Statement of Assets and Liabilities on the 30th September, 1933.

LIABILITIES.						ASSETS.					

Report on Education in the Colony for 1933.

General.

The educational facilities in the Falkland Islands fall into three groups:

- (1) Schools in Stanley, the only town in the Colony.
- (2) A School at Darwin, the largest settlement outside Stanley.
- (3) Itinerant tuition in the country districts or camp.

(1) **STANLEY.** A Government School is maintained from public funds. The curriculum and management are much the same as in an English elementary school, but in addition there is a full-time Continuation Class which provides a two-years course of further education. A scheme was instituted in 1924 to assist parents in the camp to send their children to Stanley for schooling. The children were boarded and lodged in a Government hostel and taught in the School at an inclusive charge of ten shillings a month during residence: or, if accommodated in private houses, the Government made a grant towards the cost. In 1929 the Hostel was closed owing to lack of support but the maintenance grants still remain.

There is also a Convent School taught by Roman Catholic Sisters: this school is not subject to Government control or inspection and receives no subsidy.

(2) **DARWIN.** Here for many years the Falkland Islands Company has maintained a school for the children of its employees.

(3) **THE CAMP.** Four itinerant teachers are provided by the Government, one for the East Falkland and three for the West. The teachers travel on horseback from house to house, usually staying a fortnight at each. The houses are from six to twelve miles apart, though it may - and often does - happen that a man has to travel much further than that before he comes to a house with children. Each teacher has a definite beat, which he covers three or four times a year. He sends a fortnightly report to Stanley, giving a detailed account of the work done, the books used, lists of books or materials required and so on. The Superintendent of Education makes tours of inspection, normally visiting every child under tuition once in two years. In addition to the Government staff, the Falkland Islands Company maintains two camp teachers for work on its extensive farms on the East Falkland.

Government School.

2. The authorised teaching establishment of the Government School in 1933 was

A Headmaster	}	Certificated.
One Assistant Master		
Two Assistant Mistresses		
One Assistant Teacher	}	Locally trained.
Three Supplementary Teachers		

The Headmaster was away on leave from February to August, during which time the Assistant Master, Mr. T. D. Evans, acted as Superintendent of Education and Headmaster. Mr. Evans deserves credit for the efficient manner in which he performed these duties. There was a vacancy in the post of Assistant Teacher in November and December caused by the resignation of Mrs. D. M. Dixon after twelve years' able and conscientious service in the school.

3. The following table shows the number of pupils on the roll at the end of 1933 and the number in average attendance during the year:

Number on roll 31st December 1933	131	72	203
Average number on roll all 1933	137.9	68.8	206.7
Average attendance all 1933	126.1	63.3	189.4

4. The attendance averaged 91.6 for the year. In the spring there was a long period of exceptionally bad weather which caused a prevalence of colds with a resulting effect on the

attendance; otherwise the general health of the children was good. There were no closures on account of sickness. All the children were medically and dentally examined in the course of the year, and in addition there were regular medical and dental visits for general inspection.

5. The alteration in the arrangements for the opening the tops of the school windows, referred to in my last Report, was completed early in the year, and the means of ventilating the classrooms is much improved. No other structural alterations were made during the year.

6. Woodwork and other forms of handwork have been taught throughout the year. Hockey, netball and football, physical training and folkdancing have all been regularly practised, and the exhibition of drill and folkdancing at the prizegiving in December was greatly appreciated by a crowded audience. It is gratifying to record the large attendance of parents at this annual function, showing as it does the interest taken in the work of the school.

Finance.

7. The expenditure under Head XIII Education of the annual estimates of expenditure was £2,843 : 2 : 2 in 1933 as compared with £2,917 : 9 : 7 in 1932. The revenue collected in 1933 amounted to £192 : 5 : 3 as against £183 : 5 : 1 in 1932. Details of expenditure and revenue in 1933 are as follows :

School Fees.

11. The following fees are charged at the Government School :

Each pupil in the Continuation Class	1/- a week.
Each pupil below the C.C. and above Standard 1	6d. a week.
Each pupil below Standard 2	3d. a week.

