourable the Director of Public Works, the Bill “To amend the Tariff Ordinance, 1900, as amended by the Tariff (Import Duties) Amendment Ordinances, 1929 and 1931, was read a *first* time.
- On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.
- Clauses 1 to 4 were agreed to.
- The title was agreed to.
- The Council resumed.

The Bill was then read a *third* time and passed.

6. In introducing the Bill "To provide for the Service of the Year, 1934," His Excellency said that before the Council proceeded to the formal business of the enactment of the Bill it might be of use to offer some explanatory remarks on the Estimates as a whole.

So far as concerned the Colony proper Honourable Members would observe that the Estimates for the coming year had been made to balance. The Ordinary Revenue of £51,978 exceeded the total expenditure of £51,932 by £46. This result had been obtained without the necessity for imposing extra taxation.

In preparing the estimates of the revenue for the year 1934 it had been necessary to proceed with extreme caution in view of the uncertainty as to the future. The figure inserted for the ordinary revenue for 1934 was £51,978 as compared with £55,957 in 1933. This decrease was more than accounted for by the anticipated falling off of import duties on Wines and Spirits, due to smaller importations, and of export duty on Seal Oil, under HEAD I. CUSTOMS DUTIES, and to the reduction under HEAD VI. POST OFFICE. 1. Sale of Stamps. Consequent on the withdrawal of the Centenary Stamp issue at the end of the current year it was expected that revenue from the sale of stamps would revert to a more normal figure in 1934. An increase of £550 was provided for under HEAD IV. FEES, FINES, REIMBURSEMENTS, 8. Hospital and Medical. This increase was due to the contribution of £400 from the West Falkland Farmers towards the salary of the newly appointed Government Medical Officer for the West Falkland, and to further receipts expected to accrue from Hospital fees, based on the revised figure for 1933. No considerable variations were to be remarked under the remaining heads of revenue.

In anticipation of the approval of the Secretary of State the estimate of £9,000 for the contribution from the Dependencies to the cost of the Central Administration had been retained.

It would be seen that the estimate of the expenditure for 1934 was £37,292 under the twenty ordinary heads or less by £924 than the approved estimate for 1933, and that under all heads it amounted to £51,932 or less by £3,389 than the approved estimate for 1933. The estimate of ordinary expenditure had not been as low as this figure since the year 1926 when it amounted to £36,678.

The reduction in the ordinary expenditure had been made possible by the proposed re-organization of the Post Office, Electrical and Legal Departments, and by the retrenchment of the office of Veterinary Officer. Under HEAD VI. POST OFFICE, Personal Emoluments, it was proposed to abolish the office of First Clerk and to appoint the present holder, Miss E. M. Carey, to be Postmaster with salary in the scale of £250-£10-£300 and a Personal Allowance to £30 in recognition of her length of service. Under HEAD VIII. ELECTRICAL, Personal Emoluments, for reasons of economy, it was proposed to abolish the office of Superintendent and to suggest the appointment of the Senior Wireless Operator, to be Chief Electrician with an Allowance of £50, per annum, and further to create a new office of Electrician and to regrade the salary of the Telephone Linesman. On the other hand it had been suggested that the Electrical Department should be placed under the Director of Public Works. Until a definite decision was arrived at Mr. Butcher would continue to act as Officer in Charge of the Department. The duties of Magistrate and Registrar-General, etc., and of Harbour Master, would be performed by the Treasurer and Collector of Customs without additional remuneration and those of Registrar, Supreme Court, by the Chief Clerk in the Treasury and Customs Department with an allowance of £50. The Office of Veterinary Officer under HEAD XVII. STOCK, had been substituted by that of Inspector of Stock with salary in the scale of £300-£25-£350, and a horse allowance of £12.

With regard to the extraordinary expenditure the estimate of expenditure had been drawn up primarily with an eye to the employment problem which as yet shewed no indications of any appreciable alleviation, and to this end provision had been made for various schemes of public utility.

The Dependencies' estimate shewed an anticipated revenue over expenditure of £3,590. As compared with 1933 the estimate of the revenue shewed an increase of £1,325 and the estimate of the expenditure a decrease of £1,453. During the current season two companies would conduct whaling operations under licences from the Falkland Islands

Government and so be liable to pay duty. The revenue had therefore, been calculated on the actual receipts expected to be collected from the two companies this season and on the average expectation for the last quarter of the year.

In conclusion His Excellency said that he could say with confidence that the estimates had been framed on sound lines and the revenue carefully calculated. Furthermore His Excellency was hopeful that the Expenditure would suffice to meet all demands.

On the motion of the Honourable the Principal Medical Officer seconded by the Honourable the Director of Public Works the Bill was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

On motion made consideration of Clause 2 was postponed until after consideration of the Schedule.

The Honourable the Principal Medical Officer moved the adoption of the Schedule item by item.

The Schedule was agreed to.

Clause 2 was recommitted and agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

7. The Honourable the Principal Medical Officer moved the *first* reading of the Bill "To amend the Falkland Islands Currency Notes Ordinance, 1930."

The Honourable the Director of Public Works seconded.

On further motion made and seconded the Standing Orders were suspended and the Bill was read *second* time and committed.

Clauses 1 and 2 were agreed to.

The title was agreed to.

The Council resumed.

The Bill was then read a *third* time and passed.

## Report on Education in the Colony for 1933.

### General.

The educational facilities in the Falkland Islands fall into three groups:

- (1) Schools in Stanley, the only town in the Colony.
- (2) A School at Darwin, the largest settlement outside Stanley.
- (3) Itinerant tuition in the country districts or camp.

(1) **STANLEY.** A Government School is maintained from public funds. The curriculum and management are much the same as in an English elementary school, but in addition there is a full-time Continuation Class which provides a two-years course of further education. A scheme was instituted in 1924 to assist parents in the camp to send their children to Stanley for schooling. The children were boarded and lodged in a Government hostel and taught in the School at an inclusive charge of ten shillings a month during residence: or, if accommodated in private houses, the Government made a grant towards the cost. In 1929 the Hostel was closed owing to lack of support but the maintenance grants still remain.

There is also a Convent School taught by Roman Catholic Sisters: this school is not subject to Government control or inspection and receives no subsidy.

(2) **DARWIN.** Here for many years the Falkland Islands Company has maintained a school for the children of its employees.

(3) **THE CAMP.** Four itinerant teachers are provided by the Government, one for the East Falkland and three for the West. The teachers travel on horseback from house to house, usually staying a fortnight at each. The houses are from six to twelve miles apart, though it may - and often does - happen that a man has to travel much further than that before he comes to a house with children. Each teacher has a definite beat, which he covers three or four times a year. He sends a fortnightly report to Stanley, giving a detailed account of the work done, the books used, lists of books or materials required and so on. The Superintendent of Education makes tours of inspection, normally visiting every child under tuition once in two years. In addition to the Government staff, the Falkland Islands Company maintains two camp teachers for work on its extensive farms on the East Falkland.

### Government School.

2. The authorised teaching establishment of the Government School in 1933 was

A Headmaster	}	Certificated.
One Assistant Master		
Two Assistant Mistresses		
One Assistant Teacher	}	Locally trained.
Three Supplementary Teachers		

The Headmaster was away on leave from February to August, during which time the Assistant Master, Mr. T. D. Evans, acted as Superintendent of Education and Headmaster. Mr. Evans deserves credit for the efficient manner in which he performed these duties. There was a vacancy in the post of Assistant Teacher in November and December caused by the resignation of Mrs. D. M. Dixon after twelve years' able and conscientious service in the school.

3. The following table shows the number of pupils on the roll at the end of 1933 and the number in average attendance during the year:

Number on roll 31st December 1933 ...	...	131	72	203
Average number on roll all 1933 ...	...	137.9	68.8	206.7
Average attendance all 1933 ...	...	126.1	63.3	189.4

4. The attendance averaged 91.6 for the year. In the spring there was a long period of exceptionally bad weather which caused a prevalence of colds with a resulting effect on the

attendance; otherwise the general health of the children was good. There were no closures on account of sickness. All the children were medically and dentally examined in the course of the year, and in addition there were regular medical and dental visits for general inspection.

5. The alteration in the arrangements for the opening the tops of the school windows, referred to in my last Report, was completed early in the year, and the means of ventilating the classrooms is much improved. No other structural alterations were made during the year.

6. Woodwork and other forms of handwork have been taught throughout the year. Hockey, netball and football, physical training and folkdancing have all been regularly practised, and the exhibition of drill and folkdancing at the prizegiving in December was greatly appreciated by a crowded audience. It is gratifying to record the large attendance of parents at this annual function, showing as it does the interest taken in the work of the school.

### Finance.

7. The expenditure under Head XIII Education of the annual estimates of expenditure was £2,843 : 2 : 2 in 1933 as compared with £2,917 : 9 : 7 in 1932. The revenue collected in 1933 amounted to £192 : 5 : 3 as against £183 : 5 : 1 in 1932. Details of expenditure and revenue in 1933 are as follows :

Expenditure :		£	s.	d.
1.	Personal Emoluments ...	2,215	0	9
2.	Other Charges ...	628	1	5
Total ...		2,843	2	2

Revenue :		£	s.	d.
1.	School Fees ...	162	9	0
2.	Sale of School Material ...	29	16	3
		192	5	3
<hr/>				

### Travelling Teachers.

8. The full staff of four Travelling Teacher was at work all the year, one on the East Falkland and three on the West. The following are the numbers of camp children under tuition by Government Travelling Teachers during 1933 :

Boys	47	Girls	39	Total	86.
------	----	-------	----	-------	-----

### Saint Mary's Convent School.

9. The number of pupils attending the Roman Catholic Convent School in Stanley during 1933 was as follows :

	BOYS.	GIRLS.	TOTAL.
Number on roll 31st December 1933 ...	10	56	66
Number in average attendance 1933 ...	7	47	54

### Falkland Islands Company's School and Camp Teachers.

10. The number of pupils under instruction was as follows :

	BOYS.	GIRLS.	TOTAL.
Darwin School ...	11	8	19
Camp Teachers ...	38	32	70
Total ...	49	40	89

### School Fees.

11. The following fees are charged at the Government School :

Each pupil in the Continuation Class	1/- a week.
Each pupil below the C.C. and above Standard 1	6d. a week.
Each pupil below Standard 2	3d. a week.

Exemptions are made for fatherless children and in a very small number of other cases where there is inability to pay. The proportion of expenditure met from fee income is about 8 per cent. Similar charges and conditions are in force at the Roman Catholic School in Stanley. A new proviso was added to the Government School fees regulations at the end of 1933 saying that the total amount of fees payable in respect of the children of any one family shall not exceed one shilling a week. This will cause a small reduction in fee income in future, but it will be of appreciable benefit to parents with several children attending the school. At the Darwin school no fees are charged. In the case of children taught by Travelling Teachers there are no fees, the teacher being maintained free of charge at the house where he is working.

## LIVE STOCK REPORT 1933-1934.

::O::

Stock Department,  
Stanley, Falkland Islands.  
19th April, 1934.

The Honourable,  
The Colonial Secretary.

Sir,

I have the honour to submit the following report for the year 1933-1934.

The winter was exceptionally fine and continued so up to the end of August and the beginning of September, when about a fortnight of bad weather was experienced.

By the middle of September the weather was again settled, and the spring from then on was very fine, but very dry, and grass except in the wettest localities was at a standstill. Lambing was good, and in the majority of cases slightly higher than the previous year, but ewes on the whole were not in very good condition, which was only to be expected in such a dry season.

One station has been placed in quarantine for lice in the past twelve months, and the importance of proper dipping cannot be too heavily stressed, and every care should be taken to ensure that sheep are thoroughly soaked before leaving the trough.

Great care should be exercised in gathering, especially on a station infected with any of the diseases covered by the Live Stock Ordinance, for it must be remembered that no camp can be considered properly gathered until no more sheep can be found upon it, and this will take in the ordinary course of events, three gatherings at least.

The wool clip was very satisfactory, so I have been given to understand, but generally if report speaks true, slightly lighter than last year. The percentage of clean wool (*i.e.* free from tick stains) has in the past few years increased, owing to the almost universal use of Kymac Dip, and although I have heard farmers complain of loss of weight, I am of the opinion that this is mainly due to lack of dirt in the wool; Kymac Dip probably does take out a higher percentage of grease than most dips, but surely it is better to be able to produce good clean wool from healthy sheep than to have the wool stained and the sheep kept down in condition and continually annoyed by ticks.