Exemptions are made for fatherless children and in a very small number of other cases where there is inability to pay. The proportion of expenditure met from fee income is about 8 per cent. Similar charges and conditions are in force at the Roman Catholic School in Stanley. A new proviso was added to the Government School fees regulations at the end of 1933 saying that the total amount of fees payable in respect of the children of any one family shall not exceed one shilling a week. This will cause a small reduction in fee income in future, but it will be of appreciable benefit to parents with several children attending the school. At the Darwin school no fees are charged. In the case of children taught by Travelling Teachers there are no fees, the teacher being maintained free of charge at the house where he is working.

LIVE STOCK REPORT 1933-1934.

::O::

Stock Department,
Stanley, Falkland Islands.
19th April, 1934.

The Honourable,
The Colonial Secretary.

Sir,

I have the honour to submit the following report for the year 1933-1934.

The winter was exceptionally fine and continued so up to the end of August and the beginning of September, when about a fortnight of bad weather was experienced.

By the middle of September the weather was again settled, and the spring from then on was very fine, but very dry, and grass except in the wettest localities was at a standstill. Lambing was good, and in the majority of cases slightly higher than the previous year, but ewes on the whole were not in very good condition, which was only to be expected in such a dry season.

One station has been placed in quarantine for lice in the past twelve months, and the importance of proper dipping cannot be too heavily stressed, and every care should be taken to ensure that sheep are thoroughly soaked before leaving the trough.

Great care should be exercised in gathering, especially on a station infected with any of the diseases covered by the Live Stock Ordinance, for it must be remembered that no camp can be considered properly gathered until no more sheep can be found upon it, and this will take in the ordinary course of events, three gatherings at least.

The wool clip was very satisfactory, so I have been given to understand, but generally if report speaks true, slightly lighter than last year. The percentage of clean wool (*i.e.* free from tick stains) has in the past few years increased, owing to the almost universal use of Kymac Dip, and although I have heard farmers complain of loss of weight, I am of the opinion that this is mainly due to lack of dirt in the wool; Kymac Dip probably does take out a higher percentage of grease than most dips, but surely it is better to be able to produce good clean wool from healthy sheep than to have the wool stained and the sheep kept down in condition and continually annoyed by ticks.

BURNING CAMP. This method of destroying dead or rank grass is unfortunately a necessary evil, but a great deal of indiscriminate burning is done by irresponsible people, and in some places great damage has been done by late burning especially in very dry springs and early summer. A certain amount of burning is necessary, but far too much burning is done, and I have seen places where fires have been started in swampy ground and which have spread carrying everything before them, burning hard sweet camp which will take years to recover.

Sub-division of pastures, some of which contain immense areas untouched or practically so by sheep, would be more beneficial, and sheep could be more easily looked after and shifted about.

3. The ordinary Revenue for the Falkland Islands amounted to £59,333 : 18 : 10. Included in this amount is a sum of £8,722 : 2 : 9 transferred from Dependencies Funds towards the cost of the Central Administration, and a sum of £2,312 : 7 : 0 being appreciation in value of certain investments transferred through the Investments Adjustment Account. The Revenue exceeded the original estimate for the year by £3,376 : 18 : 10, but was less than that received in 1932, by £4,865 : 3 : 0, this being due to the increased amount transferred in 1932 as Appreciation of Investments.

4. The ordinary Revenue exceeded the Expenditure (£52,335 : 0 : 11) by a sum of £6,998 : 17 : 11. On the 1st of January, 1933, the surplus of ordinary Revenue amounted to £11,758 : 3 : 0, which together with the surplus for the year gives a total surplus of ordinary Revenue on the 31st of December, 1933, amounting to £18,757 : 0 : 11.

5. The undermentioned Heads of Revenue exceeded the original estimate by a sum

of £3,654 : 1 : 2, which together with new Head "Appreciation of Investments" gives a total of £5,966 : 8 : 2 :-

				£ 5,966 : 8 : 2

	VII.	Telegraphs & Telephones		306	:	19	:	3
	VIII.	Rents	1	:	13	:	11
	X.	Contribution from Dependencies		277	:	17	:	3

6. HEAD III. INTERNAL REVENUE. The slight excess under this Head was due to increased receipts from "Occasional" licences and "Stanley Rates", with smaller decreases under "Dog" licences and "Gun" registrations.

7. HEAD IV. FEES, FINES, &c. There were increased receipts under "Hospital and Medical" and "Dental" fees of £159 : 18 : 7 and £163 : 16 : 0 respectively, on the other hand receipts under "Supreme Court", were £297 : 10 : 9 below the estimate.

8. HEAD VI. POST OFFICE. The increase of £3,238 : 7 : 6 under this Head was mainly due to receipts from sales of stamps, which exceeded the original estimate of £5,500 by £3,252 : 10 : 9.

9. HEAD IX. MISCELLANEOUS. The excess under this Head was mainly due to the following increases :- "Sale of Stores" £74 : 4 : 5, "Sale of Houses" £405 : 10 : 8, "Stanley Water Works" £73 : 13 : 1, and "Unforeseen" £157 : 18 : 4., on the other hand "Commission on drafts" and "Savings Bank" showed a decrease of £115 : 0 : 5 and £128 : 10 : 0, respectively.

10. HEAD I. CUSTOMS DUTIES. The receipts under this Head were less than the estimate for the year by £1,338 : 5 : 3. The decrease in imports was mainly due to the continued trade depression. There was an excess under "Export on Wool" of £177, but a decrease under "Export on Seal Oil" of £114 : 10 : 6.

11. HEAD II. PORT DUES. The decrease of £70 : 15 : 6 was chiefly due to there being no receipts under item "Pilotage".

12. HEAD V. INTEREST. The receipts under this Head fell short of the estimate by £594 : 8 : 2, the principal decreases being under "Land Sales", "Currency Note Security Fund" and "Joint Colonial Fund". The receipts under "Reserve Fund" were £196 : 18 : 6 over the estimate.

13. HEAD VII. TELEGRAPHS & TELEPHONES. The receipts under "Wireless Messages" were less than the estimate by £468 : 1 : 4, due to the continued depression in trade and in the Whaling Industry. There was an increase under "Electric Light" of £183 : 12 : 10, mainly due to larger consumption consequent on additional installations.

14. HEAD VIII. RENTS. The actual receipts under this Head were only £1 : 3 : 11 less than the amount estimated. There was an increase under "Crown lands" of £46 : 9 : 10, but the revenue received from "Public Baths" fell short of the estimate by a sum of £47 : 9 : 9.

II. PUBLIC HEALTH.**(A) General Remarks.****(1) GENERAL DISEASES.**

The general health of the Islanders, in respect of epidemic disease has been good. There was a small epidemic of chicken pox which was quickly suppressed, in Lafonia; and also a number of cases of ringworm occurred in Stanley, and in the camp of the East Island.

The general health has been reported as good with a certain mental reservation during the past few years. In the collective sense the health has been good, but the stamina of certain families, and individuals is gradually deteriorating. The Islanders present an easy prey to any infectious disease that might invade the Islands.

A factor of importance, consideration of which prior to every operation cannot be neglected, is the general tendency to bleeding. Certain families are definite haemophiliacs. and generally, at operation, bleeding has become increasingly difficult to control. It is now found, in many cases, that a needle puncture of the skin causes quite a severe haemorrhage. It is not an uncommon experience, where a quite dry operation wound has been closed, to find, the following day, especially in male patients, a large haematoma. To cope with the difficulty large doses of calcium lactate are being exhibited, where possible, over a period before, and intramuscular injections of horse serum immediately prior to operation, with reasonable success. It would appear that the condition is one of hydraemia associated with a calcium salt deficiency, and is becoming more general.

The case incidence of diabetes mellitus is increasing, as is also the incidence of transient glycosurias.

Appendicitis. 32 cases came to operation as compared with 25 in 1932. In many cases medical treatment, under close supervision, over a prolonged period was tried, but recurrent attacks finally forced operation. No case was of the acute fulminant type. All were typical of the local variety of sub-acute catarrhal appendicitis, associated with, in many cases localised adhesions.

Dental. The Dental Surgeon made extensive tours, and did much work in the East and West Falklands. He also inspected the dental condition of all the school children for whom there is a special Saturday morning clinic.