**BURNING CAMP.** This method of destroying dead or rank grass is unfortunately a necessary evil, but a great deal of indiscriminate burning is done by irresponsible people, and in some places great damage has been done by late burning especially in very dry springs and early summer. A certain amount of burning is necessary, but far too much burning is done, and I have seen places where fires have been started in swampy ground and which have spread carrying everything before them, burning hard sweet camp which will take years to recover.

Sub-division of pastures, some of which contain immense areas untouched or practically so by sheep, would be more beneficial, and sheep could be more easily looked after and shifted about.

**Imports.**

3. The ordinary Revenue for the Falkland Islands amounted to £59,333 : 18 : 10. Included in this amount is a sum of £8,722 : 2 : 9 transferred from Dependencies Funds towards the cost of the Central Administration, and a sum of £2,312 : 7 : 0 being appreciation in value of certain investments transferred through the Investments Adjustment Account. The Revenue exceeded the original estimate for the year by £3,376 : 18 : 10, but was less than that received in 1932, by £4,865 : 3 : 0, this being due to the increased amount transferred in 1932 as Appreciation of Investments.

4. The ordinary Revenue exceeded the Expenditure (£52,335 : 0 : 11) by a sum of £6,998 : 17 : 11. On the 1st of January, 1933, the surplus of ordinary Revenue amounted to £11,758 : 3 : 0, which together with the surplus for the year gives a total surplus of ordinary Revenue on the 31st of December, 1933, amounting to £18,757 : 0 : 11.

5. The undermentioned Heads of Revenue exceeded the original estimate by a sum

of £3,654 : 1 : 2, which together with new Head "Appreciation of Investments" gives a total of £5,966 : 8 : 2 :-

Head III.	Internal Revenue	...	£	5	:	4	:	9

	Appreciation of Investments			2,312	:	7	:	0	
									£ 5,966 : 8 : 2

On the other hand the undermentioned Heads failed to realize the amount originally estimated by £2,589 : 9 : 4, :-

	VIII.	Rents	... ..	1	:	13	:	11	
	X.	Contribution from Dependencies		277	:	17	:	3	
									2,589 : 9 : 4
				Net excess	...				£3,376 : 18 : 10

6. HEAD III. INTERNAL REVENUE. The slight excess under this Head was due to increased receipts from "Occasional" licences and "Stanley Rates", with smaller decreases under "Dog" licences and "Gun" registrations.

7. HEAD IV. FEES, FINES, &c. There were increased receipts under "Hospital and Medical" and "Dental" fees of £159 : 18 : 7 and £163 : 16 : 0 respectively, on the other hand receipts under "Supreme Court", were £297 : 10 : 9 below the estimate.

8. HEAD VI. POST OFFICE. The increase of £3,238 : 7 : 6 under this Head was mainly due to receipts from sales of stamps, which exceeded the original estimate of £5,500 by £3,252 : 10 : 9.

9. HEAD IX. MISCELLANEOUS. The excess under this Head was mainly due to the following increases :- "Sale of Stores" £74 : 4 : 5, "Sale of Houses" £405 : 10 : 8, "Stanley Water Works" £73 : 13 : 1, and "Unforeseen" £157 : 18 : 4., on the other hand "Commission on drafts" and "Savings Bank" showed a decrease of £115 : 0 : 5 and £128 : 10 : 0, respectively.

10. HEAD I. CUSTOMS DUTIES. The receipts under this Head were less than the estimate for the year by £1,338 : 5 : 3. The decrease in imports was mainly due to the continued trade depression. There was an excess under "Export on Wool" of £177, but a decrease under "Export on Seal Oil" of £114 : 10 : 6.

11. HEAD II. PORT DUES. The decrease of £70 : 15 : 6 was chiefly due to there being no receipts under item "Pilotage".

12. HEAD V. INTEREST. The receipts under this Head fell short of the estimate by £594 : 8 : 2, the principal decreases being under "Land Sales", "Currency Note Security Fund" and "Joint Colonial Fund". The receipts under "Reserve Fund" were £196 : 18 : 6 over the estimate.

13. HEAD VII. TELEGRAPHS & TELEPHONES. The receipts under "Wireless Messages" were less than the estimate by £468 : 1 : 4, due to the continued depression in trade and in the Whaling Industry. There was an increase under "Electric Light" of £183 : 12 : 10, mainly due to larger consumption consequent on additional installations.

14. HEAD VIII. RENTS. The actual receipts under this Head were only £1 : 3 : 11 less than the amount estimated. There was an increase under "Crown lands" of £46 : 9 : 10, but the revenue received from "Public Baths" fell short of the estimate by a sum of £47 : 9 : 9.

**II. PUBLIC HEALTH.****(A) General Remarks.****(1) GENERAL DISEASES.**

The general health of the Islanders, in respect of epidemic disease has been good. There was a small epidemic of chicken pox which was quickly suppressed, in Lafonia; and also a number of cases of ringworm occurred in Stanley, and in the camp of the East Island.

The general health has been reported as good with a certain mental reservation during the past few years. In the collective sense the health has been good, but the stamina of certain families, and individuals is gradually deteriorating. The Islanders present an easy prey to any infectious disease that might invade the Islands.

A factor of importance, consideration of which prior to every operation cannot be neglected, is the general tendency to bleeding. Certain families are definite haemophiliacs. and generally, at operation, bleeding has become increasingly difficult to control. It is now found, in many cases, that a needle puncture of the skin causes quite a severe haemorrhage. It is not an uncommon experience, where a quite dry operation wound has been closed, to find, the following day, especially in male patients, a large haematoma. To cope with the difficulty large doses of calcium lactate are being exhibited, where possible, over a period before, and intramuscular injections of horse serum immediately prior to operation, with reasonable success. It would appear that the condition is one of hydraemia associated with a calcium salt deficiency, and is becoming more general.

The case incidence of diabetes mellitus is increasing, as is also the incidence of transient glycosurias.

*Appendicitis.* 32 cases came to operation as compared with 25 in 1932. In many cases medical treatment, under close supervision, over a prolonged period was tried, but recurrent attacks finally forced operation. No case was of the acute fulminant type. All were typical of the local variety of sub-acute catarrhal appendicitis, associated with, in many cases localised adhesions.

*Dental.* The Dental Surgeon made extensive tours, and did much work in the East and West Falklands. He also inspected the dental condition of all the school children for whom there is a special Saturday morning clinic.

There is, and always will be, a large amount of dental work in the Colony. The dental report is appended. (Appendix I).

*General.* The S.M.O. made a short tour of the East and West Falklands in September. He inspected the M.O.'s quarters and medical stores at Fox Bay, where the new M.O. for the West Falklands whose medical service has been taken over by the Administration, was installed. The S.M.O. also investigated the living conditions and water supply etc. at Port Albemarle, the headquarters of the Falkland Islands Sealing Co. A separate report has been submitted to the Administration. The M.O. made two tours of the North Camp of the East Island during the year, and made a satisfactory report on health conditions there on both occasions.

*Government Officials.* No deaths, and only one case of invaliding occurred among Government Officials during the year. Their general health has, on the whole, been good.

## (2) COMMUNICABLE DISEASE.

*Tuberculosis.* Seven cases were notified during the year. Three cases were pulmonary, and the remainder were bone, joint and tendon affections. In all, twelve cases of tuberculosis were under observation during 1933. There were no deaths in Stanley, but one in the camp.

*Bronchial catarrh, bronchitis and broncho-pneumonia.* The incidence of coughs, and severe colds during the last four months of 1933 was unusually high. A series of colds, associated in some cases with high fever, swept the Islands from September to December, and caused a remarkable amount of debility. This high "cold" incidence is attributed mainly to the very inclement climatic conditions, and lack of sunshine experienced during the period in question. There were several cases of broncho-pneumonia following these colds, and one debilitated female child died.

*Malaria.* This, and other insect borne diseases are unknown in the Colony.

*Chickenpox.* There was a small outbreak of chickenpox in Lafonia early in the year. The source of infection was definitely traced to a letter originating from a chickenpox infected house in the United Kingdom. The inhabitants of the affected district willingly co-operated with the medical services as regards quarantine restrictions and the disease was soon eradicated. One case reached Stanley, but was promptly segregated, and there were no contact infections.

*Venereal Diseases.* With the exception of those from ships there were no cases during the year.

*Ringworm.* The ringworm epidemic in the camp of the East Island eventually reached Stanley, where 15 cases occurred. These have all been successfully treated, and as far as is known, there are no human cases at present. The endemic focus of this disease is cattle.

*Scarlet fever, measles, diphtheria, whooping cough etc.* There were no cases in the year under review.

## (B) Vital Statistics.

1. General Population. The Islanders as well as Government Officials are European or of European descent.

The estimated population of the Colony, apart from the Dependencies on the 31st December, 1933, was 2,428 which gives a population density of .52 per square mile.

During the year 27 deaths\*, and 52 births were recorded, giving the following rates :—

Population	...	...	...	2,428
Birth Rate per 1,000	...	...	...	21.42
Death rate per 1,000	...	...	...	11.52
Infantile Mortality rate per 1,000 births				57.7

\* Deaths from all causes are shown on Table IV.

## 2. Dependencies. Resident Population 650.

Births registered	...	...	...	Nil.
Deaths	...	...	...	2.

## III. HYGIENE AND SANITATION.

## (1) PREVENTIVE MEASURES.

(a) *Insect borne diseases.* These are unknown.

(b) *Epidemic disease.* A small outbreak of chickenpox occurred in Lafonia. By applying ordinary principles of isolation, and disinfection the disease was soon eradicated from the Colony.

*Ringworm.* 15 cases occurred in Stanley. These were, with one exception, children. The latter were prohibited from attending school. These patients received daily treatment at the hospital until all lesions had disappeared. The endemic focus of the disease is cattle. The majority of the farmers have co-operated with the Stock Department in reducing the disease among cattle by dipping, or destroying affected animals.

*Smallpox and Vaccination.* Vaccination is compulsory under the Vaccination Ordinance 1868.

The majority of children born in Stanley are vaccinated before they are a year old. The Camp Medical Officers also vaccinate as many children as possible under existing circumstances.

(c) *Water borne diseases.* None.

(d) *Tuberculosis.* Seven cases were notified during the year. These have occurred in known tuberculous families. There was one death from tuberculosis in the camp.

No further sanitary measures with regard to housing etc. are required in combating this disease. Members of known tuberculous families continue to marry, and no doubt the disease will be handed on from generation to generation as heretofore.

(e) *Helminthic diseases.* None are present, with the single exception of oxyuris vermicularis which is always with the people of the Islands, and has a wide distribution. Various drugs, in various combinations, have been tried with but doubtful success. At present Butolan, a Bayer product, is being exhibited, but it is too soon to predict results.

(f) *Venereal diseases.* So far the Islanders continue free from these scourges. All ships arriving at the port are warned against permitting affected members of their crews to land. The legislation necessary for suppressing these diseases is provided for by Ordinance No. 11 of 1931.

## (2) GENERAL SANITATION.

(a) *Sewage disposal.* Sewage is disposed of partly by water carriage system, and partly by E.C. method. The night soil is removed by tumbler carts under supervision of the Public Works Department. The system of disposal is very efficient, because, though all the sewage is deposited in the harbour, none is ever in evidence on the foreshore.

(b) *Scavenging.* In accordance with the Public Health Bye-laws, all ashes, and household refuse are stored in ash bins, and emptied once a month at least. This system is reasonably adequate, and in such a cold climate, does not give rise to any appreciable nuisance.

(c) *Roads and Drainage.* The roads, and drainage of Stanley are adequate to present needs, and except to mention their excellence in proportion to the size of the town, call for no further comment.

(d) *Water Supply.* The water supply is wholesome and satisfactory, but may have to be increased to meet future requirements.

(e) *Slaughterhouses and Meat Inspection.* The three licensed slaughterhouses were inspected with reasonable frequency, and were found to comply with the Board of Health Bye-Laws on all occasions. The meat to be sold for human consumption was also inspected on these occasions.

(f) *Dairies.* The dairies were inspected from time to time, and found to be fairly satisfactory. The testing of milk samples carried out showed that the standard of cleanliness had been maintained. No sample was found to contain the bacilli of tuberculosis.