There is, and always will be, a large amount of dental work in the Colony. The dental report is appended. (Appendix I).

General. The S.M.O. made a short tour of the East and West Falklands in September. He inspected the M.O.'s quarters and medical stores at Fox Bay, where the new M.O. for the West Falklands whose medical service has been taken over by the Administration, was installed. The S.M.O. also investigated the living conditions and water supply etc. at Port Albemarle, the headquarters of the Falkland Islands Sealing Co. A separate report has been submitted to the Administration. The M.O. made two tours of the North Camp of the East Island during the year, and made a satisfactory report on health conditions there on both occasions.

Government Officials. No deaths, and only one case of invaliding occurred among Government Officials during the year. Their general health has, on the whole, been good.

(2) COMMUNICABLE DISEASE.

Tuberculosis. Seven cases were notified during the year. Three cases were pulmonary, and the remainder were bone, joint and tendon affections. In all, twelve cases of tuberculosis were under observation during 1933. There were no deaths in Stanley, but one in the camp.

Bronchial catarrh, bronchitis and broncho-pneumonia. The incidence of coughs, and severe colds during the last four months of 1933 was unusually high. A series of colds, associated in some cases with high fever, swept the Islands from September to December, and caused a remarkable amount of debility. This high "cold" incidence is attributed mainly to the very inclement climatic conditions, and lack of sunshine experienced during the period in question. There were several cases of broncho-pneumonia following these colds, and one debilitated female child died.

Malaria. This, and other insect borne diseases are unknown in the Colony.

Chickenpox. There was a small outbreak of chickenpox in Lafonia early in the year. The source of infection was definitely traced to a letter originating from a chickenpox infected house in the United Kingdom. The inhabitants of the affected district willingly co-operated with the medical services as regards quarantine restrictions and the disease was soon eradicated. One case reached Stanley, but was promptly segregated, and there were no contact infections.

Venereal Diseases. With the exception of those from ships there were no cases during the year.

Ringworm. The ringworm epidemic in the camp of the East Island eventually reached Stanley, where 15 cases occurred. These have all been successfully treated, and as far as is known, there are no human cases at present. The endemic focus of this disease is cattle.

Scarlet fever, measles, diphtheria, whooping cough etc. There were no cases in the year under review.

(B) Vital Statistics.

1. General Population. The Islanders as well as Government Officials are European or of European descent.

The estimated population of the Colony, apart from the Dependencies on the 31st December, 1933, was 2,428 which gives a population density of .52 per square mile.

During the year 27 deaths*, and 52 births were recorded, giving the following rates :—

Population	2,428
Birth Rate per 1,000	21.42
Death rate per 1,000	11.52
Infantile Mortality rate per 1,000 births				57.7

* Deaths from all causes are shown on Table IV.

2. Dependencies. Resident Population 650.

Births registered	Nil.
Deaths	2.

III. HYGIENE AND SANITATION.

(1) PREVENTIVE MEASURES.

(a) *Insect borne diseases.* These are unknown.

(b) *Epidemic disease.* A small outbreak of chickenpox occurred in Lafonia. By applying ordinary principles of isolation, and disinfection the disease was soon eradicated from the Colony.

Ringworm. 15 cases occurred in Stanley. These were, with one exception, children. The latter were prohibited from attending school. These patients received daily treatment at the hospital until all lesions had disappeared. The endemic focus of the disease is cattle. The majority of the farmers have co-operated with the Stock Department in reducing the disease among cattle by dipping, or destroying affected animals.

Smallpox and Vaccination. Vaccination is compulsory under the Vaccination Ordinance 1868.

The majority of children born in Stanley are vaccinated before they are a year old. The Camp Medical Officers also vaccinate as many children as possible under existing circumstances.

(c) *Water borne diseases.* None.

(d) *Tuberculosis.* Seven cases were notified during the year. These have occurred in known tuberculous families. There was one death from tuberculosis in the camp.

No further sanitary measures with regard to housing etc. are required in combating this disease. Members of known tuberculous families continue to marry, and no doubt the disease will be handed on from generation to generation as heretofore.

(e) *Helminthic diseases.* None are present, with the single exception of oxyuris vermicularis which is always with the people of the Islands, and has a wide distribution. Various drugs, in various combinations, have been tried with but doubtful success. At present Butolan, a Bayer product, is being exhibited, but it is too soon to predict results.

(f) *Venereal diseases.* So far the Islanders continue free from these scourges. All ships arriving at the port are warned against permitting affected members of their crews to land. The legislation necessary for suppressing these diseases is provided for by Ordinance No. 11 of 1931.

(2) GENERAL SANITATION.

(a) *Sewage disposal.* Sewage is disposed of partly by water carriage system, and partly by E.C. method. The night soil is removed by tumbler carts under supervision of the Public Works Department. The system of disposal is very efficient, because, though all the sewage is deposited in the harbour, none is ever in evidence on the foreshore.

(b) *Scavenging.* In accordance with the Public Health Bye-laws, all ashes, and household refuse are stored in ash bins, and emptied once a month at least. This system is reasonably adequate, and in such a cold climate, does not give rise to any appreciable nuisance.

(c) *Roads and Drainage.* The roads, and drainage of Stanley are adequate to present needs, and except to mention their excellence in proportion to the size of the town, call for no further comment.

(d) *Water Supply.* The water supply is wholesome and satisfactory, but may have to be increased to meet future requirements.

(e) *Slaughterhouses and Meat Inspection.* The three licensed slaughterhouses were inspected with reasonable frequency, and were found to comply with the Board of Health Bye-Laws on all occasions. The meat to be sold for human consumption was also inspected on these occasions.

(f) *Dairies.* The dairies were inspected from time to time, and found to be fairly satisfactory. The testing of milk samples carried out showed that the standard of cleanliness had been maintained. No sample was found to contain the bacilli of tuberculosis.

(3) SCHOOL HYGIENE.

There are two schools in Stanley, the Government School, and St. Mary's School attached to the Catholic Church. The former has 206 pupils on its roll, and the latter 66. The Medical Officers and Dental Surgeon inspected the schools at intervals. At these inspections particular attention is paid to dental and eye conditions, and importance is attached to the recorded weights of every child. Individual inspection of the children is recorded on a special form (Appendix II).

It is considered that the high standard at which the hygienic state of the schools is maintained reflects great credit on those responsible.

(4) HOUSING.

Many new houses of a highly improved type have been built during the past few years, and the rate of building is adequate to present needs. There is no housing problem in Stanley.

(5) DIET IN HEALTH AND DISEASE.

The quality, and quantity of the diet are satisfactory. The defects are monotony, lack of balance and variety. Mutton, tea and bread are the chief constituents of the staple diet. Herein, probably, lies the answer to the problem of the high incidence of dental caries, appendicitis, and constipation. A certain quantity of fruit is imported, but supplies are irregular, and the cost is high. The doctrine of eat more raw green vegetables is being inculcated when possible.

(6) ANTI-RAT CAMPAIGN.

The bi-annual rat weeks have been continued. Red squills, and Ratox have been used to poison the rats in the rubbish dumps along the foreshore. There are periods when rats appear to be scarce, but generally they are numerous enough to warrant a bi-annual poisoning of the dumps.

(7) RECOMMENDATIONS FOR FUTURE WORK.

- (1) Continuance of supervision of slaughterhouses and meat inspection.
- (2) Continuance of supervision of milk supply.
- (3) Continuance of bi-annual rat week.
- (4) Continuance of medical inspection, and free dental treatment of school children.

IV. PORT HEALTH ADMINISTRATION.

In accordance with the usual practice vessels calling at the port were given pratique by the Medical Officers. Also all passengers for the Port were seen by the Medical Officers before landing. The great necessity for preventing, if possible, the incursion of infectious disease is fully realised, nevertheless, it must be stated, that it is possible for persons incubating infectious disease, and showing no signs thereof, to land and cause a serious epidemic.

15 vessels with a registered tonnage of 44,219, and with crews totalling 196 were given pratique during the year.

V. MATERNITY AND CHILD WELFARE.

The outpatient department of the hospital provides ante and post natal services. The

majority of confinements take place in the hospital. During the year 28 mothers were confined as against 19 in the previous year. With the exception of one case of generally contracted pelvis, where forceps delivery was successfully effected, there were no complications worthy of record.