### (3) SCHOOL HYGIENE.

There are two schools in Stanley, the Government School, and St. Mary's School attached to the Catholic Church. The former has 206 pupils on its roll, and the latter 66. The Medical Officers and Dental Surgeon inspected the schools at intervals. At these inspections particular attention is paid to dental and eye conditions, and importance is attached to the recorded weights of every child. Individual inspection of the children is recorded on a special form (Appendix II).

It is considered that the high standard at which the hygienic state of the schools is maintained reflects great credit on those responsible.

### (4) HOUSING.

Many new houses of a highly improved type have been built during the past few years, and the rate of building is adequate to present needs. There is no housing problem in Stanley.

### (5) DIET IN HEALTH AND DISEASE.

The quality, and quantity of the diet are satisfactory. The defects are monotony, lack of balance and variety. Mutton, tea and bread are the chief constituents of the staple diet. Herein, probably, lies the answer to the problem of the high incidence of dental caries, appendicitis, and constipation. A certain quantity of fruit is imported, but supplies are irregular, and the cost is high. The doctrine of eat more raw green vegetables is being inculcated when possible.

### (6) ANTI-RAT CAMPAIGN.

The bi-annual rat weeks have been continued. Red squills, and Ratox have been used to poison the rats in the rubbish dumps along the foreshore. There are periods when rats appear to be scarce, but generally they are numerous enough to warrant a bi-annual poisoning of the dumps.

### (7) RECOMMENDATIONS FOR FUTURE WORK.

- (1) Continuance of supervision of slaughterhouses and meat inspection.
- (2) Continuance of supervision of milk supply.
- (3) Continuance of bi-annual rat week.
- (4) Continuance of medical inspection, and free dental treatment of school children.

## IV. PORT HEALTH ADMINISTRATION.

In accordance with the usual practice vessels calling at the port were given pratique by the Medical Officers. Also all passengers for the Port were seen by the Medical Officers before landing. The great necessity for preventing, if possible, the incursion of infectious disease is fully realised, nevertheless, it must be stated, that it is possible for persons incubating infectious disease, and showing no signs thereof, to land and cause a serious epidemic.

15 vessels with a registered tonnage of 44,219, and with crews totalling 196 were given pratique during the year.

## V. MATERNITY AND CHILD WELFARE.

The outpatient department of the hospital provides ante and post natal services. The

majority of confinements take place in the hospital. During the year 28 mothers were confined as against 19 in the previous year. With the exception of one case of generally contracted pelvis, where forceps delivery was successfully effected, there were no complications worthy of record.

Maternity nursing services are provided for the town and camp districts.

## VI. HOSPITAL.

The King Edward VII Memorial Hospital comprises 12 beds, operating theatre, quarters for nurses, stores and outpatient department.

Two outside buildings provide (a) Dental Surgeon's office, and workshop, (b) drug store, and laboratory.

171 patients were admitted during the year, of these 146 were cured, 21 relieved, 1 not improved and 3 died. (Table III.)

50 operations were performed in the operating theatre with uniformly good results, and many minor operations were carried out in the outpatient department.

The causes of death were as follows, one male died of senility, and cardiac failure. Two female children died, one of marasmus, and one of broncho-pneumonia.

*Out-Patient Department.* The number of patients treated in the out-patient department was recorded as 1,448, (1,350 in 1932), and the total number of attendances as 3,978, (3,254 in 1932).

Commendation is due to the nursing staff for the manner in which they carried out their duties.

Dr. H. Glyn Edmunds, Medical Officer, and Mr. S. W. Harding, Dental Surgeon, performed the duties of their several posts in an efficient manner.

No structural alterations were made in the hospital during the year. The dental workshop has been enlarged to provide sufficient accommodation for both the Dental Surgeon, and mechanic to work in the shop at the same time.

At the risk of labouring the point, a plea must be made for an enlargement of the hospital premises. For the first time in the hospital's history there was a waiting list for beds all winter.

A labour theatre is required as 28 cases were treated in the maternity ward as against 19 in 1932.

Accommodation in the out-patient department is very limited, and it is becoming increasingly difficult to manage. There were 3,978 attendances at this department as against 3,254 in 1932. There are no isolation premises, and in the event of an incursion of infectious disease, it is feared that by the time isolation quarters could be provided, an epidemic would be widespread. It is suggested that with a few minor alterations Rock Cottage would provide much improved accommodation for the Dental Surgeon, and extra hospital beds, or isolation quarters as required.

## VII. PRISONS AND ASYLUMS.

There are no asylums in the Colony. No lunatics were under observation during the year.

The prison was inspected at intervals, and found always to be in a satisfactory hygienic condition. The general health of the one prisoner who was lodged in gaol for a short period was satisfactory.

### VIII. METEOROLOGY.

The Falkland Islands are situated 300 miles to the east of South America  $51^{\circ} 41'$  S. Latitude, and  $57^{\circ} 51'$  W. Longitude. The climatic conditions during the autumn, and winter were unusually good. The last few months of the year were extremely inclement. An unusual amount of cold, and lack of sunshine were experienced, as well as a phenomenally large rainfall. This accounted for a great deal of ill health in the spring.

Normally the climate owing to high winds, constant low temperatures, and lack of sunshine is rather trying. The meteorological returns are appended (Table II).

### IX. SCIENTIFIC.

The Philip Metalix Portable X-ray apparatus continued to give good service for two thirds of the year, when, unfortunately, it ceased to function. As the apparatus was first used in 1929 it may be considered to have given service for value.

It was found necessary to order a new apparatus. Originally a 10 kilowatt engine supplied power for all Government requirements as well as X-ray work, but now more power is available a larger type of apparatus was requisitioned.

### B. DEPENDENCIES.

No health reports are available. All the whaling factories have their own medical organisations.

The whaling personnel recruited from the Falkland Islands have maintained uniform good health during their stay in the ice, and in South Georgia.

## APPENDIX I.

## REPORT BY THE DENTAL SURGEON.

I have the honour to report on the work for the year 1933 as follows.

38 operations under general anaesthesia were carried out in the hospital as against 94 in the previous year. In Stanley, I was chiefly occupied in the making of dentures for those whose teeth had been previously extracted.

Twenty weeks of the year were spent in visits to the camp districts. In the East Falklands, Darwin, San Carlos, Port San Carlos, Douglas Station and Teal Inlet were visited. On the West Falklands my itinerary included Fox Bay, Chartres, Port Howard, Pebble Island, Port Stephens, and Hill Cove. At the last two stations, patients from outlying islands attended for treatment.

That these visits to the camp are essential, and appreciated, is proved by the attendance of the people from various districts. The Camp Managers kindly afforded every facility for the performance of this work.

In company with the Medical Officers, I inspected the dental condition of all children in both the Government and St. Mary's Catholic Schools. The School children attend regularly the special clinic for school children held on Saturday mornings.

The general oral hygiene of the people is improving in proportion to their greater attention to their dental condition. Pyorrhoea is abating, and only one case of Vincent's angina was encountered. There were no other extraordinary serious dental diseases.

Estimates of the 'Discovery' Committee's expenditure for the year 1934.

The Treasurer's Report and Financial Statements for the year ended 31st of December, 1933.

4. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS further provision is required for the service of the Colony and its Dependencies for the year ending the 31st of December, 1933.

"Be it resolved —

"This Council hereby sanctions the expenditure from public funds of the sum of ONE THOUSAND TWO HUNDRED AND THIRTY POUNDS SEVEN SHILLINGS AND ELEVEN PENCE, (£1,230. 7s. 11d.) to meet the several charges itemized in the accompanying schedule."

The Resolution was adopted.

5. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS further provision is required for the service of the Colony and its Dependencies for the year ending the 31st of December, 1934.

"Be it resolved —

The Resolution was adopted.

6. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS THE REVENUE OF the Dependencies for the year 1933 has not sufficed to meet the expenditure and in particular the Contribution of the Dependencies to the Central Administration and whereas at the 31st of December, 1931, and at the 31st of December, 1932, the sums of £9,000 (Nine thousand pounds) and of £6,302. 10s. 2d. (Six thousand three hundred and two pounds ten shillings and two pence), respectively, were not paid into the Dependencies Research and Development Fund but were applied to the service of the Dependencies for the years 1932 and 1933, respectively.

"NOW THEREFORE THIS COUNCIL resolves and it is hereby resolved, in pursuance of the provisions of sub-section (c) of section 2 of the Dependencies Research and Development Fund Ordinance, 1924, and subject to the sanction of the Secretary of State, THAT THE SUM OF £277. 17s. 3d. (Two hundred and seventy-seven pounds seventeen shillings and three pence) shall be paid out of the Dependencies Research and Development Fund into the revenue of the Colony on account of the Contribution of the Dependencies to the Central Administration and the aforesaid sums of £9,000 (Nine thousand pounds) and of £6,302. 10s. 2d. (Six thousand three hundred and two pounds ten shillings and two pence) shall be regarded as though they had been paid into the Dependencies Research and Development Fund and had been paid out therefrom into the revenue of the Dependencies for the service of the years 1932 and 1933, respectively."

The Resolution was adopted.

7. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS IT APPEARS EXPEDIENT to proceed further during the year 1934 with the improvement of communications to the camp, and whereas there appears to be no cause why certain services provided for in the estimate of the expenditure for the year 1934 should not be postponed.

"NOW THEREFORE THIS COUNCIL RESOLVES, with the sanction of the Secretary of State, that the additional sum of £2,220 (Two thousand two hundred and twenty pounds) shall be expended on this service during the year 1934 under Head XXI. "Public Works Extraordinary" item 17. "Improvement of Tracks to the Camp" and that an equivalent saving shall be effected in the sums of £1,500 (One thousand five hundred pounds) and £720 (Seven hundred and twenty pounds) under item 3 "New Roads etc., in Stanley" and item 4 "Three peat roads from Stanley to banks", respectively, of the same Head."

The Resolution was adopted.

The Honourable the Acting Colonial Secretary explained that owing to the increased number of men in need of work – at the present moment there are 150 men employed by the Government or seeking employment – and owing to the uncertainty as to whether the Falkland Islands and Dependencies Sealing Company would operate this winter it would probably be necessary at a later date with the sanction of the Secretary of State to invite the Council to revote the sum of £720 on "Peat Roads" as well as to vote additional moneys on other services in order to meet the unemployment situation.

8. On the motion of the Honourable the Acting Colonial Secretary, seconded by the Honourable the Senior Medical Officer, the Bill "to amend the Whale Fishery Ordinance, 1908" was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

The Honourable the Senior Medical Officer seconded.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clause 1 was agreed to.

On motion made consideration of Clause 2 was postponed until after consideration of the Schedule.

(2) Where any dangerous drug in transit is accompanied by an export authorization or diversion certificate and the Collector of Customs has reasonable grounds for believing that such authorization or certificate is false, or that it has been obtained by fraud or wilful misrepresentation of a material particular, it shall be lawful for the Collector of Customs to seize and detain the drug to which such authorization or certificate relates. Upon being satisfied that such authorization or certificate is valid or has not been obtained by fraud or misrepresentation as aforesaid the Collector of Customs shall release the drug.

(3) Where the dangerous drug in transit is not accompanied by an export authorization or diversion certificate by reason of the fact that the drug comes from a country not a party to the Geneva Convention (No. 1) and the Collector of Customs has reasonable grounds for believing that such drug is being conveyed in an unlawful manner or for an unlawful purpose or is in course of transit for the purpose of being imported into another country in contravention of the laws of that country it shall be lawful for the

Collector of Customs to seize and detain the drug.

(4) Where a dangerous drug brought into the Colony in transit is landed, or transhipped in the Colony, it shall remain under the control of the Collector of Customs and shall be moved only under and in accordance with a removal licence granted in pursuance of Section 6 hereof.

(5) Nothing in this section contained shall be deemed to apply to any dangerous drug in transit by post or in transit by air if the aircraft passes over the Colony without landing, or to such quantities of dangerous drugs as may, *bona fide*, reasonably form part of the medical stores of any ship or aircraft.

The diversion of dangerous drugs.

8. (1) No person shall, except under the authority of a diversion certificate in the Form E set out in the schedule hereto, cause or procure any dangerous drug brought into the Colony in transit to be diverted to any destination other than that to which it was originally consigned. In the case of any drug in transit accompanied by an export authorization or a diversion certificate issued by a competent authority of some other country, the country to which the drug was originally consigned shall be deemed to be the country stated in such export authorization or diversion certificate to be the country of destination.

(2) The Colonial Secretary may in his absolute discretion issue a diversion certificate in respect of any dangerous drug in transit upon production to him of a valid and subsisting import certificate issued by a competent authority in the country to which it is proposed to divert the drug, or if that country is not a party to the Geneva Convention (No. 1), upon such evidence as may satisfy him that the drug is to be sent in a lawful manner and for a proper purpose.

(3) A diversion certificate shall be issued in duplicate; one copy thereof shall accompany the drug when it is exported from the Colony. Another copy shall be despatched by the Colonial Secretary direct to the proper authority in the country to which the consignment has been diverted.

3. (1) Upon the production of an import certificate duly issued by the competent authority in any country, it shall be lawful for the Colonial Secretary to issue an export authorization in the form B set out in the schedule hereto in respect of any drug referred to in the import certificate to any person who may be duly licensed to export drugs and who is named as the exporter in such certificate, and is, under the provisions of this Ordinance, otherwise lawfully entitled to export such drug from the Colony. The export authorization shall be prepared in triplicate and two copies shall be issued to the exporter who shall send one copy with the drug to which it refers when such drug is exported. The Colonial Secretary shall send the third copy direct to the appropriate authority of the country of ultimate destination. Where the intended exportation is to a country which is not a party to the Geneva Convention (No. 1), it shall not be necessary to produce an import certificate as aforesaid. In all cases it shall be in the absolute discretion of the Colonial Secretary to issue or refuse an export authorization, as he may see fit.

(2) No dangerous drug shall be exported from the Colony unless the consignor is in possession of a valid and subsisting export authorization relating to such drug granted under this Ordinance.

(3) At the time of exportation of any dangerous drug the exporter shall produce to the Collector of Customs the dangerous drug, the export authorization relating thereto, and such other evidence as the Collector of Customs may require to satisfy him that the drug is being lawfully exported to the place and person named in the authorization which refers to it.

(4) No person shall export, cause to be exported, or take any steps preparatory to exporting any dangerous drug from the Colony except in pursuance of and in accordance with the provisions of this Ordinance.

4. (1) An import authorization in the form C set out in the schedule hereto permitting the importation into the Colony of any dangerous drug specified therein may be granted by the Colonial Secretary subject to such conditions as he shall deem fit to any person who may be duly licensed to import drugs.

The import of dangerous drugs.

(2) Where an import authorization is issued in pursuance of sub-section (1) of this Section, the Colonial Secretary shall also issue, in relation to the dangerous drug intended to be imported, an import certificate (form A) which shall be forwarded by the intending importer to the person from whom the drug is to be obtained. When the importer to whom an import authorization is issued under this Section intends to import the drug or drugs to which an authorization relates in more than one consignment, a separate import certificate shall be issued to him in respect of each such consignment.

(3) No dangerous drug shall be imported into the Colony unless the person to whom the drug is consigned is in possession of a valid and subsisting import authorization granted in pursuance of this Section.

(4) Every dangerous drug imported into the Colony from a country, which is a party to the Geneva Convention (No. 1), shall be accompanied by a valid and subsisting export authorization or diversion certificate.

(5) No person shall import, cause to be imported, or take any steps preparatory to importing, any dangerous drug into the Colony except in pursuance of and in accordance with the provisions of this Ordinance.

5. (1) No person shall bring any dangerous drug to the Colony in transit unless—

- (b) except where the drug comes from a country not a party to the Geneva Convention (No. 1) it is accompanied by a valid and subsisting export authorization or diversion certificate, as the case may be.

(2) Where any dangerous drug in transit is accompanied by an export authorization or diversion certificate and the Collector of Customs has reasonable grounds for believing that such authorization or certificate is false, or that it has been obtained by fraud or wilful misrepresentation of a material particular, it shall be lawful for the Collector of Customs to seize and detain the drug to which such authorization or certificate relates. Upon being satisfied that such authorization or certificate is valid or has not been obtained by fraud or misrepresentation as aforesaid the Collector of Customs shall release the drug.

(3) Where the dangerous drug in transit is not accompanied by an export authorization or diversion certificate by reason of the fact that the drug comes from a country not a party to the Geneva Convention (No. 1) and the Collector of Customs has reasonable grounds for believing that such drug is being conveyed in an unlawful manner or for an unlawful purpose or is in course of transit for the purpose of being imported into another country in contravention of the laws of that country it shall be lawful for the

Collector of Customs to seize and detain the drug.

(4) Where a dangerous drug brought into the Colony in transit is landed, or transhipped in the Colony, it shall remain under the control of the Collector of Customs and shall be moved only under and in accordance with a removal licence granted in pursuance of Section 6 hereof.

(5) Nothing in this section contained shall be deemed to apply to any dangerous drug in transit by post or in transit by air if the aircraft passes over the Colony without landing, or to such quantities of dangerous drugs as may, *bona fide*, reasonably form part of the medical stores of any ship or aircraft.

Removal licences.

6. (1) No person shall –

- (a) remove any dangerous drug from the conveyance by which it is brought into the Colony in transit, or
- (b) in any way move any such drug in the Colony at any time after removal from such conveyance except under and in accordance with a licence (in the form D set out in the schedule hereto and in this Ordinance referred to as a "Removal Licence") issued by the Colonial Secretary. In all cases it shall be in the absolute discretion of the Colonial Secretary to issue or refuse a removal licence as he shall deem fit.

(2) No Removal Licence for the transfer of any such drug to any conveyance for removal out of the Colony shall be issued unless and until a valid and subsisting export authorization or diversion certificate relating to it is produced to the Colonial Secretary save that where the drug has come from a country not a party to the Geneva Convention (No. 1), this sub-section shall not apply.

(3) The provisions of this Section shall not apply to dangerous drugs in transit by post.

Drugs not to be tampered with.

7. It shall be unlawful for any person to cause any dangerous drug in transit to be subjected to any process which would alter its nature, or wilfully to open or break any package containing a dangerous drug in transit except upon the instructions of the Collector of Customs and in such manner as he may direct.

The diversion of dangerous drugs.

8. (1) No person shall, except under the authority of a diversion certificate in the Form E set out in the schedule hereto, cause or procure any dangerous drug brought into the Colony in transit to be diverted to any destination other than that to which it was originally consigned. In the case of any drug in transit accompanied by an export authorization or a diversion certificate issued by a competent authority of some other country, the country to which the drug was originally consigned shall be deemed to be the country stated in such export authorization or diversion certificate to be the country of destination.

(2) The Colonial Secretary may in his absolute discretion issue a diversion certificate in respect of any dangerous drug in transit upon production to him of a valid and subsisting import certificate issued by a competent authority in the country to which it is proposed to divert the drug, or if that country is not a party to the Geneva Convention (No. 1), upon such evidence as may satisfy him that the drug is to be sent in a lawful manner and for a proper purpose.

(3) A diversion certificate shall be issued in duplicate; one copy thereof shall accompany the drug when it is exported from the Colony. Another copy shall be despatched by the Colonial Secretary direct to the proper authority in the country to which the consignment has been diverted.

(4) Upon the issue of a diversion certificate the export authorization or diversion certificate (if any) accompanying the drug on its arrival in the Colony shall be detained by the Colonial Secretary and returned to the authority issuing such authorization or diversion certificate together with a notification of the name of the country to which such drug has been diverted.

## LEGISLATIVE COUNCIL.

### Minutes of Meeting held on 16th November, 1934.

1. The minutes of the meeting held on the 15th of May, 1934, were confirmed.
2. The Honourable the Senior Medical Officer, by command, laid on the Table the following papers :

Copies of all Regulations, Orders and Bye-laws made or approved by the Governor in Executive Council since the last meeting of the Legislative Council.

Copies of despatches received from the Secretary of State for the Colonies, intimating the non-disallowance by His Majesty of Ordinances, Nos. 1, 2, 3, 4 and 5 of 1934.

Comparative Statements of Revenue and Expenditure of the Colony and the Dependencies for the periods 1st January to 31st March and 1st January to 30th June, 1934.

3. The Honourable the Senior Medical Officer moved and the Honourable the Director of Public Works seconded the adoption of the following Resolution :

“WHEREAS additional provision is required for the service of the Colony and its Dependencies for the year ending the 31st of December, 1934.

“Be it resolved –

“This Council hereby sanctions the expenditure from public funds of the sum of THREE THOUSAND TWO HUNDRED AND FORTY-ONE POUNDS NINE SHILLINGS AND NINE-PENCE (£3,241. 9s. 9d.) to meet the several charges itemized in the accompanying schedules.”

The Resolution was adopted.

4. The Honourable the Senior Medical Officer moved and the Honourable the Director of Public Works seconded the adoption of the following Resolution :

“Be it resolved that under the provisions of the Stanley Rating Ordinance, 1928, this Council hereby sanctions the following rate to be charged for the year 1935, on house property in the Town of Stanley, namely, One Shilling and Nine Pence for every Twenty Shillings of the annual value of such house property.”

The Resolution was adopted.

5. His Excellency said that before the Council proceeded to the formal business of the enactment of the Bill “To provide for the Service of the Year, 1935”, it might be as well to offer a few explanatory remarks on the Estimates.

Honourable Members would observe that so far as concerned the Colony proper the Ordinary Revenue of £52,761 exceeded the total expenditure of £52,594 by £167. No change of policy and no alterations in taxation were proposed. The Ordinary Revenue of £52,761 for 1935 exceeded the approved estimate for 1934 by £783. This anticipated increase was due to extraordinary receipts expected to accrue under :

HEAD VI. POST OFFICE, 1. Sale of Stamps  
HEAD IX. MISCELLANEOUS  
and HEAD XA. PROFIT ON TRANSFER & SALE OF INVESTMENTS.

Except for a decrease of £800 under Head VII. TELEGRAPHS & TELEPHONES, as a result of the continued depression in trade and in the whaling industry, and of £1,000 under HEAD X. CONTRIBUTION FROM DEPENDENCIES TO COST OF CENTRAL ADMINISTRATION, no considerable variations were to be remarked under the other heads of revenue. The figure of £8,000 for the contribution from the dependencies had been inserted provisionally on instructions from the Secretary of State.

The estimate of the ordinary expenditure for 1935 was £38,124 or more by £832 than the original estimate for 1934. Under all heads it amounted to £52,594 or more by £662 than the approved estimate for 1934. In addition it was proposed that a sum of £10,750 should be charged to surplus balances, making the total estimated expenditure for the year 1935, £63,344. The changes proposed under the ordinary expenditure were few and did not seem to call for special comment. With regard to the extraordinary expenditure provision was made for carrying on certain works and principally the tracks towards Fitzroy and the North Camp. Items, 1, 2 and 4 under Appendix III had become matters of primary importance and urgency, and item 3 had been inserted in accordance with proposals put forward by Imperial and International Communications, Limited, through the Secretary of State, for improving the equipment of the Wireless Telegraph Station.

The Dependencies' revenue amounted to £15,300 and was less by £1,063 than the expenditure of £16,363. The decrease of £6,270 estimated in the revenue for 1935 was accounted for almost entirely by the reduced amounts anticipated to be collected under Customs (a) Import Duties, and (b) Export Duties. Only two companies would operate under licence from the Government during the 1935-36 season and so be liable to pay duty. The revenue had therefore been calculated on the basis of the operations actually to be conducted by the two companies.

The expenditure amounted to £16,363 as compared with £17,980 in 1934 or a decrease of £1,617.

In conclusion His Excellency said that the estimates had been framed on sound lines but it had been a difficult task and it was necessary to proceed with extreme caution.

On the motion of the Honourable the Senior Medical Officer seconded by the Honourable the Director of Public Works, the Bill was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

## Report on Education in the Colony for 1934.

—:O:—

### General.

The educational facilities in the Falkland Islands fall into three groups :

- (1) Schools in Stanley, the only town in the Colony.
- (2) A school at Darwin, the largest settlement outside Stanley.
- (3) Itinerant tuition in the country districts or camp.

(1) **STANLEY.** A Government School is maintained from public funds. The curriculum and management are much the same as in an English elementary school, but in addition there is a full-time Continuation Class which provides a two years course of further education. A scheme was instituted in 1924 to assist parents in the camp to send their children to Stanley for schooling. The children were boarded and lodged in a Government Hostel and taught in the school at an inclusive charge of ten shillings a month during residence: or, if accommodated in private houses, the Government made a grant towards the cost. In 1929 the Hostel was closed owing to lack of support, but the maintenance grants still remain.

There is also a Convent School taught by Roman Catholic Sisters: this school is not subject to Government control or inspection and receives no grant from public funds.

(2) **DARWIN.** Here for many years the Falkland Islands Company has maintained a school for the children of its employees.