Maternity nursing services are provided for the town and camp districts.

VI. HOSPITAL.

The King Edward VII Memorial Hospital comprises 12 beds, operating theatre, quarters for nurses, stores and outpatient department.

Two outside buildings provide (a) Dental Surgeon's office, and workshop, (b) drug store, and laboratory.

171 patients were admitted during the year, of these 146 were cured, 21 relieved, 1 not improved and 3 died. (Table III.)

50 operations were performed in the operating theatre with uniformly good results, and many minor operations were carried out in the outpatient department.

The causes of death were as follows, one male died of senility, and cardiac failure. Two female children died, one of marasmus, and one of broncho-pneumonia.

Out-Patient Department. The number of patients treated in the out-patient department was recorded as 1,448, (1,350 in 1932), and the total number of attendances as 3,978, (3,254 in 1932).

Commendation is due to the nursing staff for the manner in which they carried out their duties.

Dr. H. Glyn Edmunds, Medical Officer, and Mr. S. W. Harding, Dental Surgeon, performed the duties of their several posts in an efficient manner.

No structural alterations were made in the hospital during the year. The dental workshop has been enlarged to provide sufficient accommodation for both the Dental Surgeon, and mechanic to work in the shop at the same time.

At the risk of labouring the point, a plea must be made for an enlargement of the hospital premises. For the first time in the hospital's history there was a waiting list for beds all winter.

A labour theatre is required as 28 cases were treated in the maternity ward as against 19 in 1932.

Accommodation in the out-patient department is very limited, and it is becoming increasingly difficult to manage. There were 3,978 attendances at this department as against 3,254 in 1932. There are no isolation premises, and in the event of an incursion of infectious disease, it is feared that by the time isolation quarters could be provided, an epidemic would be widespread. It is suggested that with a few minor alterations Rock Cottage would provide much improved accommodation for the Dental Surgeon, and extra hospital beds, or isolation quarters as required.

VII. PRISONS AND ASYLUMS.

There are no asylums in the Colony. No lunatics were under observation during the year.

The prison was inspected at intervals, and found always to be in a satisfactory hygienic condition. The general health of the one prisoner who was lodged in gaol for a short period was satisfactory.

VIII. METEOROLOGY.

The Falkland Islands are situated 300 miles to the east of South America $51^{\circ} 41'$ S. Latitude, and $57^{\circ} 51'$ W. Longitude. The climatic conditions during the autumn, and winter were unusually good. The last few months of the year were extremely inclement. An unusual amount of cold, and lack of sunshine were experienced, as well as a phenomenally large rainfall. This accounted for a great deal of ill health in the spring.

Normally the climate owing to high winds, constant low temperatures, and lack of sunshine is rather trying. The meteorological returns are appended (Table II).

IX. SCIENTIFIC.

The Philip Metalix Portable X-ray apparatus continued to give good service for two thirds of the year, when, unfortunately, it ceased to function. As the apparatus was first used in 1929 it may be considered to have given service for value.

It was found necessary to order a new apparatus. Originally a 10 kilowatt engine supplied power for all Government requirements as well as X-ray work, but now more power is available a larger type of apparatus was requisitioned.

B. DEPENDENCIES.

No health reports are available. All the whaling factories have their own medical organisations.

The whaling personnel recruited from the Falkland Islands have maintained uniform good health during their stay in the ice, and in South Georgia.

APPENDIX I.

REPORT BY THE DENTAL SURGEON.

I have the honour to report on the work for the year 1933 as follows.

38 operations under general anaesthesia were carried out in the hospital as against 94 in the previous year. In Stanley, I was chiefly occupied in the making of dentures for those whose teeth had been previously extracted.

Twenty weeks of the year were spent in visits to the camp districts. In the East Falklands, Darwin, San Carlos, Port San Carlos, Douglas Station and Teal Inlet were visited. On the West Falklands my itinerary included Fox Bay, Chartres, Port Howard, Pebble Island, Port Stephens, and Hill Cove. At the last two stations, patients from outlying islands attended for treatment.

That these visits to the camp are essential, and appreciated, is proved by the attendance of the people from various districts. The Camp Managers kindly afforded every facility for the performance of this work.