(3) **THE CAMP.** Four itinerant teachers are provided by the Government, one for the East Falkland and three for the West. The teachers travel on horseback from house to house, usually staying a fortnight at each. The houses are from six to twelve miles apart, though it may – and often does – happen that a man has to travel much further than that before he comes to a house with children. Each teacher has a definite beat, which he covers three or four times in a year. He sends a fortnightly report to Stanley, giving a detailed account of the work done, the books used, list of books or material required, and so on. The Superintendent of Education makes tours of inspection, normally visiting every child under tuition once in two years. In addition to the Government staff, the Falkland Islands Company maintains two camp teachers for work on its extensive farms on the East Falkland.

### Government School.

2. The authorised teaching establishment of the Government School in 1934 was

A Headmaster	}	Certificated by the Board of Education or the Scottish Education Department.
One Assistant Master		
Two Assistant Mistresses	}	Locally trained.
One Assistant Teacher		
Three Supplementary Teachers		

3. The following table shows the number of pupils on the registers at the end of 1934 and the number in average attendance during the year :

		BOYS.	GIRLS.	TOTAL.
Number on roll 31st December, 1934	...	135	66	201
Average number on roll all 1934	...	135.8	68.8	204.6
Average attendance for 1934	...	124.5	62.6	187.1

The attendance averaged 91.4 per cent for the year, this being the fifth year in succession during which the average of 90 per cent or over has been maintained, and it may be of interest to note that for the past four years legal proceedings have never been used to enforce attendance. Thirty-three certificates for unbroken attendance through the year were presented at the prizegiving in December; several of the recipients had had an unbroken attendance for two or more years, and in one case five years.

4. There was a good deal of sickness for two or three months in the winter, but not enough to necessitate the closing of the school. The school has not been closed for sickness

since 1926. All the children were medically and dentally examined in the course of the year, and in addition there were regular medical and dental visits for general inspection.

5. There were no structural alterations made. All the activities of the school were carried on as usual.

### Finance.

6. The expenditure under Head XIII Education of the annual estimates of expenditure was £2,775 : 10 : 5 in 1934 as compared with £2,843 : 2 : 2 in 1933. The revenue collected in 1934 amounted to £156 : 13 : 10 as against £192 : 5 : 3 in 1933. Details of expenditure and revenue in 1934 are as follows :

Expenditure :				£	s.	d.
1.	Personal Emoluments	...	...	2,208	12	9.
2.	Other Charges	...	...	566	17	8.
Total				2,775	10	5.
Revenue :				£	s.	d.
1.	School Fees	...	...	127	9	3.
2.	Sale of School Material	...	...	29	4	7.
Total				156	13	10.

### Travelling Teachers.

7. Four travelling teachers were employed during the year, one for the East Falkland and three for the West. One of the West teachers, who is in charge of the southern beat on that island, was away on leave from February to August. The following are the numbers of camp children under tuition by Government travelling teachers during 1934 :

Boys	51	Girls	38	Total	89.
------	----	-------	----	-------	-----

### St. Mary's Convent School.

8. The number of pupils attending the Roman Catholic Convent School in Stanley during 1934 was as follows :

	BOYS.	GIRLS.	TOTAL.
Number on Roll on 31st December, 1934	13	49	62
Number in average attendance 1934	10	45	55

### Falkland Islands Company's School & Camp Teachers.

9. The number of pupils under instruction was as follows :

	BOYS.	GIRLS.	TOTAL.
Darwin School	10	11	21
Camp Teachers	25	12	37
Total	35	23	58

### School Fees.

10. The following fees are charged at the Government School :

Each pupil in the Continuation Class	...	1/- a week.
Each pupil below the C.C. and above Standard 1	...	6d. a week.
Each pupil below Standard 2	...	3d. a week.

Exemptions are made for fatherless children and in a very small number of other cases where there is inability to pay. Similar charges and conditions are in force at the Roman Catholic school in Stanley. The proportion of expenditure met from fee income is

about six per cent. At the Darwin school no fees are charged. In the case of children taught by Travelling Teachers there are no fees, the teacher being boarded and lodged at the expense of the household where he is working.

11. The effect of the Government School fees amendment regulations of 1933, brought into operation in 1934, has been to reduce the amount of fees collected by about £35, representing a reduction of say 20 per cent.

WHEREAS it will be recognized that it is improper and unjust that public funds should bear the cost of the maintenance and treatment in Hospital of those who can afford to pay.

All accounts due to the Hospital must be paid promptly. Legal action will be taken to recover outstanding indebtedness.

Failing this summonses will be issued, the legal cost of the summons and if necessary of the hearing will be added to the amount payable.

### Message of His Majesty the King

“At the close of this memorable day I must speak to my people everywhere. Yet how can I express what is in my heart? As I passed this morning through cheering multitudes to and from Saint Paul's Cathedral, as I thought there of all that these 25 years have brought to me and to my Country and my Empire, how could I fail to be most deeply moved? Words cannot express my thoughts and feelings. I can only say to you, my very dear people, that the Queen and I thank you from the depths of our hearts for all the loyalty and - may I say - the love with which this day and always you have surrounded us. I dedicate myself anew to your service for the years that may still be given to me.

I look back on the past with thankfulness to God. My people and I have come through great trials and difficulties together. They are not over. In the midst of this day's rejoicings I grieve to think of the numbers of my people who are still without work. We owe to them, and not least to those who are suffering from any form of disablement, all the sympathy and help that we can give. I hope during this Jubilee year all who can will do their utmost to find them work and bring them hope. Other anxieties may be in store. But I am persuaded that with God's help they may all be overcome, if we meet them with confidence, courage and unity. So I look forward to the future with faith and hope.

It is to the young that the future belongs. I trust that through the Fund inaugurated by my dear son the Prince of Wales to commemorate this year, many of them throughout this Country may be helped in body, mind and character to become useful citizens. To the children I would like to send a special message. Let me say this to each of them whom my words may reach - the King is speaking to you. I ask you to remember that in days to come you will be citizens of a Great Empire. As you grow up always keep this thought before you; and when the time comes be ready and proudly give to your Country the service of your work, your mind and your heart.

I have been greatly touched by all greetings which have come to me to-day from my Dominions and Colonies, from India and from this home Country. My heart goes out to all who may be listening to me now wherever you may be - here at home in town or village, or in some far off corner of the Empire, or it maybe on the High Seas.

Let me end my words to you with those which Queen Victoria used after her Diamond Jubilee, 38 years ago. No words could more truly or simply express my own deep feeling now: "From my heart I thank my Beloved People. May God Bless them."

FALKLAND ISLANDS.

## TO THE KING'S MOST EXCELLENT MAJESTY.

## MAY IT PLEASE YOUR MAJESTY :

We, the Governor and Commander-in-Chief and the Members of the Executive and Legislative Councils of the Colony of the Falkland Islands and its Dependencies, humbly approach Your Majesty to offer on behalf of the whole of the population of the Colony our heartfelt congratulations on the happy occasion of Your Majesty's Silver Jubilee.

In this far distant outpost our hearts are filled with gratitude at the knowledge that we form a link in the chain which binds together a glorious Empire, and we join in the universal feeling of rejoicing throughout the Empire on the auspicious event which marks the completion of twenty-five years of Your Majesty's reign.

Secure in the affection of Your Majesty and assured of Your Majesty's constant care on our behalf, we are ever Your Majesty's loyal subjects, and on such an occasion as the present we are one in our desire to express the feelings of loyalty, pride and thankfulness which we entertain towards the persons of Your Majesty and Her Majesty the Queen.

The people of the Colony of the Falkland Islands and its Dependencies in common with those of all parts of Your Majesty's glorious Empire unite with patriotic devotion in the solemnization of the ceremony which takes place in England today; a feeling which, though borne from this the most southerly of Your Majesty's Dominions, is a wave of enthusiasm from a Colony which shares the accumulated glory and privilege inherited from the expansion and development of Your Majesty's Empire.

That it may please Almighty God to prolong Your Majesty's beneficent reign is the fervent prayer of Your Majesty's dutiful and loyal subjects in the Falkland Islands and their Dependencies.

## II. PUBLIC HEALTH.

### (A) General Remarks.

#### (1) GENERAL DISEASES.

The general health of the Islanders has been good. Several small epidemics occurred, *viz*: Scarlet Fever, Ringworm, Measles, Chicken Pox, Influenza and Impetigo.

*Appendicitis.* 25 cases were operated upon.

*Dental.* The Dental Surgeon was kept very busy throughout the year. A short report is appended.

*General.* The Medical Officer made one tour of the East Falkland Island during the year; health conditions found to be satisfactory.

*Tuberculosis.* Shows definite signs of being on the increase.

*Government Officials.* No invaliding home, but several cases developed a form of Melancholia, partly due to the climate, which compels people to remain indoors, and partly due to the fact that Junior Officials, amongst whom this melancholia is most manifest, live in lodgings.

*Venereal Disease.* No cases reported.

A separate report relating to the West Falkland Islands will be seen in Appendix I.

## (2) COMMUNICABLE DISEASES.

*Tuberculosis.* 17 cases were observed during the year; of these, seven were pulmonary, four Osseous cases, four Abdominal lesions, and two cases of Cervical Adenitis. This is an increase over 1933, when seven cases were reported. Seven deaths resulted. This disease is on the increase. No cases reported on the West Falklands.

*Bronchial Catarrh.* The incidence of coughs and severe colds during the month of August was high.

*Influenza.* There was an outbreak of Influenza during the months of July and August; this spread to the West Falklands.

*Chicken Pox.* Only four cases were seen; these occurred in Stanley during July and August.

*Scarlet Fever.* Three cases of Scarlet Fever occurred during February in the West Falkland; no deaths resulted.

*Impetigo.* Four cases in the last quarter of the year. On the increase at the end of the year.

*Ringworm.* A few cases from last year's outbreak appeared for treatment during January and February of the year under review.

*Measles.* An outbreak of measles occurred in May and June limited to one family in Stanley; outbreak traced from Magallanes.

## (B) Vital Statistics.

1. General Population. The Islanders as well as Government Officials are European or of European descent.

The estimated population of the Falkland Islands on the 1st of January, 1934, was 1,362 males, 1,065 females or a total population of 2,427. The population on the 31st December, 1934, was 2,437, as shewn below :-

The resident population of South Georgia was estimated at 670.

## III. HYGIENE AND SANITATION.

## (1) PREVENTIVE MEASURES.

(a) *Insect borne diseases.* These are unknown.

(b) *Epidemic diseases.* A small outbreak of Scarlet Fever occurred at Hill Cove in the West Falklands, three cases in all. The station was put in quarantine for six weeks.

*Small Pox and Vaccination.* Vaccination is compulsory under the Vaccination Ordinance of 1868. The majority of children born in Stanley are vaccinated before they are a year old. The camp Medical Officers also vaccinate as many children as possible under existing circumstances.

(c) *Water borne diseases.* An enteritis occurred in the West Falklands, probably water borne.

(d) *Tuberculosis.* 17 cases were notified during the year. There were no deaths from Tuberculosis in the Camp. No further sanitary measures with regard to housing etc. are required in combating this disease. Members of known tuberculous families continue to marry, and no doubt, the disease will be handed on from generation to generation, as heretofore.

(e) *Helminthic diseases.* None are present, with the single exception of oxyuris vermicularis which is always with the people of the Islands, and has a wide distribution. Various drugs, in various combinations, have been tried with but doubtful success.

(f) *Venereal diseases.* So far the Islanders continue free from these scourges. All ships arriving at the port are warned against permitting affected members of their crews to land. The legislation necessary for suppressing these diseases is provided for by Ordinance No. 11 of 1931, and by Venereal Disease (Amendment) Ordinance, 1934.

## (2) GENERAL SANITATION.

(a) *Sewage disposal.* Sewage is disposed of partly by water carriage system, and partly by E.C. method. The night soil is removed by tumbler carts under supervision of the Public Works Department. The system of disposal is very efficient, because, though all the sewage is deposited in the harbour, none is ever in evidence on the foreshore.

(b) *Scavenging.* In accordance with the Public Health Bye-laws, all ashes, and household refuse are stored in ash bins, and emptied once a month, at least. This system is reasonably adequate, and in such a cold climate, does not give rise to any appreciable nuisance.

(c) *Roads and Drainage.* The roads and drainage of Stanley are adequate to present needs, and except to mention their excellence in proportion to the size of the town, call for no further comment.

(d) *Water Supply.* The water supply is wholesome and satisfactory, but will have to be increased to meet future requirements.

(e) *Slaughter-houses and Meat Inspection.* The three licensed slaughterhouses were inspected with reasonable frequency and were found to comply with the Board of Health Bye-laws on all occasions. The meat to be sold for human consumption was also inspected on these occasions.

(f) *Dairies.* The dairies were inspected from time to time and found to be fairly satisfactory. The testing of milk samples carried out showed that the standard of cleanliness had been maintained. No sample was found to contain the bacilli of tuberculosis.

## (3) SCHOOL HYGIENE.

There are two schools in Stanley, the Government School and St. Mary's School attached to the Catholic Church. The former has 201 pupils on the roll, and the latter 62. The Medical Officers and Dental Surgeon inspected the schools at intervals. At these inspections particular attention is paid to dental and eye conditions and importance is attached to the recorded weights of every child.

It is considered that the high standard at which the hygienic state of the schools is maintained reflects great credit on those responsible.

## (4) HOUSING.

Many new houses of a highly improved type have been built during the past few years, and the rate of building is adequate to present needs. There is no housing problem in Stanley.

**(5) DIET IN HEALTH AND DISEASE.**

The quality and quantity of the diet are satisfactory. The defects are monotony, lack of balance and variety. Mutton, Tea and Bread are the chief constituents of the staple diet. Herein, probably, lies the answer to the problem of the high incidence of dental caries, appendicitis, and constipation. A certain quantity of fruit is imported, but supplies are irregular and the cost is high. The doctrine of eat more green vegetables is being inculcated when possible.

**(6) ANTI-RAT CAMPAIGN.**

The bi-annual rat weeks have been continued. Red squills and Ratox have been used to poison the rats in the rubbish dumps along the foreshore. There are periods when rats appear to be scarce, but generally they are numerous enough to warrant a bi-annual poison baiting of the dumps.

**(7) RECOMMENDATION FOR FUTURE WORK.**

1. Continuance of supervision of slaughter-houses and meat inspection.
2. Continuance of supervision of milk supply.
3. Continuance of bi-annual rat week.
4. Continuance of Medical inspection, and free dental treatment of school children.

**IV. PORT HEALTH ADMINISTRATION.**

In accordance with the usual practice vessels calling at the port were given pratique by the Medical Officers. Also all passengers for the port were seen by the Medical Officers before landing. The great necessity for preventing, if possible, the incursion of infectious disease is fully realized; nevertheless it must be stated that it is possible for persons incubating disease, and showing no signs thereof, to land and cause a serious epidemic.

Vessels registered during 1934 :

	Nos.	Tons nett.	Crews.
Stanley ...	17	40,265	788
Fox Bay ...	5	1,249	101
	<u>22</u>	<u>41,514</u>	<u>889</u>

**V. MATERNITY AND CHILD WELFARE.**

The out-patient department of the hospital provides ante and post-natal services, the majority of confinements take place in hospital.

Confinements in :—	Hospital.	Town.	Camp.	Total.
	20	5	5	30.

During 1933 there were 28 confinements.

Nursing services to the Town and Camp were supplied by the Hospital and were for maternity cases with one exception. Details of the Camp visits are as follows : three cases at North Arm, one at Darwin, one at Fitzroy and one case of Pneumonia at Port Howard. Average stay of the nurses in the Camp was 26 days.

**VI. HOSPITAL.**

The King Edward VII Memorial Hospital comprises 12 beds, operating theatre, quarters for nurses, stores and out-patient department. In addition there is a Dental Surgery and workshop, also a drug store and laboratory apart from the Hospital. Slight alterations were made in the Medical Officer's Office.

As mentioned in the 1933 report, there is a real need for the following alterations in the Hospital :—

1. Quarters apart from the Hospital for the Nursing Staff.
2. New out-patient Department.

3. Extra bed accommodation.
4. Anaesthetic room adjoining the Operating Theatre.
5. Labour Ward.
6. Drug store, present store being damp.
7. Proper X-ray room, and dark room.

These alterations are being considered by the Administration.

A new X-ray has been sent out to replace the apparatus which broke down.

The Out-Patients showed an increase in numbers over that of the previous year.

The Medico-electrical section of the Out-Patient Department has carried out successful work during the year, with Radiant Heat, Vapour and Turkish Baths, especially valuable in skin diseases and muscular rheumatism.

Artificial Sunlight treatment has been carried out in cases of adenitis and anaemia in children, also in cases of Tubercular bone and joint diseases.

Lectures were given to the nurses throughout the year by the Medical Officer and demonstrations were given by the Matron.

A full time clerk has been appointed to deal with the extra office and new book-keeping system.

A motor cycle has been purchased by the department for the use of the Medical Officers while working in the town.

## VII. PRISONS AND ASYLUMS.

There are no asylums in the Colony. No lunatics were under observation during the year.

The prison was inspected at intervals and found to be in a satisfactory hygienic condition.

## VIII. METEOROLOGICAL.

The Falkland Islands are situated about 300 miles East of South America in latitude 51 degrees 41 minutes South, and longitude 57 degrees 51 minutes West (Stanley).

The climatic conditions during the year 1934 were not up to the usual standard, there being 228 days on which rain fell. There were only eight calm days in the whole year and the average sunshine was about four hours a day.

## B. DEPENDENCIES.

No health reports are available. All the whaling factories have their own medical organizations.

The whaling personnel recruited from the Falkland Islands have maintained uniform health during their stay in the ice and in South Georgia.

## APPENDIX I.

SUMMARY OF A REPORT  
FROM MEDICAL OFFICER AT FOX BAY, WEST FALKLANDS.

Report of certain cases and diseases seen by the Medical Officer at Fox Bay since September, 1933 :—

1. *Influenza*. First occurred in Pebble Island after the M.V. "Gentoo" had returned from Stanley, it spread over the whole Island.

2. *Scarlet Fever*. Three cases at Hill Cove; station put in quarantine for six weeks. Two cases were mild, desquamation seen in one case, the third case occurred in a woman three days after labour. She was very ill, but recovered.

3. *Scurvy*. Occurred in spring 1934, two children, treated on raw vegetables only. both recovered.

4. *Gastric Enteritis*. Known locally as the "Sickness", comes on suddenly and patient ill for 4 days.

Disease occurs in the Summer, it would appear to be due to contaminated water supply in places where the drinking water is drawn from streams passing through grazing pastures and does not occur where spring water is drunk.

The disease in one case proved to be infectious.

5. *Anaemia*. A large number of people appear to be anaemic and respond readily to the exhibition of Iron. Probably a deficiency disease, the condition does not occur in Stations where vegetables are abundant.

For Return of Cases see attached Table VI.

## REPORT ON THE DENTAL DEPARTMENT.

54 Operations under general anaesthesia were carried out in hospital as against 38 of the previous year.

The camp in the East Falklands was visited by the Colonial Dental Surgeon on 21st March and he returned to Stanley on the 12th April.

The camp in the West Island was visited on 3rd August and the Dental Surgeon returned on the 11th August.

That these visits to the camp are essential, and appreciated, is proved by the attendance of the people from various districts. The Camp Managers kindly afforded every facility for the performance of this work.

In company with the Medical Officers, the Dental Surgeon inspected the dental condition of all children in both the Government and St. Mary's Catholic Schools. The School children attend regularly the special clinic for school children held on Saturday mornings.

The general oral hygiene of the people is improving in proportion to their greater attention to their dental condition. Pyorrhoea is abating.

## Regulations relating to the award of the Efficiency Decoration.

H. HENNIKER-HEATON,

*Governor.*

The Efficiency Decoration referred to in the following regulations displaces the Colonial Auxiliary Forces Officers' Decoration and the Territorial Decoration, which can, however, still be granted in cases where the necessary qualifying service was completed before the 23rd of September, 1930.

In pursuance of the Royal Warrant dated the 23rd of September, 1930, and with the gracious approval of His Majesty the King signified through the Right Honourable the Secretary of State for the Colonies, His Excellency the Governor is pleased hereby to make the following Regulations :

1. The Efficiency Decoration is a reward to an officer for long and meritorious service of proved capacity in the Authorized Auxiliary Forces of the Empire (or their Reserves) and is governed by the Royal Warrant dated the 23rd of September, 1930.

2. Commissioned officers of the Falkland Islands Defence Force (or its Reserves) who on or after the 23rd of September, 1930, have completed 20 years' qualifying service as hereinafter defined shall be eligible for the award of the Decoration.

3. The subsidiary title of the Decoration awarded to officers who complete the requisite period of qualifying service while serving in the Falkland Islands Defence Force (or its Reserves) shall be "Falkland Islands" and the words "Falkland Islands" shall be inscribed on the bar brooch of the Decoration so awarded.

4. An officer on whom the Decoration is conferred is entitled to the addition after his name of the letters "E.D."

5. Qualifying service is defined and shall be reckoned as follows :—

A. Commissioned service —

(i) on the active list of the Falkland Islands Defence Force.

(ii) in Reserves to the Falkland Islands Defence Force but only such commissioned service as may have been rendered while those Reserves performed annual training equivalent to that normally carried out by their parent Force, provided the officer concerned also performed such training.

(iii) in other Authorized Auxiliary Forces of the Empire including their Reserves and associated Cadet or Officers' Training Corps, such service in every case having been qualifying service in accordance with the regulations under the Royal Warrant of the 23rd of September, 1930, and applicable to the Force in which or with whose Reserves or associated Cadet or Officers' Training Corps the service was rendered.

(iv) other than that covered by sub-paragraphs (ii) and (iii) in any Reserve Forces mentioned in those sub-paragraphs during their embodiment, the exact period only of the embodied service rendered being reckoned as single qualifying service.

B. Commissioned service in West Africa (except that performed by natives of West Africa) will reckon two-fold as qualifying service, but any period spent on leave therefrom will reckon only as single qualifying service.

C. Half of any time during which an officer may have served on the active list after attaining the age of 17 years —

(i) in the ranks of the Falkland Islands Defence Force, or of any other Authorised Auxiliary Forces of the Empire (including their Reserves), such service

to be qualifying service in accordance with the Efficiency Decoration regulations of those forces;

(ii) In the ranks of or as a cadet in any Cadet Corps or Officers' Training Corps in the Empire in accordance with the Efficiency Decoration regulations applicable to the Force or Forces with which such Corps is associated, shall reckon as qualifying service.

D. War Service —

(i) An officer of the Falkland Islands Defence Force (at that time known as the Falkland Islands Volunteers) including its Reserves who was serving in such Force or in any other Authorized Auxiliary Force of the Empire on the 4th of August, 1914, and who, before the 11th of November, 1918, served or accepted an obligation to serve on military service beyond the borders of the territory of the Force of which he was a member, will reckon two-fold as qualifying service all embodied service as an officer on the active list given between the dates of embodiment and of disembodiment of the Force in which he was serving, and will reckon all such embodied service in the ranks on the active list as full single qualifying service towards the 20 years required, whether such service was in the Royal Navy, Regular Army, Royal Air Force, Special Reserve, Territorial Force, or Dominion or Colonial Forces.

(ii) Except as provided in the preceding sub-paragraph (i), commissioned service in the Royal Navy, the Regular Army, or the Royal Air Force, or a Permanent Force of a Dominion or Colony, during the period 4th August, 1914, and 31st December, 1921, provided that the officer was commissioned between the 4th of August, 1914, and the 11th of November, 1918, and subsequently obtained a Commission in an Auxiliary Force, shall reckon as single qualifying service; and half the time served on the active list in the ranks of the said Forces during the said period shall reckon as single qualifying service for the Decoration.

E. Nothing in these regulations shall permit any service to reckon more than two-fold as qualifying service for the Decoration.

F. Service requisite to qualify for the Decoration shall not necessarily be continuous.

G. Service on the Permanent Staff of the Falkland Islands Defence Force by members of the Permanent Forces of the Empire, except such service as may be covered by sub-paragraph D above, and (except as provided in sub-paragraphs A (ii) and (iv) above, service in any Reserve or Auxiliary Force in the Falkland Islands involving a liability for service only and no liability for training in peace, shall not reckon as qualifying service for the Decoration.

H. In the case of recipients of the Volunteer Officers' Decoration, the Territorial Decoration, or the Colonial Auxiliary Forces Officers' Decoration, no period of service in the Force in which they qualified for any of the said Decorations shall be reckoned as qualifying for the Efficiency Decoration.