In company with the Medical Officers, I inspected the dental condition of all children in both the Government and St. Mary's Catholic Schools. The School children attend regularly the special clinic for school children held on Saturday mornings.

The general oral hygiene of the people is improving in proportion to their greater attention to their dental condition. Pyorrhoea is abating, and only one case of Vincent's angina was encountered. There were no other extraordinary serious dental diseases.

Estimates of the 'Discovery' Committee's expenditure for the year 1934.

The Treasurer's Report and Financial Statements for the year ended 31st of December, 1933.

4. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS further provision is required for the service of the Colony and its Dependencies for the year ending the 31st of December, 1933.

"Be it resolved —

"This Council hereby sanctions the expenditure from public funds of the sum of ONE THOUSAND TWO HUNDRED AND THIRTY POUNDS SEVEN SHILLINGS AND ELEVEN PENCE, (£1,230. 7s. 11d.) to meet the several charges itemized in the accompanying schedule."

The Resolution was adopted.

5. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

The Resolution was adopted.

6. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS THE REVENUE OF the Dependencies for the year 1933 has not sufficed to meet the expenditure and in particular the Contribution of the Dependencies to the Central Administration and whereas at the 31st of December, 1931, and at the 31st of December, 1932, the sums of £9,000 (Nine thousand pounds) and of £6,302. 10s. 2d. (Six thousand three hundred and two pounds ten shillings and two pence), respectively, were not paid into the Dependencies Research and Development Fund but were applied to the service of the Dependencies for the years 1932 and 1933, respectively.

"NOW THEREFORE THIS COUNCIL resolves and it is hereby resolved, in pursuance of the provisions of sub-section (c) of section 2 of the Dependencies Research and Development Fund Ordinance, 1924, and subject to the sanction of the Secretary of State, THAT THE SUM OF £277. 17s. 3d. (Two hundred and seventy-seven pounds seventeen shillings and three pence) shall be paid out of the Dependencies Research and Development Fund into the revenue of the Colony on account of the Contribution of the Dependencies to the Central Administration and the aforesaid sums of £9,000 (Nine thousand pounds) and of £6,302. 10s. 2d. (Six thousand three hundred and two pounds ten shillings and two pence) shall be regarded as though they had been paid into the Dependencies Research and Development Fund and had been paid out therefrom into the revenue of the Dependencies for the service of the years 1932 and 1933, respectively."

The Resolution was adopted.

7. The Honourable the Acting Colonial Secretary moved and the Honourable the Senior Medical Officer seconded the adoption of the following Resolution :

"WHEREAS IT APPEARS EXPEDIENT to proceed further during the year 1934 with the improvement of communications to the camp, and whereas there appears to be no cause why certain services provided for in the estimate of the expenditure for the year 1934 should not be postponed.

"NOW THEREFORE THIS COUNCIL RESOLVES, with the sanction of the Secretary of State, that the additional sum of £2,220 (Two thousand two hundred and twenty pounds) shall be expended on this service during the year 1934 under Head XXI. "Public Works Extraordinary" item 17. "Improvement of Tracks to the Camp" and that an equivalent saving shall be effected in the sums of £1,500 (One thousand five hundred pounds) and £720 (Seven hundred and twenty pounds) under item 3 "New Roads etc., in Stanley" and item 4 "Three peat roads from Stanley to banks", respectively, of the same Head."

The Resolution was adopted.

The Honourable the Acting Colonial Secretary explained that owing to the increased number of men in need of work – at the present moment there are 150 men employed by the Government or seeking employment – and owing to the uncertainty as to whether the Falkland Islands and Dependencies Sealing Company would operate this winter it would probably be necessary at a later date with the sanction of the Secretary of State to invite the Council to revote the sum of £720 on "Peat Roads" as well as to vote additional moneys on other services in order to meet the unemployment situation.

8. On the motion of the Honourable the Acting Colonial Secretary, seconded by the Honourable the Senior Medical Officer, the Bill "to amend the Whale Fishery Ordinance, 1908" was read a *first* time.