I. Subject to the provisions of the preceding sub-paragraph H, an officer already in possession of the Volunteer Officers' Decoration, the Territorial Decoration, or the Colonial Auxiliary Forces Officers' Decoration, or any Long Service and Good Conduct or Efficiency Medal and Clasps will be eligible to receive the Efficiency Decoration and to wear both, provided that he has completed the full periods of qualifying service for both awards and that no qualifying service towards one award is permitted to count towards the other.

J. Except as admissible under this paragraph, service in the ranks will not be deemed to be qualifying service.

6. An officer who has the requisite qualifying service must be recommended by the Commanding Officer of the unit in which he completes the period of service requisite to qualify for the Decoration.

7. Applications for the Decoration should be made in writing by the Commanding Officer of the Falkland Islands Defence Force (or its Reserves) in which the officer recommended for the Decoration is or was serving when he completed the period of qualifying service, and should be supported by a statement of the officer's service in Form A appended to these

Regulations. The Commanding Officer will forward his recommendation through the usual channel of correspondence to the Governor, accompanied in each case by a statement certifying that the officer recommended holds (or has held) a Commission in the Falkland Islands Defence Force (or its Reserves), that he has completed the qualifying period of 20 years meritorious service, that he is an efficient and thoroughly capable officer of proved capacity, and that he is in every way deserving of the Efficiency Decoration.

8. *Grant of Decoration.*— The Decoration will be awarded on the authority of the Governor or Officer Administering the Government and a notification of its award will be published in the Falkland Islands Government Gazette. A register of awards of the Decoration will be kept at the Headquarters of the Falkland Islands Defence Force.

9. Honorary Colonels and Acting Chaplains holding Commissions who have the qualifying service are also eligible.

10. *Loss and Replacement.*— When the Decoration has been lost and it is desired to replace it, a declaration must be made before a magistrate stating the circumstances under which the loss occurred, and the rank, name, and Corps of the officer to whom the Decoration belonged. This declaration will be forwarded to the Governor through the usual channel of correspondence in the case of an officer who is still serving, and direct in the case of an officer who has retired. The Decoration will be replaced, on payment, if the explanation as to loss is considered satisfactory.

11. *Forfeiture and Restoration.*— A recipient of the Decoration who suffers death by sentence of a Military Court, or is dismissed or removed from his Corps or regiment for misconduct shall forfeit the Decoration unless the Governor shall otherwise direct.

A recipient of the Decoration who has been convicted of an offence of the following nature, viz., treason, sedition, mutiny, cowardice, desertion, or disgraceful conduct of an unnatural kind (under Section 18 (5) of the Army Act), or who, while subject to military law, is convicted by the civil power shall be liable, at the discretion of the Governor, to forfeit the Decoration.

A Decoration forfeited under the preceding Regulations may be restored by the Governor at his discretion.

A notice of forfeiture or of restoration shall in every case be published in the Government Gazette.

The subsidiary title of the Medal awarded to warrant officers, non-commissioned officers, and men who complete the requisite period of qualifying service while serving in the Falkland Islands Defence Force (and its Reserves) shall be "Falkland Islands" and the words "Falkland Islands" shall be inscribed on the Bar mount of the Medal so awarded.

4. (1) "Efficient Service" shall mean service attaining the standard of efficiency as fixed from time to time by the Governor in Council by Regulations under the Defence Force Ordinance, 1920.

(2) Service as described below shall be regarded as qualifying service, provided that none of it has been previously counted as qualifying service for the grant of any other Long Service, Good Conduct, or Efficiency Medal or Clasp -

A. Service in the ranks on the active list of the Falkland Islands Defence Force such service having been efficient in accordance with the regulations governing service in such Force.

AA. Service in the ranks of any Reserves to the aforesaid Force such as may have been rendered while these Reserves performed annual training equivalent to that normally carried out by their parent Force, provided the individual concerned also performed such training and that efficiency is determined by the standard required for the latter Force.

B. Service in the Ranks of other Authorised Auxiliary Naval, Military, or Air Forces of the Empire in which training in peace time is a prescribed condition of service, as well as service in any Reserves to these Forces, subject to the same conditions as in 4 AA, such service in both cases having been qualifying service in accordance with the regulations under the Royal Warrant of the 23rd of September, 1930, applicable to the Force in which or with whose Reserves the service was rendered.

C. Service in the ranks of a Cadet Corps or as a cadet in an Officers' Training Corps in any of His Majesty's Dominions, Colonies, or territories under His Majesty's protection, such service being qualifying service in accordance with the regulations under the Royal Warrant of the 23rd of September, 1930, applicable to the Auxiliary Forces of the domain or territory in which the service was rendered.

D. Service in any Forces mentioned in 4A, 4AA, and 4B during their embodiment, other than service covered by those sub-paragraphs, the exact period of such embodiment only being counted provided always both as regards this service and that referred to in paragraphs 4A, 4AA and 4B that a period of 2 months' embodied service in any calendar year reckoned from the 1st of January to the 31st of December will be allowed to count as the equivalent of efficient service for that year.

E. Service on the Permanent Staff of the Falkland Islands Defence Force by members of the Permanent Forces of the Empire, except such service as may be covered by sub-paragraph F below, and (except as provided in paragraph 4A), service in any Reserve or Auxiliary Force in the Falkland Islands involving a liability for service only and no liability for annual training in peace shall not reckon as qualifying service for the Medal or Clasps.

F. War Service —

(i) A Warrant Officer, non-commissioned officer, or man of the Falkland Islands Defence Force (at that time known as the Falkland Islands Volunteers) (and its Reserves) who was serving in the ranks of such Force or in the ranks of any other Authorised Auxiliary Force of the Empire including their Reserves on the 4th of August, 1914, and who before the 11th of November, 1918, served or accepted an obligation to serve, on military service beyond the borders of the territory of the Force of which he was a member, will reckon two-fold as qualifying service all embodied service on the active list, whether commissioned or in the ranks, given between the dates of embodiment and of disembodiment of the Force in which he was serving, whether such service was in the Royal Navy, Regular Army, Royal Air Force, Special Reserve, Territorial Force, or Dominion or Colonial Forces.

(ii) Except as provided in the preceding sub-paragraph F (i), commissioned service in the case of those men who were commissioned after service in the ranks of an Authorised Auxiliary Force of the Empire during the period of embodiment of the Force consequent upon the outbreak of war on the 4th of August, 1914, and who, having relinquished their Commissions, re-enrolled in the ranks of an Authorized Auxiliary Force prior to the 1st of January, 1922, shall count as single qualifying service for the Medal or Clasps.

(iii) Except as provided in sub-paragraph F (i), service in the Ranks in the Royal Navy, the Regular Army, Royal Air Force, or a permanent Force of a Dominion, Colony, or territory under His Majesty's protection during the period 4th August, 1914, to 31st December, 1921, shall count as single qualifying service for the Medal or Clasps.

G. Service in West Africa (except that performed by natives of West Africa) will reckon double towards qualifying service, but any period spent on leave therefrom will reckon only as single qualifying service.

H. No service shall count more than two-fold towards the award of the Medal and Clasps.

I. Continuity of service —

(a) Service must have been rendered continuously except —

(i) during the period 4th August, 1914, to 31st December, 1921, or

(ii) when given in different Authorized Auxiliary, Naval, Military, or Air Forces not in the same portion of the Empire, provided that the break does not exceed twelve months, or

(iii) when given in the Falkland Islands Defence Force (and its Reserves) provided that the break does not exceed 6 months, and is not due to any fault of the individual.

(b) The following periods, although inadmissible as qualifying service (save in the circumstances hereinbefore described) will not be reckoned as breaking continuity of service —

(i) Service in the Royal Navy, Regular Army, Royal Air Force, or in a Permanent Force of a Dominion, Colony, or territory under His Majesty's protection, or in the Reserves of such Forces, or in the Reserves of any Authorized Auxiliary Force of the Empire.

(ii) Intervals between service in the Royal Navy, Regular Army, Royal Air Force, or in a Permanent Force of a Dominion, Colony, or territory under His Majesty's protection, or in an Authorized Auxiliary Force of the Empire, during the period 4th August, 1914, to 31st December, 1921.

(iii) Service of men of the Falkland Islands Defence Force (including its Reserves) whilst released from Military service for the purpose of being employed on work of national importance, which will be defined as occasion arises, during a period of embodiment.

(iv) Periods of desertion or absence without leave of men of the Falkland Islands Defence Force (including its Reserves) during the embodiment or training either in Camps or barracks, provided that they continue to serve after their offence has been dealt with.

(v) Periods of detention or imprisonment during annual training or embodiment.

5. The Efficiency Medal will be worn suspended on the left breast by a green ribbon, one inch and a quarter in width, with yellow stripes down the edges, but the recipient of any other Long Service, Good Conduct or Efficiency Medal will only be permitted to wear the Efficiency Medal (with or without Clasps) with them if he has completed the full period of qualifying service in respect of each Medal or Clasp.

6. *Wearing of roses.*— In undress and service uniform when ribbons only are worn, the grant of Clasps will be denoted by the wearing on the ribbon of small silver roses, one or more according to the number of Clasps awarded. The rose (or roses) will not be worn on the ribbon when the Medal is worn.

7. *Applications for the Efficiency Medal and Clasps.*— Application for the Medal and/or Clasps should be made in writing by the Commanding Officer of the Falkland Islands Defence Force, (or its Reserves) in which the warrant officer, non-commissioned officer, or man is or was serving when he completed the period of qualifying service, and should be supported by a statement in Form A appended to these Regulations of his service qualifying for the Medal and/or Clasps. The Commanding Officer will forward his recommendation through the usual channel of correspondence to the Governor together with a certificate that the person recommended has completed the qualifying period of 12, 18, or 24 years' efficient service and that he is in every way deserving of the Efficiency Medal or Clasp.

8. *Grant of the Medal and Clasps.*— The Medal and/or Clasps will be awarded on the authority of the Governor or Officer Administering the Government and a notification of such awards will be published in the Government Gazette.

9. *Loss and Replacement.*— When a Medal or Clasp has been lost and it is desired to replace it, a declaration must be made before a Magistrate stating the circumstances under which the loss occurred, and the rank, name and corps of the person to whom the Medal or Clasp belonged. This declaration should be forwarded to the Governor through the usual channel of correspondence in the case of a member who is still serving, and direct in the case of a person who has retired. The Medal and any Clasp or Clasps lost therewith will be replaced, on payment, if the explanation as to loss is considered satisfactory.

10. *Forfeiture and Restoration.*— (a) A recipient of the Medal who suffers death by sentence of a Military Court or is dismissed or removed from his corps or regiment for misconduct shall forfeit the Medal, and any Clasp or Clasps awarded to him, unless the Governor shall otherwise direct.

(b) A recipient of the Medal who has been convicted of an offence of the following nature, viz., treason, sedition, mutiny, cowardice, desertion, or disgraceful conduct of an unnatural kind (under Section 18 (5) of the Army Act), or who, while subject to military law, is convicted by the civil power shall be liable at the discretion of the Governor to forfeit the Medal and any Clasp or Clasps awarded to him.

(c) A Medal and any Clasps so forfeited may be restored by the Governor at his discretion.

(d) A notice of forfeiture or of restoration shall in every case be published in the Government Gazette.

#### THE VACCINATION ORDINANCE, 1868.

"The Governor directs it to be notified, for general information, that it having been brought to His Excellency's cognisance that a grave danger to the public health exists from Small Pox which is prevalent in the neighbouring countries of South America and is liable to be introduced at any time through the medium of shipping calling at the Colony by reason of the fact that a large proportion of the population, both adult and juvenile, is unprotected by vaccination, His Excellency has considered it imperative in the interests of the public health effectively to put into operation the provisions of the Vaccination Ordinance, 1868, under which all children under the age of fourteen years and all children hereafter born are required to be successfully vaccinated.

The necessary steps are being taken therefore for the appointment of Public Vaccinators under the aforesaid Ordinance and generally for the enforcement of its provisions.

The matter has been discussed at a meeting of the Board of Health for the East Falkland Island and the unanimous decision was made by the Board that due measures should be undertaken for the proper protection of the community against this serious menace. The high value of vaccination as a prevention against Small Pox has long been accepted by the highest authorities. As a recent striking proof of its efficiency it is pointed out in the last Annual Medical Report for England that during 1927, 10,381 cases of Small Pox occurred in England among unvaccinated persons while there were only 41 cases among re-vaccinated persons.