The export authorization shall be prepared in triplicate and two copies shall be issued to the exporter who shall send one copy with the drug to which it refers when such drug is exported. The Colonial Secretary shall send the third copy direct to the appropriate authority of the country of ultimate destination. (2) Where any dangerous drug in transit is accompanied by an export authorization or diversion certificate and the Collector of Customs has reasonable grounds for believing that such authorization or certificate is false, or that it has been obtained by fraud or wilful misrepresentation of a material particular, it shall be lawful for the Collector of Customs to seize and detain the drug to which such authorization or certificate relates. Upon being satisfied that such authorization or certificate is valid or has not been obtained by fraud or misrepresentation as aforesaid the Collector of Customs shall release the drug.

(3) Where the dangerous drug in transit is not accompanied by an export authorization or diversion certificate by reason of the fact that the drug comes from a country not a party to the Geneva Convention (No. 1) and the Collector of Customs has reasonable grounds for believing that such drug is being conveyed in an unlawful manner or for an unlawful purpose or is in course of transit for the purpose of being imported into another country in contravention of the laws of that country it shall be lawful for the

Collector of Customs to seize and detain the drug.

(4) Where a dangerous drug brought into the Colony in transit is landed, or transhipped in the Colony, it shall remain under the control of the Collector of Customs and shall be moved only under and in accordance with a removal licence granted in pursuance of Section 6 hereof.

8. (1) No person shall, except under the authority of a diversion certificate in the Form E set out in the schedule hereto, cause or procure any dangerous drug brought into the Colony in transit to be diverted to any destination other than that to which it was originally consigned. In the case of any drug in transit accompanied by an export authorization or a diversion certificate issued by a competent authority of some other country, the country to which the drug was originally consigned shall be deemed to be the country stated in such export authorization or diversion certificate to be the country of destination.

(2) The Colonial Secretary may in his absolute discretion issue a diversion certificate in respect of any dangerous drug in transit upon production to him of a valid and subsisting import certificate issued by a competent authority in the country to which it is proposed to divert the drug, or if that country is not a party to the Geneva Convention (No. 1), upon such evidence as may satisfy him that the drug is to be sent in a lawful manner and for a proper purpose.

(3) A diversion certificate shall be issued in duplicate; one copy thereof shall accompany the drug when it is exported from the Colony. Another copy shall be despatched by the Colonial Secretary direct to the proper authority in the country to which the consignment has been diverted.

(2) The Colonial Secretary may in his absolute discretion issue a diversion certificate in respect of any dangerous drug in transit upon production to him of a valid and subsisting import certificate issued by a competent authority in the country to which it is proposed to divert the drug, or if that country is not a party to the Geneva Convention (No. 1), upon such evidence as may satisfy him that the drug is to be sent in a lawful manner and for a proper purpose.

An Ordinance

To provide for the institution of a system of quota regulation of imports of foreign textile goods.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands, with the advice and consent of the Legislative Council thereof, as follows :—

2. In this Ordinance unless the context otherwise requires:

Fixing of quotas.

3. (1) The Governor may fix by proclamation the total quantity of textile goods or of any class or classes of textile goods manufactured in any foreign country which may be imported during any period.

(2) The quota period specified in any proclamation made in accordance with sub-section (1) of this Section may commence prior to the coming into operation of this Ordinance; and any imports of regulated textiles between the commencement of the period and the coming into operation of this Ordinance may be taken account for the purposes of Section 5 of this Ordinance.

Provided that no importation made prior to the coming into operation of this Ordinance shall constitute an offence under Section 7 of this Ordinance.

Returns and declarations of origin.

4. No person shall import any regulated textiles unless he shall, at the time of importation, submit to the Commissioner in the prescribed form a return of the quantity, class, and origin of the goods imported and a declaration of origin.

Provided that, during a period of three months after the coming into operation of this Ordinance, imports of regulated textiles may, at the discretion of the Commissioner, and subject to such conditions as he may impose either generally or in any particular case as to the subsequent submission of evidence of origin, be admitted without the submission of such a declaration of origin.

(2) Any person may at any time on payment of the prescribed fee, require the Commissioner to furnish a statement of the total quantity already imported of any regulated textiles manufactured in any individual foreign country during any quota period and the Commissioner shall furnish such statement accordingly.