The co-operation of the public and in particular of parents with the Medical Authorities in dealing with this problem is earnestly sought and confidently expected in order to safeguard the general welfare of the inhabitants of the Colony as a whole".

No. 103. Colonial Secretary's Office,  
Stanley, Falkland Islands.  
25th October, 1935.

It is hereby notified, for general information, that the following arrangements have been approved by the Governor for the observance in this Colony of Armistice Day, the 11th of November, 1935.

The Order of Service will be held at the Cross of Sacrifice at 11.00 a.m. at which His Excellency will attend officially and will be supported by the Honourable Members of Councils. The Falkland Islands Defence Force, the Stanley Sea Scouts, the Stanley Boy Scouts and Girl Guides, will parade and will take part in the ceremony.

At 11.00 a.m. a gun will be fired from Victory Green. The customary two minutes silence will then be observed after which at 11.2 a.m. a second gun will be fired and the Last Post sounded. At the conclusion of the Order of Service His Excellency will lay a wreath at the foot of the Cross of Sacrifice and the Ceremony will terminate. Wreaths may then be laid by private individuals at the foot of the Cross of Sacrifice and on the Naval and Military graves.

It is hoped that as many of the public as possible will be present at the Ceremony at the Cemetery and that Heads of Departments and Government servants generally will make a special effort to attend.

The children from the Government School will be assembled and drawn up in readiness for the Ceremony at the Cross of Sacrifice.

Should the weather be inclement Divine Service will be held at Christ Church Cathedral at 10.20 a.m. At the end of the Service the Governor and the several parties on parade will proceed to the Cross of Sacrifice.

## Stock Report for the year ended 30th June, 1935.

—:0:—

Stock Department,  
Stanley, Falkland Islands,  
5th September, 1935.

The Honourable,  
The Colonial Secretary,  
Stanley.

Sir,

I beg to submit Stock Report for the year ended 30th June, 1935.

The Spring of the year was fairly dry which resulted in an exceptional lambing percentage viz:— 63.01. This is the highest percentage for many years.

The total number of sheep carried by the Islands during the year was 615,682 which shows a decrease in the last 35 years of roughly 180,000. During my term of office I have travelled practically all over the Islands, and am of the opinion that at least one-half of this decrease could again be added to the total number of sheep carried without causing any harm to the land. This would necessitate more sub-divisional fencing, and the employment of more shepherds, but those concerned would benefit by increased production. It is obvious that if farms are receiving a profit to-day, every thousand sheep they add to their present total, provided they are looked after in a proper manner, must increase their returns. Here the question arises as to which breed of sheep is best suited for conditions in the Colony. At present the "Romney" strain predominates, and from my personal experience this strain is the best and should have precedence. Another asset to the farmer would be the expert classing of wool. (I have spoken to Mr. Barret, an adept in this class, who is well known in the Colony, and he agrees entirely).

Sub-divisional fencing is another mark that would be beneficial. It is unnecessary to state here the benefits that can be derived from this as they are so obvious.

Burning of Camp is in my opinion detrimental. To my knowledge there are seven different kinds of grass in the Islands and of these only one will stand burning. Unless under proper control, burning should not be allowed.

During the year quite an amount of stock was imported into the Colony by a number of farms. By importation the vitality of the stock will increase far quicker and with better results, than by the purchase of "casts" from adjacent farms. By this I do not mean that it is essential to import fresh blood every year. Instead of importing from other countries it would be quite an easy matter to breed blood stock on some of the smaller Islands, such as, Bleaker, Speedwell, Dyke and others.

I am,  
Sir,  
Your obedient servant,  
A. M. BONNER,  
*Stock Inspector.*

A. M. BONNER,

*Inspector of Stock.*

Stock Department,  
Stanley, Falkland Islands.  
6th September, 1935.

The Honourable,  
The Colonial Secretary,  
Stanley.

Sir,

During my 28 years' Managership of Speedwell Island, San Carlos and Bleaker Island, many incidents came under my observation that should they be put in actual practice should be very beneficial. As I have said in my report there are seven different kinds of grasses in the Falkland Islands that I am aware of. As is the general practice the long white grass is always burnt as being useless. This in my opinion is not substantiated, as much damage is done to the young green grass shooting up underneath. Any farmer can prove this by going into any white flat and separating the long white grass to find the young grass shooting between. I am firmly of opinion that this white grass not only acts as protection for the younger grass but also as a shelter for lambs. Where this does not exist to any extent, ewes usually take to the valleys for shelter, and this I believe causes a death rate among lambs of at least 10% through falling in holes and ditches.

Quite recently on the West Falklands I witnessed some 300 bullock and 800 sheep driven on the same portion of land to graze. The following day I asked an attending shepherd if he could tell me the reason for this, his answer being that the bullock were put there more or less as scavengers to eat the white grass so that the sheep could get at the younger grass growing underneath. This in my opinion is ridiculous, in so much that it is obvious that bullock will not leave good grass where it exists. These 800 sheep should have been put out to graze on this portion of land at least two months before any bullock. Quite a lot is said of overstocking. Overstocking is not injurious provided that it is under control. As a proof of this one has only to look at some of the settlement bases. These parts are very heavily stocked at intervals, the ground is well primed down and manured and being cropped close, grows fine. After this it gets long periods of rest. Take as another example a lamb-marking pen. Flocks are collected here for lambmarking etc., and then turned out again. This pen must be grossly overstocked, but when left to rest for any length of time hardens and becomes green. A concrete example of this statement is the small holding paddock at Fairy Cove. At times this paddock must be overstocked, but nevertheless it is now a nice green paddock. I see no reason why more of the land cannot be made as these examples. This would naturally necessitate more sub-divisional fencing and the removal of stock from holding to holding but I am sure much benefit would be derived.

Farmers to-day pay their employees to destroy geese on their Station. Personally I do not agree that geese are detrimental to the land or stock as my personal experience has told me otherwise. As an example of this I will quote an incident during my Managership of Speedwell Island. Under my supervision some 1500 hoggets were clipped that were feeding on a portion of the Island known as Phillips' Point. These hoggets were in good condition and averaged 8 lbs of wool, and I am sure that on this same portion of land there were more geese than sheep. This portion, being no exception, was also the section where I bred horses, some of which are still living.

At this time it was unnecessary to graze horses on tussac islands. It was possible to take practically any horse from a troop and ride to Stanley, a journey taking anything up to fourteen hours. This alone proves the worthiness of harbouring young grass. Although tussac is not a summer food for sheep it is definitely a good winter fodder. It is usually said that sheep will kill any tussac. This is not so. During the winter months when sheep have a close fleece comparatively no damage is done to tussac. During the summer months when the fleece of the sheep is fairly long and so much eke in the wool is the time when the damage is done to the tussac islands and plantations. This I can substantiate by quoting "Halt" and "Third" islands of the Bleaker group. For eight years these two islands carried mutton sheep, and they did not destroy the tussac. Many of the smaller islands are in my opinion advantageous, insomuch that they are ideal for breeding off Gimmers (2 tooth) provided they are fed on the island from the time when they are shorn as hogs. Any island

that is capable of, or carries 1,000 sheep should have a full-time shepherd in attendance.

I submit that what I have written is my own practical experience, and trust that it may be of some value.

I have the honour to be,

Sir,

Your obedient servant,

A. M. BONNER,  
*Stock Inspector.*

## LEGISLATIVE COUNCIL.

### Minutes of Meeting held on the 18th of November, 1935.

1. Major the Honourable M. J. Stewart, Treasurer, after taking the prescribed oath, assumed his seat at the Council.

2. The minutes of the meeting held on the 17th of July, 1935, were confirmed.

3. The Governor read to the Council the following Message introducing the draft Estimates of Revenue and Expenditure for the year 1936 :

"Honourable Members of Legislative Council,

"The Estimates of Revenue and Expenditure of the Colony and its Dependencies for the year 1936 will be laid on the table today together with an explanatory memorandum prepared by the Colonial Secretary.

"I propose to make a few general remarks on the financial situation of the Colony which should enable Honourable Members to grasp the position as a whole.

"It will be observed that it is estimated that the surplus of Assets over Liabilities on the 31st December next will amount to £309,629 or some £2,623 more than the surplus at the end of last year. This appears to be satisfactory but the amount is arrived at by the addition of £850 in respect of land sales and of an estimated surplus of £1773 in the operation of the current year. The latter figure is however dependent upon the approval of the Secretary of State to the transfer of at least £2,266 from the Research Fund to the revenue of the Colony in order to make up deficiencies in the contribution from the Dependencies in respect of the years 1933 and 1934.

"It is probable that unless the contribution from the Dependencies is paid in full for the last two years and for 1935 expenditure will in the current year exceed revenue.

"Application has been made to the Secretary of State to sanction the payment under reference.

"It is within the knowledge of Honourable Members that the Colony cannot count upon a continuance of the contributions from the Dependencies even in the reduced amount of £8000 which the Secretary of State has approved for 1935 since the revenue from the Dependencies no longer suffice to maintain the payment after defraying the cost of local expenditure. The sums in the Research Fund appear however to be far in excess of any expenditure likely to be required during the course of the next seven years to complete the work of the Committee on Research and Development of the whaling industry.

"I have drawn the attention of the Secretary of State to the unfortunate financial effect that would result from a withdrawal or reduction in the revenue from the Dependencies having particular regard to the labour situation, for so long as it is not possible for the Government to provide employment of a nature that is justifiable on economic grounds for the surplus population in Stanley.

"I have no doubt that my appeal will receive sympathetic consideration, but it is none the less necessary to find means for reducing the comparatively high cost of the administration. The Treasurer who has recently arrived in the Colony will be charged during the course of the coming year with the duty of making a close investigation into the expenditure side of the accounts, including the possibilities of reduction in staff with a view to making such economies as will enable the accounts to balance without dependence on extraneous sources of revenue in the measure that has been possible for the past ten years.

"It will be seen from the Estimates of revenue that there have been few changes. Officials in occupation of Government quarters will in future be required to pay for water at the same rates as private occupiers. The families and households of officials on the permanent staff will no longer receive free drugs and medicines.

"There are some increases of revenue under both the relevant heads but these are  
 "mainly due to an extension of the number of beds in the hospital and to the proposal  
 "to improve the water supply and bring it to the houses which cannot be reached by  
 "the existing supply.

"The only new works of importance on the expenditure side are the provision  
 "of £3,000 for the new water supply and of £1,000 for a broadcasting studio and  
 "offices for the Chief Electrician.

"It is earnestly hoped that there may be a revival of prosperity in the farming  
 "industry upon which the life of the whole community depends. To expedite im-  
 "provements here and to assist the farmer the services of an expert Stock Adviser are  
 "being sought for in New Zealand. It is proposed that the officer be appointed for  
 "three years only in the first place. As the scheme is in the nature of an experiment  
 "the cost will in accordance with past practice be borne in the first place by the Land  
 "Sales Fund.

"Honourable Members will echo my hope that the Colony may in the year to  
 "come witness an increase in wool prices renewed vigour and success on the farms  
 "and in particular that work may be found for those who now suffer through lack of  
 "permanent employment."

4. The Honourable the Colonial Secretary, by command, laid on the Table the following papers :

Copies of all Regulations, Orders and Bye-laws made or approved by the  
 Governor in Executive Council since the last meeting of the Legislative  
 Council.

Copies of despatches received from the Secretary of State for the Colonies,  
 intimating the non-disallowance by His Majesty of Ordinances, Nos. 1, 2, 3,  
 4, 5, 6 and 7 of 1935.

 Colony for the year 1934.

5. The Honourable the Treasurer, by command, laid on the Table the following papers :

 Dependencies for the periods 1st January to 31st March and 1st January to  
 30th June, 1935.

6. The Honourable the Colonial Secretary moved and the Honourable the Treasurer seconded the adoption of the following Resolution :

"AND WHEREAS such payments have not been legalised by the Legislative Council.

The Resolution was adopted.

9. The Honourable the Colonial Secretary moved the adoption of the following Resolution :

"WHEREAS the development of the sheep industry renders it necessary for the farmers to incur expenditure for the development of their farms,

"AND WHEREAS it is in the opinion of this Council desirable in the interests of the Colony that facilities be afforded to farmers who wish to improve their property.

"BE IT THEREFORE RESOLVED as follows :

"*Firstly* The Governor shall have power to authorize advances being made to farmers from the Land Sales Fund, for the purposes of the improvement of pastures, erection of fencing, and improvement of flocks.
